

ETHIOPIAN AMULET

Depicted in this ancient drawing is the Cross of the Divine Face. To the left is a cross drawn on a cross-shaped background. Below are 15 panels of 4 eyes, pairs of eyes and crosses. This amulet was regarded as a very special protection against attacks of the Evil Eye.

NOW, Abbott's selective acting antibiotic **ERYTHROCIN** is prescribed for specific therapy against cocci infections. It is less likely to alter normal intestinal flora than most other widely used antibiotics; gastrointestinal disturbances are rare; no serious side effects reported. **ERYTHROCIN Filmtab** coating provides faster drug absorption and earlier blood levels. Thus your patient has high blood concentrations of **ERYTHROCIN** within 2 hours. Peak levels at 4 hours and significant concentrations for 8 hours. Consider **ERYTHROCIN** against staphylococci, streptococci and pneumococci even when patients are allergic to other antibiotics or when the organism is resistant. **ERYTHROCIN 100 and 200 mg. Filmtabs** are available in bottles of 25 and 100. For children 60 cc. bottles of ready-to-use Oral Suspension.

The case of *Anopheles sundaicus*...

In the Republic of Indonesia, as in many other lands where malaria is highly endemic, energetic measures are being taken to bring under full control the mosquitoes that carry the disease.

The low-lying coastal area around the capital, Jakarta, offers ideal breeding conditions for many malarial species. Here, the Indonesian Malaria Control Board is relying largely on dieldrin for mosquito destruction. Dieldrin, an insecticide recently developed by Shell, not only gives longer-lasting protection, but is also very effective against *A. sundaicus*, a locally prevalent species which has previously proved difficult to control. By the end of December 1954 approximately 28,800 dwellings were treated and some 200,000 of the population were protected.

In Indonesia one spraying a year of dieldrin, at 50 milligrams per sq. ft., gives full control over all mosquitoes and brings better health to millions of people.

Dieldrin's range of control is unique: all mosquitoes and all other major disease-carrying insects. More powerful, exceptionally persistent, giving surer kill at lower dosages, dieldrin is the outstanding insecticide developed in recent years for the protection of health against insect attack.

Another recent Shell development is aldrin, fast becoming recognised as the most widely effective and most economical of all insecticides for use in the soil.

Have you an urgent pest problem in your area?

A new preparation

Quotane Ointment

Formula: 1-(β -dimethylaminoethoxy)-3-n-butylisoquinoline monohydrochloride
0.5% w/v in an oil-in-water emulsion base.

Here is a new topical anaesthetic, chemically unrelated to the 'caine' group, with a remarkably low index of sensitization. When the patient's symptoms of itching, burning, and pain are hindering progress, when they are causing sleeplessness, or when scratching is leading to secondary infection of the lesions, this highly effective antipruritic may often provide a valuable support to treatment.

'AVLOPROCIL' DRY

NOTEWORTHY FEATURES:

- ★ An aqueous suspension, ready for use, is very speedily obtained when water for injection is added.
- ★ The prepared suspension is easy to inject, causes the minimum of pain and there is no risk of needle blockage.
- ★ The presence of a bacteriostat ensures sterility.
- ★ The suspension shows no tendency to "clay" even after prolonged storage and only requires to be shaken before it is again ready for injection.
- ★ The suspension retains its full potency for at least one month after preparation when stored at temperatures not exceeding 25°C. (77°F.)

'Avloprocil' formulations have long been known to doctors for their high quality and reliability. '**Avloprocil' Dry** is the latest addition to the range. It presents the procaine salt of penicillin G as a stable, dispersible powder from which an aqueous injection can be readily prepared.

'**Avloprocil' Dry** can always be relied upon as an effective means of obtaining a sustained therapeutic level of penicillin in the blood.

As you can imagine, the accident pictured here resulted in severe haemorrhage, shock, and multiple fractures. It was a clear case for *immediate* blood volume restoration . . . just one more occasion when INTRADEX saved the day.

This blood volume restorer can be given *at once* without awaiting cross-matching—no risk of incompatibility. INTRADEX is retained in the circulation long enough to counter the shock crisis, being ultimately fully eliminated.

As a blood volume restorer INTRADEX is a complete replacement for plasma. It is also given in emergency cases ultimately needing whole blood. It is sterile, non-pyrogenic, and non-toxic.

Soluble aspirin of consistently high quality

IT IS NOW widely agreed that soluble aspirin is to be preferred for general administration both for its solubility and for its neutrality. These qualities ensure rapidity of absorption and a greatly diminished risk of gastric irritation.

"Solprin" provides soluble aspirin of very high uniform quality. Solprin will

be found easy and convenient to take by the patient, and its slight flavouring helps to make it palatable.

