**When
nourishment
is the main problem . . .**

BRAND'S ESSENCE is a first-class protein of animal origin, in a form and strength that will not overtax a weakened system. Being partly hydrolized, it is capable of easy ingestion, digestion and absorption. It is extremely palatable, and may be taken either as a jelly or as a liquid. It helps to support convalescence and assists in restoring a positive nitrogen balance.

The major indications for the administration of Brand's Essence are loss of appetite during fatigue, acute infections, and dysphagia or digestive disturbances due to organic or bacterial lesions of the mouth, oesophagus and alimentary tract, and after surgical procedures.

The addition of Brand's Essence to low residue and weight-reducing diets is especially appreciated by the patient.

Two weapons against Athlete's Foot

and other fungal dermatoses

The combined use of Mycil Ointment and Powder has proved to be highly effective in both prophylaxis and treatment of fungal dermatoses.

Mycil Ointment is formulated to ensure penetration of the active constituent, chlorphenesin, to the site of the infection.

Mycil Powder, used alone, prevents reinfection. Because of its adsorptive properties it is useful in combating the effects of excessive perspiration.

Both preparations are non-mercurial and odourless and may be used over long periods, if necessary, without adverse effects.

The case of *Leptinotarsa decemlineata* . . .

To farmers in many countries of Western Europe the result of an all-out attack of Colorado Beetle needs no description. It simply means no crop. In Switzerland, for instance, where this pest has long been a major problem, it is virtually impossible to grow potatoes without effective insecticidal protection.

Both the adult beetles and the larvae feed continuously on the foliage throughout their lives; the adults emerging from the soil in May are the first of several annual generations.

A number of insecticides will give good control of the pest,

but the most effective from all points of view is dieldrin, developed by Shell. Dieldrin halves the number of sprayings needed and is completely successful at the very low dosage of $3\frac{1}{2}$ oz. per acre. Good control has been obtained with as little as $\frac{3}{4}$ oz!

Dieldrin is now used on a large part of the Swiss potato crop and its greater efficiency

has much reduced the cost of providing protection for this essential harvest.

Dieldrin, aldrin, endrin . . . these three advanced insecticides developed by Shell are complementary to each other. Between them they control most of the major insect pests which menace agricultural production and public health throughout the world. Have you an urgent pest problem in your area?

dieldrin

dieldrin, aldrin and endrin are

insecticides for world-wide use

"A cure in the true sense of the word"

Extract from *THE BRITISH ENCYCLOPAEDIA OF MEDICAL PRACTICE*,

Cumulative Supplement 1955, p. 79.

"The substances which stimulate peristalsis are produced in the colon itself by the action of *B. coli* enzymes on the senna glycosides, and the stimulating action is a neuromuscular one.... This reproduction of the physiological process of normal defaecation is of considerable clinical importance in giving to senna a re-educative action in cases of chronic constipation, so constituting a cure in the true sense of the word. Senokot... is the pleasantest and most reliable form of senna."

• In Constipation of Children

"This new preparation can play a valuable part in the treatment of chronic forms of constipation in children as well as in simple cases."

The Medical Press, June 9, 1954, 521.

• In Constipation of the Aged

"... the results have been most satisfactory and the laxative has been well tolerated and well liked by these elderly patients."

Report from the Sherwood Hospital, Nottingham, 1954.

• In Constipation of Pregnancy

"Senokot has been used as a routine in my unit and has proved suitable during pregnancy as well as in the puerperium."

The Lancet, March 21, 1953, 602.

• In Chronic Constipation

"... a re-educative value in the treatment of chronic constipation has been demonstrated for the new preparation by a number of workers."

The Medical Press, August 11, 1954, 127.

*Prescribed under the N.H.S.:
no B.P. equivalent; inexpensive;
not advertised to the public.*

Rx *Senokot*

Senokot is sold in Gt. Britain,
U.S.A., Canada and in
many other countries.

Granules: 1-2 teaspoonfuls. Tablets: 2-4

ALFRED LESLIE ROWSE, D.LITT., F.R.S.L., Fellow of All Souls College, Oxford, was born in St. Austell, Cornwall. President of the English Association in 1952, he is also editor of the Teach Yourself History Library. Poetry and politics, the England of Elizabeth, and his native county in all ages—these are among the main interests of this distinguished historian and stimulating teacher.

