New peptic ulcer treatment comparable to drip therapy

Whole milk and alkaline constituents
combine to produce
increased buffering action

NULACIN TABLETS have been evolved to meet a very real need in the treatment of gastric and duodenal ulcers.

All the literature on the treatment of peptic ulcers emphasizes the proven value of diminishing the acidity of the gastric juice. Many large and otherwise intractable ulcers can be healed by a continuous, intra-gastric drip of milk or alkali.

Drip therapy, is, however, not always available, nor is it practicable to use it in many instances. Nulacin offers a satisfactory alternative.

CONTINUOUS NEUTRALIZATION

NULACIN TABLETS, allowed to dissolve slowly in the mouth, have been shown clinically to provide a continuous neutralization comparable with that of drip therapy. (B.M.J., 1952, 2, 180.)

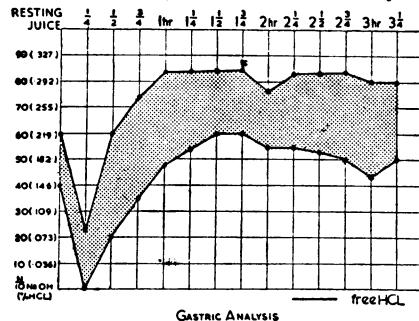

NULACIN TABLETS contain nutrient in a most acceptable form to the peptic ulcer patient. Nulacin tablets obviate the necessity of taking frequent feeds, and so lessen the tendency to obesity which must occur in those who are following a dietary regime of food at frequent intervals.

During ulcer activity the suggested dosage is 3 tablets to be sucked each hour, and for follow-up treatment 2 tablets should be sucked between meals, beginning half an hour after a meal.

The tablet is of a suitable size, and of a consistency and hardness so that, when it is sucked, the result is a constant and prolonged neutralization of the gastric juice.

NULACIN TABLETS are extremely palatable and during extensive clinical tests their taste has proved to be particularly acceptable to patients.

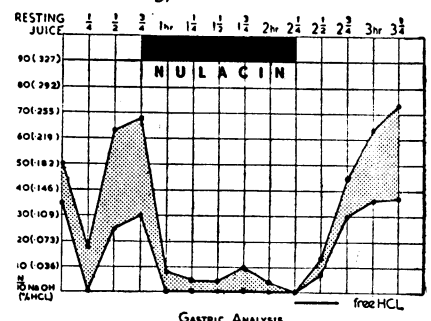

The patient should be instructed to place the tablet between the gum of the upper jaw and the cheek. Here it will be comfortable, and slowly dissolve. The efficacy of

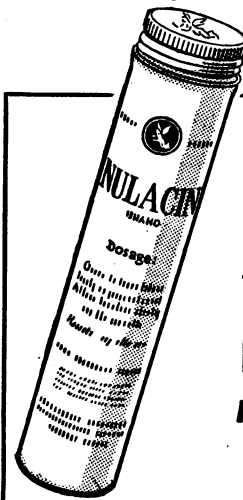

Superimposed gruel test-meal curves of six patients with duodenal ulcer

the tablet is greatly diminished if it is chewed and swallowed.

NULACIN TABLETS are not advertised to the public. There is no B.P. equivalent to this tablet. The dispensing pack of 25 tablets is free of Purchase Tax and now costs 3/-.

The same patients as in Fig. 1, two days later, showing the striking neutralizing effect of sucking Nulacin tablets (3 an hour). Note the return of acidity when Nulacin is discontinued

IMPROVED PRESENTATION

FOR IRON DEFICIENCY ANÆMIAS, ferrous sulphate is universally accepted as the most efficient compound for oral administration. The improved method of presentation in 'Plastules' ensures *maximum* absorption and utilisation. The tasteless, easy-to-swallow capsules rapidly disintegrate and the ferrous sulphate in a semi-solid condition is quickly absorbed, with avoidance of gastric irritation. The addition of Folic Acid stimulates production of erythrocytes, and the dried yeast increases appetite and reinforces the action of the iron.