Solprin may be recommended for all those conditions in which aspirin was formerly prescribed. Its qualities make it peculiarly valuable when heavy or prolonged dosage is necessary.

IT'S TOPICAL

The topical use of ACHROMYCIN tetracycline is rapidly gaining favour in present-day treatments of skin and eye infections. Because of its unsurpassed broad antibacterial range and remarkable freedom from sensitizing effects, ACHROMYCIN Ointment (3%) ably and safely combats a wide variety of skin infections. Rapidly active, it can be employed to arrest infection . . . to protect skin surfaces in contact with infected tissue fluids . . . to treat infected abrasions and burns . . . as a prophylactic measure after surgical incision or minor excision. The striking versatility of ACHROMYCIN plus its unusual freedom from side-effects make the Ophthalmic Ointment (1%) a particularly reliable means of controlling ocular infections. It is particularly useful for combating infections of the conjunctiva and deeper structures of the eye; and for preventing infection in traumatic and operative injury to the eye. Many mild conditions respond in as little as 48 hours.

summer hazards

The warmer months of the year provide conditions suitable for the multiplication of bacteria on contaminated food and for the spread of contamination by flies; it is then that epidemics of bacterial food poisoning, bacillary dysentery and summer diarrhoea of infants are most frequent and widespread.

The organisms commonly responsible for such epidemics are sensitive to the combined action of streptomycin and sulphaguanidine.

The use of Guanimycin will rapidly eliminate the infecting organism and reduce the number of convalescent carriers.

**15 years of clinical opinion
supports the use of vaginal tampons**

Why an applicator?

The function of the applicator in inserting the tampon at the upper end of the vaginal tract is of the greatest importance. It eliminates any handling of the highly-compressed soft surgical cotton, and ensures comfort and steady absorption. The correct position of the internal tampon avoids contact with both anal and urethral sources of contamination. Tampax tampons are simply and hygienically inserted in correct proximity to the cervix by means of a disposable 'applicator' tube, only $\frac{9}{16}$ " diameter. The applicator is an integral part of tamponage and, therefore, results in a definite improvement in menstrual hygiene.

'You will need a Lastonet bandage'

The Lastonet bandage may be prescribed under the National Health Scheme. Its elastic net has a two-way stretch to give firm, even support to sprained or weak joints. At the same time the net allows a healthy degree of ventilation. In 5-yard lengths (fully stretched) and 2½, 3, 3½, 4 or 6 inch widths.

How much would that be in minims?

Not being apothecaries, we wouldn't know. But we do know that measurements to one ten-thousandth part of a gram are routine among the large team of scientists who, day in, day out, are testing, retesting and probing the possibilities of all the many complex ingredients that go into the making of John Bull tyres.

It is this, plus careful workmanship with only the finest of materials, which helps to make it possible to say — quite honestly — that John Bull tyres are 'made for the man who will have the best.'

APPOINTMENTS

Applicants should state name, address, age, nationality, qualifications, and enclose (unless otherwise specified) one copy each of 3 recent ★ testimonials with short statement of experience and appointments held.

Applications should be sent at once if no closing date is given.

Canvassing in any form will disqualify.

★ *SERVICE MEMBERS may have difficulty in supplying recent testimonials, but this should not deter them from applying.*

A fully registered medical practitioner who is liable for National Service must obtain deferment of recruitment in writing from the Central Medical Recruitment Committee or (in Scotland) the Scottish Central Medical Recruitment Committee before accepting any civilian appointment.

The position of provisionally registered medical practitioners who are liable for National Service has been made clear in a notice sent to them by the Ministry of Labour and National Service.

SALARY SCALES OF JUNIOR GRADES OF HOSPITAL MEDICAL STAFF

Registrar Grades, Whole-time

(a) **REGISTRAR**: Posts obtained normally not less than two years after registration as a medical practitioner and held normally for two years: £850 per annum in the first year; £965 per annum in the second and any subsequent years.

(b) **SENIOR REGISTRAR**: Posts obtained normally not less than four years after registration as a medical practitioner and held normally for four years: £1,100 per annum in the first year; £1,200 per annum in the second year; £1,300 per annum in the third year; £1,400 per annum in any subsequent years.

Other Grades, Whole-time

(a) HOUSE OFFICERS:

(i) *Provisionally registered medical practitioners*: £425 per annum for the first post held; £475 per annum for the second and all subsequent posts held;

provided that the employing authority (subject in the case of a Hospital Management Committee to the consent of the Regional Hospital Board) shall have discretion to determine that the remuneration of any officer holding his first post in the National Health Service as a House Officer shall be £475 per annum if they are satisfied that the officer has held at least one hospital post outside, of not less than six months' duration, involving clinical responsibilities equivalent to those of house posts in the National Health Service and supervised by appropriate specialist staff.

