

When nourishment is the main problem . . .

BRAND'S ESSENCE is a first-class protein of animal origin. Being partly hydrolyzed, it is capable of easy ingestion, digestion and absorption. It is extremely palatable, and may be taken either as a jelly or as a liquid. It helps to support convalescence and assists in restoring a positive nitrogen balance.

The major indications for the administration of Brand's Essence are loss of appetite during fatigue, acute infections, and dysphagia or digestive disturbances due to organic or bacterial lesions of the mouth, oesophagus and alimentary tract, and after surgical procedures.

The addition of Brand's Essence to low residue and weight-reducing diets is especially appreciated by the patient.

Leadership in oral-iron therapy

FERROMYN

(Ferrous Succinate)

THE NEW ORGANIC IRON

FERROMYN is an original and logical approach to the problem of iron absorption and utilisation in the treatment of hypochromic anæmias. FERROMYN brings oral iron therapy a step nearer the ideal.

This new preparation presents Ferrous Succinate and exhibits the following advantages over all other forms of oral iron therapy:

1. Highest utilisation ($42\% \pm 5\%$) ensuring quickest restoration of Hb. values. It is significant to note that the utilisation factor for FERROMYN is 50% greater than that obtained with contemporary preparations.
2. In the recommended dosage of two tablets t.d.s. there is no evidence of intolerance or other gastric reaction.

THE VALUE OF PHARMACEUTICAL TECHNIQUES IN Oral Penicillin Therapy

In suitable dosage and conditions, oral penicillin therapy is now widely accepted for the obvious advantages it offers.

The problem of finding satisfactory means of presenting penicillin for oral administration has been largely a pharmaceutical one.

PRADUCIL

'200 and 400'

Tablets containing respectively 200,000 units and 400,000 units of Benzylpenicillin B.P. Bottles of 20 and 100 tablets of each strength.

Although penicillin oral tablets have been in use for some time there seemed no way of masking their bitter taste until the 'Prescoted' technique of dry-coating tablets enabled the first sugar-coated penicillin oral tablets to be made available under the name PRADUCIL. Optimum blood levels in oral penicillin therapy are achieved by the use, as in these tablets, of Benzylpenicillin B.P.

PRADUPEN

'200'

Each bottle contains 3.2 mega units of Benzylpenicillin B.P. providing 16 x 3.5 ml. teaspoonful doses of 200,000 units of penicillin when dispensed.

There is a recognised need for a liquid oral preparation in cases where tablets are not acceptable. The application of pharmaceutical technique has resulted in the development of PRADUPEN, a preparation of Benzylpenicillin B.P. in the form of a dry powder containing suitable stabilising, flavouring and sweetening agents. PRADUPEN is dispensed by adding water, yielding a non-sticky, clean-tasting, fruit-flavoured elixir.

introduce

a new vaginal tampon

without applicator

In collaboration with leading gynaecologists, our own research organisation, Smith & Nephew Research Ltd., have recently concluded extensive trials of a tampon which has been widely accepted as an aid to menstrual hygiene, on the Continent, during the past five years. This applicator-less tampon is now to be marketed in Britain under the name LIL-LETS. Samples will gladly be sent to medical practitioners on request.

LIL-LETS have, very briefly, the following main advantages;

LIL-LETS need no applicator. By inserting the tampon with the fingers, the risk of bruising is eliminated.

LIL-LETS are highly absorbent. They absorb almost ten times their own weight in moisture, and swell sideways, not lengthways. They are, therefore, really safe.

LIL-LETS are individually wrapped. Each tampon is sealed in a transparent cover. There is no risk of soiling or infection when it is carried loose.

LIL-LETS assist personal hygiene. LIL-LETS (1/6 for 10) are so much cheaper than other leading tampons, and so easy to carry about and to dispose of, that women will be encouraged to change them frequently.

 to the focal point of
 soft-tissue rheumatism

The esters in Transvasin, a new preparation developed by Hamol S.A., our Swiss associates, readily pass the skin barrier in therapeutic quantities and enable an effective concentration of the drugs to be built up where they are needed. Transvasin not only induces vasodilation of the skin with a superficial erythema, but also brings about a deep hyperaemia of the underlying tissues. It is non-irritant, and can be safely used on delicate skins.