'Plastules' are available in four varieties—

Each capsule contains:

- Plain: Exsiccated Ferrous Sulphate 5 gr., Dried Yeast $\frac{1}{2}$ gr.
- With Hog Stomach: Exsiccated Ferrous Sulphate $2\frac{1}{2}$ gr., Dried Yeast $\frac{1}{2}$ gr., Desiccated Hog Stomach 1.47 gr.
- With Liver Extract: Exsiccated Ferrous Sulphate $2\frac{1}{2}$ gr., Dried Yeast $\frac{1}{2}$ gr., Extract of 52 gr. of fresh liver.
- With Folic Acid: Exsiccated Ferrous Sulphate $2\frac{1}{2}$ gr., Dried Yeast $\frac{1}{2}$ gr., Folic Acid 1 mg., Extract of 26 $\frac{1}{2}$ gr. of fresh liver.

It is a balanced blend of pure orange juice and rose hip extract. The well-known health characteristics of both are here combined for the first time. It does not cause stomach or bowel trouble.

Available through chemists only.

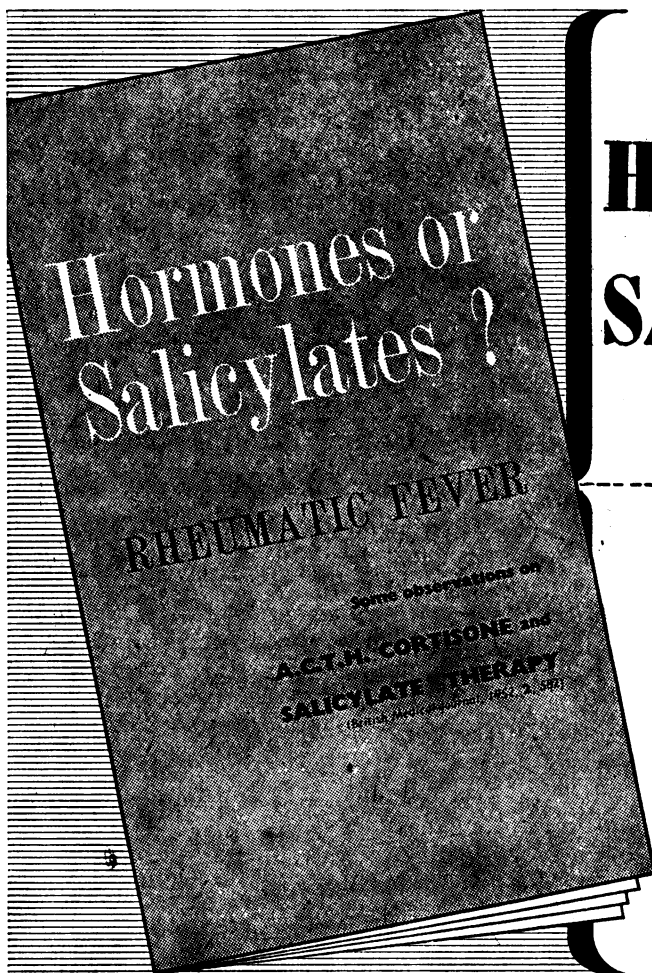

By reason of its high vitamin content (not less than 56 mgms. of vitamin C per fluid oz.) Rosena is equal in vitamin C activity to Ministry of Food Orange Juice and National Rose Hip Syrup. It also contains three natural sugars which are nutritionally valuable. These comprise glucose, fruit sugar and cane sugar. In addition, a further 10% of pure glucose has been added.

HORMONES OR SALICYLATES?

Rheumatic Fever

Some observations on
A.C.T.H., CORTISONE and

(British Medical Journal, 1952, 2, 582)

IN 1951 we published and distributed amongst the Medical Profession a booklet entitled 'The Similarity in the Mode of Action of Salicylates and Cortisone in the Treatment of Rheumatism'.

