derestricted

can then be prescribed on E.C.10

As from Monday, April 4, ACHROMYCIN tetracycline Lederle is derestricted—which means that doctors can prescribe it whenever required for private and N.H.S. patients. ACHROMYCIN is the latest in broad-spectrum therapy, culminating long years of Lederle research. It is unsurpassed in its range of antibacterial effectiveness . . . unsurpassed in its freedom from undesirable reactions. Its important advantages include quicker absorption and diffusion in body tissues and fluids, more prolonged blood levels, greater stability, fewer and milder side effects. In most cases, *oral* administration secures the high concentrations of the antibiotic in the blood that are all important for therapeutic success. The average adult dose of ACHROMYCIN, like that of Aureomycin† chlortetracycline—from which it is derived—is 1 GRAM DAILY.

Achromycin means greater comfort, potency and economy

Next patient, please...

What a blessing it is — to doctor and patient alike — that prompt, effective relief can nowadays be prescribed in cases of rheumatic pain.

The value of salicylate in rheumatoid disease and rheumatic fever has long been recognised, but until recently its use was restricted by the toxic effects accompanying the necessarily high dosage.

In Berex, the combination of acetylsalicylic acid and calcium succinate enables toleration of massive aspirin dosage without lowering the prothrombin level, with the encouragement of tissue respiration and with less gastric disturbance.

SUMMARY OF STUDY ON SUCCINATE-SALICYLATE THERAPY *

A succinate-salicylate combination was found superior to acetylsalicylic acid in rheumatic states both on grounds of therapeutic efficacy and lower toxicity. Adequate amounts of the former could be administered with more lasting effect and with fewer and milder side effects. Furthermore, succinate-salicylate affects the disease process itself, as well as relieving painful symptoms and does not abnormally increase prothrombin time even after prolonged dosage.

NOWADAYS particular interest is centred around vitamin B₁₂—not only on account of its specific action in pernicious anaemia (that, of course, is undoubted), but because it appears to be of marked benefit in other spheres. B₁₂ has, in fact, brought prompt—sometimes dramatic—results in trigeminal neuralgia. The vitamin has also been used with good effect in herpes zoster, osteoarthritis and osteoporosis, seborrhoeic dermatitis and certain neuropathies such as those resulting from alcoholism and malnutrition. Moreover, B₁₂ therapy is frequently followed by a marked improvement in appetite, vigour and well-being—indeed for this “tonic” effect, a few doses of 50 micrograms every second day usually suffice.

Specific for the prevention and treatment of Napkin-rash

DRAPOLENE CREAM was formulated specifically for the treatment and prophylaxis of urinary ammoniacal dermatitis. The distress and anxiety of this state have not been experienced when DRAPOLENE has been used as a preventative measure.

Reports received from many Infant Welfare Centres have stated that successful results have been obtained in both mild and severe forms of napkin rash, the condition clearing completely in four to six days.

DRAPOLENE also possesses cleansing properties which beneficially contribute to napkin toilet, thereby minimising the risk of aggravating the already hypersensitive area.

More effective - than ever

Today's new techniques empower Man with a far more complete knowledge of haematopoiesis. Through these and many other advances, physicians are able to diagnose and treat anaemias more effectively than ever before. The continuous research by Philips-Roxane in this field has resulted in their being one of the leading manufacturers of anti-anaemia preparations. Best known among Philips-Roxane's anti-anaemia preparations is HEPAR RA FORTE for haematopoiesis containing at least 5 gamma vitamin B₁₂ and 150 gamma folic acid per c.c.

Each batch of this liver extract is clinically controlled as to haematopoietic response on previously untreated cases of pernicious anaemia.

To lessen the fear of mutilation . . . arrange for Prosthesis before mastectomy

The psychological hazards of mastectomy are generally recognized. A woman's fear of mutilation—of its effect on her appearance—is often as great as her fear of surgery itself. That is why arranging for the correct prosthesis replacement *before* surgery helps to minimize the psychic trauma—enabling the patient to face the adjustment period with more calm and assurance.

The surgeon can prescribe Spencer Mastectomy Supports with complete confidence that they will meet both the medical and cosmetic indications. The reason: Each Spencer Breast Support and Breast Form is individually designed, cut and made for each patient.

Wherever support is indicated for breasts, back, abdomen—for women, men, children—you will find Spencer Supports demonstrably superior.

EMOTIONAL DISTURBANCE...

A close association has been shown to exist between certain emotional disturbances and changes in gastric function. Increased acid secretion has been observed to follow emotional reactions of a combative nature and the importance of controlling gastric acidity in the management of peptic ulcer is widely recognised.

'Aludrox' Amphoteric Gel, buffers gastric acid to a pH of 3.5 to 4.0, at the same time providing a protective gel barrier over the surface of the ulcer. Healing is thus able to proceed whilst the risk of alkalosis is avoided and normal digestion is unimpaired.

Codis and the Physician

THE ADVANTAGE OF "CODIS" to the physician is this.