"My Daily Mail" by A. L. ROWSE

"OF ALL THE POPULAR, more accessible, papers the Daily Mail is that which stands out for good standards.

I first noticed this some years ago in relation to its foreign news: very important in the world as it is today that we should be reliably informed.

Even more important is the way the news is set out: first things come first and are given their proper place. I hate the hysterical headlineism of modern journalism.

I like the serious-minded articles on the middle

page and the book-reviews also exemplifying good standards.

Best—and a rarity this—are the leaders, which are both incisive and responsible. People seem to find it difficult to be both—especially intellectuals and writers: all too many of them have no sense of responsibility whatever.

To have no standards means treating the public with disrespect. Your leaders, treating serious issues seriously and also very effectively, with plenty of spirit, display a fundamental respect for the mind of the public."

Drip therapy without a tube

NULACIN

In the past, the successful treatment of many cases of peptic ulceration demanded hospital conditions. Now, by means of Nulacin Tablets, it is possible to control gastric hyperacidity without any inconvenience to the patient. By using Nulacin Tablets as directed, an ambulant patient can obtain all the advantages of intragastric milk-alkali drip therapy.

INDICATIONS

NULACIN tablets are indicated whenever neutralization of the gastric contents is required: in active and quiescent peptic ulcer, gastritis, gastric hyperacidity.

Beginning half-an-hour after food, a NULACIN tablet should be placed in the mouth and allowed to dissolve slowly. During the stage of ulcer activity, up to three tablets an hour may be required. For follow-up treatment, the suggested dosage is one or two tablets between meals.

GASTRIC ANALYSIS Superimposed gruel fractional test-meal curves of five cases of duodenal ulcer

Career Girl

'MYSOLINE' not only reduces the frequency and severity of epileptic attacks, but also produces a marked sense of well-being. The patient is encouraged to take a renewed and more vigorous interest in life, and can return confidently to a normal way of living.

A major advance in the treatment of epilepsy, 'Mysoline' is especially indicated in the *grand mal* and psychomotor types, and it

is frequently of help in cases of *petit mal*. It combines high activity with low toxicity, a wide margin of safety and absence of hypnotic effect during established treatment.

RIKER LABORATORIES LIMITED
LOUGHBOROUGH LEICS

When will the last patient die of T.B?

Will it be 2000AD, 2500AD, 3000? Or is this modern scourge due for defeat tomorrow? One thing is certain. The future will surely bring its own medical problems. How, for instance, will the doctor treat stress conditions caused by space travel. What transportation will carry him on his daily round. Surely the motor car will be a relic of a bygone age. And surely diagnosis will be reached not by an evaluation of symptoms and experience but rather by mental transference of feelings from patient to physician. Who knows, perhaps even treatment too will be purely psychological. Let's ponder awhile on the stupendous implications which confront us when we open up this vista of the future. Probably T.B. and possibly carcinoma too will already have succumbed to newly discovered treatments. Possibly it will be a micro-organism, as yet unisolated, that rids mankind of these and other maladies. And what of progress in the field of antibiotics. Will Terramycin, for instance, still be the "wonder drug"? How will its effectiveness against no fewer than 100 infections compare with the range of future medicaments. Will there then be medical weapons with even broader spectrums? Whatever is the judgement of time on antibiotics, however our present medical efforts are assessed by those who come after, and whether we become the objects of scorn or praise, no medical man of the future will ever be able to justifiably accuse us of giving anything except our best. Or is man *never* destined to be whole in mind and body. Well, what do *you* think?

Terramycin is the Trade Mark of Chas. Pfizer & Co., Inc. for their brand of oxytetracycline.

... the NEW banana-flavoured, insoluble penicillin salt

COMPOCILLIN *Oral Suspension*

(Hydrabamine Penicillin G, Abbott)

CompoCillin Oral Suspension is prepared in a palatable, highly stable and fluid form which permits easy oral administration of penicillin. High and even peak blood levels of CompoCillin appear within 30 minutes—concentrations remain significant for more than 4 hours.

CompoCillin is indicated in the treatment of infections produced by penicillin-sensitive organisms including staphylococci, gonococci, streptococci, pneumococci, and in the type of case in which oral penicillin therapy is known to be therapeutically effective. It may also be

used prophylactically where secondary infection is a recognized danger.

