THE RT. HON. WALTER ELLIOT, M.C., M.P. for Kelvingrove Division of Glasgow, was born in Lanark and educated at Glasgow Academy and University. Is a Doctor of Science and of Medicine, and a Doctor of Laws in no less than seven Universities. Won his M.C. and bar in France during the 1914-18 War. Has been Minister of Agriculture and Fisheries, Secretary of State for Scotland, Minister of Health, and Director of Public Relations at the War Office. His home is near Hawick in Roxburghshire.

"My Daily Mail" *by* WALTER ELLIOT

"I READ THE DAILY MAIL because I enjoy a robust newspaper which has its own point of view and doesn't mind letting you know it.

But a point of view is not enough ; it has to be supported by facts and set out in a good clear English style. That is what I specially like about the Daily Mail. It is not afraid to set out in its leader a fully

argued case, vigorously written, but coherent and leading up to a single point.

As for information, Don Iddon's American Diary seems to me a model of what such things should be.

Need I mention Flook, or Rip Kirby and his man Desmond, companions of the cartoon page ? I don't think so. They are unique."

Transvasin

brings the esters of **NICOTINIC ACID**
SALICYLIC ACID
p-AMINO BENZOIC ACID

to the focal point of
soft-tissue rheumatism

The esters in Transvasin, a new preparation developed by Hamol S.A., our Swiss associates, readily pass the skin barrier in therapeutic quantities and enable an effective concentration of the drugs to be built up where they are needed.* Transvasin

not only induces vasodilation of the skin with a superficial erythema, but also brings about a deep hyperaemia of the underlying tissues. It is non-irritant, and can be safely used on delicate skins. It is now being widely prescribed with successful clinical results. Since a very small quantity is sufficient for each application, the cost of treatment is extremely low.

The remarkable 'tonic' action of vitamin B₁₂ may well be explained by the fact that the vitamin is apparently necessary for the proper function of enzymes that play a vital part in protein, carbohydrate and, possibly, fat metabolism.

'I think it's my nerves, doctor.' It has been calculated that 2 in 6 prescriptions under the NHS are for 'nerves'*. These patients, who may present with a bewildering variety of vague non-organic signs and symptoms, all have one thing in common — they worry too much. Since this lessens their ability to deal with routine problems a vicious spiral of increasing worry and decreasing competence is set up. Combined with a doctor's advice and reassurance 'Drinamyl' gives these patients a holiday from tension. By inducing a mood of cheerful calmness, without drowsiness or inappropriate euphoria, it enables them to take a fresh look at their situation. Imaginary worries are set aside and energy sensibly apportioned to deal with matters of real concern.

'SULPHAMEZATHINE' PROPHYLAXIS

An Alternative to Tonsillectomy

"The results of the trial show that sulphadimidine was an effective prophylactic agent"

Brit. med. J., March 10, 1956, p. 540.

RECENT TRIALS in a well-known London hospital have clearly demonstrated that 'Sulphamezathine' prophylaxis can deal effectively with the problem of recurrent infections of the upper respiratory tract in children.

From observations of groups of children awaiting tonsillectomy, it is recorded that in those receiving a daily dose of 'Sulphamezathine' there was a substantial reduction in the incidence of acute respiratory infections, a significant shortening of school absence periods, and also fewer illnesses requiring attention from the family doctor.

'Sulphamezathine' prophylaxis is therefore considered worthy of trial in such cases as an alternative to tonsillectomy, and can be expected to reduce the number requiring operation.

NOTE: Of all the sulpha drugs, 'Sulphamezathine' is particularly suitable for prophylactic dosing. Its toxicity is low, it is well tolerated and gives rise to no renal complications.

Tablets (0.5 gramme) and a flavoured oral suspension (0.5 gramme per drachm) are available.

The only oral aminophylline preparation which ensures full therapeutic response

Clinical evidence shows that when, as in "THEODROX", aminophylline is combined with specially prepared aluminium hydroxide, gastric irritation is minimised. Large ORAL doses of aminophylline can, therefore, be tolerated to produce consistent, high blood levels of theophylline.

Each tablet of "THEODROX" contains 3 gr. of aminophylline and 4 gr. of dried aluminium hydroxide gel.

INDICATIONS—Congestive heart failure, bronchial or cardiac asthma and angina pectoris.

"THEODROX" with PHENOBARBITONE tablets contain in addition $\frac{1}{4}$ gr. phenobarbitone and are indicated in conditions where a degree of sedation is also required.

Both forms are available in bottles of 25, 100 and 1,000 tablets.

Spreading smooth and even . . .

Smoothly, thinly and painlessly Ef-Cortelan Skin Lotion (*liquid* hydrocortisone Glaxo) spreads over tender surfaces. Swiftly, safely, effectively—sometimes in a few hours—it suppresses inflammation, exudation and allergic skin reactions.

A little goes a long way.

