# A MANUAL OF ANÆSTHETIC TECHNIQUES

By WILLIAM J. PRYOR

8½ x 5½ in. 236 pp. 77 illustrations. 27s. 6d. Written primarily for House Surgeons and Registrars, this book will provide a vade-mecum wherein may be found the answers to practical problems which arise during day-to-day administration of anæsthetics. No attempt has been made to delve deeply into the theory of anæsthesia, the emphasis being on practical techniques.

# A MANUAL OF PRACTICAL OBSTETRICS

By O'DONEL BROWNE

Revised and rewritten by J. G. GALLAGHER

3rd Edn. 8\frac{3}{4} \times 5\frac{1}{2} in. 274 pp. 205 illus. 37s. 6d.

For the new edition of the late O'Donel Browne's well-known manual the book has been thoroughly revised to bring it in line with current practice. The revision has been so extensive that Dr. Gallagher has virtually rewritten much of the text.

#### X-RAYS

Their Origin, Dosage and Practical Application By W. E. SCHALL

brings the esters of NICOTINIC ACID

SALICYLIC ACID p-AMINOBENZOIC ACID

to the focal point of soft-tissue rheumatism

The esters in Transvasin, a new preparation developed by Hamol S.A., our Swiss associates, readily pass the skin barrier in therapeutic quantities and enable an effective concentration of the drugs to be built up where they are needed.\* Transvasin

not only induces vasodilation of the skin with a superficial erythema, but also brings about a deep hyperaemia of the underlying tissues. It is non-irritant, and can be safely used on delicate skins. It is now being widely prescribed with successful clinical results. Since a very small quantity is sufficient for each application, the cost of treatment is extremely low.

# Spreading smooth and even . . .

Smoothly, thinly and painlessly Ef-Cortelan Skin Lotion (hydrocortisone Glaxo) spreads over tender surfaces. Swiftly, safely, effectively—sometimes in a few hours—it suppresses inflammation, exudation and allergic skin reactions.

# A little goes a long way.

Most conditions are adequately controlled by the 0.5% Ef-Cortelan Lotion and, because it has superior spreading and penetrating qualities and brings hydrocortisone into more intimate contact with the tissues, the lower strength is as effective as a 1% ointment. This, and the fact that only a little of the lotion is used, offers appreciable economic advantages. Ef-Cortelan Lotion is especially suitable for extensive, weeping surfaces and for application to the scalp.

# A Superior Buffered Analgesic

ALASIL' TABLETS—the improved form of salicylate medication—provide the efficient analgesia expected from their content of aspirin. Their superior acceptability derives from their content of a reliable buffer which minimizes the tendency to gastric irritation sometimes caused by the use of aspirin alone.

Advantages

'Alasil' is an advanced sedative and antipyretic; it does not tend to induce gastric irritation; because of its high tolerability, it may be used for long-term administration even to those with sensitive stomachs, and to children.

Composition

'Alasil' Tablets contain the recognized antacid corrective, 'Alocol' (Colloidal Aluminium Hydroxide), which permits their sedative principle, acetylsalicylic acid, to exert its action with minimal risk of side-effects

Indications

Symptomatic pain generally; rheumatism, fibrositis, lumbago, headache, dysmenorrhoea; dental pain.

These new 'Sublings' each contain 10 mg. of Testosterone B.P. in a special water-soluble wax base devised to give perfect sublingual absorption. They have been shown to be clinically effective and to produce a 17-ketosteroid excretion rate COMPARABLE TO THAT FROM THE SAME DOSAGE OF INJECTED TESTOSTERONE PROPIONATE.

An objective test of the efficacy of treatment is thus available. This is in contrast to the almost entirely subjective evidence in therapy with Methyltestosterone B.P. (whether administered sublingually or swallowed) since this is not excreted as 17-ketosteroids and admittedly gives less satisfaction than injected Testosterone Propionate weight for weight.

# RAUWILOID+VERILOID

# ...a safe yet powerful combination

The standardized hypotensive alkaloids of Rauwolfia serpentina ('Rauwiloid') and Veratrum viride ('Veriloid') together provide a most effective and safe oral treatment for moderate to severe degrees of hypertension. 'Rauwiloid' widens the margin between the emetic and the antihypertensive doses of 'Veriloid', and enables therapeutic doses of 'Veriloid' to be given in almost every case of hypertension. This combination of drugs exerts a steady and prolonged hypotensive effect, and produces the minimum of discomfort to the patient.