The recommended initial dose is one or two 5 c.c. teaspoonfuls every six hours. For small children the dosage should be calculated according to age and weight. This seldom induces side effects. Alterations in dosage should be guided by the patients' therapeutic response.

COMPOCILLIN Oral Suspension is ready for instant use, and is supplied in 2 fl. oz. bottles containing 300,000 units per 5 c.c. teaspoonful.

Symbol of security

The keynote in the success of ACHROMYCIN tetracycline is the genuine sense of *security* that its use engenders. More and more doctors look first to ACHROMYCIN—secure in the knowledge that it promises consistently superior results. Its range of antimicrobial activity is unsurpassed; so, too, is its ability to diffuse swiftly throughout the body tissues.

Moreover, ACHROMYCIN is available in an unusually wide variety of prescribing forms and is quick to gain the acceptance and confidence of patients of all ages.

CARNATION MILK for Infant Feeding

The advantages of Homogenisation

1. Breast Milk

2. Carnation Milk diluted to
whole milk standard

3. Cows' Milk

The reduced reproductions of photo-micrographs above (originally magnified 560 times) show a direct comparison between the fat globule size and distribution in breast milk, Carnation Milk and cows' milk. It will be seen that the homogenisation process given Carnation Milk breaks down the large globules of ordinary cows' milk and distributes them evenly.

The fat globules of ordinary cows' milk average 5 microns. Carnation globules after homogenisation average 1 micron, and this reduction in size increases the total number of fat globules by a minimum of 125 times. As only the total surface area of the globules has been increased and not the mass, the attraction between fat and serum exceeds gravitational force and a permanent emulsion is formed. Butterfat, therefore, cannot separate out.

The advantages of homogenisation when prescribing Carnation Milk are:

- 1 Fat globule surface area available for enzymic action is increased as much as five times over that of ordinary milks.
- 2 Complete digestion of the butterfat is practically assured and the irritating effect of free fatty acids, so troublesome with ordinary milk, is eliminated.
- 3 Miscibility of the fat in Carnation Milk with
 - a Water during feed preparation and without subsequent fat separation.
 - b The contents of the upper digestive tract.
- 4 Reduction below full-cream value removes proportionately the important nutrients carried by butterfat. These are the vitamins A, E and K—the phospholipids and sterols of whole milk. Homogenisation renders a full-cream

milk superior for all infant feeding.

5 Feeding bottles are easily cleaned by even inexperienced mothers. The risk of bacteria entrapped in a fat film is eliminated.

6 The adaptability of Carnation because of homogenisation permits the use of one simple milk for ALL infant feeding, with the exception of specific intolerances to milk solids other than whey proteins.

Other attributes of Carnation Milk are:

- 1 Safety, because of sterilisation after the Carnation cans are sealed.
- 2 Hypo-allergenic properties.
- 3 Uniformity—due to standardisation of solids.
- 4 Prophylactic D₃.
- 5 Accuracy of measurement.

"The Feeding of Infants"—a book specially prepared for doctors—together with reprints of clinical investigations and Carnation feeding charts are available from: Medical Department, General Milk Products Limited, Bush House, Aldwych, London, W.C.2.

PIRITON is the most effective therapeutic agent for the control of hay fever symptoms. Owing to its low dosage, lack of side-effects and high degree of tolerance, Piriton may be given with safety over the long periods necessary for adequate control of hay fever. Welcome relief of sneezing and lacrimation is obtained in some cases within 10 minutes and in most cases within 30 minutes; following a single dose, given orally, a relatively symptom-free state may be maintained for up to 6 hours.

Piriton

Trade Mark

TABLETS Piriton Maleate are available in bottles containing 25 and 500 tablets. Each tablet contains 4 mg. of Piriton (chlorpheniramine maleate).

INJECTION of Piriton Maleate is available in boxes of 5 and 100 ampoules of 1 c.c. Each c.c. contains 10 mg. of Piriton (chlorpheniramine maleate).

PAEDIATRIC SYRUP is supplied in bottles of 4 fluid ounces and 2 litres. Each teaspoonful contains 2 mg. of Piriton (chlorpheniramine maleate).

