

Postgraduate Courses At Home . . .

The Medical, Surgical and Pediatric Clinics of North America are the nearest things in print to-day to actual attendance at postgraduate courses in the great medical teaching centres of America. They bring to your own desk or own armchair, in the most useful form possible, the *NEW THINGS* in Medicine, Surgery, and Pediatrics—*WHILE THEY ARE STILL NEW*.

MEDICAL CLINICS OF NORTH AMERICA

Each number contains an important symposium, selected by the expressed wishes of subscribers, covering such problems as: *Pulmonary Disease; Specific Methods of Treatment; Cardio-vascular Disease; Rheumatic Diseases; Emergencies in General*

Practice; Efficacy of New Drugs, etc. Published in January, March, May, July, September, and November. *Cloth Covers:* £5 per year in U.K., and £6 6s. elsewhere. *Paper Covers:* £4 5s. in U.K., and £5 5s. elsewhere.

SURGICAL CLINICS OF NORTH AMERICA

Symposia on such subjects as: *Surgery for the Poor Risk Patient and the Aged; Thoracic Surgery; Neurological Surgery; Total Care of the Surgical Patient; Obstetrics and Gynecology; Tech-*

niques and Procedures in Surgery, etc. Published in February, April, June, August, October, and December. Same prices as for Medical Clinics (above).

PEDIATRIC CLINICS OF NORTH AMERICA

Symposia cover such topics as: *Care of the Premature; Cardio-vascular Disease; Pediatric Emergencies and Accidents; Pediatric Allergy; Pediatric Orthopedics, etc.* Published in February,

May, August, and November. £4 10s. per year in U.K., and £5 5s. elsewhere.

FERROMYN

(Ferrous Succinate)

**THE NEW ORGANIC IRON—A COMPLETE RANGE AT
REDUCED PRICES**

50% reduced dosage

50% higher utilisation

30% reduction in price

This new iron preparation presents Ferrous Succinate, the bivalent iron salt of succinic acid. Succinic acid, together with glycine is essential for the synthesis in the red bone marrow of a porphyrin (hæm) containing iron.

The controlled clinical trials with FERROMYN show a mean utilisation factor of 42% as compared with the mean utilisation factor of 28% with Ferrous Gluconate and 14% with Ferrous Sulphate.

A notable feature of this preparation is that the very favourable response is obtained with the minimum overall dosage of ferrous salt thus ensuring minimum risk of toxic reaction.

The range of FERROMYN preparations has been extended to include ELIXIR FERROMYN and ELIXIR FERROMYN 'B'.

SOLUBLE PENICILLIN

All the advantages of
soluble penicillin
in a

***STABLE

- *attacks* with higher, faster blood levels
and
follows through with sustained activity
in the tissues

This new oral penicillin is different in a very important respect. It presents *soluble* potassium penicillin—most effective form for oral therapy—in a stable, palatable liquid.

To secure the most rapid and decisive results by mouth, penicillin must be speedily absorbed to give a high initial destructive level (by far the most conclusive attack), followed by a sustained inhibitory level at the infected focus. This is undoubtedly best achieved with soluble potassium penicillin, which is absorbed from the alimentary tract with the greatest efficiency.

It is this form of penicillin that is presented in

Crystapen Liquid. Each fluid drachm (teaspoonful) contains 200,000 units of potassium penicillin in a discreetly flavoured fluid vehicle.

The true merit of this preparation is revealed by the fact that the initial peak level is secured in *addition* to the prolonged level, *not at the expense of it*. Indeed, Crystapen Liquid exerts a sustained therapeutic effect lasting six hours or more—as long as that of any other form of oral penicillin. In short, this preparation not only delivers a swift lethal attack on susceptible organisms, but also *follows through* with sustained activity in the tissues.

A NEW ADJUVANT IN THE TREATMENT OF RESPIRATORY DISORDERS

Lloyd-Hamol Ltd., of London and Zurich, presents to the medical profession a new decongestive salve, Thoracin, for the symptomatic relief of coughs, colds and respiratory disorders.

This diagram shows how Thoracin components penetrate the skin, are carried by the bloodstream to the alveoli and excreted there to exert their effect.

FORMULA

Phenyl Ethyl Nicotinate	2.0% w/w
Guaiacol Furoate	5.0% w/w
Tetrahydrofurfuryl Salicylate	10.0% w/w
Camphor	3.0% w/w
Eucalyptol	2.0% w/w
Water-Miscible Base to	100.0%

► The Thoracin formula is based on the same principles that have made Transvasin so successful in the treatment of rheumatic conditions.

► Thoracin is composed of esters of substituted hydroxy aromatic derivatives.

► Thoracin achieves the effect of the classic counter-irritant remedies — poultices, plasters and cupping — without irritation of the skin.

