SAVARESSE'S COBAIBA CAPSULES.

These Capsules are superior to those made with Gelatine, inasmuch as their slow solubility causes them to remain entire until they have passed from the stomach into the intestines, the usual nausea and unpleasant eructations being thus obviated. In corroboration of this important characteristic the Patentees can adduce the following testimonial from the "Practical Treatise on the Urinary and Generative Organs," by WILLIAM ACROM, Esq. (See page 96) —

"In many instances I have known the Gelatine Capsule burst in the effort of swallowing, or dissolve as soon as it is in the stomach. An improvement has lately been introduced by enclosing the Copaiba in Membrane, thus obviating the objection to all Gelatine Capsules."

These Capsules are sold in boxes containing 30 in each box, by all Druggists and Patent Medicine Vendors.
