## FEBRUARY

**&\*** 

#### SHOW A LEG

"Came the dawn". Of all the words-and they must have run into hundreds of thousands—put together by the gifted creatures who wrote the sub-titles in the days of silent films, these three only are remembered. The dawn, when it did come, was generally welcome. The solitary horseman, silhouetted against it, meant that help was on the way; the stockade, a-bristle with the arrows of the Redskins, would be relieved, the cruel thongs which bound the heroine to the permanent way would be severed in the nick of time.

Upon the British in February the impact of dawn is less auspicious. Some people are better at getting up than others, but only a few invite our hostile incredulity by pretending that they like doing it. The daily round, the common task, viewed with half-open eyes from the sanctuary of our pillow, arouse in us a vehement repugnance. Why on earth, we wonder, did homo sapiens never take up hibernation?

Yet, somehow, day after day, we survive, by a supreme effort of the will, this test of character, and once we are out of bed, routine, like a conveyor-belt, bears us steadily forward out of oblivion and into the world. The day that dawn has ushered in is unlikely, for most of us, to include any hairbreadth escapes or last-minute rescues; but it will hardly prove as lacklustre as it appeared from our pillow.

Certainly the day will not lack interest at the Midland Bank. Thousands of customers will visit its branches and, when the Bank closes, more than 700,000 cheques will have passed through its hands.

## CASSELL MEDICAL BOOKS

READY FEBRUARY 25TH

## THE **PHYSIOPATHOLOGY** OF CANCER

Edited by FREDDY HOMBURGER, M.D., and WILLIAM H. FISHMAN, Ph.D.

This work provides a comprehensive cross-section of the scope and direction of current cancer research, each of the 28 eminent contributors having produced a critical evaluation of all work in his own field. The material has been carefully organized so that the reader is led from the basic biologic and chemical studies through the problems of clinical investigation to the practical applications in diagnosis and treatment.

By following the chapters consecutively the work provides a textbook for students, but its scope is so broad and each chapter so detailed that it may also be used by research workers as a reference book to the present state of progress in fields adjacent to their own.

GREENFORD, MIDDLESEX BYRon 3434.

For anxious, tense, restless patients Seconesin provides a safe relaxant-sedative. It introduces a totally new idea in sedation. Non-narcotic and with a minimum of secobarbital, there is no danger of cumulation or "hangover" because both components are rapidly eliminated. Seconesin acts promptly and its effect lasts for a few hours only. Day-time relaxation with Seconesin is so calming that most patients sleep well at night without further hypnotics or sedatives.

#### **COMPOSITION**

Each tablet contains:—

Mephenesin [3-(2-methylphenoxy)-

propane-1: 2-diol].....400 mg.

Secobarbital (Quinalbarbitone)......30 mg.

#### **DOSAGE**

1 tablet every 4-6 hours, preferably after meals, will give adequate day-time relaxation.

**PACKINGS** 

Bottles of 25 and 100 tablets.

PHARMACEUTICAL MANUFACTURING CO., ASHLEY ROAD, EPSOM, SURREY
The Local Anaesthetic Specialists

"Sanatogen
will do you
more good than
any tonic I can
prescribe"

Half the patients in your waiting room may be people who "want a tonic, doctor". Their symptoms vary, and may be referred to any system—headaches, insomnia, fatigue, flatulent dyspepsia, constipation or diarrhoea under stress; palpitations and dyspnoea on effort; frequency and precipitancy of micturition; and the aches and pains (the largest group)—backache, arthritis, neuralgia and "rheumatism". There may be, particularly in this last group, a minor physical disability, causing discomfort which is magnified to severe pain.

Though symptomatic treatment is often prescribed for many of these patients, a factor common to them all is the strain of coping with life's difficulties—either because the conditions of their lives are too much for even the strongest to bear, or because for a weak character the ordinary worries of life are too great a burden.

These people come to the doctor for help; he does help, just by listening; but they also want something they can take which will make them feel better, able to face life again. What tonic is really needed? A

mere pick-me-up or a first-class protein tonic which gives lasting benefit to the patient?

