Cutting the coat to suit the cloth

With insurance policies as with clothes—it's the well-fitting ones that give the greatest satisfaction. The many ready-made policies often do not meet the needs of the individual. We have always borne this in mind when planning our policies. To keep them flexible rather than rigid; and to plan them personally to fit both the needs—and the pocket—of the prospective policyholder. If you are concerned for your future or for the future of your dependants, see how simple it is to guarantee now what you need. For example, at the age of 25 by setting aside the modest sum of £5 a month we could provide:

FOR YOU

In 20 years a cash sum of £1,000 plus profits.
Should you become disabled, your premiums cease during disability and an income of £10 monthly is paid to you.

FOR DEPENDANTS

Benefits up to a maximum of £3,400. Immediate cash payment of profits plus Pension of £10 monthly for balance of 20 years . . . £2,400
Plus cash at end of Pension period . . . £1,000
£3,400

This type of plan is bringing PEACE OF MIND to many men in your calling. Send for full particulars to-day.

Athletes Foot**ANTIPRURITIC FUNGICIDE**

Epidermophytoses and allied fungoid infections often resist treatment owing to re-infection from scratching and from poor penetration of the medicament. CALPED CREAM provides the anti-pruritic fungicide parachlorophenylether, proved to have a very marked inhibitive action on many types of fungi.

Salicylic acid contributes to the fungicidal properties by encouraging desquamation of infected skin, allowing direct contact with invading fungi.

CALPED is also available in powder form. A polythene insufflator facilitates application.

A new and logical therapy for Rheumatic conditions

**Water-soluble esters of salicylic,
p-aminobenzoic and nicotinic acids,
that readily pass the skin barrier**

The local treatment of rheumatic conditions has hitherto presented certain difficulties; drugs which penetrated the skin often caused intense irritation and their use was of doubtful value.

Transvasin, a new preparation developed by Hamol, S.A., our Swiss associates, and now available for prescription in this country, contains esters of salicylic, p-aminobenzoic and nicotinic acid. These esters, being both water- and fat-soluble, readily pass the skin barrier in therapeutic quantities without causing irritation, and enable an adequate concentration of the drugs to be built up where they are needed. Transvasin not only induces vasodilation of the skin with a superficial erythema but also brings about a *deep* hyperaemia of the underlying tissues.

PLEASANTLY FLAVOURED ELIXIR

The association of methyltestosterone and ethinylœstradiol in Mepilin produces a more complete response in the treatment of menopausal disorders than can be obtained by the use of œstrogens alone.

The presence of methyltestosterone enables a reduction in œstrogen dosage to be made; thus undesirable side effects such as breast turgidity and pelvic congestion are avoided and the risk of withdrawal bleeding is reduced. An increased feeling of confidence and well-being is produced which is both mental and physical.

Each teaspoonful (4 ml.) of Mepilin Elixir and each Mepilin Tablet contains ethinylœstradiol 0.01 mg. and methyltestosterone 3 mg.

Nervous Exhaustion

Practitioners often encounter patients whose ill-health is due mainly to emotional or neurotic disturbance. Frequently there appears to be no physical basis and their principal symptoms are usually undue nervousness, fatigue and poor appetite.

For these mildly neurasthenic and exhausted cases 'BELETE' Wyeth is uniquely appropriate. It contains Phenobarbitone and Vitamin B-complex as an appetising Elixir, and so provides a quieting relaxation, while at the same time supplying nutritional factors known to be essential for the energy requirements of nervous metabolism.

'BELETE' contains:—
Phenobarbitone B.P. ½ gr. : Aneurine Hydrochloride 1.5 mg. : Riboflavin 1.0 mg. : Pyridoxine Hydrochloride 0.33 mg. : Nicotinamide B.P. 10.0 mg. : Pantothenyl Alcohol 0.2 mg. (equivalent to 0.212 mg. Pantothenic Acid) : Alcohol 15%.

...simplifies the treatment
of **HYPERTENSION**

When side-effects prevent satisfactory adjustment of dosage of Veriloid given alone, Veriloid-VP usually makes possible continuation of therapy. This combination in one tablet of Veriloid, 2 mg., with phenobarbitone, B.P., 15 mg., is of value in all forms of hypertension. Arterial pressure is reduced by the specific hypotensive effect of the Veratrum alkaloids; phenobarbitone given concurrently effectively raises the limit of tolerance to Veriloid, and reduces emotional tension. There is marked relief of subjective symptoms.

The initial dose of Veriloid-VP (subsequently adjusted according to clinical response) is one to one and one-half tablets four times daily, after meals and at bed-time.

Veriloid-VP is available in bottles of 100 and 500 tablets.

Detailed information sent on request.

NOTE

Veriloid, plain, continues to be available in scored tablets of 1 mg. and 2 mg. Why MIXOGEN is prescribed for menopausal symptoms

Because it is now established that :—

- combined male and female hormone treatment is the most effective in this condition.
- the correct balance of the two hormones is essential both for efficacy and economy—determined by extensive clinical trial in the U.K. and unique to Mixogen.
- both the hormones in Mixogen are completely effective when swallowed—thus maximum, immediate relief is given in the simplest and most convenient way.