How they fought malaria

in Kasongo-Mumema

A victory of major importance was won against Malaria in 1951. Won at a region near Elizabethville in the Belgian Congo called Kasongo-Mumema. And this after the dry season, when the Sporozoite Index rises.

Between 3rd September and 15th December, 1951, weekly distributions of the new drug, 'Daraprim', were made. The results speak for themselves:

PLASMODIAL INDEX

	BEFORE	AFTER				
	3 Sept. 1951	24 Sept. 1951	1 Oct. 1951	22 Oct. 1951	19 Nov. 1951	17 Dec. 1951
Proportion Infected	40/183	11/172	6/170	4/158	2/149	0/161
% Infected	21.9	6.4	3.5	2.5	1.3	Nil

On the 26th March 1952 the Index was still negative.

Evidence of this kind shows the major role that 'Daraprim' can play in suppressing malaria in a community.

'DARAPRIM'

PYRIMETHAMINE

BRAND

In the French Union, Tunisia and Morocco pyrimethamine is available under the trade name 'Malocide'

'Daraprim' is tasteless and well tolerated, and causes no skin discoloration. It is supplied as 25 mgm. tablets in packs of 6, 30 and 1000.

EAR WAX *Removed this easy way*

The removal of wax from the external auditory meatus has, in the past, normally entailed attendance by the patient for diagnosis and for the prescription of a suitable loosening agent, and a second attendance a few days later for syringing. Now, by the use of Cerumol Ear Drops, wax can be removed in most cases at one visit. A few drops of Cerumol can be instilled into the ear and, while another patient is being attended to, the soft cerumen dissolves and the harder wax disimpacts. The wax can then be removed by gentle syringing or with cotton wool. The wax may even be found to run out of the ear on its own accord, in which case patients themselves may instil Cerumol at home, obviating further attendances. Cerumol is anti-bacterial, non-irritating and harmless to the lining of the external auditory meatus or the tympanic membrane. Cerumol is included in Category No. 4 of the M.O.H. classified list of Proprietary Preparations and may be prescribed on N.H.S. Form E.C.10.

PACKS:—For Surgery Use : 10 c.c. vial—separate dropper included. (Basic N.H.S. price 2/8.) For Hospital Use : 2 oz. and 10 oz. bottles.

Reflections on Feet

The athletic season is upon us. Dotted over sports grounds and village greens are feet. Always in pairs, they stand, shuffle, trot, run, tire and halt. And above all they sweat. Not the strong, concentrated fungicidal sweat from which SOPRONOL's active constituents are derived, but a copious, dilute, watery sweat which does little more than macerate potentially soggy skin to provide an even better foothold for the lurking ubiquitous fungus. Yes, this is the season, sun willing, not only of inter-athleticism but of inter-digital stoicism. The latter burden avoidable—for Sopronol makes tinea toe the line. Sopronol Ointment is available in 1 oz. collapsible tubes.

Formula: Sodium Propionate 12.1%, Propionic Acid 2.7%, Sodium Caprylate 9.8%, Zinc Caprylate 4.9%, Dioctyl Sodium Sulphosuccinate 0.15%.

Sopronol

OINTMENT

Wyeth

The word 'Sopronol' is a registered trade mark.

JOHN WYETH & BRO. LTD., CLIFTON HOUSE, EUSTON ROAD, LONDON, N.W.1

An intravenous barbiturate anaesthetic with the following properties

- ★ SMOOTH, RAPID INDUCTION
- ★ SHORT DURATION OF ACTION
- ★ GOOD TOLERANCE
- ★ ULTRA-SHORT RECOVERY PERIOD
- ★ MINIMAL POST-ANAESTHETIC CONFUSION

These properties make 'Transithal' an excellent anaesthetic agent for use in outpatients and casualty departments and in dental and other procedures in which brief intravenous anaesthesia is indicated. In such procedures 'Transithal' is superior to thiopentone sodium in that patients not only require less post-anaesthetic nursing care but also a much shorter period of detention before full recovery from anaesthesia takes place.

A Shooting Party at Lunch

This picture, by an unknown illustrator, recalls the large outdoor compositions of Watteau, which it resembles in revealing the Eighteenth-Century French preoccupation with extravagant *al fresco* gatherings.