(ii) *Fully registered medical practitioners*: £525 per annum for any post held;

provided that in exceptional circumstances, subject to the consent of the Minister, this rate may be exceeded by up to £50 per annum where a post cannot be filled otherwise.

In each case under sub-sections (i) and (ii) above, a deduction of £125 per annum in respect of board and lodging and other services provided shall be made and each post shall be tenable for six months.

(b) **SENIOR HOUSE OFFICER**: Posts obtained normally not less than one year (in Scotland, two years) after registration as a medical practitioner and normally held for one year only: £745 per annum.

(c) **JUNIOR HOSPITAL MEDICAL OFFICER**: Officers who have held house appointments but who are not Registrars and who have less responsibility than other hospital officers of non-consultant status: £775 (for an officer appointed not less than one year after full registration as a medical practitioner) by £50 to £1,075 per annum.

ALL NATIONAL HEALTH SERVICE HOSPITAL APPOINTMENTS ARE IN ACCORDANCE WITH THE TERMS AND CONDITIONS OF SERVICE OF HOSPITAL MEDICAL STAFF

Those intending to apply for resident appointments in the Registrar grades are recommended to make inquiries with regard to the deductions proposed for board and lodging at the time of submitting their applications, where this is not stated in the advertisement.

W. V. Wadsworth, B.Sc., M.B., M.R.C.P., D.P.M.

This hospital receives all types of patients who are suffering from psychological and senile illnesses. It has recently been extensively redecorated and central heating has been installed throughout, making it one of the most luxuriously appointed hospitals in the country. Private rooms, with special nurses, can be provided.

All patients receive very careful and thorough clinical and pathological investigation: the most modern psychiatric treatment is available, including deep insulin therapy. Psychotherapeutic treatment is employed in suitable cases.

OCCUPATIONAL THERAPY is a special feature of the hospital and there are excellent facilities for indoor and outdoor recreation—tennis, cricket, croquet, badminton, billiards, cinema, television, etc.

GERIATRIC UNITS for mild cases of senility are provided where patients can pursue as normal a life as possible.

The hospital is situated in 300 acres of pleasant Cheshire parkland, and yet is only 9 miles from Manchester.

GLAN-Y-DON is the hospital's convalescent home overlooking the sea at Colwyn Bay. It is extremely comfortable and well appointed and has its own farm and market garden.

ST. ANDREW'S HOSPITAL, NORTHAMPTON

For Nervous and Mental Disorders

President: The Earl Spencer, Medical Supt.: Thomas Tennent, M.D., F.R.C.P., D.P.H., D.P.M.

This Registered Hospital is situated in 130 acres of park and pleasure grounds. Voluntary patients who are suffering from incipient mental disorders or who wish to prevent recurrent attacks of mental trouble, temporary patients and certified patients of both sexes are received for treatment. Careful clinical, biochemical, bacteriological and pathological examinations. Private rooms with special nurses, male or female, in Hospital or in one of the numerous villas in grounds of the various branches can be provided.

MOULTON PARK.—Two miles from the main Hospital there are several branch establishments and villas situated in a park and farm of 650 acres. Milk, meat, fruit, and vegetables are supplied to the Hospital from the farm, gardens, and orchards of Moulton Park. Occupational therapy is a feature of this branch and patients are given every facility for occupying themselves in farming, gardening and fruit-growing.

WANTAGE HOUSE.—This is a Reception Hospital in detached grounds with a separate entrance to which patients can be admitted. It is equipped with all the apparatus for the complete investigation and treatment of Mental and Nervous Disorders by the most modern methods: insulin treatment is available for suitable cases. It contains special departments for hydrotherapy by various methods, including Turkish and Russian baths, the prolonged immersion bath, Plombière's treatment, etc. There is an Operating Theatre, a Dental Surgery, an X-ray Room, an Ultra-Violet Apparatus, and a Department for Diathermy and High-frequency Treatment. It also contains Laboratories for biochemical, bacteriological and pathological research. Psychotherapeutic treatment is employed when indicated.

BRYN-Y-NEUADD HALL.—The seaside house of St. Andrew's Hospital is beautifully situated in a Park of 330 acres at Llanfairfechan amidst the finest scenery in North Wales. On the North-West side of the Estate, a mile of sea-coast forms the boundary. Patients may visit this branch for a short seaside change or for longer periods. The hospital has its own private bathing house on the seashore. There is trout-fishing in the park.

At all the branches of the Hospital there are cricket grounds, football and hockey grounds, lawn tennis courts (grass and hard courts), croquet grounds, golf courses, and bowling greens. Ladies and gentlemen have their own gardens, and facilities are provided for handicrafts such as carpentry, etc.

For terms and further particulars apply to the Medical Superintendent (Telephone No.: Northampton 4354 (3 lines), who can be seen in London by appointment.
