# THE EARLY DETECTION AND PREVENTION OF DISEASE

edited by JOHN HUBBARD

George S. Pepper Professor of Public Health and Preventive Medicine, University of Pennsylvania School of Medicine

This book emphasizes the practical aspects of preventive medicine and public health work. It is based on the proceedings of a postgraduate symposium held at the University of Pennsylvania in Spring, 1955. Twenty-eight eminent specialists have contributed to the nine sections, covering: preventive medicine in clinical practice; preventive medicine in relation to the cardio-vascular system, the gastro-intestinal system, pelvic cancer and selected diseases; norms of mental health and early detection of deviations from the norms; measurement of the health of the musculoskeletal system; a review of immunization; the practical application of preventive medicine in the armed forces. The book will be useful to specialists in industrial medicine and public health and to the general physician.

March-April 320 pages illustrated about 60s.

# Spreading smooth and even...

A little Ef-Cortelan Skin Lotion goes a long way. Just one drop will spread smoothly and evenly to cover an extensive area. It does not stick, sting or stain—brings only swift, soothing relief in inflammatory, exudative and allergic skin disorders.

# Why the spreading power of Ef-Cortelan Skin Lotion is so important.

• More intimate contact with the tissues makes the  $\frac{1}{2}{}^{0}_{70}$  lotion as effective as a  $\frac{1}{2}{}^{0}_{70}$  ointment • It spreads smoothly without a hint of friction • It is economical in use

# GLAXO EF-CORTELAN SKIN LOTION

(0.5% and 1% hydrocortisone alcohol in non-greasy fluid base) In 20 cc. squeeze bottles.

ALSO AVAILABLE: EF-CORTELAN SKIN OINTMENT NO. I (non-greasy); EF-CORTELAN SKIN OINTMENT NO. 2 (greasy). In potencies of \(\frac{1}{2}\)%, 1% and 2\(\frac{1}{2}\)%. OINTMENT and LOTION WITH NEOMYCIN.

FIRST oral trichomonacide

TRADE MARK BRAND OF AMINITROZOLE TABLETS

### for male and female

Because of their systemic action, TRITHEON tablets reach resistant trichomonads in their hiding places throughout the genito-urinary tract. Unlike local trichomonacides, TRITHEON tablets eradicate the organism in male and female as proved by negotive culture.

Clinical investigation has demonstrated that TRITHEON tablets administered orally eradicate trichomonads for culture-proved cure of more than 70 per cent of female patients whose husbands are treated simultaneously with TRITHEON tablets. Even when only the wife is treated, cures are effected in approximately one-third of the patients.

Dosage: One tablet three times daily for 10 days

Available: Bottles of 30, 180 and 1000 tablets; each tablet contains 100mg 2-acetylamino-5-nitrothiazole

LITERATURE ON REQUEST

Ortho Pharmaceutical Limited • High Wycombe • England

TRITHEON is the original brand of 2-acetylamino-5-nitrothiazole tablets developed in the Ortho Research Foundation for the oral treatment of trichomoniasis

It is generally agreed that cases of soft-tissue rheumatism and of many types of arthritis benefit by hyperaemia of the affected tissues. Transvasin, which contains two quick-acting esters of nicotinic acid, induces such a deep and prolonged hyperaemia at the same time as it produces superficial erythema.

In addition to the esters of nicotinic acid, Transvasin contains the fat- and water-soluble esters of salicylic and p-aminobenzoic acids. Both these well-tried analgesic drugs are readily conveyed through the skin in therapeutic quantities and enable an effective concentration to be built up where they are needed.

Transvasin is now being widely prescribed, with successful clinical results. Since a very small quantity is sufficient for each application, the cost of treatment is extremely low.

Transvasin is available in 1 oz. tubes, basic N.H.S. price 2/6 plus P.T., and is not advertised to the public. Samples and literature will be gladly sent on application.