It is now being widely prescribed, with successful clinical results. Since a very small quantity is sufficient for each application, the cost of treatment is extremely low.

for
the cocci

*No more delayed action
from enteric coating*

NEW *Filmtab* ERYTHROCIN Stearate tablets provide faster absorption, earlier blood levels. The *Filmtab* (marketed only by Abbott) disintegrates far faster than enteric coatings—permits almost immediate drug absorption. Tests show ERYTHROCIN is adequately protected.

Result? Your patient has high blood concentrations of ERYTHROCIN *within 2 hours*, instead of 4–6 hours as before. Peak level at 4 hours and significant concentrations for 8 hours.

ERYTHROCIN Stearate is highly effective—almost every gram-positive coccus is sensitive to its action. Especially recommended against staphylococci, because of the high incidence of staphylococcal resistance to penicillin and other oral antibiotics.

ERYTHROCIN Stearate (compared with most other antibiotics) is less toxic—less likely to alter the normal intestinal flora. Gastro-intestinal disturbances are rare. No serious side effects reported.

Average adult dose is 200 mg. every 4–6 hours. ERYTHROCIN Stearate *Filmtabs* (100 and 200 mg.) are supplied in bottles of 25 and 100. For children ERYTHROCIN Stearate Oral Suspension (100 mg. per 5 c.c.) is available in 60 c.c. (2 fl. oz.) bottles.

REDUCTION OF HYPERMOTILITY

'Lergine' brand Tricyclamol Chloride, a new anti-cholinergic agent, markedly reduces gastro-intestinal motility and spasm, and diminishes gastric, pancreatic and intestinal secretions.

As an adjunct to the dietary treatment of peptic ulcer, 'Lergine' provides prompt relief of spasm and pain. In cases requiring added sedation 'Lergine' brand Compound, which contains tricyclamol and phenobarbitone, is advised.

'Lergine' has proved highly effective in relieving the pain and constipation associated with spastic or "irritable" colon, and is valuable in treating pylorospasm, ulcerative colitis, regional ileitis and some types of diarrhoea, for example that associated with pancreatic insufficiency.

'Lergine' and 'Lergine' Compound are each issued in bottles of 100 and 500, the former at prices of 17/6d. and 80/-, and the latter at 19/6d. and 85/-, each subject to the usual discount.

All Elastoplast bandages NOW HAVE POROUS ADHESIVE!

When the Elastoplast Bandage with Porous Adhesive was introduced to the medical profession, the demand for it was so immediate, so wide-spread, that a priority system of supply was necessary. More and more of our manufacturing resources were turned over to the production of this type of bandage. Now demand has increased further to such an extent that we have been induced to make all

The reason for this overwhelming demand is simple—the Elastoplast Bandage with Porous Adhesive represents a most significant advance in the field of Elastic Adhesive Bandages. It overcomes the main cause of plaster intolerance, by permitting free evaporation of sweat from the skin.

Especially notable among the merits of AUREOMYCIN is the ease with which effective concentrations can be produced *precisely where they are needed*. This feature is well demonstrated in the case of ear, nose and throat infections—the majority of which show prompt and positive response to this most versatile antibiotic.

In severe conditions, AUREOMYCIN is wisely given in capsule or soluble tablet form, to secure a rapid concentration in the tissues. And this measure is ably supported by appropriate local therapy such as AUREOMYCIN Otic, for instillation into the auditory canal . . . AUREOMYCIN Troches, which furnish a continuous bacteriostatic lavage of the mouth . . . or AUREOMYCIN Nasal, which swiftly arrests a wide variety of infections of the upper respiratory tract.

It's a safe practice

Safety measures devised for our protection are now commonplace and readily accepted. In chemotherapy, few will deny that one of the most important of the safety measures is the careful and critical selection by the manufacturer of drugs that combine maximum therapeutic activity with minimum toxicity. Nowhere is this better seen than in the case of 'Sulphatriad'.

When sulphonamide therapy is indicated, the prescription of 'Sulphatriad' for young and old has been clinically proved and accepted as a practice with a wide safety margin and range of effectiveness. *Detailed literature is available on request.*

Subjective warmth and glow

'ALGIPAN', the smooth non-greasy HISTAMINE cream, relies upon *methyl nicotinate* to ensure swift penetration of the cutaneous barrier. Simple inunction suffices to shepherd the Histamine content through the epidermis to the deeper tissues, where the resulting dilatation of arterioles and capillaries promotes a local increase in blood supply, accompanied by a reflex cessation of aching in underlying muscles.

To the patient, this is evidenced by a circumscribed surface 'flush' and warming glow, rapidly followed by disappearance of pain.