Urolucosil^{*}

A SULPHONAMIDE

FREE FROM SIDE-EFFECTS

One of the most valuable characteristics of Urolucosil is the remarkable absence of side-effects noted with this sulphonamide. Such conditions as cyanosis, vomiting, acidosis, hypersensitivity, have yet to be reported; it is most uncommon for there to be any upset of the blood picture or disturbance of the intestinal flora with Urolucosil. Because Urolucosil is a compound with the high solubility of 98% at a pH of 7, it is unlikely that any blockage of the urinary passage by crystalline deposits will be caused; no diminishing of urinary output caused by such blockage has in fact been reported since Urolucosil was introduced to the medical profession in Great Britain. Finally, depression, which so often militates against the well-being of a patient, is virtually absent when Urolucosil is prescribed. Urolucosil is especially indicated in uncomplicated infections due to *B. coli* and other organisms of the coliform group: acute cystitis, acute pyelitis, pyelitis of pregnancy: urinary tract infections in children: neurogenic bladder.

A perfect source of Vitamin C

RIBENA (*Syrupus Ribis Nigri B.P.C.*)

HIGH CONCENTRATION OF VITAMIN C—REMARKABLE STABILITY

Four characteristics of Ribena make it a perfect source of Vitamin C:

- 1 It contains a high concentration of Vitamin C—and it is very stable.
- 2 The vitamin is in its natural state.*
- 3 Ribena is very well tolerated even by sensitive stomachs. It is completely free from all cellular structure. It is suitable for infants almost from birth, for peptic ulcer cases, and for women suffering from "morning sickness"; they can take it when almost everything else increases discomfort.
- 4 In addition to its therapeutic values, it is delicious in its own right as sweet blackcurrant syrup.

* Following reports of unsatisfactory response to the therapeutic use of synthetic ascorbic acid in peptic ulcer cases, controlled tests using Ribena were instituted at various large British hospitals, with striking results.

Clinical experience has also shown that in ulcerative gingivitis, the routine use of Ribena as an adjunct to local therapy has given more satisfactory results than that of the synthetic vitamin.

The superiority is presumably due to the presence of other factors of the Vitamin-C complex; possibly the Vitamin P, as well as mineral elements.

Therapeutic uses

Ribena is recommended for all conditions requiring Vitamin-C implementation: namely, as a natural and rapid restorative from fatigue; for increasing resistance to local infection and colds; for expectant and nursing mothers; for infants from birth; for children and adolescents; in many dental conditions; in peptic ulcer cases; in fractures and wounds; in blood dyscrasias and hæmorrhagic states; in infections and fevers; and in many skin disorders.

Reports for doctors overseas

The makers of Ribena co-operated extensively with the Ministries of Food and Health during the war, a co-operation which still goes on to some extent even now. The Royal Forest Factory has attached to it a series of very fine laboratories where research into fruit juices and vitamins is conducted to an academic level, under the direction of an expert, lately in charge of the Fruit Products Section of the University of Bristol Agricultural Research Station. Reports of much of the work done are available, on application, to doctors and scientists overseas. These are likely to be of particular interest now that Ribena is being extensively exported.

Send for further information. A booklet entitled "Blackcurrant Juice in Modern Therapy: Natural Vitamin C" will be forwarded to you with pleasure; also details of a number of controlled tests made on the use of Vitamin C, if you will write to:—

Canvassing in any form will disqualify.

★*SERVICE MEMBERS may have difficulty in supplying recent testimonials, but this should not deter them from applying.*

Deferment of recruitment for fully registered "R" practitioners (i.e., fully registered practitioners liable for call-up under the National Service Acts) is granted at the discretion of the Central Medical Recruitment Committee and (in Scotland) the Scottish Central Medical Recruitment Committee. The Committee normally allow a fully registered "R" practitioner to hold a First House Officer post (N.H.S. salary £350 per annum) provided that it commences within three months of the end of his deferment by the Ministry of Labour and National Service as a whole-time medical student; and a Second House Officer post (N.H.S. salary £400 per annum) provided that it is secured before the end of his First House Officer post and commences within one month thereafter.

An "R" practitioner requires the special written permission of the C.M.R.C. or (in Scotland) the Scottish C.M.R.C. to proceed to any further post.

The position of provisionally registered "R" practitioners has been made clear in a notice sent to them by the University Joint Recruiting Boards.

THE CONTROL of hay-fever still remains a problem, but whatever therapy is adopted the additional use of a nasal decongestant is invaluable. FENOX, by virtue of its unique properties, is the ideal preparation for both children and adults, giving immediate and prolonged relief without . . .

irritation of inflamed mucosa
impairment of ciliary action
undesirable side-effects

FENOX is water-miscible and non-oily. It has the same viscosity as mucus and remains at the site of action.