### LLOYD-HAMOL LTD.

11 Waterloo Place, London, S.W.1. Whitehall 8654/5/6.

The graph above is of an experiment to measure the effect of Transvasin on skin temperature on a subject. The red line plots the skin temperature before and at intervals after a single application of one inch of cream (0.924 grams) from a tube of Transvasin. The black line gives similar information with regard to the application of a plain vanishing cream used as a control. Skin temperatures were measured with an electro-thermo couple every five minutes for two hours. Photographs show the affected area before application; three minutes and thirty minutes later.

### **COMPOSITION OF TRANSVASIN**

Salicylic acid tetrahydrofurfuryl-ester		 14%
Nicotinic acid ethyl-ester		2%
Nicotinic acid n-hexyl-ester		 2%
p-Aminobenzoic acid ethyl-ester		2%

A major advance in ORAL xanthine therapy

The most striking effects from the use of Choledyl are shown in the relief of the mild chronic state of bronchospasm and the reduction in the occurrence of acute attacks.

Choledyl provides theophylline blood levels up to 75 per cent higher than those obtained with oral aminophylline and it is essentially nontoxic in clinically effective dosage levels.

Choledyl is available in tablet form in two strengths, each tablet containing choline theophyllinate 100 mg. (coloured pink) or 200 mg. (coloured yellow). Supplied in bottles of 100 and 500 tablets.

### **Elastoplast Bandaging Technique**

### in the treatment of

### **Sprains**

Two solutions of everyday first aid problems are illustrated below, using Elastoplast elastic adhesive bandages and plasters. The tidy, effective result is typical of the modern approach in the treatment of sprains.

### SPLINT METHOD

in the treatment of Finger Sprains

The injured finger is strapped to an adjacent uninjured finger by two strips cut from a I" wide Elastoplast Plaster. The strapping is applied transversely around the two fully extended fingers so that the interphalangeal joints are not covered. Lateral movement of the injured joint is impossible; but flexion and extension are unimpaired.

Bandaging consists essentially of figureof-eight turns round hand and wrist—alternate turns slit to accommodate the thumb.

Elastoplast elastic adhesive bandages (Porous) are available in 3 yard lengths and 2",  $2\frac{1}{2}$ ", 3" and 4" widths. (Prescribable on Form E.C.10)

Outside the British Commonwealth Elastoplast is known as Tensoplast

# Announcing 'Cathomycin', 'Trade Mark'

# a new antibiotic of life-saving potential

### DISCOVERED IN THE MERCK SHARP & DOHME RESEARCH LABORATORIES

'CATHOMYCIN' is well absorbed when given orally and is indicated principally in the treatment of STAPHYLOGOGCAL INFECTIONS including those resistant to all other antibiotics.

'CATHOMYCIN' is also effective in conditions due to susceptible strains of PROTEUS and certain infections due to streptococcus, diplococcus, corynebacterium and pasteurella.

Excellent results have been reported in the following conditions:

Post-operative wound infections

Cellulitis

Staphylococcal septicaemia

Varicose ulcers

Recurrent and persistent carbuncles

Various skin abscesses

Enteritis

Whitlows and paronychiae

Maxillary sinusitis

Osteomyelitis

Infected amputation stump

Infected burns

How Supplied: 'Cathomycin' Tablets are supplied in bottles of 16. Each tablet contains the equivalent of 250 mg. Sodium Novobiocin.

Literature gladly supplied on request.

The limited supplies at present available are restricted to Hospital use only.

# relieving the agony of spasm

Manufactured and distributed in England by Pfizer Ltd., Folkestone, Kent, for

G. H. BOEHRINGER SOHN, INGELHEIM AM RHEIN

Registered proprietors of the Trade Mark

BUSCOPAN is a selective spasmolytic agent which affects specifically the hollow organs of the abdomen and the genito-urinary tract. BUSCOPAN relieves spasm, smoothly and quickly without producing unpleasant side effects. Many painful conditions, such as gastric and duodenal ulcer, spastic dysmenorrhea and renal or biliary colic will respond readily to its action. Its administration often enables accurate differentiation to be made between spasmodic and organic obstruction.

