EAR WAX
Removed
THE EASIER WAY

The removal of wax from the external auditory meatus can now be greatly simplified—by the use of Cerumol Ear Drops. Cerumol dissolves soft cerumen, disimpacts the hard wax plug, and a simple wiping or washing out is sufficient to remove debris. Cerumol is not injurious to the lining of the external auditory meatus or to the tympanic membrane.

Anti-bacterial, safe and efficient, Cerumol is an accepted product for use in a large number of hospitals and general practices throughout the country. It is included in Category No. 4 of the Classified List of Proprietary Preparations issued by the Ministry of Health, and may therefore be prescribed on N.H.S. form E.C.10.

PACKS:—For Surgery Use: 10 c.c. vial, separate dropper included (Basic N.H.S. price 2s. 8d.)

NOBECUTANE *the sterile plastic wound dressing*

(*Brit. med. J.*
1954.2.17)

NOW ALSO AVAILABLE IN SPRAY CONTAINERS

NOBECUTANE consists of an acrylic resin dissolved in a mixture of acetic esters. When applied to the dry skin the solvent evaporates leaving an elastic, transparent, and adhesive film.

NOBECUTANE has many advantages over conventional dressings. It is non-irritating, transparent, tough, pliable and durable and can be applied over joints where some degree of mobility is required.

NOBECUTANE is impervious to bacteria but permeable to air and water vapour and allows normal aqueous exhalation of the skin to escape. No maceration of the skin occurs.

NOBECUTANE is economical in use and results in a saving of at least 20% over the cost of conventional dressings. In addition it is welcomed by nursing staff who find it effects a considerable saving in time.

NOBECUTANE is available in 300 ml. spray containers, holding sufficient solution to dress 60-70 surgical wounds. It is also available in bottles of 50 ml. and 250 ml.

highest utilisation

The therapeutic value of any preparation is in direct ratio to the amount absorbed and utilised. That FERROMYN is an improved form of iron medication is confirmed by achieving a utilisation factor of 40 per cent \pm 5. This figure is considerably higher than any obtained from contemporary oral iron preparations. The clinical response is in keeping with the above factor, realising a mean daily Hb. response of 1.2 per cent in 150 cases reviewed during a recent clinical trial.

GLAXO **STYRION** TABLETS

Trade mark

The outstanding fact about Styron, Glaxo's new preparation, is that it neutralises only the excess acid in the stomach. Its use eliminates risk of the after-effects associated with over-neutralisation. The importance of this in a class of remedies widely used without medical supervision will be appreciated. Over-dosage has no Nemesis: Styron brings nothing but relief.

Styron contains polyaminostyrene, an 'ion exchange' (acid-binding) resin, which can be chemically 'tailored' to act selectively. In the stomach Styron forms an insoluble resin-acid complex. As the degree of acidity declines, so does the activity of Styron—until normal physiological range is re-established. The excess acid

is then neutralised in the alkalinity of the small intestine while Styron is excreted in the form in which it was given.

Styron is the nearest approach to the ideal antacid, therapeutically efficient, non-irritant, and safely given in reasonable dosage for any length of time.

The dosage is 2 to 4 tablets (repeated if necessary), to be chewed and swallowed with a drink of water.

**15 years of clinical opinion
supports the use of vaginal tampons**

Why an applicator?

The function of the applicator in inserting the tampon at the upper end of the vaginal tract is of the greatest importance. It eliminates any handling of the highly-compressed soft surgical cotton, and ensures comfort and steady absorption. The correct position of the internal tampon avoids contact with both anal and urethral sources of contamination. Tampax tampons are simply and hygienically inserted in correct proximity to the cervix by means of a disposable 'applicator' tube, only $\frac{9}{16}$ " diameter. The applicator is an integral part of tamponage and, therefore, results in a definite improvement in menstrual hygiene.

By sharply reducing the frequency and severity of attacks, and effecting a marked improvement in mental alertness and general well-being, 'Mysoline' enables the adult epileptic to become a confident, self-supporting member of the community. The outstanding value of 'Mysoline' in grand mal and psychomotor epilepsy has been confirmed in widespread trials carried out over the past four years, in the leading neurological centres of many countries. A noteworthy feature of these

investigations is that the majority of cases selected were patients who had hitherto failed to respond to all other forms of treatment. Now internationally recognised as an important advance in the treatment of epilepsy, 'Mysoline' combines powerful anticonvulsant activity with low toxicity and freedom from hypnotic effect. Its usefulness in petit mal has also been studied, and some workers have reported that substantial or complete control of attacks is frequently obtained.

