

The Complete Guide to the
Treatment of Heart Disease

CARDIAC THERAPY

by HAROLD J. STEWART, M.D.

A separate chapter is devoted to each heart disorder. Enough diagnostic information is given to ensure that the best treatment is given in each individual case, and every aspect of treatment for the condition is fully explained. The safe use of drugs is specifically described. The total management of the patient is given in a progressive manner and the author tells precisely what to do in each type of cardiac emergency.

Everyone concerned with the treatment of cardiac disorders will find its value immeasurable.

"Locis remotis qui latet, lex est sibi"

The doctor no less than the administrator must often be a law unto himself in remote places, faced with the necessity of adapting professional and ethical considerations to unusual circumstances. Publilius Syrus, the slave-philosopher, bearing no responsibilities at all, appreciated such things.

¹Dr. Edmund Brassey, for example, found it a little disconcerting when, in a rough, tough mining town of Nova Scotia, patients for his empty roster were "collected" by a gang of hoodlums.

Another far-flung medico, ²Werner Junge, who spent ten years in little-known Liberia establishing medical services, thought it expedient to make an ally of the witch-doctor, and to countenance peculiar remedies.

And ³Ernest M. Lippa, an Austrian who practised his calling in China from 1938 onward, had to try and continue his work after the surge of Communism swept past his hospital, leaving him and his staff at the mercy of the commissars. His report on what he saw of Red China is of general interest, and his account of Communist medical standards and services particularly so.

In simple arithmetic the above equations are correct, of course. But when applied to the effect of sulphonamide mixtures, the answers are unpredictable without recourse to the laboratory.

“The adequacy of a given concentration of a sulphonamide acting alone may be impaired by adding another.”

NO SOLVENTS

Porosity is only half the answer to the problem of skin irritations in the use of elastic adhesive bandages.

PoroPlast contains no solvents and none of the irritating resins usually embodied in elastic adhesive bandages. It contains NO RUBBER. Its porosity is complete . . . the plaster mass is spread in a new way which gives regular ventilation over its entire surface, *even where two layers overlap.*

PoroPlast has already shown that it can considerably reduce skin hazards. In widespread tests it remained *in situ* for long periods, even on the most sensitive skin, without causing irritation.

Now freely available to hospitals and general practitioners, costing no more than ordinary elastic adhesive bandages. Samples on application.

In convalescence

Lethargy and loss of appetite—the very conditions which, in convalescence, it is essential to reverse—are also among the earliest symptoms of Vitamin B deficiency.

The administration of B-complex Vitamins to convalescent patients is, therefore, common expedience.

'Beplex', an established means of providing a balanced dosage of the important B Vitamins, naturally prepared, may be accepted with equal confidence for specific therapy or prophylaxis. It is available as an agreeable elixir or in capsule form to suit the preference of the patient.

'BEFLEX' Elixir — One teaspoonful provides: Thiamine Hydrochloride 0.5 mg., Riboflavin 1 mg., Nicotinamide 5 mg. Also contains significant amounts of the lesser known factors as found in yeast extract and 16% Alcohol.

THERE'S STRENGTH IN COMBINED ACTION

The answer to many a problem lies in combined action. Witness the higher blood levels and the greater clinical efficacy that have been reported from the oral administration of penicillin and the sulphonamides simultaneously in cases when the oral administration of the antibiotic or chemotherapeutic agent alone has been ineffective. A convenient means of applying this combined antibacterial therapy is Sulpenin. Containing penicillin, sulphadiazine and sulphamerazine in balanced dosage, it provides a valuable treatment for many infections due to susceptible micro-organisms. By utilising the synergistic action between penicillin and the sulphonamides the antibacterial range is increased, the likelihood of kidney damage is lessened and the tendency for the bacteria to develop mutant strains resistant to one or other of the component drugs is reduced.

the first Elizabethans..*

The virtues of 'sour oranges and lemons' in curing 'the scurvy' were known to seafarers in the days of Elizabeth Tudor, and later on Captain Cook found that fresh vegetables served the same purpose. The difference today is that we know how much ascorbic acid we get in these foods and we can regulate our intake according to the needs of health and disease.

