postoperative sedation...

one of the many uses

for short-acting NEMBUTAL

In the pharmaceutical field, where rapid obsolescence is the rule rather than the exception, a product that continues to grow in popularity after nearly 25 years of use must possess distinct advantages. Consider these:—

- Short-acting NEMBUTAL (Pentobarbitone Sodium, B.P.) can produce any desired degree of cerebral depression—from mild sedation to deep hypnosis.
- The dosage required is small — only about half that of many other barbiturates.
- Hence, there's less drug to be inactivated, shorter duration of effect, wider margin of safety and little tendency towards morning-after hangover.
- In equal oral doses, no other barbiturate combines quicker, briefer, more profound effect.

The use of stabilized Trypsin

A NEW TREATMENT FOR **ULCERS** **ABRASIONS** **BURNS** **PYODERMIAS**

ANY MEDICAL PRACTITIONER knows how stubbornly resistant to any therapy a long-standing varicose ulcer can be. The reason is partly the diminished blood supply, but more perhaps the formation of a pus-containing layer and of crusts which cover the ulcer and impede the healing process. Similar difficulties are often encountered in the treatment of wounds and abrasions.

PROTEOLYTIC ACTION

It has long been known that the proteolytic enzyme trypsin could digest crusts by the process of physiological curettage. The difficulty has been to incorporate the trypsin in a stable preparation. In Biotrase, trypsin remains active physiologically for over one year. It rapidly dissolves crusts and scabs and leaves a clean, granulating surface. A certificate of stability has been issued by a Department of Bio-chemistry.

Biotrase has been designed by Lloyd-Hamol of London and Zurich for the treatment of infected skin lesions. Apart from trypsin, it contains two new

antiseptic agents of proved bacteriolytic properties, Ca-N-Hydroxymethylglutamate and 2,2¹ thiobis-(4,6-dichlorophenol), designated bithionol, both of which are effective against a wide range of gram-positive and gram-negative pathogenic organisms and do not cause skin sensitivity. Biotrase also contains carbamide, included for its buffering properties.

INDICATIONS FOR USE

Biotrase may be used wherever there is an infected—or potentially infected—breach of surface of the skin. Common conditions for its use include the following: Varicose, diabetic and post-thrombotic ulcers; wounds, and second and third degree burns; infected and necrotic skin conditions, including pyodermias; boils and carbuncles (following incision).

COMPOSITION OF BIOTRASE

<i>Trypsin pur.</i>	0.16%
<i>Ca-N-Hydroxymethylglutamate</i>	5.00%
<i>2,2¹ thiobis-(4,6-dichlorophenol)</i>	0.50%
<i>Carbamide B.P.</i>	5.00%
<i>In polyethylene glycol</i>	

Biotrase is available in 35 g. tubes at a basic N.H.S. price of 3/9d. plus Purchase Tax. Samples and literature are available to medical practitioners on request.

• **EDRISAL** *highly effective in dysmenorrhoea*

Women with dysmenorrhoea commonly have depression and uterine cramps, as well as pain.

All three symptoms are relieved by 'Edrisal' tablets.

'Edrisal' combines the analgesic action of aspirin and phenacetin with the anti-spasmodic, anti-depressant effects of 'Benzedrine'. The pain is alleviated; the uterine cramps relieved; the patient's gloom dispelled.

Edrisal relieves the **pain**, the **depression** and the **cramps** of dysmenorrhoea

Smith Kline & French represented by Menley & James, Limited

SMITH & NEPHEW

Armamentarium against tuberculosis

Smith & Nephew play a prominent part in the chemotherapy of tuberculosis. They offer a range of tuberculostatic drugs which includes:—

PYCAZIDE (isoniazid)	PYCAMISAN (P.A.S. + isoniazid)
PARAMISAN SODIUM (P.A.S.)	THERAPAS (alternative to P.A.S.) (Calcium 4-benzamidosalicylate)
NUPASAL-213 (less toxic form of isoniazid) (o-hydroxybenzal isonicotinyl hydrazone)	

PYCAZIDE is the Smith & Nephew name for isoniazid. **PYCAZIDE** syrup (blackcurrant flavoured) is available to permit greater flexibility of dosage than is possible with **PYCAZIDE** tablets, and is particularly suitable in the treatment of children. One teaspoonful is approximately equivalent to 20 mg. of isoniazid.