Have you considered Sanatogen for these patients?

What is Sanatogen? It is 95% casein, with 5% sodium glycerophosphate in the form of a casein-glycerophosphate complex. In debilitated states, or in convalescence after illness or injury, Sanatogen can be recommended with complete confidence. Sanatogen is unusual amongst tonic preparations in that it has both a nutrient and a tonic effect. By reason of its high protein content it supplies the patient with an extra 24 grams of first-class protein daily, equivalent to the protein content of four eggs (but free from fat and cholesterol) and at approximately half the cost. To this, glycerophosphates add a specific tonic effect.

Sanatogen, it should be remembered, has been used most successfully for more than 50 years and has a unique record for "toning up" the debilitated patient. You can in all sincerity say "Sanatogen will do you more good than any other tonic I can prescribe".

## Where combined action Succeeds

From apparent defeat, many a contest is won by combined action. The joint administration of penicillin and the sulphonamides frequently establishes successful therapy, when the oral administration of the antibiotic or chemotherapeutic agent alone has been ineffective.

Sulpenin, containing penicillin, sulphadiazine and sulphamerazine in balanced dosage is a convenient means of applying combined therapy in the treatment of many infections due to susceptible microorganisms. By utilising the synergistic action known to exist between penicillin and the sulphonamides, the antibacterial range is increased, the likelihood of kidney damage is lessened and the tendency for the bacteria to develop mutant strains resistant to one or other of the component drugs is reduced.

# SULPENIN

Combined Oral Penicillin and Sulphonamide Therapy

Theodrox compare favourably with those produced by parenteral administration of aminophylline.

\* Micrograms of theophylline per 100 c.c. of blood.

Prior to the introduction of Theodrox the usefulness of oral aminophylline has been limited by failure to obtain adequate blood levels because of gastric intolerance. With Theodrox this difficulty is overcome and effective oral dosage is entirely feasible. Each tablet of Theodrox contains 3 gr. of aminophylline B.P. with 4 gr. of dried aluminium hydroxide gel, B.P.C.

In the form of Theodrox, aminophylline can be administered orally to produce results comparable with intravenous or intramuscular dosage, yet without the inconvenience and danger of parenteral administration.

Theodrox is supplied in containers of 25, 100 and 1,000 tablets.

Theodrox is also available as Theodrox with Phenobarbitone, each tablet containing in addition & gr. of Phenobarbitone B.P.

HIGH WYCOMBE - BUCKINGHAMSHIRE - ENGLAND

Contains skin-penetrating esters of salicylic, nicotinic, and p-aminobenzoic acids. It brings real relief to deep-seated muscular rheumatism by simple inunction.

Transvasin, a new preparation developed by Hamol S.A., our Swiss associates, and now available for prescription in this country, contains esters of salicylic, p-aminobenzoic and nicotinic acids. These esters, being both water- and fat-soluble, readily pass the skin barrier in therapeutic quantities and enable an effective concentration of the drugs to be built up where they are needed. Transvasin not only induces vasodilation of the skin with a superficial erythema but also brings about a deep hyperaemia of the underlying tissues. It is completely non-irritant, and can be safely used on the most sensitive skin.

It is now being widely prescribed, with highly successful results. There is evidence, also, that since a very small quantity is sufficient for each application the cost of treatment is extremely low.

Salicylic acid tetrahydrofurfuryl-ester	14%
Nicotinic acid ethyl-ester	2%
Nicotinic acid n-hexyl-ester	2%
p-Aminobenzoic acid ethyl-ester	2%
Water-miscible cream base ad	100%

Transvasin is not advertised to the public. It is available in 1 oz. tubes at 3/4½d. plus 7½d. P.T., and is obtainable on Form E.C.10.

Samples and literature will be gladly sent on application.

## Ultra-violet radiation

—described by one eminent authority as "the most vitalizing of all measures"—is the speciality of Hanovia Ltd. of Slough, who have maintained their lead in this field for over 25 years. General bodily irradiation, of proven value in a wide variety of conditions from acidosis to whooping cough, can be provided by the Alpine Sun Lamp for the individual patient, or the Centrosol for groups; the water-cooled Kromayer Lamp has been designed for topical or orificial application of heavier counter-irritant deses, as in the treatment of Arthritis.