► Thoracin contains a new ester of Guaiacol that is entirely free from the evil smell and irritant effect associated with this phenol derivative in its pure form. This ester easily penetrates the skin, and is excreted in the alveoli, where it exerts its well-known action.

► Thoracin ensures vasodilation of the superficial skin vessels by the use of esters of nicotinic acid.

► Thoracin relieves reflex spasm of the pectoral muscles by the use of the tetrahydrofurfuryl-ester of salicylic acid.

► Thoracin brings to the alveoli via the bloodstream the sedative, antispasmodic, and expectorant properties of camphor and eucalyptus.

THORACIN is available in 1 oz. tubes — basic price 2/6 plus 7½d. P.T. It is an ethical product, and is not advertised to the public. Since a very small quantity is sufficient for each application, the cost of treatment is extremely low. *Samples and literature will be gladly sent on application.*

A new cough specific

(Sodium 2:6 ditertiarybutylnaphthalene Monosulphonate)

suppresses cough with no undesirable side-effects

SODIUM 2:6 ditertiarybutylnaphthalene Monosulphonate (Becantyl), a product of original research, is a new agent that is specific in suppressing cough. It is unrelated to morphine and guaiacol.

BECANTYL does not cause constipation, anorexia, drowsiness or any undesirable side-effects; being devoid of side-effects BECANTYL may be prescribed for infants, children, and the aged.

Clinical experience supports the value of BECANTYL in suppressing all types of cough, and shows that it does not suppress expectoration.

BECANTYL may be used in the treatment of all types of cough. There are no contra-indications to its use.

BECANTYL is presented in 4 fluid ounce, 40 fluid ounce, and 80 fluid ounce bottles.

'SERPILOID' BRAND

One of the active alkaloids of *Rauwolfia serpentina* Benth.

RAUWILOID

Regd.

Riker's original preparation of mixed alkaloid hydrochlorides of *Rauwolfia serpentina*, remains available as before. "RAUWILOID" presents in a refined form, accurately standardized, all the desirable activity of the crude root. Inert matter and undesirable constituents—for example, yohimbine alkaloids—are eliminated by the extraction process.

Reserpine is probably the most sedative of the active principles of *Rauwolfia*, and is also responsible for part of the hypotensive and bradycardic effects of the crude drug.

INDICATIONS:

- A. Mild and labile hypertension, and, in combination with potent agents, severer types of hypertension.
- B. In psychiatry, for the treatment of anxiety neuroses, tension and psychotic states involving hyper-activity. In these indications reserpine's high index of sedative activity is particularly valuable.

Available in 0.25 mg., and 0.5 mg. tablets in bottles of 100 and 1,000.

AGAINST MALNUTRITION

'VIMALTOL', a delicious, nourishing vitamin preparation, has achieved wide popularity as a supplementary food item against malnutrition in infants, children and adults. It can be used with advantage whenever nutritional levels are unsatisfactory. It can also be usefully employed when vitamin intake is insufficient, for example, due to distaste for natural vitamin-bearing fruits and other foods.

'Vimaltol' is a quality product from the 'Ovaltine' Research Laboratories. Its balanced formula, which includes special malt extract, high vitamin potency yeast, halibut liver oil and iron, has been developed in the light of recent findings of dietetic science. 'Vimaltol' actively assists in growth and development and helps to raise resistance against the onset of infection.

For these reasons, it is widely prescribed for the young because of their higher metabolic requirements. It is highly palatable, readily assimilable and quickly available.

Radio-active wear detector brings to motorists
the biggest advance ever made in car lubrication

80% Less Engine Wear

with new BP Special Energol

'VISCO-STATIC' MOTOR OIL

UP TO 12% LOWER PETROL CONSUMPTION

Doubles the life of your engine

THIS IS WONDERFUL NEWS. You can save 80% of engine wear, cut petrol consumption and enjoy easier starting and greater reliability than ever before thought possible.

BP Special Energol is a new kind of motor oil introduced by The British Petroleum Company for use in all four-stroke petrol engines in good condition. Tests in the laboratory and on the road prove that BP Special Energol cuts engine wear by 80% and actually doubles the life of your engine.

You also save substantially on petrol consumption — 5-10% on normal running and up to 12% on start and stop running such as a doctor does. BP Special Energol with all its advantages costs only 50% more than conventional premium oils. On petrol saving alone it more than repays the extra cost.

'Visco-static'?

BP Special Energol 'Visco-static' is quite unlike any conventional motor oil. It is as thin when cold as the lightest grade of lubricating oil at present sold. Yet it is as thick when hot as the grades normally recommended for summer use. This special property in an oil is what lubrication scientists have been striving after for many years. It means ideal lubrication at all temperatures *using only this one grade of oil* for all engines and seasons where S.A.E. grades 10W to 40 are normally recommended.

