The "light diet" patient needs protein

KEEPING AN INVALID ON A LIGHT DIET may be no light matter to a busy housewife. Sick people tire quickly of milk foods—and in many cases there is a physical reaction against them.

Brand's Essence is a boon in sickness. It provides a useful protein supplement to the diet, in an ideal form for invalids: a fat-free, appetizing jelly that even the weakest system can rapidly absorb. Ready to serve in various ways, it is delicious just eaten with a spoon, spread on bread and butter, warmed up as a liquid, or mixed with milk.

Brand's Essence doesn't cloy—sick people often enjoy it when they can't take anything else. And it revives appetite amazingly.

The addition of Brand's Essence to low residue and weight-reducing diets is especially appreciated by the patient.

ARGUMENTUM AD JUDICIUM

Extract from a letter in the
BRITISH MEDICAL JOURNAL
August 11th, 1956, p.374.

"The use of the proprietary form of standardized senna... is in conformity with [the practice of] an increasing number of members of the medical profession. A recent annotation in the Journal incriminates liquid paraffin as a cause of lipoid pneumonia and as an obstacle to the absorption of fat-soluble vitamins . . . and to the healing of wounds. In these days of economy in prescribing . . . the biologically standardized form of senna . . . is cheaper by half than paraffin, is far easier to dispense, and there is no wastage of storage space."*

of **PHILIPS** Health lamps

(Made in Holland)

INFRAPHIL MODEL "B"

This is a simply constructed and lightweight lamp that helps, quickly and comfortably, to relieve many ailments of a rheumatic nature. The patient can, after medical advice, give himself home treatment in a standing, sitting or lying position and in any room where there is an electric point. The lamp is obtainable only on production of a signed medical certificate. Price £3.3.0.

INFRAPHIL MODEL "A"

Basically, this is the same lamp as the one above. It has, however, been given a stream-lined, robust stand, the base of which enables the lamp to be more easily fixed to a wall and the rays directed downwards. INFRAPHIL is particularly suitable for sportsmen and athletes, who will use it as an aid to massage and for the relief of sprains, bruises and muscular fatigue. Obtainable on medical certificate only. Price £4.4.0.

Ultra-violet **SUNLAND**

Compact and attractive in appearance, this Philips ultra-violet lamp has the double advantage of portability and manoeuvrability. It is simple and safe for your patients to use, under Medical Guidance, in the comfort of their own home. Goggles are, of course, essential and these are provided with the lamp. Again, a signed medical certificate is necessary for purchase. Price £5.17.6.

The boy who could not talk

I had a queer case the other day, said an N.S.P.C.C. Inspector. It concerned a little three year old boy. I was told he could not talk, and that although arrangements had been made for him to see a doctor, his mother had not kept the appointments. I was asked to see her about this; she was quite reasonable about it and agreed readily to take the boy to the doctor. So far so good, but just as I was going, I stooped down to pat the little fellow on the cheek and to my horror I found he was swarming with vermin.

I then discovered his mother was in an even worse condition. We had to get busy then and with the help of the medical authorities we were able to get the boy and the mother as well as the house cleaned up. Strangely enough this cleared up the question of the boy not talking! Evidently the neighbours knew the state he was in and would not let their children play with him. So he never came into contact with anybody outside his home to talk to. Now he has plenty of pals and chatters away nineteen to the dozen. Last week he proudly showed me a threepenny piece and offered to buy my car with it!

Cases like this—an actual case on the files of the N.S.P.C.C.—are dealt with frequently by the Society; for the scope of the Society's work is very much wider than cases of cruelty or gross neglect. If the Society can do *anything* at *any* time to help children whose welfare, happiness or future is in jeopardy, it will do so.

This vital humanitarian work depends on your subscriptions and support. Please send your contributions to:

SMITH & NEPHEW

Armamentarium against tuberculosis

Smith & Nephew play a prominent part in the chemotherapy of tuberculosis. They offer a range of tuberculostatic drugs which includes:—

| | |
|---|--|
| PYCAZIDE (isoniazid) | PYCAMISAN (P.A.S. + isoniazid) |
| PARAMISAN SODIUM (P.A.S.) | THERAPAS (alternative to P.A.S.) (Calcium 4-benzamidosalicylate) |
| NUPASAL-213 (less toxic form of isoniazid) (o-hydroxybenzal isonicotinyl hydrazone) | |

PYCAZIDE is the Smith & Nephew name for isoniazid. **PYCAZIDE** syrup (blackcurrant flavoured) is available to permit greater flexibility of dosage than is possible with **PYCAZIDE** tablets, and is particularly suitable in the treatment of children. One teaspoonful is approximately equivalent to 20 mg. of isoniazid.