The tonic value also of these life-giving rays must not be overlooked. Except in a few instances of definite contra-indication, it can be said that there is no invalid or convalescent whose condition cannot be ameliorated by the judicious use of ultra-violet radiation, either as a sole or concomitant measure. A range of small prescription lamps is available, and can be recommended for use in the patient's own home in suitable cases.

Further particulars of equipment, indications and technique, will be gladly sent on request.

# JAEGER

Jaeger body-belts are made of pure wool, for these reasons. Wool keeps its wearer cool in summer, warm in winter. Wool disposes quickly of perspiration, retaining body warmth. Wool, being porous, allows both the escape of exhalations from the skin, and the access of pure air to the skin. Jaeger body-belts sit well, stay in position, and give support without pressure. They are available in all sizes.

JAEGER HOUSE, 204-206 REGENT STREET, W.I

## When nourishment

## is the main problem . . .

Brand's Essence is a first-class protein of animal origin. Being partly hydrolized, it is capable of easy ingestion, digestion and absorption. It is extremely palatable, and may be taken either as a jelly or as a liquid. It helps to support convalescence and assists in restoring a positive nitrogen balance.

The major indications for the administration of Brand's Essence are loss of appetite during fatigue, acute infections, and dysphagia or digestive disturbances due to organic or bacterial lesions of the mouth, oesophagus and alimentary tract, and after surgical procedures.

The addition of Brand's Essence to low residue and weightreducing diets is especially appreciated by the patient.

## Brand's Essence

(BEEF OR CHICKEN)

# It depends what you mean by 'Banking'

OF COURSE we safeguard money and cash cheques. But we go further. We maintain specialist departments whose functions, although not 'banking' in the usual sense, can nevertheless be used to very good purpose. These departments will, for example, act as an Executor, help with a customer's Income Tax problems, obtain currency for foreign travel. They will do many more things besides. But the moral of this multiplicity of functions is simply this: if you have any problem of finance or business, the chances are that we can help you deal with it. And that is what we mean by 'banking'.

WESTMINSTER BANK

## Advantages of the Daimler Limousine **Ambulance** Service

When patients find a normal car too fatiguing, yet wish to avoid travelling in a public ambulance, the need is met by engaging a Private Limousine Ambulance from Daimler Hire Ltd. The Ambulance has the appearance of a large private limousine.

A fully trained attendant accompanies each driver. Each Limousine Ambulance is equipped with a swivelling bed, folding carrying chair, canvas carrying slings and sick-room cabinet. Air beds are available if required. Two comfortable chair-seats are provided. Adequate heating and ventilating is automatically assured.

★ A booklet giving full details of this service is available on request. Please write or telephone:-

## all foot troubles caused by footwear, if from babyhood none but Clarks shoes are worn, fitted by Clarks Footgauge.

Clarks back this promise with 129 years of shoe craftsmanship. They keep it by making children's shoes which are based on the natural shape of a child's foot...made in different widths to each length size...fitted with scientific accuracy on a special Footgauge for length, for breadth

and for girth. That's why so many children in over 60 countries in the world wear Clarks.

## POLLERGEN (DUNCAN)

#### COMBINED

indicated in

● SEASONAL HAY FEVER ● CORYZAL ASTHMA Researches in Allergy have clearly demonstrated that more success is to be achieved by treatment with a combined pollen extract than with simple extracts of pollen such as Timothy Grass.

Pollergen is a combined extract of those pollens which have proved to be most frequently responsible for the onset of Hay Fever and Hay Asthma, and treatment should be commenced early in the year so as to ensure that maximum dosage is attained before the Pollen Cloud is at its height.

#### APPOINTMENTS

Applicants should state name, address, age, nationality, qualifications, and enclose 3 copies (unless otherwise specified) of recent ★ testimonials with short statement of experience and appointments held.