One looks in vain for any evidence that the "shooting" has produced results. Of the social success of the consequent junketings, however, there can be no doubt at all.

Eating Out...

Eating away from home is always more or less hazardous to the hyperacid patient.

Portable medication is, in the patient's untutored hands, scarcely less risky; indiscriminate use of the many alkaline remedies within easy purchase often does more harm than good.

For the occasional or habitual dyspeptic alike, PRODEXIN affords, in a convenient and palatable tablet, a means of checking hyperacidity by regulating gastric pH at a safe and constant level for long periods.

Packings

Cartons of 30 individually wrapped tablets and dispensing packs of 240 tablets.

Basic N.H.S. cost of 240 tablets: 23s.4d.

Each Prodexin Tablet contains

Aluminium glycinate.....0.9 gm.

Light magnesium carbonate.....0.1 gm.

PRODEXIN

for the menopausal syndrome

**A NEW FAT-STORED
ŒSTROGEN**

TACE

may change present-day concepts of œstrogen therapy because:—

TACE

is stored in body fat—its activity is gradually released in a manner closely resembling natural œstrogen secretion.

TACE

is free from side effects. Nausea, vomiting and œstrogen withdrawal bleeding in the female and painful gynæcomastia in the male are not produced.

TACE

has virtually no effect on the pituitary gland. Resistance does not develop on prolonged therapy—'TACE' is therefore of particular value in the treatment of prostatic carcinoma where it will often continue to control the condition when resistance to other œstrogens has developed.

INDICATIONS

1. MENOPAUSAL SYNDROME
2. INHIBITION OF LACTATION
3. PROSTATIC CARCINOMA

DRAMAMINE* IN VERTIGO

Labyrinthine Disturbance

Long recognised as a standard for the management of motion sickness, Dramamine has become accepted in the control of a variety of other clinical conditions characterised by vertigo.

Vertigo, it has been claimed, is primarily due to a disturbance of those organs of the body that are responsible for body balance. When the posture of the head is changed, the gelatinous substance in the semi-circular canals begins to flow. This flow initiates neural impulses which are transmitted to the vestibular nuclei. From this point impulses are sent to different parts of the body to cause the symptom complex of vertigo.

Some impulses reach the eye muscles and cause nystagmus ; some reach the cerebellum and skeletal muscles and righting of the head results ; others activate the emetic centre to result in nausea, while still others reach the cerebrum making the person aware of his disturbed equilibrium. *Vertigo may be caused by a disease or abnormal stimuli of any of these tissues involved in the transmission of the vertigo impulse, including the cerebellum and the end organs.*

A possible explanation of Dramamine's action is that it depresses the overstimulated labyrinthine structure of the inner ear. Depression, therefore, takes place at the point at which these impulses, causing vertigo, nausea and similar disturbances, originate. Some investigators have suggested that Dramamine may have an additional sedative effect on the central nervous system.

Repeated clinical studies have established Dramamine as valuable in the control of the symptoms of Menière's syndrome, radiation sickness, hypertension vertigo, the vertigo of fenestration procedures, labyrinthitis and vestibular dysfunction associated with antibiotic therapy, as well as in motion sickness.

Any of these conditions in which Dramamine is effective may be classed as "disease or abnormal stimuli"† of the tissues including the end organs (gastro-intestinal tract, eyes) and their nerve pathways to the labyrinth.

Dramamine (brand of dimenhydrinate) is supplied in tablets of 50 mg. in bottles of 12, 36, 100 and 1000 tablets and in cartons (10 strips of 10 tablets). G. D. Searle & Co., Ltd., 83, Crawford Street, London, W.1.

* Regd. Trade Mark

† "Dizziness" : Vertigo and Syncope, G.P. 8:35 (Nov.) 1953.

The site of Dramamine's action is probably in the labyrinthine structure.

HUMANISED TRUFOOD

A MILK MODIFICATION SPECIFICALLY DESIGNED TO MEET THE
NUTRITIONAL NEEDS OF THE NORMAL INFANT

Humanised Trufood is not just a dried milk: it is a modification of cows' milk specifically designed to meet the needs of the normal infant from birth.

The fat content compares favourably with that of "Full Cream" dried milk powders. Moreover, as Trufood is dried by the spray process the fat is kept in a fine, well-diffused emulsion, thus ensuring easier assimilation.