"The addition of 'Rauwiloid' makes 'Veriloid' easy to administer, more effective and practically does away with unpleasant side-actions".

Amer. J. Med., (1954) 17:629

'Rauwiloid + Veriloid' tablets each contain 1 mg. of the alkaloids of *Rauwolfia serpentina* and 3 mg. (by biological assay in terms of reference standard) of those of *Veratrum viride*. The starting dosage is one tablet three times daily. The tablets are available in bottles of 100 and 500.

# The right diet at your fingertips

This filing box, designed for the consulting room desk, contains an indexed supply of diet cards for 16 different conditions. The cards are planned to include specimen daily menus which facilitate the patient's co-operation and save the doctor's time. This is one of the services offered free of charge to the medical profession by the Energen Dietary Service.

In special cases, clinical considerations often necessitate the preparation of a diet which takes into account the individual requirements of the patient. On receipt of the appropriate information from the practitioner, such diets can be specially constructed and sent through the post; or a consultation can be arranged with a senior dietitian.

The Energen Dietary Service is staffed by fully qualified dietitians, under close medical supervision. It offers independent information and assistance to the medical profession in all

dietary and nutritional matters.

# Atomic detector proves

# 80% less engine wear with

# BP Energol 'Visco-static'

# Measuring wear while the engine is running

Over and over again test results with BP Energol 'Visco-static' motor oil have shown 80% less wear on cylinder bores and piston rings. These tests have been made with a wonderful new radio-active wear-detector at The British Petroleum Company's Research Laboratories. By fitting radio-active parts, engineers measure wear while the engine is actually running.

# What is the main cause of engine wear?

Research has proved that engines wear out faster while warming up. The reason is that while the car isn't in use, acid products condense on the cylinder walls and attack the surfaces. In turn the products of this corrosion are abrasive and grind the piston rings and cylinders when the engine starts. This accounts for the greater part of all engine wear.

# How BP Energol 'Visco-static' reduces wear

BP Energol 'Visco-static' defeats starting wear in two ways. First because of its anti-corrosive additives, it leaves a strong, protective layer of oil on the cylinder walls when the engine is stopped. Secondly when the engine is started again BP Energol 'Visco-static' flows freely even in extreme cold. This ensures that the cylinders are flushed with adequate lubricant during the critical warming up period.

# Up to 12% saving in petrol

You cut down oil drag with BP Energol 'Visco-static' and so save up to 12% of petrol on start and stop running and up to 5% on

longer runs. Starting is easier too in all weathers and your engine runs more freely and easily. BP Energol 'Visco-static' is for all the year round—another plus point.

# Do's and Don'ts with BP Energol 'Visco-static'

Don't mix it with other oils.

Drain and refill with BP Energol
'Visco-static.' If you have not
been using a detergent oil you

should run for 500 miles, then drain and refill again.

Don't change to it if your engine will shortly need an overhaul. You will do better to continue with the normal grades of BP Energol until it has been overhauled.

BP Energol 'Visco-static' is obtainable at garages where you see the BP Shield, in pint, quart and I gallon sealed containers.

Strength, lightness and resistance to water combine to make this new type of plaster of Paris bandage much more economical in use

Very hard, water resistant casts result when plaster of Paris is polymer reinforced. That is why Gypsona's Extra' has, in addition to all Gypsona's well known qualities, these extra advantages:

## Durability

Gypsona 'Extra' casts outlast all other plaster casts and are more resistant to damage and the effects of water.

#### Lightness

Casts are thin, comfortable to wear, and therefore allow better functional treatment.

#### X-ravs

Thinner casts permit greater clarity in X-ray photographs.

# Cleanliness

Negligible plaster loss means less mess and a saving of time.

#### Feonomy

When the recommended method of application is followed, two Gypsona 'Extra' bandages will do the work of every three plaster bandages now used, and a more durable cast results.

(Gypsona standard bandages remain available for those cases where the special qualities of Gypsona 'Extra' are not required.)