MEMORANDUM

Subject : Sleep

To: ALL DOCTORS

From: FOGARTYS OF BOSTON

As makers of down and feather pillows, we do not guarantee to put your patients to sleep, but we do claim that their chances of sleep will be improved if they use our pillows.

At a recent B.M.A. meeting, it was said "that in many respects sleep was still an unsolved physiological problem."* Nevertheless, we believe that a good pillow, which combines comfortable softness with support for the head, is a definite help towards a good night's sleep. It is evident that many members of the profession share our view, because more and more doctors are buying *Swan* pillows for their own use.

Down and feathers, which are *natural* materials, are conducive to healthy *natural* sleep. Before they are used in our pillows, they are purified (in our own plant) to B.S.I. standards, and they meet the most exacting hygienic requirements.

We realize, of course, that some people like a fairly firm pillow, while others prefer one so soft that the head sinks well into it. Because of the wide range of fillings used, we can cater for all tastes.

We are now printing a small booklet entitled *How to Buy Good Pillows*. If this subject interests you—professionally or personally—please write and reserve your copy now.

Look for this sign when you buy pillows.

EMOTIONAL DISTURBANCE...

A close association has been shown to exist between certain emotional disturbances and changes in gastric function. Increased acid secretion has been observed to follow emotional reactions of a combative nature and the importance of controlling gastric acidity in the management of peptic ulcer is widely recognised.

'Aludrox' Amphoteric Gel, buffers gastric acid to a pH of 3.5 to 4.0, at the same time providing a protective gel barrier over the surface of the ulcer. Healing is thus able to proceed whilst the risk of alkalosis is avoided and normal digestion is unimpaired.

METHYLPENTYNOL

The time and trouble involved in dealing with the psychoneurotic patient is a constantly recurring problem in general practice. Oblivon is an entirely new drug which is specific for the reduction of nervous tension and the physiological accompaniments of fear and anxiety.

Administered three times a day it has a tranquillising effect on the anxious patient, reducing the mental tension and controlling the multiple physical symptoms of which the patient complains.

Unlike the amphetamines and the barbiturates, Oblivon is an entirely safe preparation. There are no contra-indications to the use of Oblivon, and it may confidently be given even to patients with cardiac, renal or hepatic disease.

Codis

and the Physician

THE ADVANTAGE OF "CODIS" to the physician is this.

Like Tab. Codein. Co. B.P., Codis offers the valuable and tried combination of aspirin, phenacetin and codeine phosphate. But the aspirin in Codis, unlike that in Tab. Codein. Co. B.P., is in the form of soluble calcium aspirin—which is formed immediately the

tablet is dissolved in water. This calcium aspirin is of course far less likely to cause the gastric irritation sometimes produced by acid particles of ordinary aspirin.

Because it is readily soluble, Codis will be found easier to administer—and the aspirin it contains will be rapidly absorbed by the patient.

COMPOSITION

Each Codis tablet contains:—Acid. Acetylsalicyl. B.P. 4 gr.; Phenacet. B.P. 4 gr.; Codein. Phosph. B.P. 0.125 gr.; Calc. Carb. B.P. 1.2 gr.; Acid. Cit. B.P. (Exsic.) 0.4 gr.

PATIENTS' RECORDS AVAILABLE IN THREE SECONDS

New simplified system cuts clerical work by half

A new visible system of recording patients' case-histories is proving a boon to medical men throughout the country.

Consisting of three units: case-history cards, accounts records and filing unit, the system offers speed, efficiency and security... reduces clerical labour by half, and is comparatively inexpensive.

The cards, suspended from hangers, are housed in either portable panels or steel cabinets. They are instantly available and by reason of the permanent visible edge any record may be found in literally three seconds. The panel or cabinet is opened, the eye selects the name and immediately the record is before you—adjusted for further entries.

Personal particulars of the patient, clinical notes, and diagnosis are embodied in the record, and a method of signalling by coloured indicators can show past or future appointments or any urgent matter that particularly requires attention.