Full information about Humanised Trufood and the seven other Trufood milks for infants will be supplied on request to Trufood Limited, Green Bank, London, E.1.

You will find that when you have to feed an infant artificially there is a better Trufood milk available whatever your requirement may be.

Brand's

MEAT PROTEIN FOODS FOR BABIES

The makers of Brand's Essence are pleased to introduce Brand's Strained Protein Foods for Babies.

Brand's Strained Beef and Brand's Strained Veal are all fine table-quality meat, ground to a smooth meat purée and moistened with meat broth. A little salt is added for flavouring.

Clinically tested, Brand's Strained Protein Foods were very well received and very well tolerated. They are recommended as an addition to normal infant diet, and are especially helpful during weaning. They can be given from the age of 3½ to 4 months onwards.

Brand's Strained Protein Foods are free from preservatives; heat-sealed and sterilized, in 1½ oz. glass jars. Professional samples and literature on request.

BRAND'S
STRAINED BEEF

BRAND'S
STRAINED VEAL

Brand's well-known Chicken Broth, Bone & Vegetable Broth (thick or clear), and Strained Prune, are also available to help in providing a properly varied diet.

Consulting room ballad

"What do you think of Guinness, Sir?"

The brewer said to me.

"Does it aid the ailing patient?"

Does it help the blind to see?

Is it any use as medicine?"

Said my favourite pharmacist,

"Do you think we should include it
In the therapeutic list?"

My well considered answer was,

"There isn't any doubt,

There's nothing like a Guinness

To make one's heart feel stout.

It won't restore the dead to life,

Or mend a broken arm,

But it titillates the appetite

And never does you harm.

"It sets the patient on his feet,

Restores his muscle tone,

Inflates the rabbit's ego,

Increases blood and bone,

Alleviates depression

Insomnia melts away,

It's kindest to one's ulcer

If taken once a day."

M.B., Ch.B. *

Guinness

is good for you

* Doctors, too, enjoy writing verse about Guinness. The above, contained in a letter addressed to Guinness by one of them, is published by kind permission.

Canned strained foods set a mother's mind at rest

As you know, some mothers are worried when you advise early mixed feeding for baby. With so many other things to do, the difficulty of obtaining and preparing a variety of fresh foods seems almost insuperable. But Heinz Strained Foods solve the mother's problem and make it easy for her to follow your advice.

Furthermore, Heinz Strained Foods are better for baby than many home-prepared foods. Heinz get their vegetables and fruits straight from farms. And the special Heinz cooking and straining equipment preserves the maximum goodness.

So with 19 really nourishing varieties to choose from, it's easy for mother to give her baby the varied diet you recommend.

For a FREE booklet giving the nutrient values of all 19 varieties of Heinz Strained Foods, please write to Dept. 1R, H. J. Heinz Company Ltd., London N.W.10.

Malnutrition and the skin

In malnutrition the skin is frequently affected. Thus in pellagra, which is ascribed mainly to nicotinic acid deficiency, dermatitis is one of the classical symptoms. Riboflavin deficiency is also characterized by skin lesions such as cheilosis, angular stomatitis and dermatitis of the nasolabial folds.

Marmite has been found particularly valuable in the treatment of lesions of mucocutaneous junctions due to riboflavin deficiency. Marmite provides 1.5 mg. riboflavin and 16.5 mg. nicotinic acid per ounce, as well as all the other known factors of the vitamin B complex. It is easily administered as it can be incorporated in the diet in a variety of appetising ways.

APPOINTMENTS

Applicants should state name, address, age, nationality, qualifications, and enclose (unless otherwise specified) one copy each of 3 recent ★ testimonials with short statement of experience and appointments held.

Applications should be sent at once if no closing date is given.

Canvassing in any form will disqualify.

★ *SERVICE MEMBERS may have difficulty in supplying recent testimonials, but this should not deter them from applying.*

A fully registered medical practitioner who is liable for National Service must obtain deferment of recruitment in writing from the Central Medical Recruitment Committee or (in Scotland) the Scottish Central Medical Recruitment Committee before accepting any civilian appointment.

The position of provisionally registered medical practitioners who are liable for National Service has been made clear in a notice sent to them by the Ministry of Labour and National Service.

