

THE BRITISH DIABETIC ASSOCIATION

Since its founding in 1934, the Association has contributed greatly to the welfare of the whole diabetic community. Membership is now about 18,000 consisting of lay diabetics, doctors, almoners, nurses and other persons interested in the progress of treatment of diabetes and in improving the economic, social and psychological conditions of diabetics.

Medical practitioners are requested to call the attention of their diabetic patients to the Association's aims and achievements.

A reduced subscription rate of 10/- p.a. is allowed to doctors during the five years following medical registration.

A NEW ADJUVANT IN THE TREATMENT OF RESPIRATORY DISORDERS

Lloyd-Hamol Ltd., of London and Zurich, presents to the medical profession a new decongestive salve, Thoracin, for the symptomatic relief of coughs, colds and respiratory disorders.

This diagram shows how Thoracin components penetrate the skin, are carried by the bloodstream to the alveoli and excreted there to exert their effect.

FORMULA

Phenyl Ethyl Nicotinate	2.0% w/w
Guaiacol Furoate	5.0% w/w
Tetrahydrofurfuryl Salicylate	10.0% w/w
Camphor	3.0% w/w
Eucalyptol	2.0% w/w
Water-Miscible Base to	100.0%

► The Thoracin formula is based on the same principles that have made Transvasin so successful in the treatment of rheumatic conditions.

► Thoracin is composed of esters of substituted hydroxy aromatic derivatives.

► Thoracin achieves the effect of the classic counter-irritant remedies — poultices, plasters and cupping — without irritation of the skin.

► Thoracin contains a new ester of Guaiacol that is entirely free from the evil smell and irritant effect associated with this phenol derivative in its pure form. This ester easily penetrates the skin, and is excreted in the alveoli, where it exerts its well-known action.

► Thoracin ensures vasodilation of the superficial skin vessels by the use of esters of nicotinic acid.

► Thoracin relieves reflex spasm of the pectoral muscles by the use of the tetrahydrofurfuryl-ester of salicylic acid.

► Thoracin brings to the alveoli via the blood stream the sedative, antispasmodic, and expectorant properties of camphor and eucalyptus.

THORACIN is available in 1 oz. tubes — basic price 2/6 plus 7½d. P.T. It is an ethical product, and is not advertised to the public. Since a very small quantity is sufficient for each application, the cost of treatment is extremely low. *Samples and literature will be gladly sent on application.*

'Penavlon' penicillin tablets ensure precision in dosing

'Penavlon' Tablets are supplied in two strengths, 200,000 units and 500,000 units of penicillin respectively, to facilitate the prescribing of convenient dosage schedules.

'Penavlon' can always be relied upon

- **the tablets are uncoated**

They rapidly disintegrate after ingestion and the penicillin is quickly absorbed.

- **full potency is assured**

Moisture-free processing during formulation and special packing ensure full potency at the time of dispensing. Storage tests under normal conditions of usage have proved their stability.

'PENAVLON' penicillin Tablets B.P., contain soluble crystalline penicillin G (potassium salt) of the highest quality and potency. They provide an effective and convenient means of giving penicillin by the mouth and are at the same time the least expensive oral formulation of the antibiotic.

RELEASING EXCESS FLUID

The need for a safe, potent oral drug for the rapid treatment of oedema has long been felt by doctors in hospital and general practice. This need is now adequately fulfilled by the introduction of DIAMOX Acetazolesamide, a new oral diuretic that is neither a mercurial nor xanthine derivative.

Based on a new concept—the induction of diuresis by inhibiting the enzyme carbonic anhydrase—DIAMOX is rapidly absorbed and excreted largely unchanged by the kidney. It is not a renal irritant, nor is it cumulative. After a single morning dose copious diuresis results. In most cases of left-sided heart failure, DIAMOX alone will maintain the patient oedema-free. Patients with severe right-sided heart failure, involving accumulations of fluid, may require paracentesis or mercurial injections to initiate response, after which dry weight can usually be maintained with DIAMOX alone.

Not a mercurial or xanthine derivative

Single dose induces diuretic response for 6-12 hours

Potent yet remarkably safe

Permits undisturbed sleep at night

Ideal for long-term therapy and for regular use at home

A new cough specific

(Sodium 2:6 ditertiarybutylnaphthalene Monosulphonate)

suppresses cough with no undesirable side-effects

SODIUM 2:6 ditertiarybutylnaphthalene Monosulphonate (Becantyl), a product of original research, is a new agent that is specific in suppressing cough. It is unrelated to morphine and guaiacol.

BECANTYL does not cause constipation, anorexia, drowsiness or any undesirable side-effects; being devoid of side-effects BECANTYL may be prescribed for infants, children, and the aged.

Clinical experience supports the value of BECANTYL in suppressing all types of cough, and shows that it does not suppress expectoration.