P.A.S. and isoniazid are combined in **PYCAMISAN** cachets in five different strengths enabling "made to measure" dosage to be prescribed with the least waste of time and effort. **PYCAMISAN** cachets are practically tasteless and easy to swallow and their use offers distinct advantages in domiciliary treatment of tuberculosis.

'**PARAMISAN SODIUM**' is the sodium salt of P.A.S. (Sodium Aminosalicylate B.P.). It is recommended in the combined chemotherapy of all the forms of tuberculosis. It is rapidly absorbed, rapidly excreted, and of low toxicity.

The cachet form of '**PARAMISAN SODIUM**' ('**PASHETS**') makes oral dosage possible without any unpleasant taste in the mouth. Twelve cachets provide a day's requirements of the drug. '**PARAMISAN SODIUM**' is also available in tablet form and in ampoules for local or intrathecal injection.

Wherever P.A.S. is indicated **THERAPAS** may be used. It is often better tolerated by the patient and has a slightly sweet, not unpleasant taste. **THERAPAS** may be as effective as P.A.S. in delaying the emergence of streptomycin resistance. Its value in the treatment of genito-urinary tuberculosis is well established.

As an alternative to isoniazid **NUPASAL-213** may be used in cases which have already exhibited toxicity to isoniazid, for the toxicity of **NUPASAL-213** is virtually nil.

Dosages and presentations of any or all of these drugs will gladly be sent on request as space does not permit those details to be given in this advertisement.

Ortho Pharmaceutical Limited · High Wycombe · England

IT is generally agreed that cases of soft-tissue rheumatism and of many types of arthritis benefit by hyperaemia of the affected tissues. Transvasin, which contains two quick-acting esters of nicotinic acid, induces such a deep and prolonged hyperaemia at the same time as it produces superficial erythema.

In addition to the esters of nicotinic acid, Transvasin contains the fat- and water-soluble esters of salicylic and p-aminobenzoic acids. Both these well-tried analgesic drugs are readily conveyed through the skin in therapeutic quantities and enable an effective concentration to be built up where they are needed.

Transvasin is now being widely prescribed, with successful clinical results. Since a very small quantity is sufficient for each application, the cost of treatment is extremely low.

Transvasin is available in 1 oz. tubes, basic N.H.S. price 2/6 plus P.T., and is not advertised to the public. Samples and literature will be gladly sent on application.

The graph above is of an experiment to measure the effect of Transvasin on skin temperature on a subject. The red line plots the skin temperature before and at intervals after a single application of one inch of cream (0.924 grams) from a tube of Transvasin. The black line gives similar information with regard to the application of a plain vanishing cream used as a control. Skin temperatures were measured with an electro-thermo couple every five minutes for two hours. Photographs show the affected area before application; three minutes and thirty minutes later.

VALLESTRIL* — A SELECTIVE OESTROGEN

'Selective Action' on Vaginal Mucosa

"Vallestril is an effective synthetic oestrogen singularly free from toxic effects and complications, especially uterine bleeding." †

Adult vaginal epithelium maintained by natural oestrogenic activity.

At menopause: reversion of epithelium towards the infantile type.

Post-menopausal, infantile type of epithelium, with thin, atrophic layers.

At menopause, with Vallestril: slowing of the reversion.

The above drawings illustrate the oestrogenic activity of Vallestril brand of methallenoestril, and direct attention to its selective action in the pelvis, for the uterus is stimulated much less than is the vagina.

Clinical experience bears out experimental studies. Vallestril is a potent oestrogen, and yet is comparatively weak in its action on the uterus. This is shown by the effectiveness of treatment with Vallestril in the disorders indicated below, accompanied by a remarkable reduction of "withdrawal" bleeding.