<sup>\*</sup> Regd. Trade Mark

### FOR MILD FORMS OF PAIN

Background to Tercin "Aspirin and phenacetin are effective and useful, and a sedative effect is obtainable if a barbiturate is combined with them... The reputation of codeine as a pharmacologically useful drug is at present waning, for the analgesic effect of the compound tablet of codeine B.P. is probably due more to its content of aspirin and phenacetin than to the ½ gr. (8 mg.) of codeine present. It is a weak analgesic even when given in full doses."

(Brit. Med. J. 1952 (Oct. 25th) ii, p.928)

Tercin combines aspirin and phenacetin with butobarbitone. It is indicated for the relief of mild forms of pain for which tablets of aspirin, phenacetin and codeine have hitherto been prescribed. An important aspect

of Tercin therapy is that it does not cause constipation. Tercin is available in tablets containing aspirin 5 grains, phenacetin 3 grains and butobarbitone ½ grain. Basic N.H.S. price. Bottles of 200 at 4/10.

DOSAGE: One or two tablets as required. A total dose of eight tablets daily should generally not be exceeded.

Literature and samples are available on request to the Medical Department

### PRO-BANTHINE\* FOR ANTI-CHOLINERGIC ACTION

# A Combined Neuro-Effector and Ganglion Inhibitor

Pro-Banthine\* consistently controls gastro-intestinal hypermotility and spasm and the attendant symptoms.

Pro-Banthine is an improved anti-cholinergic compound. Its unique pharmacological properties are a decided advance in the control of the most common symptoms of smooth muscle spasm in all segments of the gastro-intestinal tract.

By controlling excess motility of the gastrointestinal tract, Pro-Banthīne has found wide use<sup>1</sup> in the treatment of peptic ulcer, functional

diarrhoeas, and regional enteritis and ulcerative colitis. It is also valuable in the treatment of pylorospasm and spasm of the sphincter of Oddi.

It was found<sup>2</sup> that Pro-Banthīne orally was an "inhibitor of spontaneous and histamine-stimulated gastric secretion" which "resulted in marked and prolonged inhibition of the motility of the stomach, jejunum and colon . . ."

Therapy with Pro-Banthīne is remarkably free from reactions associated with para-sympathetic inhibition. Dryness of the mouth and blurred vision are less severe with Pro-Banthīne than with certain other potent anti-cholinergic agents.

In the above series<sup>2</sup>, "Side effects were entirely absent in single doses of 30 or 40 mg. . . ."

Pro-Banthīne Bromide (2'-diisopropylaminoethyl xanthene-9-carboxylate methobromide) brand of propantheline bromide, is available in sugar-coated tablets of 15 mg.

For the average patient one tablet of Pro-Banthine (15 mg.) with each meal and two tablets (30 mg.) at bedtime will be adequate. Full literature is available on request. G. D. Searle & Co. Ltd., High Wycombe, Bucks. Tel. High Wycombe 1770.

# In Barbiturate Poisoning and Anaesthesia

"Whatever its mode of action, there is no doubt that bemegride is a valuable advance in the treatment of barbiturate coma." Lancet Editorial ii (1956) 980

### In Barbiturate Poisoning

MEGIMIDE brand of bemegride is the safe stimulant with remarkable properties in counteracting the central nervous depression of barbiturates, and the risk of serious complication is much diminished. It is now abundantly clear from clinical evidence that MEGIMIDE is wholly effective when used alone in the treatment of barbiturate poisoning, and that it need not, as hitherto recommended, be used conjointly with DAPTAZOLE as an extra stimulant—this greatly simplifies the technique of treatment.

### In Barbiturate Anaesthesia

After short surgical procedures with thiopentone sodium as the sole anaesthetic agent, MEGIMIDE powerfully stimulates respiratory depression and dramatically shortens post-anaesthetic sleep. It is thus valuable in post-operative nursing in a busy surgical ward, and is specially recommended for casualty, outpatient procedures and dental surgery.

injudicious therapy may result in systemic fungal infections, sensitization reactions, or the development of resistant strains of organisms and may preclude the use of these valuable antibiotics on occasions when their use is more specifically indicated. It is as well therefore that the sulphonamides be employed first whenever an infection is known to be or is likely to be susceptible to these drugs, and to keep the more expensive and more powerful antibiotics in reserve to crack the harder "nuts".

