## A SPENCER SUPPORT for Intervertebral Disc

In both conservative and surgical treatment of intervertebral disc, application of a back support is usually indicated.\* We invite the surgeons' investigation of Spencer as an adjunct to treatment. Each Spencer is *individually designed, cut and made* for each patient—after a description of the patient's body and posture has been recorded and detailed measurements taken. Thus, individual support requirements are accurately met. The Spencer Spinal Supports shown incorporating rigid Spinal Brace were individually designed for both man and woman patients. Note exterior pelvic binder for added pelvic stability.

*“Come now—a Soft Diet  
can be very appetising!”*

**As a doctor**, you know how many patients still think that a Soft Diet means dull, unappetising meals. Fortunately you can tell them that to-day such a diet can be nutritionally balanced and, what's more, interesting.

Shortages? Preparation problems? These can be conveniently and economically overcome by including in the patient's diet Heinz Strained Meat Broths, Soups, Vegetables and Fruits. There are seventeen varieties,\* so there is no question of loss of appetite through monotony.

Heinz Strained Foods are invaluable to a patient on a Soft Diet because they

contain no irritating seasonings or spices, and, although coarse fibres are removed, sufficient bulk is retained to safeguard the bowel's function.

Scientific cooking methods conserve the nutritive values of these foods. They are actually more nutritious than similar foods prepared at home. Their inclusion in a Soft Diet is a simple, pleasant way to provide the patient with protein, vitamins and minerals.

For hospital use, these foods are obtainable in 15½-oz. cans from the usual suppliers, or direct from H. J. Heinz Company Ltd., Harlesden, London, N.W.10.

# NOW WIDELY PRESCRIBED— Transvasin

Contains skin-penetrating esters of salicylic, nicotinic, and p-aminobenzoic acids. It brings real relief to deep-seated muscular rheumatism by simple inunction.

Transvasin, a new preparation developed by Hamol S.A., our Swiss associates, and now available for prescription in this country, contains esters of salicylic, p-aminobenzoic and nicotinic acids. These esters, being both water- and fat-soluble, readily pass the skin barrier in therapeutic quantities and enable an effective concentration of the drugs to be built up where they are needed. Transvasin not only induces vasodilation of the skin with a superficial erythema but also brings about a deep hyperaemia of the underlying tissues. It is completely non-irritant, and can be safely used on the most sensitive skin.

It is now being widely prescribed, with highly successful results. There is evidence, also, that since a very small quantity is sufficient for each application the cost of treatment is extremely low.

Salicylic acid tetrahydrofurfuryl-ester	14%
Nicotinic acid ethyl-ester	2%
Nicotinic acid n-hexyl-ester	2%
p-Aminobenzoic acid ethyl-ester	2%
Water-miscible cream base ad	100%

Transvasin is not advertised to the public. It is available in 1 oz. tubes at 3/4d. plus 7½d. P.T., and is obtainable on Form E.C.10.

Samples and literature will be gladly sent on application.

## Treatment of the Streptococcal Throat

'PONDETS' Penicillin are a new and ingenious vehicle for local oral penicillin therapy that combine the striking advantages of extreme palatability with prolonged action. Each 'Pondet' contains 5,000 international units of crystalline potassium penicillin-G in a delicious hard, fruit, toffee-like base that completely masks the bitter taste of penicillin.

Because of the nature of their hard base, 'Pondets' dissolve slowly and uniformly, supplying an uninterrupted high concentration of penicillin to infected areas of the oro-pharyngeal mucosa.

INDICATED in minor superficial oral infections due to penicillin sensitive organisms ranging from the 'Streptococcal Throat' to the less common Vincent's infection and recommended for routine prophylactic use following Tonsillectomy.

*Individually wrapped in bottles of 20.*

Children accept 'Pondets' as readily as a sweet, and they are particularly useful in controlling throat infections in juvenile communities.

# A New development providing **CONTROLLED** antacid therapy

Prodexin is a new product containing aluminium glycinate, and belongs to the buffer group of antacids. It depends for its action upon the slow release, on hydrolysis, of active aluminium hydroxide gel and glycine (amino acetic acid). Glycine rapidly raises the pH to 2, sparing the aluminium gel for the later stage of raising it into the "safe zone" of pH 3.5 to 4.5. Prodexin maintains an equable gastric environment for long periods without alkalisiation.

Prodexin provides a convenient, economical and safe treatment for **HYPERACIDITY** and **PEPTIC ULCER**.

The tablets, sucked one at a time, maintain the pH of the stomach contents within the "safe zone" for up to two hours. With Prodexin there is no risk of acid rebound or alkalosis. Prodexin tablets are pleasant to suck and they do not form gritty particles in the mouth or give rise to constipation.

## PRODEXIN

Each tablet contains:—

Aluminium glycinate.....0.9 gramme.  
(dihydroxy aluminium aminoacetate)

Light magnesium carbonate.....0.1 gramme.

The basic N.H.S. cost of treatment at the rate of 6 Prodexin tablets daily is 8½d.

## A new, highly effective expectorant on an original basis

The principal constituent of 'HICOSEEN' is 2-Diethylaminoethyl-phenylethyl-acetate, synthesized by Hommel and for the first time clinically used. It acts broncholytically and at the same time sedatively on the cough reflex.