SALARY SCALES OF JUNIOR GRADES OF HOSPITAL MEDICAL STAFF

Registrar Grades, Whole-time

(a) **REGISTRAR:** Posts obtained normally not less than two years after registration as a medical practitioner and held normally for two years: £850 per annum in the first year; £965 per annum in the second and any subsequent years.

(b) **SENIOR REGISTRAR:** Posts obtained normally not less than four years after registration as a medical practitioner and held normally for four years: £1,100 per annum in the first year; £1,200 per annum in the second year; £1,300 per annum in the third year; £1,400 per annum in any subsequent years.

Other Grades, Whole-time

(a) HOUSE OFFICERS:

(i) *Provisionally registered medical practitioners:* £425 per annum for the first post held; £475 per annum for the second and all subsequent posts held;

provided that the employing authority (subject in the case of a Hospital Management Committee to the consent of the Regional Hospital Board) shall have discretion to determine that the remuneration of any officer holding his first post in the National Health Service as a House Officer shall be £475 per annum if they are satisfied that the officer has held at least one hospital post outside, of not less than six months' duration, involving clinical responsibilities equivalent to those of house posts in the National Health Service and supervised by appropriate specialist staff.

(ii) *Fully registered medical practitioners:* £525 per annum for any post held;

provided that in exceptional circumstances, subject to the consent of the Minister, this rate may be exceeded by up to £50 per annum where a post cannot be filled otherwise.

In each case under sub-sections (i) and (ii) above, a deduction of £125 per annum in respect of board and lodging and other services provided shall be made and each post shall be tenable for six months.

(b) **SENIOR HOUSE OFFICER:** Posts obtained normally not less than one year (in Scotland, two years) after registration as a medical practitioner and normally held for one year only: £745 per annum.

(c) **JUNIOR HOSPITAL MEDICAL OFFICER:** Officers who have held house appointments but who are not Registrars and who have less responsibility than other hospital officers of non-consultant status: £775 (for an officer appointed not less than one year after full registration as a medical practitioner) by £50 to £1,075 per annum.

ALL NATIONAL HEALTH SERVICE HOSPITAL APPOINTMENTS ARE IN ACCORDANCE WITH THE TERMS AND CONDITIONS OF SERVICE OF HOSPITAL MEDICAL STAFF

Those intending to apply for resident appointments in the Registrar grades are recommended to make inquiries with regard to the deductions proposed for board and lodging at the time of submitting their applications, where this is not stated in the advertisement.

ANTI-TUBERCULOSIS CHEMOTHERAPY
PROJECT (India)**VACANCIES FOR MEDICAL OFFICER AND FOR BACTERIOLOGIST**

The World Health Organization and the Indian Government have invited the Medical Research Council to be responsible for scientific direction of a research project to assess the value of tuberculosis chemotherapy in domiciliary patients. The Council have accepted the invitation and now seek to recruit, on behalf of the World Health Organization, (a) a Medical Officer (to assist the Medical Director), and (b) a Bacteriologist for work on the project in Madras which will include both out-patients and hospital patients. The successful candidate for post (a) will be expected to do a limited amount of postgraduate teaching. For post (b) responsibilities will include the bacteriological diagnosis of tuberculosis, the culture and identification of acid-fast organisms and the investigation of bacterial sensitivity to the drugs under study, and the successful candidate will also supervise the training of research workers in the bacteriology of acid-fast infections. Post (a): Age under 45. Experience in chest diseases, especially tuberculosis. Post (b): Medical qualification, or University degree in bacteriology, with experience in running a laboratory. Conditions of service: The successful candidates will be employed by W.H.O. by contract; for two years in the first instance, extendable to five years in all, for post (a), and for one year in the first instance, extendable, for post (b). Both posts: Salary: £2,100 per annum (approximately), income tax free under the usual W.H.O. concession, with yearly increments (For post (b), it may be higher for a candidate with exceptional experience). In addition lodging allowances (about £550 per annum), dependant and kit allowances and educational grants, all tax free. First-class air passages for men appointed and dependants to India and back. Appointments will start as soon as possible. It may be possible to arrange for the secondment of the successful candidates if they are, at present, employed by the National Health Service or the Medical Research Council. Applications (two copies, stating post sought), giving age, qualifications, details of experience and the names of three referees, should be sent to the Establishment Officer, Medical Research Council, 38, Old Queen Street, Westminster, London, S.W.1, within one week of the publication of this notice. Candidates placed on short list will be asked to fill up World Health Organization questionnaires. (7543)