Like Tab. Codein. Co. B.P., Codis offers the valuable and tried combination of aspirin, phenacetin and codeine phosphate. But the aspirin in Codis, unlike that in Tab. Codein. Co. B.P., is in the form of soluble calcium aspirin—which is formed immediately the

tablet is dissolved in water. This calcium aspirin is of course far less likely to cause the gastric irritation sometimes produced by acid particles of ordinary aspirin.

Because it is readily soluble, Codis will be found easier to administer—and the aspirin it contains will be rapidly absorbed by the patient.

COMPOSITION

Each Codis tablet contains:—Acid. Acetylsalicyl. B.P. 4 gr.; Phenacet. B.P. 4 gr.; Codein. Phosph. B.P. 0.125 gr.; Calc. Carb. B.P. 1.2 gr.; Acid. Cit. B.P. (Exsic.) 0.4 gr.

Codis (Regd.) is not advertised to the public

FOR PRESCRIPTION. Codis is available in distinctive gold foils of 6 tablets each.

PUBLIC SIZES. 20 tablets (in bottles or foil) 2/7 each, inc. P.T.

... enters General Practice

The newest broad-spectrum antibiotic, tetracycline, which was discovered in the Pfizer Research Laboratories, and is available as TETRACYN, may now be prescribed by all members of the medical profession.

TETRACYN promises to be as valuable as Terramycin, which has become the most widely prescribed broad-spectrum antibiotic the world over. Like Terramycin, TETRACYN is very soluble and stable and produces

comparable blood levels. TETRACYN has been used in selected cases in British hospitals since October 1954, and experience appears to confirm its early promise.

TETRACYN is indicated where certain antibiotics produce troublesome side reactions such as nausea and vomiting or prove to be ineffective.

Fourfold Control in Peptic Ulcer and Hyperchlorhydria

**HCl Secretion
Neutralization
Gastric Spasm
Sensory Anaesthesia**

ALOCOL COMPOUND is a new preparation formularized to provide comprehensive management of causal and symptomatic disturbances in the treatment of hyperchlorhydria and its manifestations, including gastric and duodenal ulcer.

<i>Formula each Tablet</i>	<i>ALOCOL COMPOUND tablets effect</i>
'Alocol' (Col. Alumin. Hydroxide) 11.58 gr.	antacid protection
Ext. Belladon. Sicc. B.P. 0.075 gr.	diminished secretion
Papaverine Hydrochlor. B.P. 0.31 gr.	reduced motility
Benzocaine B.P. 0.31 gr.	sensory anaesthesia

Alocol Compound thus provides the advantage of fourfold control—reduction of causal hyperacidic flow, and its neutralization; alleviation of symptomatic hypermotility and pain.

EFFECTIVE NON-BARBITURATE SEDATION

Growing recognition of the long-term cumulative toxic effects of barbiturates, and the well-known, insidious, psychic habituation to their use—matters of considerable concern to many Doctors—are now avoidable dangers through the formulation of Noctynol Tablets. The latter present :

MEPHENESIN, which, by diminishing reflex hyperexcitability, relieving nervous tension and anxiety, and promoting muscular relaxation, not only induces the composure essential to the onset of sleep, but also ensures that the sleep is restful and refreshing.

CARBROMAL and BROMVALETONE which, by synergism, act as effective hypnotics and quickly transform the mephenesin-induced sedation to hypnosis. Unlike the barbiturates, carbromal and bromvaletone are non-toxic and non-cumulative and, as elimination is comparatively rapid, they rarely give rise to 'hang-over' and depression.

In smaller doses, NOCTYNOL Tablets act as a non-depressant calmative eminently suitable for daytime sedation.

★ Each tablet contains :

Mephenesin	200 mg.
Carbromal	200 mg.
Bromvaletone	70 mg.
Ascorbic Acid	30 mg.

APPOINTMENTS

Applicants should state name, address, age, nationality, qualifications, and enclose (unless otherwise specified) one copy each of 3 recent ★ testimonials with short statement of experience and appointments held.

Applications should be sent at once if no closing date is given.

Canvassing in any form will disqualify.

★SERVICE MEMBERS may have difficulty in supplying recent testimonials, but this should not deter them from applying.

A fully registered medical practitioner who is liable for National Service must obtain deferment of recruitment in writing from the Central Medical Recruitment Committee or (in Scotland) the Scottish Central Medical Recruitment Committee before accepting any civilian appointment.

The position of provisionally registered medical practitioners who are liable for National Service has been made clear in a notice sent to them by the Ministry of Labour and National Service.

SALARY SCALES OF JUNIOR GRADES OF HOSPITAL MEDICAL STAFF

Other Grades, Whole-time

(a) **REGISTRAR**: Posts obtained normally not less than two years after registration as a medical practitioner and held normally for two years: £850 per annum in the first year; £965 per annum in the second and any subsequent years.