'Hicoseen' provides the basic requirements of anti-tussic therapy: repression of cough reflex and promotion of expectoration. These are accomplished with a very high degree of compatibility.

### PHARMACOLOGY

Absence of side-effects, including drowsiness, is of outstanding importance. The respiratory centre not being acted on in any way, the cough reflex is probably influenced by a mechanism different from that of morphine alkaloids. 'Hicoseen' contains such a small dose of codeine phosphate that even high overdosage is innocuous.

### COMPOSITION

2-Diethylaminoethyl-phenylethyl-acetate	0.1%
Codeine phosphate	0.08%
Guaiacol albuminate	5.25%
<i>in pleasantly flavoured syrup</i>	

### INDICATIONS

Specific in cough irritation, bronchial catarrh, bronchitis, tracheo-bronchitis in emphysema and pulmonary tuberculosis.

### DOSAGE

Adults: 2 to 4 tablespoonfuls; in cases of cough irritation 1 to 10 teaspoonfuls daily.

Children: according to age and number of cough paroxysms 3 to 5 tea- or dessertspoonfuls daily.

### PRESENTATION

'Hicoseen' Syrup is available in bottles containing 4 fluid oz; also in 16 fluid oz. bottles for dispensing.

# A STRIKING EXAMPLE OF DRUG COMPLEMENTATION

**IN MODERATE,  
SEVERE AND  
RESISTANT  
HYPERTENSION**

## • • • • **RAUWILOID + VERILOID**

The calming, relaxing and mildly hypotensive effect of Rauwiloid, when combined with the more potent Veriloid (brand of standardized alkaloids of *Veratrum viride*), leads to a unique type of drug complementation. The patient's Veriloid requirement is decreased, side effects, if present, disappear and significant hypotensive response is produced. Not only are the diastolic and systolic pressures lowered significantly, but also at the same time the patient

feels better. Headache and dizziness disappear and tachycardia, when present, is replaced by mild bradycardia.

On the basis of this apparent synergism, Rauwiloid+Veriloid leads to excellent results in moderate, severe and resistant hypertension. Each tablet contains 1 mg. of Rauwiloid and 3 mg. of Veriloid. Average dose: one tablet three or four times daily, preferably after meals, at intervals of not less than four hours.

**In mild and labile hypertension . . . .**

## • • • • **RAUWILOID**

Rauwiloid produces excellent results in early, mild or labile hypertension. Blood pressure is significantly reduced, a sense of well-being is quickly experienced and mild bradycardia replaces tachycardia. Toxic reactions do not occur, even when the amount of drug administered is three or four times the usual

dose. Side effects are rare. Initial dose: 4 mg. (2 tablets) once daily; maintenance dose: 2 mg. daily. Rauwiloid is a standardized alkaloidal extract of *Rauwolfia serpentina*. Each batch is tested in dogs for its sedative, hypotensive and bradycardic effects. Hence pharmacological uniformity is assured.

## A perfect source of Vitamin C

**RIBENA** (*Syrupus Ribis Nigri B.P.C.*)

HIGH CONCENTRATION OF VITAMIN C—  
REMARKABLE STABILITY

Four characteristics of Ribena make it  
a perfect source of Vitamin C:

- 1 It contains a high concentration of Vitamin C—and it is very stable.
- 2 The vitamin is in its natural state. \*
- 3 Ribena is very well tolerated even by sensitive stomachs. It is completely free from all cellular structure. It is suitable for infants almost from birth, for peptic ulcer cases, and for women suffering from "morning sickness"; they can take it when almost everything else increases discomfort.
- 4 In addition to its therapeutic values, it is delicious in its own right as sweet blackcurrant syrup.

\* Following reports of unsatisfactory response to the therapeutic use of synthetic ascorbic acid in peptic ulcer cases, controlled tests using Ribena were instituted at various large British hospitals, with striking results. Clinical experience has also shown that in ulcerative gingivitis, the routine use of Ribena as an adjunct to local therapy has given more satisfactory results than that of the synthetic vitamin. The superiority is presumably due to the presence of other factors of the Vitamin C complex, possibly the Vitamin P, as well as mineral elements.

### Therapeutic uses

Ribena is recommended for all conditions requiring Vitamin C implementation: namely, as a natural and rapid restorative from fatigue; for increasing resistance to local infection and colds; for expectant and nursing mothers; for infants from birth; for children and adolescents; in many dental conditions; in peptic ulcer cases; in fractures and wounds; in blood dyscrasias and hæmorrhagic states; in infections and fevers; and in many skin disorders.

### Reports for doctors overseas

The makers of Ribena co-operated extensively with the Ministries of Food and Health during the war, a co-operation which still goes on to some extent even now. The Royal Forest Factory has attached to it a series of very fine laboratories where research into fruit juices and vitamins is conducted to an academic level, under the direction of an expert, lately in charge of the Fruit Products Section of the University of Bristol Agricultural Research Station. Reports of much of the work done are available, on application, to doctors and scientists overseas. These are likely to be of particular interest now that Ribena is being extensively exported.

Send for further information. A booklet entitled "Blackcurrant Juice in Modern Therapy: Natural Vitamin C" will be forwarded to you with pleasure; also details of a number of controlled tests made on the use of Vitamin C, if you will write to:—