Most conditions are adequately controlled by the 0.5% Ef-Cortelan Lotion and, because it has superior spreading and penetrating qualities and brings hydrocortisone into more intimate contact with the tissues, the lower strength is as effective as a 1% ointment. This, and the fact that only a little of the lotion is used, offers appreciable economic advantages. Ef-Cortelan Lotion is especially suitable for extensive, weeping surfaces and for application to the scalp.

GLAXO EF-CORTELAN SKIN LOTION

(0.5% and 1% hydrocortisone alcohol in water-miscible base) in 20 cc. squeeze bottles.

ALSO FROM THE GLAXO CORTISONE RANGE. EF-CORTELAN SKIN OINTMENT NO. 1 (1% and 2½% hydrocortisone acetate in *non-greasy* base); EF-CORTELAN SKIN OINTMENT NO. 2 (1% and 2½% hydrocortisone acetate in *greasy* base). Both in 5 g. and 15 g. tubes; 50 g. jars.

ANTE-NATAL CLINIC

DIAMOX
in
Pre-eclamptic toxæmia

Toxaemia is still a major obstetrical complication, and early clinical signs of the condition are often associated with retention of water and sodium. DIAMOX acetazolamide is not only a powerful diuretic, but also increases sodium excretion. Recent tests show that DIAMOX with a low salt diet significantly decreases the symptoms of pre-eclamptic toxæmia^{1,2}. Reports also show that in early toxæmia and hypertensive vascular disease, DIAMOX improves the condition, as indicated by loss of weight, reduction of oedema, decrease of albuminuria and a fall in blood pressure. In these trials, side reactions have been negligible and no effect on foetal viability has been observed.

PAINFUL GUT

'Merbentyl' relieves painful spasm of the gut without the side-effects (changes of heart rate, mydriasis, cycloplegia, dry mouth, etc.,) associated with other natural and synthetic anticholinergic agents. 'Merbentyl' both blocks the parasympathetic nerve endings and directly relaxes smooth muscle, thus it is an ideal remedy in functional bowel upsets and effectively allays painful spasm in organic diseases.

MERBENTYL

'Merbentyl' is available in tablets (each containing 10 mg. diethylaminocarbocyclobenzyl hydrochloride), and as a syrup (each 5 c.c. containing 10 mg. 'Merbentyl'). Also combined with Phenobarbitone (15 mg. (gr. 1/2) per tablet or 5 c.c. syrup).

Even on the highest dosage (8 tablets per day) the basic daily cost to the N.H.S. is less than 7d.

Governing factors

in balanced digitalisation

A constant and stable composition, rapid action, uniform absorption, and elimination quick enough to avoid prolonged toxicity; these are the qualities which would be expected of a digitalis preparation of choice. They are all evident in Digoxin. sportsman in disguise!

Beneath this formal city attire beats the heart of a sporting motorist — witness his M.G. Magnette! Handsomely it measures up to the demands of business and family affairs — in the elegance of its line, in its smooth, silent running, and in the quiet luxury of its interior. (Real leather upholstery — fascia panel and woodwork in solid walnut.) Yet, out on the open road, it puts up a performance right in line with M.G. tradition. Surging acceleration, rigid road-holding, powerful braking — all the joys of sports motoring are there in generous measure.

PLASTER

CATALYST

Gypsona
EXTRA

**Strength, lightness and resistance to water
combine to make this new type of plaster of Paris
bandage much more economical in use**

Very hard, water resistant casts result when plaster of Paris is polymer reinforced. That is why Gypsona 'Extra' has, in addition to all Gypsona's well known qualities, these extra advantages:

Durability

Gypsona 'Extra' casts outlast all other plaster casts and are more resistant to damage and the effects of water.

Lightness

Casts are thin, comfortable to wear, and therefore allow better functional treatment.

X-rays

Thinner casts permit greater clarity in X-ray photographs.

Cleanliness

Negligible plaster loss means less mess and a saving of time.

Economy

When the recommended method of application is followed, two Gypsona 'Extra' bandages will do the work of every three plaster bandages now used, and a more durable cast results.

(Gypsona standard bandages remain available for those cases where the special qualities of Gypsona 'Extra' are not required.)

Bislumina GOES A LONG WAY

Bislumina is packed in the freshly precipitated state ensuring that the fine particles present the largest possible surface area for the sequestration of pepsin, and adhere firmly to the gastric mucosa. Added to these properties is an effective antacid action. Bislumina provides comprehensive therapy and because of the method of preparation high efficiency is attained with low dosage.

A combination of sulphonamides with Penicillin and Vitamin 'B' for oral administration

A combination of three sulphonamides with a reasonable dose of Penicillin, Tercillin readily overcomes the difficulty of insolubility apparent in all sulphonamides when used independently. It also dispenses with the unpleasant flavour associated with the oral use of large doses of Penicillin, whilst the synergistic combination is still at least as effective as a large single dose of Penicillin. The incorporation of aneurine hydrochloride and nicotinamide in suitable dosage helps to overcome any vitamin deficiency caused by the alteration of the normal intestinal flora, which may occur after the use of the less soluble sulphonamides.

