## Laxatives for Children

To aid the Physician in choosing a laxative for children, we give the chief characteristics of Andrews. The dosage is easily adjusted according to age. Andrews is pleasant tasting, and children accept it readily. Its laxative action is mild, and is due to the presence of magnesium sulphate and other salts in balanced proportion which increase the fluid content of the bowel by osmotic action and so lead to easy non-

gripping evacuation. Andrews has a soothing effect on the stomach, stimulates the bile-flow and generally aids digestive processes. It is also useful as a gastric sedative in bilious attacks. Andrews has no costive reaction when discontinued.

The manufacturers of  
**DETTOL** submit  
the following facts to your attention

*Wide mention in medical literature has made Dettol a textbook antiseptic. Wide clinical use has attested the efficiency of Dettol in literally millions of cases which range from minor accident to major operation.*

**Efficiency** Dettol is an efficient antiseptic which, moreover, retains a high degree of efficiency in the presence of organic matter.

**Toleration** Dettol is well tolerated on the skin and tissues in high concentrations. Moreover, its non-toxicity offers a high degree of safety to doctor, nurse and patient.

**Strength** The fact that Dettol is well tolerated by the tissues permits dilutions to be recommended for clinical purposes which provide a margin of safety even when a reasonable amount of organic material is present.

**Activity** Dettol is active against both

Gram-positive and Gram-negative micro-organisms. Under standard conditions of test a dilution of 1 in 200 kills *Staph. aureus* in 10 minutes; a one in 500 dilution kills *Strept. pyogenes* in 10 minutes.

Dettol is not incompatible with soap, traces of which need not be removed before application. **Compatibility**

Dettol is non-poisonous, safe, pleasant and economical in use. It has an agreeable smell. **Pleasantness**

Bacteriological data and the literature of Dettol are available on request. Dettol is packed in 2 and 5 gallon, Purchase-Tax-free Dispensing containers. **Data**

# THROMBIN (MAW) *in Tonsillectomy*

THROMBIN is now being widely used in tonsillectomy operations for the control of excessive bleeding. It acts efficiently, quickly and is extremely simple to apply. The wound surface should first be swabbed clean of blood, then syringed with a concentrated solution of THROMBIN.

THROMBIN can be successfully used in any operation which involves excessive bleeding, and may often be applied in conjunction with absorbable haemostatic dressings such as fibrin foam, gelatin foam and alginates.

## SOME FACTS ABOUT THROMBIN

**STABILITY:**—THROMBIN keeps indefinitely in the dry state, and therefore may be kept in stock against an emergency.

**STERILITY:**—THROMBIN is sterilised by filtration, and needs no re-sterilisation.

**ADSORPTION:**—THROMBIN is easily adsorbed by solids, and should therefore be applied by syringe or spray.

**APPLICATION:**—THROMBIN is supplied in a dry ampoule, together with an ampoule of diluent. Solution is very rapid.

**QUANTITY:**—THROMBIN is available for surgical purposes in ampoules of 50, 200 and 5,000 N.I.H. UNITS, and for oral use in packages of 5,000 N.I.H. UNITS.

*Good results for THROMBIN are being reported in many varied surgical applications, and we shall be glad to supply further information. Inquiries should be addressed to:*

# 'WELLCOME' BRAND Diphtheria-Pertussis Prophylactic

This new prophylactic replaces 'Wellcome' brand Diphtheria-Pertussis Prophylactic D.P.P. It is a mixture of equal parts of Purified Diphtheria Formol Toxoid F.T. (P), containing at least 50 Lf per c.c., and of Whooping Cough Vaccine, plain (i.e. suspended), standardised to contain 40,000 million *Haemophilus pertussis* in each c.c. The preparation therefore contains in each c.c., Purified Diphtheria Formol Toxoid F.T. (P) 25 Lf, and *H. pertussis*, 20,000 million.

The diphtheria formol toxoid contains at least 1500 Lf per mgm. protein nitrogen, and is less likely to cause reactions than unpurified ("crude") toxoid. The Whooping Cough Vaccine is prepared from four to six selected smooth strains of *H. pertussis* grown in Cohen and Wheeler's liquid culture medium. Since the mixture contains no alum or other mineral vehicle, the risk of local reaction is reduced.

'Wellcome' Diphtheria-Pertussis Prophylactic is of high antigenic efficiency; there is some evidence that the antigenicity of the diphtheria formol toxoid is increased by the presence of the whooping cough vaccine. As the prescribed course consists of three injections only, the combined prophylactic spares the child discomfort and saves the doctor valuable time.

The prophylactic is issued in sets of  $3 \times 1$  c.c. ampoules and in rubber-capped bottles containing 10 c.c.

# In the form of Solprin

**aspirin can be better tolerated in large doses over prolonged periods.**

**'Solprin' is a soluble, stable and palatable tablet providing pure calcium aspirin. That is, Solprin overcomes the physical and chemical disadvantages of both aspirin and calcium aspirin, and combines the advantages of both.**

Unlike ordinary aspirin, Solprin is substantially neutral and soluble: and unlike calcium aspirin it does not decompose during manufacture and storage. Thus Solprin combines the analgesic, sedative and anti-rheumatic effects of aspirin with the solubility and blandness of pure calcium aspirin.

Extensive clinical trials with Solprin show important results such as might be expected of so excellent a combination of properties. Except in cases of extreme hypersensitivity, Solprin can be tolerated in large doses over prolonged periods without the development of gastric and systemic disturbances.

## INCREASED DEMANDS

Certain circumstances may cause an increase in the daily requirements of vitamins which is not met by the average diet. In such cases a food supplying the lacking vitamins is often recommended in preference to synthetic vitamin supplements.