Vallestril is indicated in the menopausal syndrome, in post-menopausal osteoporosis, in prostatic carcinoma, and in suppression of ovulation or lactation.

Vallestril is well-tolerated, even in large doses.

DOSAGE: The usual dose in middle-aged or older women is one tablet (3 mg.) two or three times daily for two or three weeks, followed by lower maintenance doses.

Two tablets three times daily is the average dose for suppression of lactation or in prostatic carcinoma.

Ovulation is suppressed by a dose of two to four tablets three times daily.

Supplied as scored tablets of 3 mg. in bottles of 100 and 1,000. Further literature is available to the medical profession on request.

EAR WAX *Removed this easy way*

The removal of wax from the external auditory meatus has, in the past, normally entailed attendance by the patient for diagnosis and for the prescription of a suitable loosening agent, and a second attendance a few days later for syringing.

Now, by the use of Cerumol Ear Drops, wax can be removed in most cases at one visit. A few drops of Cerumol can be instilled into the ear and, while another patient is being attended to, the soft cerumen dissolves and the harder wax disimpacts. The wax can then be removed by gentle syringing or with cotton wool. The wax may even be found to run out of the ear on its own accord, in which case patients themselves may instil Cerumol at home, obviating further attendances.

Cerumol is anti-bacterial, non-irritating and harmless to the lining of the external auditory meatus or the tympanic membrane. Cerumol is included in Category No. 4 of the M.O.H. classified list of Proprietary Preparations and may be prescribed on N.H.S. Form E.C.10.

FORMULA (Active Constituents per 100 c.c.):—*p*-dichlorobenzene B.P.C., 2 gm.; Benzocaine B.P., 3 gm.; Chlorbutol B.P., 5 gm.; Ol. Terebinth B.P., 15 c.c.

When Constipation and Hyperacidity are concurrent —

— as they usually are ...

In the treatment of chronic constipation, particularly where it is associated with gastric hyperacidity, 'Mil-Par' provides a reliable antacid laxative of unvarying efficacy.

A balanced combination of 'Milk of Magnesia'*, with a selected grade of medicinal paraffin, 'Mil-Par' neutralizes excess gastric acidity and checks the development of acid conditions

in the lower alimentary tract. In the intestine, where it readily permeates the faecal mass, 'Mil-Par' softens the bowel content and provides both lubrication and gentle stimulation.

'Mil-Par' is specially to be recommended during convalescence after operation or protracted illness; for infants and children, expectant and nursing mothers.

without gastric distress**

BLOOD LEVELS OF AMINOPHYLLINE (expressed as theophylline)
—produced by three methods

The valuable properties of aminophylline can now be utilized to the full, simply and effectively—by the *oral* administration of 'Theodrox'. The serious disadvantage associated with the oral dosage of *plain* aminophylline—acute gastric distress—has been overcome. A high blood level of the active component, theophylline—such as could be obtained satisfactorily only by parenteral administration—is now possible. 'Theodrox' contains aminophylline combined with specially prepared aluminium hydroxide, and gastric discomfort is reduced to a minimum. When a degree of sedation is also required, tablets of 'Theodrox' With Phenobarbitone (containing gr. $\frac{1}{8}$ phenobarbitone) are indicated.

'Theodrox' tablets each contain gr. 3 aminophylline, and both forms of 'Theodrox' are available in bottles of 25, 100 and 1,000.

INDICATIONS

For the treatment of Bronchial or Cardiac Asthma; as a diuretic in Congestive Heart Failure; as a supplement to emergency treatment in Status Asthmaticus; Angina Pectoris.

Magnesium Carbonate (400 mg.), Bismuth Subnitrate (350 mg.), Sodium Bicarbonate (200 mg.), Rhizoma Calami (25 mg.), and Cortex Rhamni Frangulae (25 mg.).

Results

"The immediate clinical results were assessed after the first month's treatment in four main groups: (A) pronounced relief (symptom free); (B) definite relief (minor symptoms with no pain); (C) doubtful relief (symptoms persisting but improved); (D) no relief.

"Table II shows that 81% of cases became symptom-free—70% of them during the first week and 30% during the second week; a further 9% were relieved of the majority of their symptoms. Thus there was a satisfactory response in 90% of cases.