P.A.S. and isoniazid are combined in **PYCAMISAN** cachets in five different strengths enabling "made to measure" dosage to be prescribed with the least waste of time and effort. **PYCAMISAN** cachets are practically tasteless and easy to swallow and their use offers distinct advantages in domiciliary treatment of tuberculosis.

'**PARAMISAN SODIUM**' is the sodium salt of P.A.S. (Sodium Aminosalicylate B.P.). It is recommended in the combined chemotherapy of all the forms of tuberculosis. It is rapidly absorbed, rapidly excreted, and of low toxicity.

The cachet form of '**PARAMISAN SODIUM**' ('**PASHETS**') makes oral dosage possible without any unpleasant taste in the mouth. Twelve cachets provide a day's requirements of the drug. '**PARAMISAN SODIUM**' is also available in tablet form and in ampoules for local or intrathecal injection.

Wherever P.A.S. is indicated **THERAPAS** may be used. It is often better tolerated by the patient and has a slightly sweet, not unpleasant taste. **THERAPAS** may be as effective as P.A.S. in delaying the emergence of streptomycin resistance. Its value in the treatment of genito-urinary tuberculosis is well established.

As an alternative to isoniazid **NUPASAL-213** may be used in cases which have already exhibited toxicity to isoniazid, for the toxicity of **NUPASAL-213** is virtually nil.

Dosages and presentations of any or all of these drugs will gladly be sent on request as space does not permit those details to be given in this advertisement.

for the mild to moderate
rheumatic conditions encountered in general practice

Upjohn of England Ltd · 4 Aldford Street · London W1

Rubriment relieves pain in such conditions as muscular rheumatism, fibrositis, strains and sprains.

Some minutes after application the skin becomes flushed and there is a comforting feeling of warmth which persists for many hours.

RUBRIMENT

A new long-acting rubefacient—safe and effective

Rubriment is a product of original research.

For some years it has been known that some chemicals when applied to the skin produce redness and warmth. Rubriment is based on a new substance, the benzyl ester of nicotinic acid, which has been demonstrated to give a long-lasting rubefacient effect without any damage or irritation to the skin even after prolonged and repeated application.

Ten minutes after application of Rubriment there is a comforting feeling of warmth and the area is seen to be

flushed. This redness is due to the dilatation of the small cutaneous blood-vessels. This persists, without danger of irritation to the skin. Clinical reports have been received of the efficacy of Rubriment for the relief of pain in such conditions as muscular rheumatism, lumbago, fibrositis, strains and sprains. The immediate and prolonged vasodilatory action of Rubriment also provides effective relief for unbroken chilblains.

Whenever counter-irritation is indicated, Rubriment is the preparation of choice for the patient.

Available in two forms

Rubriment (2.5% nicotinic acid benzyl ester and 0.1% Capsicin) is available either as a cream or as a liniment, both of which are non-greasy.

The cream is rapidly absorbed and needs only gentle

application. It is supplied in tubes of 20 g. (Approx.). **BASIC PRICE to N.H.S., 2/2d.**

The liniment lends itself to massage, if this is required. It is supplied in bottles of 2 fl. ozs. (approx.). **BASIC PRICE to N.H.S., 3/-.**

Directions for use Apply Rubriment to the affected area. As Rubriment causes a stinging sensation in contact with the eyes and face, the hands should be well washed after use.

One application per day has been found to be effective for

the majority of patients, though a fresh application may be made, if necessary, at more frequent intervals.

Rubriment is not advertised to the public and can be prescribed on form E.C.10.

CARNATION MILK FOR INFANT FEEDING

The digestibility of Carnation Milk

CURD FORMATION

1 Breast Milk

2 Carnation Milk diluted to
whole milk value

3 Pasteurised Milk

The milk in each flask has been curdled by the addition of pepsin. Whilst precipitating, the milks were stirred constantly. This simulated the conditions occurring in an infant's stomach. Breast milk and Carnation Milk remain liquid with a suspension of very fine curds. Pasteurised milk curdles into a solid mass. Boiled milk produces curds intermediate in size and texture between those of Carnation Milk and pasteurised milk.