# **ADRENOXYL**

### Reduces the mean bleeding-time

Adrenoxyl reduces the mean bleeding-time by decreasing the permeability and increasing the contractility and resistance of the capillary wall.

### A dry field at operation

Adrenoxyl has been successful in diminishing capillary bleeding in a wide range of surgical operations. It has proved particularly useful in ear, nose and throat, ophthalmic and plastic surgery. In plastic surgery of the face it has been reported that, post-operatively, there is less swelling and bruising when Adrenoxyl has been used.

### No side effects

Adrenoxyl does not have any side effects or contraindications. It does not affect blood coagulation, blood pressure or pulse rate and does not possess any sympathomimetic properties.

### In medical conditions

Adrenoxyl has been used with success in those medical conditions associated with capillary fragility.

In the British Medical Journal (April 21st, 1956) a correspondent confirmed the value of Adrenoxyl in providing a dry field for the surgeon and in shortening the duration of the operation.

### **Packs**

Ampoules: Boxes of 6 and boxes of 50.

Each ampoule contains 0.75 mg. of adrenochrome

monosemicarbazone dihydrate.

Tablets: Tubes of 25 and bottles of 500.

Each tablet contains 2.5 mg. of adrenochrome

monosemicarbazone dihydrate.

The best results are obtained when both tablets and ampoules are used.

# Detergents and the skin

"We have found . . . that the incidence of skin trouble attributable to synthetic detergents is no higher than that previously due to the use of soap products, alkalis and allied preparations"

REPORT OF THE GOVERNMENT COMMITTEE ON SYNTHETIC DETERGENTS, 1956

# THE VITAL ROLE OF DETERGENTS TO-DAY

SINCE THEIR introduction six years ago the new washing products, now generally known as "detergents," have revolutionised British household washing. This is because they give superior performance in hard water, leave clothes and dishes demonstrably cleaner, and leave no dulling film as soaps usually do.

Women have been quick to appreciate these advantages. Thus, while the first weekly wash detergent (Tide) only achieved national distribution in September 1952, detergents as a whole now account for more than half of the total washing powder market. They are in constant and regular use in practically every home in this country, and there is no evidence that they have yet reached the peak of their popularity.

### THEIR EFFECT ON THE SKIN

Thomas Hedley & Co. Limited, makers of Tide and other detergents, constantly test their washing products to determine their effect on the skin of housewives. In addition to every kind of accepted laboratory technique, such as patch and immersion tests, Hedley have conducted, under careful medical supervision, prolonged home usage tests. These were developed to obtain a reliable measure of the mildness of washing products under normal usage

conditions in the home. Observations on over 12,000 housewives have shown that household detergents as a class do not differ in their effect on the skin from all-purpose soap powders which have been used for years.

Specifically, research has shown that Tide, the most popular of the new detergents, is as mild as other general-purpose soap powders.

Moreover, the results of the Hedley investigations disclosed that a washing product plays a much smaller part in determining the skin condition of the average housewife than does, for example, the coldness of the weather and the extent to which she uses hand cream.

The conclusions from these tests are fully in line with the Report of the Government Committee on Synthetic Detergents, 1956, which stated "We have found... that the incidence of skin trouble attributable to synthetic detergents is no higher than that previously due to the use of soap products, alkalis and allied preparations."

## "A STUDY OF THE EFFECT OF THE NEW DETERGENTS ON THE SKIN"

This is the title of a booklet which describes a comprehensive research programme carried out under medical supervision to determine the effect of detergents on the skin. If you would like a copy please write for one to Thomas Hedley & Co. Limited, Gosforth, Newcastle upon Tyne 3.