TABLE II

| Group | Active Ulcers | Presumptive Ulcers | Totals |
|--------|---------------|--------------------|------------|
| A | 63 (79.6%) | 17 (89.0%) | 80 (81.7%) |
| B | 8 (10.2%) | 1 (5.5%) | 9 (9.2%) |
| C | 6 (7.6%) | 1 (5.5%) | 7 (7.1%) |
| D | 2 (2.5%) | 0 (—) | 2 (2.0%) |
| TOTALS | 79 (100%) | 19 (100%) | 98 (100%) |

"Four of the nine cases in groups C and D have elected to go to surgery, and one of the remaining cases has a hiatus hernia as well as a duodenal ulcer. Experience of treating these 'Failures' over the past six years leads one to believe that no form of medical treatment will be effective and that surgery is the only hope of relieving their symptoms. In 75% of cases the patients were of the opinion that the tablets were superior to alkaline powders, and they found that they were able to take foods which they had avoided for years."

Extracts from the
BRITISH MEDICAL JOURNAL
1955, 2, 827

"SUMMARY: Seventy-nine cases of peptic ulcer and 19 of presumptive peptic ulcer have been treated with Roter tablets. Immediate clinical response was satisfactory in 90% of patients, with a relapse rate of 57% in the first year; a reduction in the average number of relapses was recorded in 15 cases kept on a maintenance dose for one year."

PACKINGS: Tins of 40, 120, 640, and dispensing size 720 (P.T. exempt). Basic N.H.S. price: 1/- for 10 tablets.

Roter Tablets are not advertised to the public, and may be prescribed on E.C.10 forms. Literature and samples on request.

'Infant Feeding
with Evaporated
Milk'.

Safety, simplicity and digestibility in

INFANT FEEDING

Safe—Libby's Evaporated Milk is fresh cow's milk concentrated, sealed in cans and sterilized so that it remains sweet and safe indefinitely. It cannot cause diarrhoea or other digestive symptoms due to bacterial contamination.

Simple—In making the formula, no boiling or straining of the milk is required. It is prepared simply by adding boiled water and granulated sugar.

Easily Digested—Digestibility depends upon low curd tension and small curd particle size.—The sterilization by heat of Libby's Milk is far more effective than is boiling in lowering curd tension.

BUT curd particle size is an even more important index of digestibility than is curd tension, as shown by Doan and co-workers in the United States. Libby's Evaporated Milk, reconstituted with water and curdled with rennin, which approximates conditions occurring in the infant's stomach, remains liquid with suspension of extremely fine curds, similar to human milk, and much finer than curd from boiled or any other kind of cow's milk.

Milk-alkali drip therapy without a tube

NULACIN

The most effective control of gastric acidity is milk-alkali drip therapy; the most convenient way of obtaining milk-alkali drip therapy is by sucking Nulacin tablets.

Thus, Nulacin is of great value in the treatment of peptic ulcer in the ambulatory patient, and in the prevention of ulcer relapse.

Nulacin tablets are prepared from whole milk combined with dextrans and maltose, and incorporate Magnesium trisilicate 3.5 grs; Magnesium oxide 2.0 grs; Calcium carbonate 2.0 grs; Magnesium carbonate 0.5 grs; Ol. menth. pip. q.s. Their shape, size and consistency are such that, when

they are allowed to dissolve slowly in the mouth, control of gastric acidity can be achieved. Up to three tablets an hour may be required to give continuous neutralization of the gastric contents.

Nulacin tablets are not advertised to the public, have no B.P. equivalent, and may be prescribed on E.C.10. The dispensing pack of 25 tablets is free of Purchase Tax. (Price to Pharmacists is 2/-) Also available in tubes of 12.

Nulacin is available throughout the British Commonwealth, in the U.S.A. and in many other countries. It is known as Nulactin in Canada and Sweden.

GASTRIC ANALYSIS. Superimposed gruel fractional test-
meal curves of five cases of duodenal ulcer.

GASTRIC ANALYSIS. Same patients as in graph on left, two
days later, showing the striking neutralizing effect of sucking
Nulacin tablets (3 an hour). Note the return of acidity when
Nulacin is discontinued.