It is interesting to note the report of the treatment of Rheumatic Fever published in the British Medical Journal (1952, 2, 582) which provided evidence that salicylates (in the form of Berex) act in a similar manner to A.C.T.H. An abstract of this report is now available in booklet form on request.

New porous Elastoplast

**THIS IMPROVED ELASTOPLAST IS NOW
BEING SUPPLIED TO HOSPITALS**

T. J. Smith & Nephew announce that they have now completed two years of extensive clinical trials of their new Porous Adhesive Elastoplast bandages and extension plasters. Results confirm that this new porous adhesive largely overcomes skin reaction to occlusion, which some patients experience beneath fully spread adhesive bandages, by permitting free evaporation of sweat and minimizing epidermal keratinisation produced by the stimulating effect of the adhesive.

Porous Elastoplast bandages and extension plasters are now being supplied to hospitals and, as production increases, will be available to the medical profession as a whole. Prices are the same as the normal spread Elastoplast bandages.

Points about Porous Elastoplast

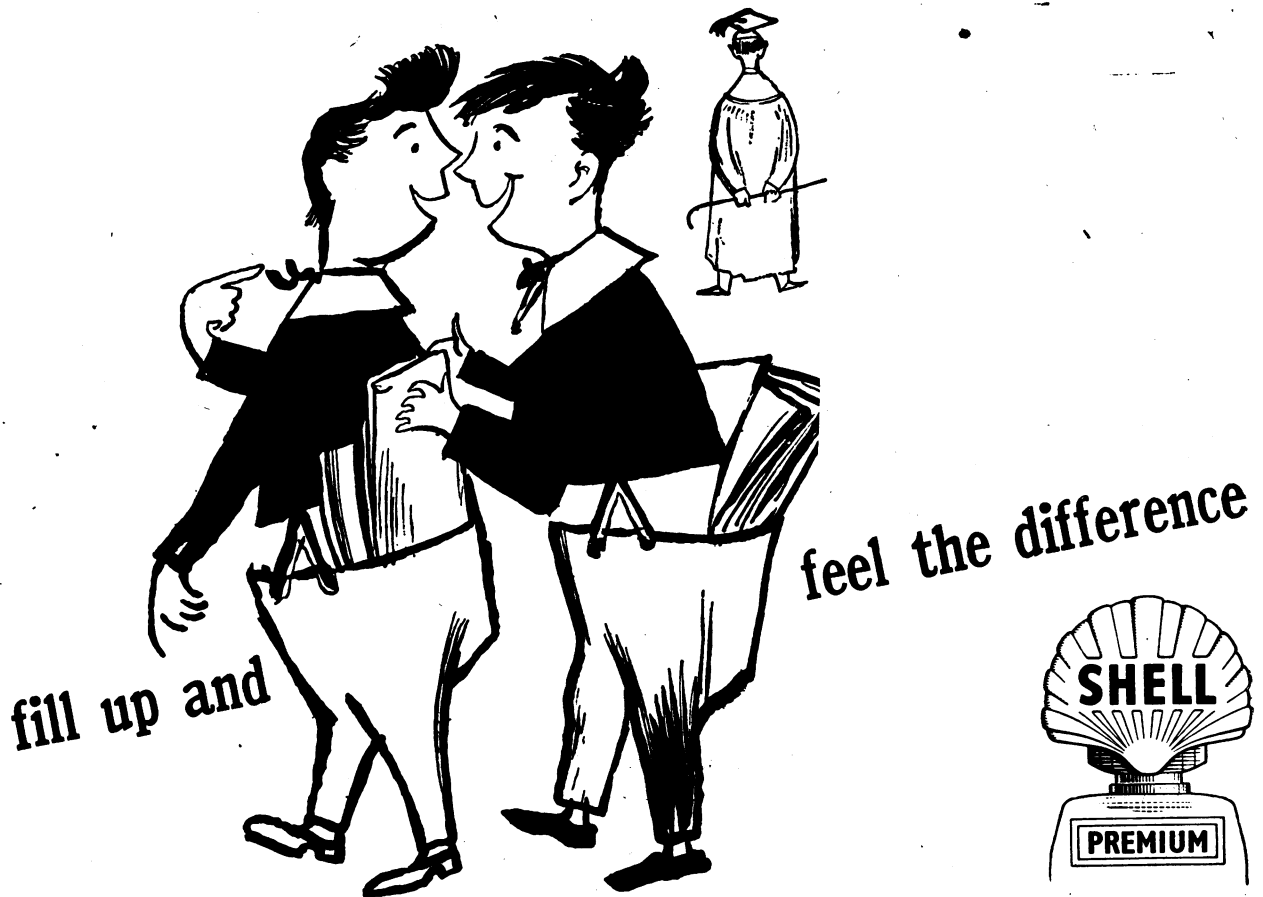

- 1 Porous throughout whole surface of the bandage, allowing free evaporation of sweat and minimizing blockage of sweat-duct ostia.
- 2 The ideal compression and grip of Elastoplast is wholly maintained because there is no loss of stretch, regain or adhesive qualities.
- 3 Adhesive not spread to edges of bandage — minimizes rucking and soiling of clothes.
- 4 Fluffy edges eliminate localised 'hard' compression — preventing trauma to devitalized skin.
- 5 The name of the improved Elastoplast is 'Porous Adhesive Elastoplast'.

comfort AT DEPTH in joints and muscles

A well-made bed may have its merits—but the modern answer to pain in joints and muscles is histamine-induced vasodilation. Hitherto, the topical use of histamine has been limited owing to its poor absorption through the skin, but with the introduction of NALGIN—a new, deep, penetration histamine balm—this difficulty is overcome. NALGIN Balm contains methyl nicotinate—an extremely penetrative therapeutic agent which enables the histamine to reach the deeper skin-tissues. Light massage with NALGIN induces hyperaemia, with its pleasantly relaxing warmth, brings a speedy reduction of pain, and gives real *comfort at depth*.