When an increased demand for the B<sub>2</sub> vitamins arises, Marmite has proved particularly useful, as it provides these vitamins in the naturally occurring form in a palatable foodstuff. For regular inclusion in the antenatal diet, Marmite is recognized as being of somewhat special value.

# New peptic ulcer treatment comparable to drip therapy

Whole milk and alkaline constituents  
combine to produce  
increased buffering action

**N**ULACIN TABLETS have been evolved to meet a very real need in the treatment of gastric and duodenal ulcers.

All the literature on the treatment of peptic ulcers emphasizes the proven value of diminishing the acidity of the gastric juice. Many large and otherwise intractable ulcers can be healed by a continuous, intra-gastric drip of milk or alkali.

Drip therapy, is, however, not always available, nor is it practicable to use it in many instances. Nulacin offers a satisfactory alternative.

## CONTINUOUS NEUTRALIZATION

NULACIN TABLETS, allowed to dissolve slowly in the mouth, have been shown clinically to provide a continuous neutralization comparable with that of drip therapy. (B.M.J., 1952, 2, 180.)

NULACIN TABLETS contain nutrient in a most acceptable form to the peptic ulcer patient. Nulacin tablets obviate the necessity of taking frequent feeds, and so lessen the tendency to obesity which must occur in those who are following a dietary regime of food at frequent intervals.

During ulcer activity the suggested dosage is 3 tablets to be sucked each hour, and for follow-up treatment 2 tablets should be sucked between meals, beginning half an hour after a meal.

The tablet is of a suitable size, and of a consistency and hardness so that, when it is sucked, the result is a constant and prolonged neutralization of the gastric juice.

NULACIN TABLETS are extremely palatable and during extensive clinical tests their taste has proved to be particularly acceptable to patients.

The patient should be instructed to place the tablet between the gum of the upper jaw and the cheek. Here it will be comfortable, and slowly dissolve. The efficacy of

the tablet is greatly diminished if it is chewed and swallowed.

NULACIN TABLETS are not advertised to the public. There is no B.P. equivalent to this tablet. The dispensing pack of 25 tablets is free of Purchase Tax and now costs 3/-.

## Burns

Even minor burns call for specific qualities in a dressing. Pain must be relieved, sterility maintained, the burnt area protected and healing stimulated.

OPTULLE is a sterile dressing consisting of an open mesh gauze impregnated with a petroleum compound containing Balsam of Peru.

OPTULLE soothes the moment it is applied. It is prepared under aseptic conditions and is heat sterilised after packing in containers.

The greatest advantage of OPTULLE is that frequent change of dressing is unnecessary and this minimises the risk of infection. Experience has shown that these factors can almost halve the time of healing.

OPTULLE causes no pain on removal nor does it disturb the fragile healing tissues.

OPTULLE is particularly valuable in treating burns in children on account of its soothing qualities and painless removal.

## JUDY'S IN TROUBLE AT SCHOOL

"She's at a difficult age under any conditions . . . but these days with fresh food so dear and diet so dull, so many demands on her young body and developing mind . . . no wonder she's run down. Looks like another case of Vitamin deficiency."

The increased potency of Supavite is of particular value in such conditions of nervous strain, especially when these are accentuated by vitamin deficiencies in the diet. The combination of Minerals with the Vitamins in Supavite is important as they act together to give the fullest nutritional benefits.

Cases are recorded each winter establishing the striking value of Terpoim Elixir in cough therapy . . . particularly where patients complain of cough-disturbed sleep. In addition to increasing mucous secretion, Terpoim also has a sedative effect upon the cough-centre, without causing cerebral depression. Thus it soothes the membranes, controls the spasm, and assures recuperative rest.

## A CAREER AT SEA

The Merchant Navy offers good prospects

The large Shipping Companies recruit future Executive Officers for their ocean-going ships from H.M.S. WORCESTER, a Nautical College founded in 1862 by London shipowners. Nearly 7,000 Cadets have passed through the College and received specialized training in addition to a sound general education.

The College is officially recognized by the Ministry of Education and by the Ministry of Transport, the latter accepting the training provided on board the WORCESTER as being the equivalent of one year's sea service.

Cadets are admitted after reaching the age of 13½ and before reaching the age of 16. They leave the College when they are 17 and the period of training depends on the age at entry, with a minimum period of two years. Candidates are required to take the Common Entrance Examination or the WORCESTER Entrance Examination, according to age. They must be medically fit with perfect eyesight.

Fees are £210 per annum including uniform. Various scholarships in reduction of fees are available. The WORCESTER offers an excellent opportunity for boys of good education and character wishing to become Executive Officers in the Merchant Navy—a career providing world travel, good remuneration, and an interesting life.

Illustrated Prospectus containing full information will be forwarded on application to the Secretary,

Deferment of recruitment for fully registered "R" practitioners (i.e., fully registered practitioners liable for call-up under the National Service Acts) is granted at the discretion of the Central Medical Recruitment Committee and (in Scotland) the Scottish Central Medical Recruitment Committee. The Committees normally allow a fully registered "R" practitioner to hold a First House Officer post (N.H.S. salary £350 per annum) provided that it commences within three months of the end of his deferment by the Ministry of Labour and National Service as a whole-time medical student; and a Second House Officer post (N.H.S. salary £400 per annum) provided that it is secured before the end of his First House Officer post and commences within one month thereafter.

An "R" practitioner requires the special written permission of the C.M.R.C. or (in Scotland) the Scottish C.M.R.C. to proceed to any further post.

The position of provisionally registered "R" practitioners has been made clear in a notice sent to them by the University Joint Recruiting Boards.