In VITAVEL SYRUP, concentrated orange juice is used as a base for the inclusion of other equally necessary vitamins, A, B₁, C and D, and the potency of each is designed to satisfy human needs.

AN IMPROVED BARBITURIC HYPNOTIC OF GOOD COMPATIBILITY AND WIDE THERAPEUTIC MARGIN

The House of Hommel have now made available for general distribution in this country 'DORMUPAX', a strong hypnotic agent whose high efficacy derives primarily from its inclusion of the *calcium salt of n-butyl-allyl-barbiturate*, presented for the first time in the new product.

FORMULA	Each Tablet of	{	Calcium n-butyl-allyl-barbiturate	3.75 grains
	'Dormupax' contains		Carbromalum B.P.C.	1.5 grains

PHARMACOLOGY Comparative experimental studies show that the therapeutic index of *n-butyl-allyl-barbituric acid* is superior to that of the majority of commonly used barbituric acid derivatives, i.e. of butyl, ethyl, isopropyl and phenyl structure. In animal studies the therapeutic index (DE/DL) is as low as 0.27. It has also been shown that the quotient DE/DL is even more favourable for the calcium salt than for the acid.

The molecule of *n-butyl-allyl-barbituric acid* reaches the sleep centre unchanged. After an average sleep duration of 8 hours, it is completely degraded to an indifferent form. The efficacy of 'Dormupax' is reinforced by carbromalum. The latter is a prompt, safe, medium strength hypnotic which is free from after-effects.

CLINICAL DATA 'Dormupax' has been thoroughly investigated in several mental asylums. Because the dosages are often much above the normal standard in these institutions, which comprise senile, disturbed or schizophrenic persons, the two most important factors for a hypnotic — efficacy and compatibility — could be examined in detail. The results were highly satisfactory. In cases of senile, motor-restless patients the efficacy was very good on dosage of half a tablet in the afternoon and one tablet in the evening. Disagreeable after-effects could not be observed.

Excited insane patients tolerate 4 tablets daily in a course of 2 to 4 days without any deleterious after-effects. For hypertonics the concurrent administration of 'Hyperysin'-Hommel proved to be very effective.

INDICATIONS Insomnia due to psychic causes or pain — Insomnia in cases of various diseases, especially circulatory diseases or arteriosclerosis — Spastic vascular states. In these cases the combination of 'Dormupax' and 'Hyperysin'-Hommel is indicated.

DOSAGE Maximum daily single dose: 2 Tablets; maximum daily dose: 5 Tablets. Further information on dosage supplied in literature on request.

PACKS: Standard Tube of 12 Tablets; bottles of 250 (Dispensing). Samples of 'Dormupax' available on personally signed request of physicians only [Sch. IV] from the Medical Dept.

Influenza Peak

The Influenza deaths graph follows a consistent pattern; maintaining a low but steady level for nearly nine months of the year. Between December and February the graph rises sharply . . . in an epidemic year into hundreds of deaths a week.

The busy doctor, whether he is overburdened with the demands of an epidemic or is simply faced with a seasonal increase in 'flu cases, naturally looks for an analgesic and sedative with proved antipyretic effect.

Veganin*, containing 1/6th of a grain of codeine phosphate together with acetylsalicylic acid and phenacetin, has long been accepted as the analgesic, sedative and antipyretic of choice. Its disintegration rate of 10 seconds ensures rapid action.

Veganin is obtainable from all chemists in tubes of 10 and 20 tablets; also available in bulk packages of 100 and 500 tablets for dispensing only, free of purchase tax when prescribed either privately or on the N.H.S. The tax free packages of 100 and 500 tablets are supplied to the chemist at 6s. 3d. and 27s. 1d. net, respectively.

The headache, vertigo, dyspnoea and malaise associated with severe hypertension can be promptly controlled or greatly mitigated by Veriloid Intramuscular Solution. This intramuscularly administered hypotensive agent produces a prompt, sustained and significant reduction in blood-pressure, and provides welcome relief from the distressing subjective symptoms.