It is the reason why BP Special Energol

Radio-activity provides the proof

This picture shows a radio-active piston ring being fitted into the special wear research engine at the BP Research Station at Sunbury. When the engine is running, radio-active particles in the oil stream show the rate of engine wear while it is happening. By condensing years of wear tests into weeks, this equipment has provided exhaustive proof of the value of BP Special Energol.

not only reduces wear and petrol consumption but improves motoring performance and reliability in almost every way.

Easier starting than you have ever known

BP Special Energol flows freely even in extreme cold so that the engine will turn over more freely. Starting even in mid-winter is no more difficult than in high summer. Your battery lasts longer.

No oil starvation and less wear

Full lubrication begins from the first turn of the engine. Abrasive products on

the cylinder walls are washed away immediately. This saves an enormous amount of wear on both your piston rings and cylinder walls. BP Special Energol includes additives which give outstanding film strength, acid resisting properties and detergency.

Less oil consumption

By reducing wear, BP Special Energol also reduces oil consumption. It maintains ample viscosity for good lubrication even at the hottest parts of the engine, near the piston rings.

How to use BP Special Energol

BP Special Energol should not be mixed with conventional oils. The sump should be drained and refilled with the new oil and this should be repeated after the first 500 miles. Future oil changes should be after the normal mileage recommended by the makers of your car.

When not to use BP Special Energol

If your engine is worn and will shortly need overhauling, do not use BP Special Energol. The normal grades of BP Energol are still on sale and will help your engine to give the best possible service until it has been overhauled. Your garage manager will be glad to give advice if you are in any doubt.

BP Special Energol is obtainable at garages where you see the BP Shield. It is coloured red for easy identification and sold in sealed packages.

4 Good reasons why it's wiser to smoke Pall Mall...

★ For the absorption and adsorption of nicotine and tars, pure cotton-wool is specially laid in the mouthpiece. Watch the colour change as you smoke.

★ Recessed deep in the mouthpiece, the built-in filter prevents contact between lips and trapped tars.

★ Only the purest of cigarette paper is used—crimp-sealed and not gummed, therefore no resinous adhesive is smoked.

★ Matured Virginia tobaccos, from the cream of the crop, are used in Pall Mall—backed by Rothmans 60 years experience of fine blending. Taste again the flavour of real Virginia.

LUCOZADE as an improved form of glucose therapy

Lucozade combines all the known qualities of glucose with a unique palatability.

Hence its unusual versatility—as a revitalising drink, as a means of sustenance when solids cannot be tolerated, and as the ideal answer when the appetite is impaired. Lucozade will be tolerated by the most difficult patient.

APPOINTMENTS

Applicants should state name, address, age, nationality, qualifications, and enclose (unless otherwise specified) one copy each of 3 recent ★ testimonials with short statement of experience and appointments held.

Applications should be sent at once if no closing date is given.

Canvassing in any form will disqualify.

★SERVICE MEMBERS may have difficulty in supplying recent testimonials, but this should not deter them from applying.

A fully registered medical practitioner who is liable for National Service must obtain deferment of recruitment in writing from the Central Medical Recruitment Committee or (in Scotland) the Scottish Central Medical Recruitment Committee before accepting any civilian appointment.

The position of provisionally registered medical practitioners who are liable for National Service has been made clear in a notice sent to them by the Ministry of Labour and National Service.

SALARY SCALES OF JUNIOR GRADES OF HOSPITAL MEDICAL STAFF

Registrar Grades, Whole-time

(a) **REGISTRAR:** Posts obtained normally not less than two years after registration as a medical practitioner and held normally for two years: £850 per annum in the first year; £965 per annum in the second and any subsequent years.

(b) **SENIOR REGISTRAR:** Posts obtained normally not less than four years after registration as a medical practitioner and held normally for four years: £1,100 per annum in the first year; £1,200 per annum in the second year; £1,300 per annum in the third year; £1,400 per annum in any subsequent years.

Other Grades, Whole-time

(a) HOUSE OFFICERS:

(i) *Provisionally registered medical practitioners:* £425 per annum for the first post held; £475 per annum for the second and all subsequent posts held;

provided that the employing authority (subject in the case of a Hospital Management Committee to the consent of the Regional Hospital Board) shall have discretion to determine that the remuneration of any officer holding his first post in the National Health Service as a House Officer shall be £475 per annum if they are satisfied that the officer has held at least one hospital post outside, of not less than six months' duration, involving clinical responsibilities equivalent to those of house posts in the National Health Service and supervised by appropriate specialist staff.

(ii) *Fully registered medical practitioners:* £525 per annum for any post held; provided that in exceptional circumstances, subject to the consent of the Minister, this rate may be exceeded by up to £50 per annum where a post cannot be filled otherwise.

In each case under sub-sections (i) and (ii) above, a deduction of £125 per annum in respect of board and lodging and other services provided shall be made and each post shall be tenable for six months.