'Algipan' is of proven value in fibrositis and other manifestations of the 'rheumatic' syndrome.

Frequent washing and scrubbing of the hands and immersing them in anti-septics tends to impoverish the skin. Nivea counteracts the drying effects and keeps the skin smooth and supple. Nivea is a water-in-oil emulsion containing Eucerite, which, due to its high cholesterol content, is closely related to the fatty substances of the skin. It is rapidly absorbed and does not leave the skin greasy. Use a little after every wash and keep your hands in perfect working condition.

Let Sanatogen help you in treatment of Psychosomatic Disorders

Hippocrates, in the fifth century B.C., taught that deductions are to be made only from observed facts. Though this basic principle was neglected for more than two thousand years, in the last hundred years it has borne fruit, and the harvest increases year by year. Today the general practitioner treats many diseases with confidence and exact knowledge. But what of psychosomatic disorders?

EVIDENCE FOR SANATOGEN

Sanatogen (a casein-glycerophosphate complex) has been successfully used as a nerve tonic for more than fifty years. In this period there must have been hundreds of proprietary tonics, now forgotten. Yet the demand for Sanatogen has continued to increase each year. Now that is a statement of observed fact which deserves consideration. Of course, we do not suggest that Sanatogen is the complete answer to psychosomatic disorders. Nevertheless, all the clinical evidence shows that the chemical combination contained in Sanatogen does produce remarkable results.

THE ROLE OF SANATOGEN

Sanatogen is 95% casein chemically combined with 5% sodium glycerophosphates. Three teaspoonfuls of Sanatogen t.d.s. (the normal dosage) provide the patient with 24 grams of protein daily, free from fat and cholesterol, at a cost of less than a shilling a day; whilst by reason of its glycerophosphate content it has a specific tonic effect on body and nerve tissue. Although Sanatogen is not prescribable owing to its high food value, it is being increasingly recommended by practitioners today because of the excellent results obtainable with this tonic. On the evidence, it is a fair deduction to say that Sanatogen is by far the best tonic available today for treatment of stress and strain. You can with confidence say to your patient: "A course of Sanatogen will do you good."

Nutritional needs in convalescence

Convalescents in general require a full well-balanced diet. Specific needs vary with individuals, but it is always important to ensure an adequate supply of all the essential nutrients. It is now known also that it is specially necessary to build up a nutritional reserve before operation. Lack of proper attention to nutrition may be one of the factors causing a delayed recovery.

As a dietary source of the B vitamins Marmite has proved particularly useful, as it can readily be included in the menu in a variety of ways.

A case for RAUWILOID + VERILOID

RAUWILOID + VERILOID

RAUWILOID + VERILOID is a striking example of drug complementation. It combines in one tablet 1 mg. of 'Rauwiloid' brand alkaloid hydrochlorides of *Rauwolfia serpentina* and 3 mg. 'Veriloid' brand alkaloids of *Veratrum viride*. 'Rauwiloid', by widening the margin between the effective therapeutic dose of 'Veriloid' and that producing side actions, enables satisfactory hypotensive doses of 'Veriloid' to be given to most patients. The combination is ideal for relieving the symptoms of moderate to severe hypertension. It is effective, safe, produces a minimum of discomfort to the patient and exerts a prolonged antihypertensive action.

"The addition of 'Rauwiloid' makes 'Veriloid' easy to administer, more effective and practically does away with unpleasant side reactions".

Ovaltine in antenatal and postnatal care

THE INCREASED nutritional demands arising during the latter half of pregnancy and the ensuing period of lactation, call for a general fortification of the patient's diet.

'Ovaltine' is eminently suitable as an aid in meeting this need because it provides concentrated nourishment in a palatable and easily assimilated form. It is acceptable to the most capricious appetite, such as often occurs in pregnancy.

'Ovaltine' possesses galactagogue properties. It also aids in maintaining the strength and general well-being of the nursing mother.

The high quality of its natural ingredients—malt, milk, cocoa, soya and eggs—its content of added vitamins, and the strictly hygienic conditions of its manufacture combine to provide a first-class nutritional product which has long enjoyed the approval of obstetricians.

Radio-active wear detector brings to motorists
the biggest advance ever made in car lubrication

80% Less Engine Wear

with new BP Special Energol

'VISCO-STATIC' MOTOR OIL

UP TO 12% LOWER PETROL CONSUMPTION

Doubles the life of your engine

THIS IS WONDERFUL NEWS. You can save 80% of engine wear, cut petrol consumption and enjoy easier starting and greater reliability than ever before thought possible.