Overseas (Vacant)—contd.**AMERICAN UNIVERSITY OF BEIRUT**
Beirut, Lebanon

ST. ANDREW'S HOSPITAL, NORTHAMPTON
for Nervous and Mental Disorders

President: The Earl Spencer, Medical Supt., Thomas Tennent, M.D., F.R.C.P., D.P.H., D.P.M.

This Registered Hospital is situated in 130 acres of park and pleasure grounds. Voluntary patients who are suffering from incipient mental disorders or who wish to prevent recurrent attacks of mental trouble, temporary patients and certified patients of both sexes are received for treatment. Careful clinical, biochemical, bacteriological and pathological examinations. Private rooms with special nurses, male or female, in Hospital or in one of the numerous villas in grounds of the various branches can be provided.

MOULTON PARK.—Two miles from the main Hospital there are several branch establishments and villas situated in a park and farm of 650 acres. Milk, meat, fruit and vegetables are supplied to the Hospital from the farm, gardens, and orchards of Moulton Park. Occupational therapy is a feature of this branch and patients are given every facility for occupying themselves in farming, gardening and fruit-growing.

WANTAGE HOUSE.—This is a Reception Hospital in detached grounds with a separate entrance to which patients can be admitted. It is equipped with all the apparatus for the complete investigation and treatment of Mental and Nervous Disorders by the most modern methods; insulin treatment is available for suitable cases. It contains special departments for hydrotherapy by various methods, including Turkish and Russian baths, the prolonged immersion bath, Plombière's treatment, etc. There is an Operating Theatre, a Dental Surgery, an X-ray Room, an Ultra-Violet Apparatus, and a department for Diathermy and High-frequency treatment. It also contains Laboratories for biochemical, bacteriological and pathological research. Psychotherapeutic treatment is employed when indicated.

BRYN-Y-NEUADD HALL.—The seaside house of St. Andrew's Hospital is beautifully situated in a Park of 330 acres at Llanfairfechan amidst the finest scenery in North Wales. On the North-West side of the Estate, a mile of sea-coast forms the boundary. Patients may visit this branch for a short seaside change or for longer periods. The hospital has its own private bathing house on the seashore. There is trout-fishing in the park.

At all the branches of the Hospital there are cricket grounds, football and hockey grounds, lawn tennis courts (grass and hard courts), croquet grounds, golf courses and bowling greens. Ladies and gentlemen have their own gardens, and facilities are provided for handicrafts such as carpentry, etc.

For terms and further particulars apply to the Medical Superintendent (Telephone No.: Northampton 4354 (3 lines)), who can be seen in London by appointment.

CHEADLE ROYAL, CHEADLE,
CHESHIRE

Registered Mental Hospital

President:

The Right Hon. The Earl of Derby, M.C.

Medical Superintendent:

W. V. Wadsworth, B.Sc., M.B., M.R.C.P., D.P.M.

This hospital receives all types of patients who are suffering from psychological and senile illnesses. It has recently been extensively redecorated and central heating has been installed throughout, making it one of the most luxuriously appointed hospitals in the country. Private rooms, with special nurses, can be provided.

All patients receive very careful and thorough clinical and pathological investigation, the most modern psychiatric treatment is available, including deep insulin therapy. Psychotherapeutic treatment is employed in suitable cases.

OCCUPATIONAL THERAPY is a special feature of the hospital and there are excellent facilities for indoor and outdoor recreation—tennis, cricket, croquet, badminton, billiards, cinema, television, etc.

GERIATRIC UNITS for mild cases of senility are provided where patients can pursue as normal a life as possible.

The hospital is situated in 300 acres of pleasant Cheshire parkland, and yet is only 9 miles from Manchester.

GLAN-Y-DON is the hospital's convalescent home overlooking the sea at Colwyn Bay. It is extremely comfortable and well appointed and has its own farm and market garden.

For terms and further particulars, apply to the Medical Superintendent. Telephone: GATLEY 2231.