# Mas cura la dieta que la lanceta

A good diet cures more than the lancet.

(Spanish Proverb)

INCE we all suffer at some time, many of us all the time, from such culinary curses of the age as harmful food processing—days-old vegetables—an emasculated loaf—Supavite is good for everyone. But over and above that basic truism you will know many categories among your patients for whom a food supplement of the calibre and comprehensiveness of Supavite is more than good—is maybe vital. Old people with inadequate shopping and cooking facilities, women in pregnancy and lactation, men undergoing heavy physical stress, convalescents, patients who have no appetite or must diet, ailing children—Supavite is their manna in the wilderness. Any clinical or sub-clinical state involving (or likely to lead to) mild vitamin deficiency is a cry for Supavite, which contains not only the essential vitamins but also the trace-elements necessary both in themselves and for proper utilization of the vitamins.

### A.M.A. Scientific Exhibits 1956

Sponsored by Council on Scientific Assembly, American Medical Association

UNTIL LAST YEAR, the A.M.A. Scientific Exhibits could be seen only in one place and only at a designated time. When the A.M.A. Meeting was over, the exhibits were dismantled, many of them never to appear again. The physician who missed the Meeting was deprived of "the best postgraduate medical course in the world." Then Grune & Stratton published A.M.A. SCIENTIFIC EXHIBITS, 1955—a faithful reproduction of the award-winning Exhibits, supplemented by others outstanding for their clinical and research value. The response to this new kind of medical volume was overwhelming, inducing us to continue the project . . . and now the 1956 Volume is ready. (416 pp., thousands of illus., 70s.)

### Synopsis of Gastroenterology

Rudolf Schindler, M.D.

THE LONG-FELT NEED FOR A concise, to-the-point and practical guide to diagnosis and management of disorders of the G-I tract is now fulfilled in this new manual. By use of the unusually detailed index, the reader is able to find, in a matter of seconds, all necessary information on management, diet, medication and physiotherapy for any individual patient. The author's wide experience as a pioneer in the use of endoscopy in clinical medicine is of exceptional value in the section giving the procedures for proctoscopy, esophagoscopy, gastroscopy, and peritoneoscopy which have proved best and safest in Dr. Schindler's many thousands of examinations. (384 pp., 55s.)

# **CLINICAL PATHOLOGY** IN GENERAL **PRACTICE**

321 pages. Price 21s. (by post—inland 22s. 3d., overseas 21s. 9d.)

This handbook on clinical pathology meets the needs of the general practitioner, the houseman, and the senior student. It contains thirty-nine articles comprising a series specially written for the British Medical Journal. Each article has been revised and brought up to date by its author. The book gives authoritative information on-

- available laboratory facilities
- reliable tests and which to use
- techniques for collecting and preserving specimens
- interpretation of results and significance of abnormal findings.

Obtainable from booksellers or by post from Publishing Manager

### APPOINTMENTS

Applicants should state name, address, age, nationality, qualifications, and enclose (unless otherwise specified) one copy each of 3 recent  $\bigstar$  testimonials with short statement of experience and appointments held.

Applications should be sent at once if no closing date is given. Canvassing in any form will disqualify.

\* SERVICE MEMBERS may have difficulty in supplying recent testimonials, but this should not deter them from applying.

A fully registered medical practitioner who is liable for National Service must obtain deferment of recruitment in writing from the Central Medical Recruitment Committee or (in Scotland) the Scottish Central Medical Recruitment Committee before accepting any civilian appointment.