The Desk-Top Unit complete with adjustably tabbed suspended files proves invaluable for housing correspondence, reports, X-ray negatives and all other documentary matter.

This system, which has been designed with the co-operation of the medical profession, is invaluable to either the General Practitioner or the Specialist. For full details just write "Medical Records" on your notepaper and post to the address below.

Neomycin, which is well suited to intestinal antiseptics, effectively combats many organisms associated with diarrhoea—especially pathogenic strains of *Shigella*, *Salmonella*, *Proteus* and *E. Coli*, so often encountered in gastrointestinal disorders.

removes toxins and irritants

The purified colloidal kaolin in KAOMYCIN removes toxins and irritants by physical adsorption. The finely divided kaolin particles protect and soothe the intestinal mucosa and help to solidify the stools—hyperperistalsis giving way to normal motility.

no systemic absorption

The effects of KAOMYCIN are direct, dependable and localised. It acts entirely in the bowel, suppressing irritants and reducing inflammation. KAOMYCIN is well tolerated and because the active ingredients are not absorbed, it does not cause undesirable systemic effects.

Description: Each fluid ounce of Kaomycin contains : Neomycin sulphate 300 mg. (equivalent to 210 mg. neomycin base) Purified colloidal kaolin 90 grains.

Dosage: Adults: two to four tablespoonfuls four times daily. Infants under 2 years: one to two teaspoonfuls four times daily. Children over 2 years: two to four teaspoonfuls four times daily.

Packing: Bottles of 4 and 16 fluid ounces.

For direct control of simple diarrhoeas—KAOPECTATE. Each fl. oz. contains purified colloidal Kaolin ... 90 grains, in a palatable vehicle. Bottles of 10 fl. oz.

CHEMOTHERAPY

OF TUBERCULOSIS

B-PAS WANDER PRODUCTS

These are now in unrestricted supply to provide the significant advantages of the newest clinically proven modification of PAS, i.e. B-PAS (4-Benzoylamino-2-hydroxybenzoic acid).

Extensive published reports based on the criteria of bacteriostatic levels, patient toleration and clinical results show that B-PAS (Wander) is a major contribution to the chemotherapeutic armamentarium against tuberculosis.

Calcium B-PAS (Wander) is virtually insoluble; hence its slower absorption and excretion, and ability to provide high blood levels of extended duration, but with relatively low dosage. In contradistinction to other forms of PAS, B-PAS (Wander) is entirely free from unpleasant taste. It is thus acceptable to patients in easily taken powder form, as well as in cachets if preferred. The powder form is supplied in convenient single-dose envelopes, or in bulk in any quantity.

PACKS—Powder: Tins of 150 and 500 x 3.5 g. envelopes.

Cachets: „ „ 80 and 400 x 1.0 g.

Sodium B-PAS (Wander) also available in 1.5 g. Cachets

'B-PASINAH' WANDER

combined B-PAS and Isoniazid (INAH)

To facilitate concurrent administration of B-PAS (Wander) and INAH, this product is formulated so that 12 Cachets daily in divided dosage provides 12 g. of Calcium B-PAS (Wander) plus 300 mg. of INAH.

PACKS—Cachets each containing 1 g. 'B-Pasinah' (Wander) and 25 mg. INAH: Tins of 100 and 500.

Full Abstracts from Literature on B-PAS, also details of institutional quantities and prices sent on request.

What the Doctor ordered —and why.

'Treatment as before', he told the man at his garage, 'in fact, whenever I want a new tyre (which won't be often) you can take John Bull for granted.'

He knows that John Bull tyres are sound—and that they give him more miles of safe, trouble-free motoring than any of the makes he has previously used.

BRITISH MEDICAL ASSOCIATION

THERAPAS first synthesized in our laboratories in 1951, was introduced into tuberculosis therapy as an alternative to P.A.S. Detailed pharmacological studies have been published in this country (1), and Swiss workers have produced evidence (2) that calcium 4-benzamidosalicylate has a therapeutic action *per se*.

Therapas delays the emergence of streptomycin resistance. Its value in the treatment of genito-urinary tuberculosis is well established (3), (4), (5). Unlike P.A.S. (to which it is converted in the body) it has a slightly sweet, not unpleasant taste.