Due solely to processing, Carnation Milk produces a unique curd formation — tensionless, flocculent. *The modification of cow's milk proteins essential for this curd formation occurs during the final sterilising — a process exclusive to evaporated milk.* This terminal heating induces:—

1 An increase in casein particle size together with expulsion of some "bound" water.

2 A change in the calcium salts in which there is a combining action with the phosphate ions to form colloid or semi-colloid phosphates of calcium.

These changes result in (a) soft curd properties when Carnation is acted upon by hydrogen ions in the range of gastric acidity, and (b) a reduced intensity of the

calcium-casein coagulating mechanism.

The extreme range of digestibility and tolerance of proteins, as found in Carnation Milk, is the practical advantage at the disposal of all physicians who are concerned with infant feeding. Other highly desirable advantages to those prescribing Carnation are:—

- 1 Safety, because of sterilisation *after* the Carnation cans are sealed.
- 2 Hypo-allergenic properties.
- 3 Uniformity — due to standardisation of solids.
- 4 Prophylactic D₃.
- 5 Permanently emulsified butterfat.
- 6 Accuracy of measurement.

"The Feeding of Infants" — a book specially for doctors — together with reprints of clinical investigations and Carnation feeding charts are available from: — Medical Department, General Milk Products Limited, Bush House, Aldwych, London, W.C.2.

Ph.719

EAR WAX *Removed this easy way*

The removal of wax from the external auditory meatus has, in the past, normally entailed attendance by the patient for diagnosis and for the prescription of a suitable loosening agent, and a second attendance a few days later for syringing.

Now, by the use of Cerumol Ear Drops, wax can be removed in most cases at one visit. A few drops of Cerumol can be instilled into the ear and, while another patient is being attended to, the soft cerumen dissolves and the harder wax disimpacts. The wax can then be removed by gentle syringing or with cotton wool. The wax may even be found to run out of the ear on its own accord, in which case patients themselves may instil Cerumol at home, obviating further attendances.

Cerumol is anti-bacterial, non-irritating and harmless to the lining of the external auditory meatus or the tympanic membrane. Cerumol is included in Category No. 4 of the M.O.H. classified list of Proprietary Preparations and may be prescribed on N.H.S. Form E.C.10.

FORMULA (Active Constituents per 100 c.c.):—*p*-dichlorobenzene B.P.C., 2 gm.; Benzocaine B.P., 3 gm.; Chlorbutol B.P., 5 gm.; Ol. Terebinth B.P., 15 c.c.

The Climacteric

The association of methyltestosterone and ethinylœstradiol in Mepilin produces a more complete response in the treatment of menopausal disorders than can be obtained by the use of oestrogens alone. An increased feeling of confidence and well-being is produced

which is both mental and physical.

The presence of methyltestosterone enables a reduction in oestrogen dosage to be made; thus undesirable side effects such as breast turgidity and pelvic congestion are avoided and the risk of withdrawal bleeding is reduced.

"... a mixture of the male and female hormones was more efficacious than oestrogen alone."

CLINICAL PRODUCTS LTD. RICHMOND SURREY***In the Service...*****Research**

The House of Wander continues to maintain its advanced position in pharmaceuticals and quality food products because the standardization of active ingredients during manufacture is backed by careful control and investigation in its extensive Research Laboratories.

In Quality

The Wander Research Laboratories have made useful contributions in the fields of dietetics, nutrition and vitamins. Their wide experience and up-to-date laboratory facilities help to maintain the high quality of Malt Extract and Cod Liver Oil (Wander), the vitamin content of which exceeds that of the analogous B.P. preparations.

The special consideration of physicians when prescribing a malt and oil preparation is that of vitamin values. Comparative studies prove that to prescribe "Wander Brand" is to specify malt extract and cod liver oil of the finest possible quality.

In the Service of Medicine

Careful control and investigation help to maintain "Wander Brand" in the forefront of its class. Moreover, with all its special advantages, "Wander Brand" costs no more than some malt and oil preparations with a lower vitamin content.

therapy*

Anxine Tablets provide the complete symptomatic treatment of anxiety states by improving mood and increasing confidence, by inducing gentle sedation and allaying anxiety, and by securing the optimal degree of muscular relaxation.