(b) **SENIOR REGISTRAR**: Posts obtained normally not less than four years after registration as a medical practitioner and held normally for four years; £1,100 per annum in the first year; £1,200 per annum in the second year; £1,300 per annum in the third year; £1,400 per annum in any subsequent years.

Registrar Grades, Whole-time

(a) HOUSE OFFICERS:

(i) *Provisionally registered medical practitioners*: £425 per annum for the first post held; £475 per annum for the second and all subsequent posts held;

provided that the employing authority (subject in the case of a Hospital Management Committee to the consent of the Regional Hospital Board) shall have discretion to determine that the remuneration of any officer holding his first post in the National Health Service as a House Officer shall be £475 per annum if they are satisfied that the officer has held at least one hospital post outside, of not less than six months' duration, involving clinical responsibilities equivalent to those of house posts in the National Health Service and supervised by appropriate specialist staff.

(ii) *Fully registered medical practitioners*: £525 per annum for any post held; provided that in exceptional circumstances, subject to the consent of the Minister, this rate may be exceeded by up to £50 per annum where a post cannot be filled otherwise.

In each case under sub-sections (i) and (ii) above, a deduction of £125 per annum in respect of board and lodging and other services provided shall be made and each post shall be tenable for six months.

(b) **SENIOR HOUSE OFFICER**: Posts obtained normally not less than one year (in Scotland, two years) after registration as a medical practitioner and normally held for one year only: £745 per annum.

(c) **JUNIOR HOSPITAL MEDICAL OFFICER**: Officers who have held house appointments but who are not Registrars and who have less responsibility than other hospital officers of non-consultant status: £775 (for an officer appointed not less than one year after full registration as a medical practitioner) by £50 to £1,075 per annum.

ALL NATIONAL HEALTH SERVICE HOSPITAL APPOINTMENTS ARE IN ACCORDANCE WITH THE TERMS AND CONDITIONS OF SERVICE OF HOSPITAL MEDICAL STAFF

Those intending to apply for resident appointments in the Registrar grades are recommended to make inquiries with regard to the deductions proposed for board and lodging at the time of submitting their applications, where this is not stated in the advertisement.

COUNTY BOROUGH OF ROTHERHAM

Applications are invited from registered medical practitioners (male) for the post of **DEPUTY MEDICAL OFFICER OF HEALTH and DEPUTY PRINCIPAL SCHOOL MEDICAL OFFICER**

at a salary within the consolidated range of £1,166 13s. 4d., rising by five annual increments of £50 to £1,416 13s. 4d. The commencing salary will be determined at a point within the scale, having regard to the experience of the successful candidate. Applicants must possess a D.P.H. and have had previous experience in school health, maternity and child welfare, and general public health work. The person appointed will be responsible, under the direction of the Medical Officer of Health, for carrying out administrative and other duties in all sections of the work of the Health Department, and must be capable of assuming full responsibility for the department when necessary. The appointment is whole-time, and the successful candidate will not be allowed to engage in private practice. The appointment will be terminable at any time by three months' notice in writing on either side and will be subject to the Medical Whitley Council's general conditions of service for Public Health Medical Officers. The appointment is also subject to the approval of the successful candidate by the Minister of Education under the Handicapped Pupils and School Health Service Regulations, 1945. The successful candidate will be required to pass a medical examination for superannuation purposes. The tenancy of a three bedroomed house is available, if required. Forms of application may be obtained from the Medical Officer of Health, Municipal Offices, Rotherham, and must be returned to the undersigned, giving the names of three referees, and endorsed "Deputy Medical Officer of Health," by April 16, 1955. Every application must state whether the candidate is related to any member or officer of the Rotherham County Borough Council and deliberate omission to disclose any such relationship will disqualify the candidate. Canvassing of members of the Council, whether direct or indirect, will disqualify any candidate.—John S. Wall, Town Clerk, Municipal Offices, Rotherham. (9573)

SOCIETY OF APOTHECARIES OF LONDON (M.M.S.A.)

The Mastery of Midwifery is designed to give evidence of intensive study and practical experience in *Ante-natal Care, Midwifery, and Infant Welfare* and their relation to *Hygiene and Preventive Medicine*. The possession of this Diploma will prove of value in private practice and also to candidates for appointments involving the special work described in the preceding paragraph. The tests imposed are stringent; the Examination, written, oral, and clinical, demands thorough and detailed knowledge gained by practical experience, and constitutes a definite endeavour to *combat Maternal and Infant Mortality*. Examinations are held twice yearly, in the months of May and November. Regulations and forms of application for admission to the Examination may be obtained from the Registrar, the Society of Apothecaries, Black Friars' Lane, E.C.4.

Readers frequently desire to refer to advertisements concerning appliances, preparations, etc., which have appeared in earlier issues of the *Journal*.

The Advertisement Manager can supply particulars at any time.

In dealing with written inquiries, especially from overseas, correspondents are, wherever possible, put in direct contact with the advertisers in whose products they are interested.
