## THE NATURAL FRIEDRICHSHALL BITTER WATER,

One of the most popular among the numerous Mineral Waters of Germany.

Not only does this Water possess a high reputation among the people as a curative, but—and it is on this we lay greatest stress—it is highly recommended by the Faculty, and is in almost daily use in most clinical hospitals.

"This water, which may be employed advantageously at home, especially in Winter, by those who cannot conveniently go to a mineral spring, is a well-proved mild aperient and powerful dissolvent. It improves the appetite, strengthens the digestive organs, and, by banishing lassitude and melancholy, renders occupation a pleasure instead of a labour. It is an excellent remedy for cold in the chest and bowels, and has been used more particularly with the best results in cases of long continued disorder of the abdomen. Its effect is excellent in constipation, piles, obstructions in the bowels, tendency of blood to the head and breast, and inflammation of the womb. Its efficacy has been proved against scrofula, obesity, pleurisy, and may be used simultaneously with such popular remedies as the whey-cure, etc. The effect of the Water is gentle and gradual, and neither requires a particular diet nor the slightest interruption to one's usual business. The Friedrichshall Bitter Water, accompanied by printed directions for use, may be had of all Apothecaries and Dealers in Mineral Waters.

## SOLUTION OF BIMECONATE OF MORPHIA.

(Vide "LANCET," MARCH 4, 1839.)

This preparation has been used by the leading Physicians and Surgeons for the last thirty years.

**DR. MACLEOD** stated that it rarely produced headache, and has repeatedly answered where opium has disagreed, and succeeded in cases where the other salts of Morphia had failed to give relief.

**Dr. A. T. THOMSON** said it possessed anodyne properties superior to any of the salts of Morphia in ordinary use.

**Dr. ROOTS** states that he had taken every other preparation of Opium, but from none of them had obtained the some degree of quiet rest that he enjoyed from this Bimeconate of Morphia.