Although each of the three components of Anxine Tablets, dexamphetamine sulphate, cyclobarbitone and mephenesin, makes an

important contribution to the amelioration of the symptoms of anxiety states, none is adequate alone. It is only when they are combined, in the form of Anxine Tablets, that maximum control of symptoms is achieved.

Anxine Tablets are indicated in the treatment of anxiety states, psychoneuroses and psychosomatic disorders. Anxine will produce rapid improvement in cases where mental or emotional tension is an important factor, in depression and neurasthenia, and in those patients suffering from the many ill-defined anxieties and fears which can so profoundly and adversely affect general health.

ANXINE

Each tablet contains :—

DEXAMPHETAMINE SULPHATE

2.5 mg.

CYCLOBARBITONE

35 mg.

MEPHENESIN

120 mg.

years of discretion?

Wisdom may be said to grow with the years, yet dietary discretion is often sadly lacking in the elderly patient. Indifference to food is reflected in irregular, ill-chosen meals—often leading to impaired nutrition and anaemia states. For just such cases PERIHEMIN Haematinic is an eminently sound prescription. Here, in convenient capsule form, are all the principal haemopoietic substances in therapeutic amounts. PERIHEMIN is therefore valuable for closing the gaps which may exist in the body's anti-anaemia defences.

Perihemin*

Brand of Iron-B₁₂-C-folic acid — stomach-liver fraction-purified intrinsic factor concentrate. In bottles of 100 and 1000

Each capsule contains ferrous sulphate exsiccated, 192 mg. FOLVITE* folic acid, 0.85 mg; vitamin B₁₂, 10 micrograms; ascorbic acid, 50 mg; powdered stomach, 200 mg; insoluble liver fraction, 50 mg; purified intrinsic factor concentrate, 0.5 mg.

Stress

ANXIETY STATE—*aids to diagnosis*

In a recent medical article*, the following symptoms and signs were put forward as aids to the diagnosis of the anxiety state. They are not diagnostic, but in association with other observations may suggest the diagnosis.

SYMPTOMS

Headache (often localized in the back of the head and neck).
Inability to read or think (inability to concentrate).
Insomnia, dizziness (often resulting from hyperventilation).
Palpitation and tachycardia (often resulting from hyperventilation).
Faintness (often resulting from hyperventilation).
Sense of tightness in the chest (often resulting from hyperventilation).
Anorexia (common), nausea, emesis, diarrhoea, aerophagia.
Abdominal pain, backache, pain and stiffness in the shoulder region.

SIGNS

Sighing, wearing of tinted glasses, bitten fingernails.
Axillary perspiration.

AIDS TO TREATMENT

In the treatment of anxiety and tension, no one disputes the fundamental importance of the simple psychotherapy which the General Practitioner is so well placed to dispense. Yet he, himself, generally recognises the need for a more material adjunct, a tonic and restorative, which will assist the nervous system as well as the organism as a whole. Sanatogen is an active nutrient tonic, and the choice of many physicians in such circumstances. Conversely, the considerable effect of a poor nutritional state on the mental outlook has long been recognised. Here again, the merits of Sanatogen as a high protein tonic nutrient are apparent. Sanatogen contains 95% casein and 5% sodium glycerophosphate; because of its high nutrient value and tonic and restorative effects, it is beneficial in many forms of physical and mental debility.

* *Aust. N.Z. Gen. Practit.* (1955). 26, 88.

Sanatogen

THE HIGH PROTEIN TONIC

The word 'Sanatogen' is a regd. trade mark of Genatosan Ltd., Loughborough, Leics.

Children needing aspirin
will readily take

Rasprin

1½ gr. soluble aspirin tablets
specially formulated*
and flavoured for children

*Acid. Acetylsalicyl. B.P. gr. 1.25
Calc. Carb. B.P. gr. 0.375
Acid. Cit. B.P. (Ezric). gr. 0.125

RASPRIN TABLETS disintegrate in the mouth so quickly that a child cannot choke with them.

Every 10 Rasprin tablets are packed in a plastic vial, so that the maximum amount of aspirin in any one container is 12½ grains.

