

SPIKING & CO.'S MALT BISCUITS.

FOR INFANTS AND INVALIDS.

Messrs. S. and Co. beg to call special attention to these Biscuits, and to recommend them most confidently to the notice of the Profession and the Public, as having been proved to be of the greatest benefit both to Infants and Adult Invalids.

In an able article on "The Art of Feeding Babies," attributed to Dr. Druitt, it is said:—"We must notice the very ingenious MALT Biscuits made by Spiking, of Dover Street; these contain the malt and wheaten flour in the form of a biscuit; they keep any time, and require no more cooking than any other nursery biscuit. When mixed with milk-and-water, they dissolve into a smooth custard-like mass, with nothing lumpy or pasty about them. We have known them eagerly used by adults troubled with great irritation of stomach and bowels. They make capital imitation of custard."—See *Medical Times and Gazette* of August 24, 1867.

Price 8d. per lb., or 4s. 6d. per box.

SPIKING & CO., 5, DOVER STREET, PICCADILLY, W.

SPIKING & CO.'S GRANULATED MALT FOOD,

FOR INFANTS AND INVALIDS,

Is specially recommended as containing all the constituents of their celebrated MALT BISCUITS in an entirely new form, which, while it is far more portable than the Biscuits, possesses all their advantages, being as easily prepared and as readily digestible.

Sold by SPIKING & CO., 5, Dover Street, Piccadilly, and all Chemists, in Tins, One Shilling each.

FERRIS & CO.'S

SYRUP OF CHLORAL HYDRAT.

(Registered.) Price 8s. per lb.

Medical gentlemen will find this a most elegant and convenient formula for the exhibition of Chloral; it is perfectly clear and stable, and the acrid taste and unpleasant odour of Chloral are completely covered. Prepared of definite strength and from Chloral of ascertained purity, it may always be relied upon. Each drachm contains 10 grains of Chloral Hydrat.

From the "Lancet," Feb. 19, 1870.

"Messrs. FERRIS and Co., the well-known chemists of Bristol, have sent us a specimen of a new syrup of chloral hydrate which promises to prove very useful. Each drachm of the syrup contains, along with some balsamic ingredients, ten grains of the chloral, and is a convenient dose for whooping cough (according to our own experience) to be given every four or six hours. For a hypnotic dose, from two to four drachms should be given at once, according to the patient's age, etc. We think the new preparation will be found extremely useful."

From the "Medical Times and Gazette," Feb. 12, 1870.

"The HYDRATE OF CHLORAL is coming largely into use as a soothing medicine, and any preparation which tends to render it more easily taken will be welcome. Messrs. FERRIS and Co. have succeeded in preparing a tolerably palatable and easily dosed syrup which will save much trouble in dispensing. We have administered it in a case of obstinate irritable cough during pregnancy, and in another of sleeplessness from general malaise and mental anxiety, and have found it agree perfectly, and produce the desired result in both cases. We may add that the syrup contains ten grains of pure chloral to the drachm, and that the price is 8s. per pound."

MAY BE PROCURED DIRECT FROM THE SOLE MANUFACTURERS,

FERRIS, BOORNE, TOWNSEND, and BOUCHER,
WHOLESALE DRUGGISTS, BRISTOL.

And through all leading Wholesale and Retail Chemists in Great Britain and the Colonies.

N.B.—2 lbs. Syrup of Chloral, or 1 lb. Nепenthe and 1 lb. Syrup of Chloral, sent carriage paid to any Railway Station in the Kingdom, on receipt of a Post-office Order for 16s.

In prescribing, please write—Syrupus Chloral Hydrat. (Ferris).

NEPENTHE.

PREPARED EXCLUSIVELY FROM OPIUM. (Dose the same as Tinctura Opii.)

Nepenthe does not produce headache, stupor, giddiness, depression of spirits, diminution of nervous energy, prostration of strength, nor constipation, but induces natural and refreshing sleep. It may be used with perfect safety in every case where an Opiate is indicated, and from the peculiar process by which it is prepared it is deprived of all constituents which render the Tinctura Opii, and most other forms of Opium, in very numerous instances wholly inadmissible. It is always of UNIFORM STRENGTH, and in this respect possesses high advantages. Price 8s. per lb.

From the "Lancet," Dec. 18, 1869.

"NEPENTHE, OR ANODYNE TINCTURE, prepared by Messrs. FERRIS & Co., Bristol.—This preparation really consists, as stated, solely of opium, resembling somewhat the liquid extract of the British Pharmacopoeia. It is claimed for it that it does not produce headache, stupor, giddiness, depression of spirits, diminution of nervous energy, prostration of strength, nor constipation; it is doubtless less stimulating than those preparations of opium made with the solid and crude drug; and a further commendation of Nepenthe is its uniformity of strength. The Nepenthe intended for subcutaneous injection is of double the ordinary strength; and that it is really so we have verified by analysis."

May be procured direct from the Sole Manufacturers,

FERRIS, BOORNE, TOWNSEND, and BOUCHER,
Wholesale Druggists, Bristol,

And through all leading Wholesale and Retail Chemists in Great Britain and the Colonies.

NOTICE.—Notwithstanding the enormous and increasing advance in Opium, the price of Nepenthe remains the same, and it is now the cheapest as well as the best preparation of this important drug.