BECANTYL may be used in the treatment of all types of cough. There are no contra-indications to its use.

BECANTYL is presented in 4 fluid ounce, 40 fluid ounce, and 80 fluid ounce bottles.

MALARIA—a bar to progress

Increasing evidence from endemic regions indicates that 'Daraprim' can play a major part in eradicating malaria. This new drug has proved an excellent suppressant in a dosage of one product once a week; when administered under supervision to an entire community it has been shown capable of breaking the malarial cycle. 'Daraprim' is tasteless and well tolerated; it causes no discoloration of the skin. It is supplied as compressed products of 25 mgm., in packs of 6, 30, 250 and 1000.

It's a safe practice

Safety measures devised for our protection are now commonplace and readily accepted. In chemotherapy, few will deny that one of the most important of the safety measures is the careful and critical selection by the manufacturer of drugs that combine maximum therapeutic activity with minimum toxicity. Nowhere is this better seen than in the case of 'Sulphatriad'.

When sulphonamide therapy is indicated, the prescription of 'Sulphatriad' for young and old has been clinically proved and accepted as a practice with a wide safety margin and range of effectiveness. *Detailed literature is available on request.*

Sanatogen as an aid in treatment of Psychosomatic Disorders

It is now widely recognised that a high percentage of all cases seen by the general practitioner today can be attributed wholly or partly to psychosomatic disorders. Though the symptoms may be diverse (rheumatism, headache, insomnia, dyspepsia, diarrhoea, effort syndrome, etc.), a common factor in the patients is their inability to withstand the pressure to which he or she is subjected.

A SUGGESTION FOR THE GENERAL PRACTITIONER

In the treatment of these psychosomatic disorders the general practitioner will find that Sanatogen protein nerve tonic is an extremely useful adjunct, particularly when dealing with patients who insist on a tonic, when strong suggestion is needed, or for people who are reluctant to accept a psychosomatic disorder as a diagnosis.

THE ROLE OF SANATOGEN

Sanatogen is 95% casein chemically combined with 5% sodium glycerophosphate, and has a vigorous tonic effect on the physical and nervous system. Three teaspoonfuls of Sanatogen t.d.s. (the normal dosage) provide the patient with 24 grams of protein daily, free from fat and cholesterol; whilst by reason of its glycerophosphate content it has a specific tonic effect on body and nerve tissue. Although Sanatogen is not prescribable owing to its high food value, it has been widely recommended by the profession for more than 50 years.

For
the patient
with angina

Peritrate is a valuable aid in the treatment of angina by virtue of its action as a coronary vasodilator. Each 10 mg. tablet begins to act half-an-hour after ingestion and the action continues 4-5 hours. Peritrate prevents anginal attacks, or reduces their frequency, severity and duration. It diminishes the patient's nitroglycerin requirements, and improves exercise tolerance. Peritrate is non-toxic and causes very few side-effects even on prolonged administration.

PERITRATE WITH PHENOBARBITONE

Peritrate is now available with Phenobarbitone for the Angina Pectoris patient who needs sedation. Each tablet contains 10 mg. Peritrate and 15 mg. Phenobarbitone. The packs and prices for these tablets are the same as for Peritrate.

Why MIXOGEN is prescribed for menopausal symptoms

Because it is now established that :—

- combined male and female hormone treatment is the most effective in this condition.
- the correct balance of the two hormones is essential both for efficacy and economy—determined by extensive clinical trial in the U.K. and unique to Mixogen.
- both the hormones in Mixogen are completely effective when swallowed—thus maximum, immediate relief is given in the simplest and most convenient way.

The removal of wax from the external auditory meatus can now be greatly simplified—by the use of Cerumol Ear Drops. Cerumol dissolves soft cerumen, disimpacts the hard wax plug, and a simple wiping or washing out is sufficient to remove debris. Cerumol is not injurious to the lining of the external auditory meatus or to the tympanic membrane.

Anti-bacterial, safe and efficient, Cerumol is an accepted product for use in a large number of hospitals and general practices throughout the country. It is included in Category No. 4 of the Classified List of Proprietary Preparations issued by the Ministry of Health, and may therefore be prescribed on N.H.S. form E.C.10.

PACKS :—For Surgery Use: 10 c.c. vial, separate dropper included (Basic N.H.S. price 2s. 8d.)
For Hospital Use: 2 oz. and 10 oz. bottles.

HUMANISED TRUFOOD

A MILK MODIFICATION SPECIFICALLY DESIGNED TO MEET THE
NUTRITIONAL NEEDS OF THE NORMAL INFANT

Humanised Trufood is not just a dried milk: it is a modification of cows' milk specifically designed to meet the needs of the normal infant from birth.