BP Special Energol is a new kind of motor oil introduced by The British Petroleum Company for use in all four-stroke petrol engines in good condition. Tests in the laboratory and on the road prove that BP Special Energol cuts engine wear by 80% and actually doubles the life of your engine.

You also save substantially on petrol consumption — 5-10% on normal running and up to 12% on start and stop running such as a doctor does. BP Special Energol with all its advantages costs only 50% more than conventional premium oils. On petrol saving alone it more than repays the extra cost.

'Visco-static' ?

BP Special Energol 'Visco-static' is quite unlike any conventional motor oil. It is as thin when cold as the lightest grade of lubricating oil at present sold. Yet it is as thick when hot as the grades normally recommended for summer use. This special property in an oil is what lubrication scientists have been striving after for many years. It means ideal lubrication at all temperatures *using only this one grade of oil* for all engines and seasons where S.A.E. grades 10W to 40 are normally recommended.

It is the reason why BP Special Energol

Radio-activity provides the proof

This picture shows a radio-active piston ring being fitted into the special wear research engine at the BP Research Station at Sunbury. When the engine is running, radio-active particles in the oil stream show the rate of engine wear while it is happening. By condensing years of wear tests into weeks, this equipment has provided exhaustive proof of the value of BP Special Energol.

not only reduces wear and petrol consumption but improves motoring performance and reliability in almost every way.

Easier starting than you have ever known

BP Special Energol flows freely even in extreme cold so that the engine will turn over more freely. Starting even in mid-winter is no more difficult than in high summer. Your battery lasts longer.

No oil starvation and less wear

Full lubrication begins from the first turn of the engine. Abrasive products on

the cylinder walls are washed away immediately. This saves an enormous amount of wear on both your piston rings and cylinder walls. BP Special Energol includes additives which give outstanding film strength, acid resisting properties and detergency.

Less oil consumption

By reducing wear, BP Special Energol also reduces oil consumption. It maintains ample viscosity for good lubrication even at the hottest parts of the engine, near the piston rings.

How to use BP Special Energol

BP Special Energol should not be mixed with conventional oils. The sump should be drained and refilled with the new oil and this should be repeated after the first 500 miles. Future oil changes should be after the normal mileage recommended by the makers of your car.

When not to use BP Special Energol

If your engine is worn and will shortly need overhauling, do not use BP Special Energol. The normal grades of BP Energol are still on sale and will help your engine to give the best possible service until it has been overhauled. Your garage manager will be glad to give advice if you are in any doubt.

BP Special Energol is obtainable at garages where you see the BP Shield. It is coloured red for easy identification and sold in sealed packages.

A new cough specific

(Sodium 2:6 ditertiarybutylnaphthalene Monosulphonate)

suppresses cough with no undesirable side-effects

SODIUM 2:6 ditertiarybutylnaphthalene Monosulphonate (Becantyl), a product of original research, is a new agent that is specific in suppressing cough. It is unrelated to morphine and guaiacol.

BECANTYL does not cause constipation, anorexia, drowsiness or any undesirable side-effects; being devoid of side-effects BECANTYL may be prescribed for infants, children, and the aged.

Clinical experience supports the value of BECANTYL in suppressing all types of cough, and shows that it does not suppress expectoration.

BECANTYL may be used in the treatment of all types of cough. There are no contra-indications to its use.

BECANTYL is presented in 4 fluid ounce, 40 fluid ounce, and 80 fluid ounce bottles.

EAR WAX

Removed

THE EASIER WAY

The removal of wax from the external auditory meatus can now be greatly simplified—by the use of Cerumol Ear Drops. Cerumol dissolves soft cerumen, disimpacts the hard wax plug, and a simple wiping or washing out is sufficient to remove debris. Cerumol is not injurious to the lining of the external auditory meatus or to the tympanic membrane.

Anti-bacterial, safe and efficient, Cerumol is an accepted product for use in a large number of hospitals and general practices throughout the country. It is included in Category No. 4 of the Classified List of Proprietary Preparations issued by the Ministry of Health, and may therefore be prescribed on N.H.S. form E.C.10.

PACKS:—For Surgery Use: 10 c.c. vial, separate dropper included (Basic N.H.S. price 2s. 8d.)
For Hospital Use: 2 oz. and 10 oz. bottles.