Rasprin is not advertised to the lay public, and may be prescribed on Form E.C.10. Basic N.H.S. price is 4d. per vial of 10 tablets—exempt from Purchase Tax.

Night attack

The angina patient goes to bed in fear and may wake in agony. Peritrate prophylaxis can ease his mind considerably. Since Peritrate is a *long-lasting* coronary vasodilator, a single dose affords protection for as long as 4 to 5 hours . . . a considerable part of the night. Peritrate will not abort attacks completely — but it prevents attacks or reduces their severity in up to 80% of cases. Exercise tolerance is increased, nitroglycerin intake is reduced and very few side-effects occur.

Active principles : Pentaerythritol tetranitrate 10 mg.

Packing : Bottles of 50 tablets and packs of 500 supplied to chemists for dispensing only.

PERITRATE WITH PHENOBARBITONE. (Peritrate 10 mg. with Phenobarbitone 15 mg.) is also available, similarly packed.

Peritrate

WILLIAM R. WARNER & CO. LTD., POWER ROAD, LONDON, W.4.

FOR ALL PAIN that responds to aspirin; for all palates, and for all patients—even the dyspeptic—PAYNOCIL is universally acceptable.

FOR CHILDREN there is no pleasanter way of taking aspirin, and coaxing is seldom necessary. JUNIOR PAYNOCIL tablets contain just the right dose.

NON-IRRITANT—the aspirin particles are minutely and evenly spread over the gastric mucosa in a harmless and non-adherent form.

ACCEPTABLE—the flavour of Paynocil is remarkably pleasant and the presence of aspirin is unnoticed.

QUICK DISPERSING—the disintegration of Paynocil tablets on the tongue—without water—has been called “flash dispersal”. Chewing is unnecessary and swallowing effortless.

IN THE MENOPAUSE

One bottle of 60 TACE capsules (2 capsules a day) can relieve
many of your menopausal patients.

Some may require a second course, but few will need a third.

The introduction of TACE marks the beginning of a new era in the treatment of menopausal symptoms. TACE is stored in the body fat and subsequently released in a manner resembling normal hormone secretion. There is virtually no withdrawal bleeding (in four investigations 1, 2, 3, 4 there were only 7 cases of withdrawal bleeding in 257 patients) and TACE is also extremely well tolerated in other respects.

Because of fat storage the action of TACE is prolonged. In 13 out of 16 patients beneficial effects remained up to 4 months after therapy had been discontinued.¹

TACE is indicated in other cases which require oestrogen therapy—for example in the inhibition of lactation and the treatment of prostatic carcinoma.

TACE

is available in green capsules (each containing 12 mg. chlorotrianisene dissolved in oil) in bottles of 60 and 300.

The Prophylaxis of ATHLETE'S FOOT

Hitherto, protection against re-infection with *Tinea Pedis* has only been possible by troublesome procedures which are difficult to sustain. MONPHYTO colourless paint is not only effective against the fungi responsible but is so easily applied and non-messy in use that a *routine of weekly prophylactic application* is soon established. This will eradicate any dormant fungus and prevent re-infection.

Where the disease is present MONPHYTO rapidly relieves the symptoms, the unpleasant burning and itching quickly subside and healing follows.

The other chief indication for MONPHYTO is CHRONIC PARONYCHIA due to moniliasis. Sufferers from this hitherto intractable condition welcome the immediate relief of symptoms and rapid healing.

Active constituents per 100 ml.

Boric Acid B.P. 2%. Chlorbutol B.P. 3%. Methyl Salicylate B.P. 18%. Salicylic Acid B.P. 12%. Undecylenic Acid B.P. 5.5%.

Malnutrition and the skin

In malnutrition the skin is frequently affected. Thus in pellagra, which is ascribed mainly to nicotinic acid deficiency, dermatitis is one of the classical symptoms. Riboflavin deficiency is also characterized by skin lesions such as cheilosis, angular stomatitis and dermatitis of the nasolabial folds.

Marmite has been found particularly valuable in the treatment of lesions of mucocutaneous junctions due to riboflavin deficiency. Marmite provides 1.5 mg. riboflavin and 16.5 mg. nicotinic acid per ounce, as well as all the other known factors of the vitamin B complex. It is easily administered as it can be incorporated in the diet in a variety of appetising ways.