Tercillin is valuable in the treatment of pneumonia, urethritis, otitis media, mastoiditis, tonsillitis, sinusitis, scarlet fever, gonorrhoea and intrauterine infections. Also a wide variety of conditions associated with Staphylococcal and Streptococcal infections can be effectively combated with Tercillin.

FORMULA:

Sulphadimidine B.P. 0.0925G; Sulphamerazine B.P.C. 0.0925G; Sulphadiazine B.P. 0.065G; Nicotinamide B.P. 10 mgms.; Aneurine Hydrochloride B.P. 1.5 mgms.; Penicillin B.P. 100,000 units.

DOSE: 2 to 4 tablets for an adult. $\frac{1}{2}$ to 2 tablets for children according to age (every four hours).

New (10th) Edition

MODERN METHODS OF FEEDING IN INFANCY AND CHILDHOOD

by

DONALD PATERSON and GEORGE NEWNS

For many years this book has been popular not only with medical practitioners and students, but also with nurses, midwives and mothers of young children. The last revised edition was published in 1947 when wartime standards of feeding still prevailed. This new, tenth edition has been almost completely rewritten, some of the artificial foods have been replaced by later preparations, and the latest work on lactation, breast feeding and nutrition in health and disease has been incorporated.

Dr. Newns is Physician at the Hospital for Sick Children, Great Ormond Street, and the Dean of the Institute of Child Health, University of London.

Tenth edition. Demy 8vo. Illustrated. 15s.

Applications should be sent at once if no closing date is given.

Canvassing in any form will disqualify.

★ *SERVICE MEMBERS may have difficulty in supplying recent testimonials, but this should not deter them from applying.*

A fully registered medical practitioner who is liable for National Service must obtain deferment of recruitment in writing from the Central Medical Recruitment Committee or (in Scotland) the Scottish Central Medical Recruitment Committee before accepting any civilian appointment.

The position of provisionally registered medical practitioners who are liable for National Service has been made clear in a notice sent to them by the Ministry of Labour and National Service.

SALARY SCALES OF JUNIOR GRADES OF HOSPITAL MEDICAL STAFF

Registrar Grades, Whole-time

(a) **REGISTRAR**: Posts obtained normally not less than two years after registration as a medical practitioner and held normally for two years: £850 per annum in the first year; £965 per annum in the second and any subsequent years.

(b) **SENIOR REGISTRAR**: Posts obtained normally not less than four years after registration as a medical practitioner and held normally for four years: £1,100 per annum in the first year; £1,200 per annum in the second year; £1,300 per annum in the third year; £1,400 per annum in any subsequent years.

Other Grades, Whole-time

(a) HOUSE OFFICERS:

(i) *Provisionally registered medical practitioners*: £425 per annum for the first post held; £475 per annum for the second and all subsequent posts held;

provided that the employing authority (subject in the case of a Hospital Management Committee to the consent of the Regional Hospital Board) shall have discretion to determine that the remuneration of any officer holding his first post in the National Health Service as a House Officer shall be £475 per annum if they are satisfied that the officer has held at least one hospital post outside, of not less than six months' duration, involving clinical responsibilities equivalent to those of house posts in the National Health Service and supervised by appropriate specialist staff.

(ii) *Fully registered medical practitioners*: £525 per annum for any post held; provided that in exceptional circumstances, subject to the consent of the Minister, this rate may be exceeded by up to £50 per annum where a post cannot be filled otherwise.

In each case under sub-sections (i) and (ii) above, a deduction of £125 per annum in respect of board and lodging and other services provided shall be made and each post shall be tenable for six months.

(b) **SENIOR HOUSE OFFICER**: Posts obtained normally not less than one year (in Scotland, two years) after registration as a medical practitioner and normally held for one year only: £745 per annum.

(M.M.S.A.)**

The Mastery of Midwifery is designed to give evidence of intensive study and practical experience in *Ante-natal Care, Midwifery, and Infant Welfare* and their relation to *Hygiene and Preventive Medicine*. The possession of this Diploma will prove of value in private practice and also to candidates for appointments involving the special work described in the preceding paragraph. The tests imposed are stringent; the Examination, written, oral, and clinical, demands thorough and detailed knowledge gained by practice experience, and constitutes a definite endeavour to *combat Maternal and Infant Mortality*. Examinations are held twice yearly, in the months of May and November. Regulations and forms of application for admission to the Examination may be obtained from the Registrar, the Society of Apothecaries, Black Friars' Lane, E.C.4.

A **NEW** Development in analgesics

Panadol (N-acetyl-p-aminophenol) is a potent analgesic and antipyretic, new to this country. Clinical trials have shown it to be much better tolerated than Tab. Codein. Co. Panadol is therefore a valuable alternative to currently-used analgesics in arthritic, muscular and neuralgic pain, headaches and colds.

NO ASPIRIN—*no gastric irritation*

NO PHENACETIN—*no methaemoglobinaemia*

NO CODEINE—*no constipation*