Effective though **Therapas** has been in these respects, it now appears from recent work (6), shortly to be published, that it is of still greater importance. The results indicate that:

Therapas, in combination with isoniazid or streptomycin, gives satisfactory clinical and radiological results in the treatment of pulmonary tuberculosis.

Therapas is just as effective as P.A.S. in delaying the emergence of resistance to either isoniazid or streptomycin.

Therapas can be used wherever P.A.S. is indicated, and is better tolerated.

Dosage: **Therapas** may be administered in daily doses of 14 G.

Availability: Individual packets of 3.5 G. in boxes of 100 packets. 1.0 G cachets in containers of 100 and 500.

Bulk powder in containers of 100 G and 500 G.

APPOINTMENTS

Applicants should state name, address, age, nationality, qualifications, and enclose (unless otherwise specified) one copy each of 3 recent ★ testimonials with short statement of experience and appointments held.

Applications should be sent at once if no closing date is given.

Canvassing in any form will disqualify.

★SERVICE MEMBERS may have difficulty in supplying recent testimonials, but this should not deter them from applying.

A fully registered medical practitioner who is liable for National Service must obtain deferment of recruitment in writing from the Central Medical Recruitment Committee or (in Scotland) the Scottish Central Medical Recruitment Committee before accepting any civilian appointment.

The position of provisionally registered medical practitioners who are liable for National Service has been made clear in a notice sent to them by the Ministry of Labour and National Service.

SALARY SCALES OF JUNIOR GRADES OF HOSPITAL MEDICAL STAFF

Registrar Grades, Whole-time

(a) **REGISTRAR**: Posts obtained normally not less than two years after registration as a medical practitioner and held normally for two years: £850 per annum in the first year; £965 per annum in the second and any subsequent years.

(b) **SENIOR REGISTRAR**: Posts obtained normally not less than four years after registration as a medical practitioner and held normally for four years: £1,100 per annum in the first year; £1,200 per annum in the second year; £1,300 per annum in the third year; £1,400 per annum in any subsequent years.

Other Grades, Whole-time

(a) HOUSE OFFICERS:

(i) *Provisionally registered medical practitioners*: £425 per annum for the first post held; £475 per annum for the second and all subsequent posts held;

provided that the employing authority (subject in the case of a Hospital Management Committee to the consent of the Regional Hospital Board) shall have discretion to determine that the remuneration of any officer holding his first post in the National Health Service as a House Officer shall be £475 per annum if they are satisfied that the officer has held at least one hospital post outside, of not less than six months' duration, involving clinical responsibilities equivalent to those of house posts in the National Health Service and supervised by appropriate specialist staff.

(ii) *Fully registered medical practitioners*: £525 per annum for any post held;

provided that in exceptional circumstances, subject to the consent of the Minister, this rate may be exceeded by up to £50 per annum where a post cannot be filled otherwise.

In each case under sub-sections (i) and (ii) above, a deduction of £125 per annum in respect of board and lodging and other services provided shall be made and each post shall be tenable for six months.

(b) **SENIOR HOUSE OFFICER**: Posts obtained normally not less than one year (in Scotland, two years) after registration as a medical practitioner and normally held for one year only: £745 per annum.

(c) **JUNIOR HOSPITAL MEDICAL OFFICER**: Officers who have held house appointments but who are not Registrars and who have less responsibility than other hospital officers of non-consultant status: £775 (for an officer appointed not less than one year after full registration as a medical practitioner) by £50 to £1,075 per annum.

ALL NATIONAL HEALTH SERVICE HOSPITAL APPOINTMENTS ARE IN ACCORDANCE WITH THE TERMS AND CONDITIONS OF SERVICE OF HOSPITAL MEDICAL STAFF

Those intending to apply for resident appointments in the Registrar grades are recommended to make inquiries with regard to the deductions proposed for board and lodging at the time of submitting their applications, where this is not stated in the advertisement.

NOTICES

APPLICANTS ARE ADVISED NOT TO SEND original testimonials when replying to advertisements. Copies will answer the purpose quite as well, and in the event of their being lost or mislaid no inconvenience will ensue.

Readers frequently desire to refer to advertisements concerning appliances, preparations, etc., which have appeared in earlier issues of the *Journal*.

The Advertisement Manager can supply particulars at any time.

In dealing with written inquiries, especially from overseas, correspondents are, wherever possible, put in direct contact with the advertisers in whose products they are interested.