The replaceable barrel means great economies in the long run

The glass barrel is protected by a metal casing and breakage risk is thereby reduced to a minimum. If the glass barrel is broken only the glass barrel and piston need be renewed.

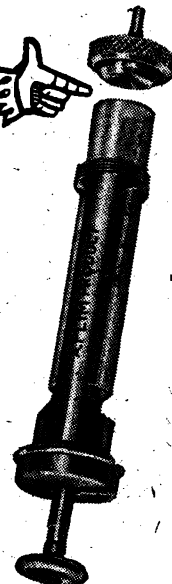

Spare barrels are supplied complete with individually fitted pistons. Users however are advised to order a spare barrel when they buy the syringe; this permits instant replacement.

All components can be taken apart or assembled in a few seconds.

No cement or solder is used and sterilization can be done at temperatures up to 200° C. The metal piston must be withdrawn during sterilization but there is no need to dismantle the rest of the syringe.

SIZES: 1, 2, 5, 10 and 20 c.c.

INTERCHANGEABLE NEEDLE FITTINGS:
Record, Luer and all other types. Side and central.

Deferment of recruitment for fully registered "R" practitioners (i.e., fully registered practitioners liable for call-up under the National Service Acts) is granted at the discretion of the Central Medical Recruitment Committee and (in Scotland) the Scottish Central Medical Recruitment Committee. The Committees normally allow a fully registered "R" practitioner to hold a First House Officer post (N.H.S. salary £350 per annum) provided that it commences within three months of the end of his deferment by the Ministry of Labour and National Service as a whole-time medical student; and a Second House Officer post (N.H.S. salary £400 per annum) provided that it is secured before the end of his First House Officer post and commences within one month thereafter.

An "R" practitioner requires the special written permission of the C.M.R.C. or (in Scotland) the Scottish C.M.R.C. to proceed to any further post.

The position of provisionally registered "R" practitioners has been made clear in a notice sent to them by the University Joint Recruiting Boards.