Applications should be sent at once if no closing date is given. Canvassing in any form will disqualify.

\*SERVICE MEMBERS may have difficulty in supplying recent testimonials, but this should not deter them from applying.

A fully registered medical practitioner who is liable for National Service must obtain deferment of recruitment in writing from the Central Medical Recruitment Committee or (in Scotland) the Scottish Central Medical Recruitment Committee before accepting any civilian appointment.

The position of provisionally registered medical practitioners who are liable for National Service has been made clear in a notice sent to them by the Ministry of Labour and National Service.

#### SALARY SCALES OF JUNIOR GRADES OF HOSPITAL MEDICAL STAFF

#### Registrar Grades, Whole-time

(a) REGISTRAR: Posts obtained normally not less than two years after registration as a medical or dental practitioner and held normally for two years: £775 per annum in the first year; £890 per annum in the second and any subsequent years.

(b) SENIOR REGISTRAR: Posts obtained normally not less than four years after registration as a medical or dental practitioner and held normally for four years; £1,000 per annum in the first year; £1,100 per annum in the second year; £1,200 per annum in the third year; £1,300 per annum in any subsequent years.

#### Other Grades, Whole-time

(a) HOUSE OFFICERS (including Dental)

(i) Provisionally registered medical practitioners: £350 per annum for the first post held; £400 per annum for the second and any subsequent post held.

(ii) Fully registered practitioners: £350 per annum for the first post held; £400 per annum for the second post held; £450 per annum for the third and any subsequent post held. provided that a medical practitioner who has held house posts under (i) above whilst provisionally registered shall be remunerated at the rate of £450 per annum for each post held after obtaining full registration; and provided that in exceptional circumstances, subject to the consent of the Minister (in Scotland of the Secretary of State), the rates under (ii) may be exceeded by up to £50 per annum where a post cannot be filled otherwise.

A deduction at the rate of £100 per annum shall be made from the remuneration of House Officers in respect of board and lodging and other services provided. Each post shall be tenable for six months.

(b) SENIOR HOUSE OFFICER: Posts obtained normally not less than one year (in Scotland, two years) after registration as a medical or dental practitioner and normally held for one year only: £670 per annum.

(c) JUNIOR HOSPITAL MEDICAL OFFICER: Officers who have held house appointments but who are not Registrars and who have less responsibility than other hospital officers of non-consultant status: £700 (for an officer appointed not less than two years after registration as a medical practitioner) by £50 to £1,000 per annum.

#### ALL NATIONAL HEALTH SERVICE HOSPITAL APPOINTMENTS ARE IN ACCORDANCE WITH THE TERMS AND CONDITIONS OF SERVICE OF HOSPITAL MEDICAL STAFF

Those intending to apply for resident appointments in the Registrar grades are recommended to make inquiries with regard to the deductions proposed for board and lodging at the time of submitting their applications, where this is not stated in the advertisement.

# 'MEPILIN'

# for the menopausal patient

The association of methyltestosterone and ethinylœstradiol in Mepilin produces a more complete response in the treatment of menopausal disorders than can be obtained by the use of œstrogens alone.

The presence of methyltestosterone enables a reduction in œstrogen dosage to be made; thus undesirable side effects such as breast turgidity and pelvic congestion are avoided and the risk of withdrawal bleeding is reduced. An increased feeling of confidence and well-being is produced which is both mental and physical.

Each teaspoonful (4 ml.) of Mepilin Elixir and each Mepilin Tablet contains ethinylæstradiol 0.01 mg. and methyltestosterone 3 mg.

'MEPILIN' TABLETS Bottle of 25 at 4/4 and 100 at 14/6

'MEPILIN' ELIXIR Bottle of 4 fl. oz. at 6/and 20 fl. oz. at 23/-. Basic N.H.S. Prices DOSAGE: Menopause and geriatric conditions: average cases—3 tablets or 3 teaspoonsfuls daily, Premenstrual tension and dysmenorrhea—2 tablets or 2 teaspoonsfuls daily from 10th to 22nd day of the menstrual cycle.

Literature and specimen packings are available on request