The position of provisionally registered medical practitioners who are liable for National Service has been made clear in a notice sent to them by the Ministry of Labour and National

#### SALARY SCALES OF JUNIOR GRADES OF HOSPITAL MEDICAL STAFF Registrar Grades, Whole-time

- (a) REGISTRAR: Posts obtained normally not less than two years after registration as a medical practitioner and held normally for two years: £850 per annum in the first year; £965 per annum in the second and any subsequent years. If the post is resident a deduction of £170 per annum in the second and any subsequent years.
- (b) SENIOR REGISTRAR: Posts obtained normally not less than four years after registration as a medical practitioner and held normally for four years; £1,100 per annum in the first year; £1,200 per annum in the second year; £1,300 per annum in the third year; £1,400 per annum in any subsequent years. If the post is resident a deduction of £200 per annum is made.
  - (a) HOUSE OFFICERS:

Other Grades, Whole-time (i) Provisionally registered medical practitioners: £425 per annum for the first post held; £475 per annum for the second and all subsequent posts held;

provided that the employing authority (subject in the case of a Hospital Management Committee to the consent of the Regional Hospital Board) shall have discretion to determine that the remuneration of any officer holding his first post in the National Health Service as a House Officer shall be £475 per annum if they are satisfied that the officer has held at least one hospital post outside, of not less than six months' duration, involving clinical responsibilities equivalent to those of house posts in the National Health Service and supervised by appropriate specialist staff.

(ii) Fully registered medical practitioners: £525 per annum for any post held;

provided that in exceptional circumstances, subject to the consent of the Minister, this rate may be exceeded by up to £50 per annum where a post cannot be filled otherwise.

In each case under sub-sections (i) and (ii) above, a deduction of £125 per annum in respect of board and lodging and other services provided shall be made and each post shall be tenable for six months.

- for six months.

  (b) SENIOR HOUSE OFFICER: Posts obtained normally not less than one year (in Scotland, two years) after registration as a medical practitioner and normally held for one year only: £745 per annum. If the post is resident a deduction of £150 per annum is made.

  (c) JUNIOR HOSPITAL MEDICAL OFFICER: Officers who have held house appointments but who are not Registrars and who have less responsibility than other hospital officers of non-consultant status: £775 (for an officer appointed not less than one year after full registration as a medical practitioner) by £50 to £1,075 per annum. If the post is resident a deduction of £170 per annum is made. £170 per annum is made.

ALL NATIONAL HEALTH SERVICE HOSPITAL APPOINTMENTS ARE IN ACCORDANCE WITH THE TERMS AND CONDITIONS OF SERVICE OF HOSPITAL MEDICAL STAFF

CLARE COLLEGE

HARRISON WATSON STUDENTSHIP FOR MEDICAL RESEARCH

The Governing Body of Clare College, Cambridge, invite applications for a Harrison Watson Studentship commencing on October 1, 1957. The Studentship which is open to male graduates of any University in any country, is for research or training in research "into the causes and cure of tuberculosis, and/or other diseases of an allied character." The Governing Body intend to interpret these terms in the widest possible sense and they invite detailed enquiries. The Studentship may be: (i) a Junior Studentship of value between £800 and £550 a year, normally tenable for three years, or (ii) a Senior Studentship of value between £800 and £1,000 a year, tenable for one, two or three years. The Student may also hold another award or post, and may engage in a limited amount of teaching, if in the opinion of the Governing Body these do not interfere with his research. The Student will be required to become a member of Clare College and the University of Cambridge, and to reside and work in Cambridge. Applications should contain an account of the applicant's career, and a general statement of his proposed course of research. No testimonials need be submitted, but the names and addresses of not fewer than two referees should be sent. Applications and enquiries should be addressed to the Master, Clare College, Cambridge. The closing date for application is March 31, 1957. (8756)

# UNIVERSITY OF EDINBURGH Faculty of Medicine

UNIVERSITY OF EDINBURGH
Faculty of Mediciae

UNIVERSITY (FELLOWSHIPS, SCHOLARSHIPS
AND BURSARIES) SCHEME, 1953
In terms of the above-named Scheme, certain funds have been amalgamated to form a Medical Faculty Scholarship Fund, from which awards of Fellowships and Scholarships will be made under the following conditions:

GRADUATE RESEARCH SCHOLARSHIPS
Four Research Scholarships are offered for award, each tenable for one year and, in certain circumstances, renewable for a second year. For the first year the minimum value of the Scholarships shall be £500, and for the second year £600. The Scholarships shall be open to graduates in the Faculties of Arts or Science of any University who hold an Honours Degree; and to licentiates in Medicine. The Scholarships shall not be open for award to any applicant who, excluding any period spent in National Service, has beld a degree or licence for longer than three years. Those to whom awards are made shall be required to undertake research work in a Department within the Faculty of Medicine. The Research Scholarships will normally be awarded at the beginning of each academic year in October.