The fat content compares favourably with that of "Full Cream" dried milk powders. Moreover, as Trufood is dried by the spray process the fat is kept in a fine, well-diffused emulsion, thus ensuring easier assimilation.

Full information about Humanised Trufood and the six other Trufood milks for infants will be supplied on request to Trufood Limited, Green Bank, London, E.1.

You will find that when you have to feed an infant artificially there is a better Trufood milk available whatever your requirement may be.

Availability of Vitamins in Yeast

Deficiencies of single factors of the Vitamin B Group do not occur. Accordingly, even if a deficiency condition appears to result from the lack of an individual factor of the group and it is considered necessary to give intensive treatment with this factor, *the entire Vitamin B complex should always be administered concurrently.*

It is, however, extremely important, in view of suggestions in recent publications, that the vehicle selected as a source of the entire B Complex does not withhold its vitamin content from the patient.

Human experiments show that the rich, natural vitamin potency of Aluzyme is totally available to the human system.

- *Aluzyme is not advertised to the public and may be prescribed on Form E.C.10*

**High-speed
pen recorders
for medical use**

SAFE—HIGH DEFINITION—NON-CLOGGING

Kelvin Hughes high-speed ink writing recorders are, by virtue of their design, perfectly safe for use in operating theatres. The ink is quick drying and does not clog, since it is immediately evacuated whenever the apparatus is switched off. Frequency responses of the recorders are very high, resulting in extremely good definition. Units can be adapted for use with existing chart tables.

Kelvin Hughes welcome enquiries from the Medical profession regarding any application of pen recording.

A Rubefacient

Balm with an

important

difference *

Cremalgin

(for treatment of rheumatism, fibrositis and allied complaints)

On average 100,000 prescriptions for rubefacient balms are written monthly — testimony enough to their efficacy.

But the cost to the Health Service is disturbing, particularly in the light of the urgent need for economy.

What then is the solution?

The answer can be found in Cremalgin, a rubefacient cream identical in formula and quality, *yet 50% less costly than the best methyl nicotinate creams currently prescribed.

This vital contribution to N.H.S.

economy is made possible by the issue of dispensing packs and by realistic costing and production methods. That the need for such an economy is foremost in the minds of the medical profession is clearly shown by the fact that no fewer than 4,000 doctors have already received samples of Cremalgin at their own request.

Methyl Nicotinate 1.0%.

Glycol Salicylate 10.0%. Histamine Dihydrochloride 0.1%.

Capsaicin 0.1%. Excipient q.s.

Wholesale chemists can now supply Cremalgin in 1 oz. dispensing tubes at 21/- per doz. and in 1 lb. dispensing jars at 19/6 per unit.

Modern surgery insists . . .

Every operation is an adventure and modern surgery insists that the measurable hazards shall be reduced to a minimum. When the theatre sister hands a Swann Morton scalpel to the surgeon, four things are certain—handle and blade are precisely fitted and balanced one with the other, and the blade is true to shape, it is perfectly tempered and it has a smooth, even keenness. These scalpels are produced in Sheffield by a small highly trained team of enthusiasts. Demand, the world over, grows each year.

APPOINTMENTS

Applicants should state name, address, age, nationality, qualifications, and enclose (unless otherwise specified) one copy each of 3 recent ★ testimonials with short statement of experience and appointments held.

Applications should be sent at once if no closing date is given.

Canvassing in any form will disqualify.

★SERVICE MEMBERS may have difficulty in supplying recent testimonials, but this should not deter them from applying.

A fully registered medical practitioner who is liable for National Service must obtain deferment of recruitment in writing from the Central Medical Recruitment Committee or (in Scotland) the Scottish Central Medical Recruitment Committee before accepting any civilian appointment. The position of provisionally registered medical practitioners who are liable for National Service has been made clear in a notice sent to them by the Ministry of Labour and National Service.

SALARY SCALES OF JUNIOR GRADES OF HOSPITAL MEDICAL STAFF

Registrar Grades, Whole-time

(a) **REGISTRAR:** Posts obtained normally not less than two years after registration as a medical practitioner and held normally for two years: £850 per annum in the first year; £965 per annum in the second and any subsequent years.

(b) **SENIOR REGISTRAR:** Posts obtained normally not less than four years after registration as a medical practitioner and held normally for four years: £1,100 per annum in the first year; £1,200 per annum in the second year; £1,300 per annum in the third year; £1,400 per annum in any subsequent years.

Other Grades, Whole-time

(a) HOUSE OFFICERS:

(i) **Provisionally registered medical practitioners:** £425 per annum for the first post held; £475 per annum for the second and all subsequent posts held;

provided that the employing authority (subject in the case of a Hospital Management Committee to the consent of the Regional Hospital Board) shall have discretion to determine that the remuneration of any officer holding his first post in the National Health Service as a House Officer shall be £475 per annum if they are satisfied that the officer has held at least one hospital post outside, of not less than six months' duration, involving clinical responsibilities equivalent to those of house posts in the National Health Service and supervised by appropriate specialist staff.