A single injection of Veriloid Intramuscular Solution lowers the blood-pressure for 3 to 6 hours. In many instances symptomatic relief persists for considerably longer periods. By repeated injections, the arterial tension may be depressed for many hours or even days. Thereafter, oral medication

soluble aspirin with codeine phosphate and phenacetin

Codis presents a familiar grouping of analgesic drugs; aspirin, phenacetin, codeine phosphate; with an important advantage. The "aspirin" in Codis is rendered soluble, as in 'Solprin'.

Placed, uncrushed, in water, a Codis tablet disperses in a matter of seconds to form a solution of calcium aspirin and codeine phosphate with finely suspended phenacetin. The chance of irritation of the gastric mucosa by undissolved particles of aspirin is thus minimised.

Codis is recommended for all those conditions for which Tab. Codein. Co. B.P. would be prescribed. It has the added advantages of greater ease of administration and far less likelihood of aspirin intolerance, while the rapid absorption of the soluble aspirin promotes prompt relief.

COMPOSITION *Each Codis tablet contains:—Acid. Acetylsalicyl. B.P. 4 grs., Phenacet. B.P. 4 grs., Codein Phosph. B.P. 0.125 grs., Calc. Carb. B.P. 1.2 grs., Acid. Cit. B.P. (Exsic.) 0.4 grs., Excip. ad. 11.45 grs.*

Invalid Bovril is a highly concentrated form of Bovril for use in the sick-room. Prepared without seasoning,

it provides the maximum concentration in the most easily assimilated form. Many doctors recommend it in cases where the patient needs "building-up" after illness. Perhaps there is a patient of yours who would benefit from a course of Invalid Bovril?

JAEGER

Jaeger body-belts are made of pure wool, for these reasons. Wool keeps its wearer cool in summer, warm in winter. Wool disposes quickly of perspiration, retaining body warmth. Wool, being porous, allows both the escape of exhalations from the skin, and the access of pure air to the skin. Jaeger body-belts sit well, stay in position, and give support without pressure. They are available in all sizes.

BRAND'S ESSENCE is a first-class protein of animal origin. Being partly hydrolized, it is capable of easy ingestion, digestion and absorption. It is extremely palatable, and may be taken either as a jelly or as a liquid. It helps to support convalescence and assists in restoring a positive nitrogen balance.

The major indications for the administration of Brand's Essence are loss of appetite during fatigue, acute infections, and dysphagia or digestive disturbances due to organic or bacterial lesions of the mouth, oesophagus and alimentary tract, and after surgical procedures.

The addition of Brand's Essence to low residue and weight-reducing diets is especially appreciated by the patient.

Patients are superbly comfortable on an Intalok mattress. Every one of the many hundreds of very fine high grade springs is interlinked, coil by coil, with its neighbours to create a firm, even surface that is sensitive to the slightest movement. This is comfort that goes a long way to help the patient's recovery.

More good reasons why Intalok is the ideal hospital mattress:

- 1 All metal parts are rustless—can be sterilized repeatedly.
- 2 The spring centre gains by repeated stoving.
- 3 There are no tufts or piping to collect dust—and the mattress is light for easy handling.

4 Intalok mattresses can be made to special thicknesses or sizes, or in segments to suit special cases.

5 Existing hair mattresses can be converted to Intalok. This cuts costs.

6 Every Intalok springing unit is guaranteed for ten years.

Deferment of recruitment for fully registered "R" practitioners (i.e., fully registered practitioners liable for call-up under the National Service Acts) is granted at the discretion of the Central Medical Recruitment Committee and (in Scotland) the Scottish Central Medical Recruitment Committee. The Committees normally allow a fully registered "R" practitioner to hold a First House Officer post (N.H.S. salary £350 per annum) provided that it commences within three months of the end of his deferment by the Ministry of Labour and National Service as a whole-time medical student; and a Second House Officer post (N.H.S. salary £400 per annum) provided that it is secured before the end of his First House Officer post and commences within one month thereafter.

An "R" practitioner requires the special written permission of the C.M.R.C. or (in Scotland) the Scottish C.M.R.C. to proceed to any further post.

The position of provisionally registered "R" practitioners has been made clear in a notice sent to them by the University Joint Recruiting Boards.