For SUB-ACUTE and Chronic dermatoses

TAR + HYDROCORTISONE

combined in

TARCORTIN CREAM

have pronounced advantages over either medicament alone.

The established germicidal, stimulating and anti-pruritic properties of tar, in the treatment of sub-acute and refractory skin affections, can now be considerably enhanced by its incorporation with hydrocortisone.

Clinical trials have shown that the two medicaments together exert a powerful synergistic action that is far more rapid, more pronounced and complete than the action of either alone. These two valuable therapeutic agents are presented in a non-greasy, stainless, hydrophilic cream, known as TARCORTIN.

TARCORTIN CREAM

Is supplied in 7 grm. tubes, containing 0.5% Hydrocortisone in a special coal-tar extract.

Canned strained foods set a mother's mind at rest

As you know, some mothers are worried when you advise early mixed feeding for baby. With so many other things to do, the difficulty of obtaining and preparing a variety of fresh foods seems almost insuperable. But Heinz Strained Foods solve the mother's problem and make it easy for her to follow your advice.

Furthermore, Heinz Strained Foods are better for baby than many home-prepared foods. Heinz get their vegetables and fruits straight from farms. And the special Heinz cooking and straining equipment preserves the maximum goodness.

So with 19 really nourishing varieties to choose from, it's easy for mother to give her baby the varied diet you recommend.

For a FREE booklet giving the nutrient values of all 19 varieties of Heinz Strained Foods, please write to Dept. 1R, H. J. Heinz Company Ltd., London N.W.10.

Do not overlook the Psychological effect of a SPENCER Support

During antepartum and postpartum periods—and especially in early ambulation—a Spencer exerts an important psychological effect. A Spencer's gentle but effective support increases the patient's confidence in her ability to "stay on her feet" and "move about."

Therapeutically, a Spencer Support helps to regain postural stability, helps replace organs in normal position, often relieves low-back pain. A Spencer offers protection to tissues affected by operative procedures without restricting natural muscle activity.

A qualified scientifically trained Fitter furnishes us with a description of the patient's body and posture, and detailed measurements. Then the support is individually designed, cut, and made at our Manufactory at Banbury. Within a short time the patient's support is delivered and adjusted by the Fitter.

APPOINTMENTS

Applicants should state name, address, age, nationality, qualifications, and enclose (unless otherwise specified) one copy each of 3 recent ★ testimonials with short statement of experience and appointments held.

Applications should be sent at once if no closing date is given.

Canvassing in any form will disqualify.

★SERVICE MEMBERS may have difficulty in supplying recent testimonials, but this should not deter them from applying.

A fully registered medical practitioner who is liable for National Service must obtain deferment of recruitment in writing from the Central Medical Recruitment Committee or (in Scotland) the Scottish Central Medical Recruitment Committee before accepting any civilian appointment.

The position of provisionally registered medical practitioners who are liable for National Service has been made clear in a notice sent to them by the Ministry of Labour and National Service.

SALARY SCALES OF JUNIOR GRADES OF HOSPITAL MEDICAL STAFF

Registrar Grades, Whole-time

(a) **REGISTRAR**: Posts obtained normally not less than two years after registration as a medical practitioner and held normally for two years: £850 per annum in the first year; £965 per annum in the second and any subsequent years. If the post is resident a deduction of £170 per annum is made.

(b) **SENIOR REGISTRAR**: Posts obtained normally not less than four years after registration as a medical practitioner and held normally for four years: £1,100 per annum in the first year; £1,200 per annum in the second year; £1,300 per annum in the third year; £1,400 per annum in any subsequent years. If the post is resident a deduction of £200 per annum is made.

Other Grades, Whole-time

(a) HOUSE OFFICERS:

(i) **Provisionally registered medical practitioners**: £425 per annum for the first post held; £475 per annum for the second and all subsequent posts held;

provided that the employing authority (subject in the case of a Hospital Management Committee to the consent of the Regional Hospital Board) shall have discretion to determine that the remuneration of any officer holding his first post in the National Health Service as a House Officer shall be £475 per annum if they are satisfied that the officer has held at least one hospital post outside, of not less than six months' duration, involving clinical responsibilities equivalent to those of house posts in the National Health Service and supervised by appropriate specialist staff.