GRADUATE RESEARCH FELLOWSHIPS

Three Research Fellowships are offered for award, each tenable for one year, renewable for a second year and, in special circumstances, for a third year. For the first year, the minimum value of the Fellowships will be £700: for a second year and, in special circumstances, for a third year. £800: and, where awarded for a third year. £900. The Fellowships shall be open to graduates in the Faculty of Medicine of any University: to graduates in the Faculties of Arts or Science of any University who hold an Honours Degree; and to licentiates in Medicine. Those to whom awards are made shall be required to undertake research work in a department within the Faculty of Medicine. The Research Fellowships will normally be awarded at the beginning of each academic year in October.

Applications.—Applications for the Graduates to be made on a prescribed application

#### UNIVERSITY OF LONDON

Institute of Obstetrics and Gynaecology

Institute of Obstetrics and Gynaecology (Incorporating the teaching facilities of Queen Charlotte's. Maternity Hospital, Chelsea Hospital for Women and the Department of Obstetrics and Gynaecology at Hammersmith Hospital)

Applications are invited from graduates with a registrable qualification for enrolment for the Spring Term (March 4 to June 1, 1957). Graduates attend each of the constituent hospitals in turn for clinical work, and attend lectures and special demonstrations at all three hospitals. Enrolment Fee £3. Tuition Fee £36 a term. General practitioners wishing further experience in obstetrics may be accepted to attend the course at Queen Charlotte's Maternity Hospital for shorter periods—i.e., two to four weeks. They will have the opportunity of attending the labour ward, in addition to combined classes of lectures and demonstrations at the three hospitals of the Institute. Ministry of Health grants are payable to approved general practitioners attending for a period of two weeks. An Intensive Course for those preparing for M.D. and M.R.C.O.G. will be held from June 3 to June 15, 1957. During the winter vacation, a limited number of graduates may attend the practice of the hospitals. A refresher course for general practitioners will be held from February 25 to March 2, 1957, and another from June 17 to June 22, 1957. Hostel accommodation is available at Queen Charlotte's Hospital and at Hammersmith Hospital. Further particulars can be obtained from the Secretary, Institute of Obstetrics and Gynaecology, Chelsea Hospital for Women, Dovehouse Street, London, S.W.3. (8856)

### SITUATIONS VACANT

Biochemist or Biophysicist (non-medical) to be in technical charge of biochemistry, under the Director of Clinical Pathology in a modern hospital laboratory with a staff of 21. Degree in chemistry or physics, or equivalent F.R.I.C., essential. Candidates must be thoroughly familiar with the principles and in the maintenance of electronic measuring equipment ordinarily used—e.g., U.V. spectrophotometer and flame photometer. Candidates should also be interested in the prospect of establishing, from the point of view of the responsibility for the physical and chemical aspects, a radio-active section for elements used in medical diagnosis. The post is for one year in the first instance, renewable for a second year, and if satisfactory a continuing agreement is anticipated. Salary \$6.000 to \$8,000; two weeks' vacation, plus nine statutory holidays. Address applications, giving age, nationality, marital status, religion, experience, availability, and names of three referees, to Director of Clinical Pathology, Sarnia General Hospital, Sarnia. (8790)

Readers frequently desire to refer to advertisements concerning appliances, preparations, etc., which have appeared in earlier issues of the *Journal*.

The Advertisement Director can supply

particulars at any time.

In dealing with written inquiries, especially from overseas, correspondents are, wherever possible, put in direct contact with the advertisers in whose products they are interested.

Write: Advertisement Director, British Medical Journal, B.M.A. House, Tavistock Square, London, W.C.1.