(ii) **Fully registered medical practitioners:** £525 per annum for any post held; provided that in exceptional circumstances, subject to the consent of the Minister, this rate may be exceeded by up to £50 per annum where a post cannot be filled otherwise.

In each case under sub-sections (i) and (ii) above, a deduction of £125 per annum in respect of board and lodging and other services provided shall be made and each post shall be tenable for six months.

(b) **SENIOR HOUSE OFFICER:** Posts obtained normally not less than one year (in Scotland, two years) after registration as a medical practitioner and normally held for one year only: £745 per annum.

(c) **JUNIOR HOSPITAL MEDICAL OFFICER:** Officers who have held house appointments but who are not Registrars and who have less responsibility than other hospital officers of non-consultant status: £775 (for an officer appointed not less than one year after full registration as a medical practitioner) by £50 to £1,075 per annum.

ALL NATIONAL HEALTH SERVICE HOSPITAL APPOINTMENTS ARE IN ACCORDANCE WITH THE TERMS AND CONDITIONS OF SERVICE OF HOSPITAL MEDICAL STAFF

Those intending to apply for resident appointments in the Registrar grades are recommended to make inquiries with regard to the deductions proposed for board and lodging at the time of submitting their applications, where this is not stated in the advertisement.

Overseas (Vacant)—contd.**HER MAJESTY'S OVERSEA CIVIL SERVICE**
Medical Branch—Barbados**ANAESTHETIST**

Required at the General Hospital, Barbados. The selected officer will be responsible for the anaesthetic services at the general hospital under the direction of the Director of Medical Services and will be required to assist in training nurses and medical interns. His duties will include pre- and post-operative care of patients in so far as these duties relate to anaesthetics and to keep records. Candidates must possess qualifications registrable in the United Kingdom and should have had experience in the use of anaesthetics. To qualify for specialist salary scale (see below) candidates must hold a Dip.oma in Anaesthetics (if held before November 1953) or be a Fellow of the Faculty of Anaesthetists. Appointment can be made on permanent basis with pension (non-contributory) at the age of 55, or on agreement for three years in the first instance (in which event passage arrangements quoted below are slightly different). For officers on agreement arrangements will, if possible, be made to continue their superannuation payments. Salary scale for candidates not possessing specialist qualifications is \$4,128 to \$5,280 (\$860 to £1,100) a year. For candidates holding specialist qualifications, salary scale is \$4,800 to \$6,240 (£1,000 to £1,300) a year plus a non-pensionable allowance equal to one half of fees paid into Public Treasury in respect of special services rendered. A cost-of-living allowance of £32 10s. a year is payable on both salary scales. Furnished quarters are available at rental of five per cent of salary (for officers on agreement, free furnished quarters or allowance of 10 per cent of salary). Free passages on appointment are provided for officer and family up to maximum cost of £300 (or £400 if Governor requires candidate to travel by air). Free passages on leave are provided for officer and wife only at end of tour of service of 3½ years (pro rata payment on completion of not less than two years of tour). Home leave may be granted on full pay after each tour. Income tax at local rates. Social and recreational amenities are good. Climate is healthy for Europeans. Educational facilities are available. Application forms from the Director of Recruitment, Colonial Office, Sanctuary Buildings, Great Smith Street, London, S.W.1 (quoting ref. BCD117/28/05). (7957)

HER MAJESTY'S OVERSEA CIVIL SERVICE

Required for general duties. One post is in the Orange Walk District, the other is in Belize. Appointments can be made on a permanent basis with pension (non-contributory) at the age of 55, or on short-term agreement, renewable if desired. Arrangements can probably be made for doctors in the National Health Service to resign from the N.H.S. but retain their superannuation rights up to six years and receive a gratuity (taxable) of 20 per cent of the aggregate of their salary after their engagement. Salary scale ranges from £810 to £1,200 per annum at the current rate of exchange of the British Honduras dollar (\$4 equals £1). Private practice in district towns is permitted, but in Belize an allowance of £125 per annum is payable in lieu of private practice. Quarters are available at a rental of 7½ per cent of salary, subject to a maximum charge of £120 per annum. Income tax at local rates. Free passages are provided on appointment for officer, wife and children, not exceeding five persons in all. On leave, passages are provided for officer and wife, and not more than two children, subject to the provision of funds annually by the Legislative Council. Local leave is permissible and generous home leave is granted after each tour of from two to three years' duration. Candidates must possess medical qualifications registrable in the United Kingdom. Application forms from the Director of Recruitment, Colonial Office, Sanctuary Buildings, Great Smith Street, London, S.W.1 (quoting reference BCD 117/31/01). (7956)