(ii) **Fully registered medical practitioners**: £525 per annum for any post held; provided that in exceptional circumstances, subject to the consent of the Minister, this rate may be exceeded by up to £50 per annum where a post cannot be filled otherwise.

In each case under sub-sections (i) and (ii) above, a deduction of £125 per annum in respect of board and lodging and other services provided shall be made and each post shall be tenable for six months.

(b) **SENIOR HOUSE OFFICER**: Posts obtained normally not less than one year (in Scotland, two years) after registration as a medical practitioner and normally held for one year only: £745 per annum. If the post is resident a deduction of £150 per annum is made.

(c) **JUNIOR HOSPITAL MEDICAL OFFICER**: Officers who have held house appointments but who are not Registrars and who have less responsibility than other hospital officers of non-consultant status: £775 (for an officer appointed not less than one year after full registration as a medical practitioner) by £50 to £1,075 per annum. If the post is resident a deduction of £170 per annum is made.

Overseas (Vacant)—contd.**PROVINCIAL ADMINISTRATION OF THE CAPE OF GOOD HOPE: UNIVERSITY OF STELLENBOSCH: JOINT MEDICAL SERVICE FOR THE KARL BREMER HOSPITAL, BELLVILLE**

Applications are invited from registered medical practitioners (Specialists) with Pathological Histology as major subject, for appointment to the post of

PROFESSOR IN PATHOLOGY

The appointment will be subject to the conditions of service of the University of Stellenbosch, as well as the agreement entered into between the University of Stellenbosch and the Provincial Administration. Members of the Joint Medical Staff are required to serve jointly the Provincial Administration and the University. The Professor will be appointed on a whole-time basis, with no right to a private practice and with salary at the rate of £2,688 per annum (fixed) and will be required to become a member of the University Provident Fund. In addition to the basic salary, a cost of living allowance at rates prescribed from time to time is payable. At present the amount payable is £234 per annum, if married. The right is reserved, should suitable applications for the post of Professor be not received, to offer a suitable applicant an appointment in a post of First Assistant (Medical Practitioner, Grade G), with a salary of £2,220 per annum (fixed). Applicants should, therefore, state whether they would be prepared to accept an appointment of First Assistant should they not be nominated for the post of Professor. An appointment as First Assistant will be made in terms of the Hospital Board Service Ordinance No. 19 of 1941, as amended, and the regulations framed thereunder as well as the agreement entered into between the Provincial Administration and the University. The successful applicant will be required to contribute to the Cape Provincial Officials' Pension Fund and, if not already in the Hospital Service, will be required to submit satisfactory Birth and Health Certificates. The medium of instruction of the University is Afrikaans. Applicants must state their degree of proficiency in Afrikaans and English and are requested to furnish particulars in regard to the following: (a) Academic achievements (degrees and diplomas held and the standard of achievement in professional examinations: scholarships and special awards); (b) Professional experience (not only a statement of employer but the institution in which the individual worked and the type of work undertaken); (c) Names of three referees (one of these should preferably be someone occupied in the same branch of medicine as the candidate). Until such time as the training of students is commenced, the appointed person will be responsible for duties at the hospital and for the organization of his Department. Applications must be addressed to the Registrar of the University of Stellenbosch, Stellenbosch, and must reach him not later than March 15, 1957. Applicants must state the earliest date on which they will be able to assume duty. (9003)

THE QUEEN VICTORIA MATERNITY HOSPITAL, INC., 22, Victoria Avenue, Rose Park, South Australia, Australia

Applications are invited from members of the Royal College of Obstetricians and Gynaecologists for the position of

MEDICAL SUPERINTENDENT

of the above Hospital. The appointment will be for a minimum term of three years and the salary range is £A.2,426 to £A.2,676 per annum, subject to a deduction for furnished residence, light, power, fuel, and telephone. Consideration will be given to the refunding of a proportion of fares, subject to conditions relating to period of service, in the case of a successful Overseas applicant. The Hospital: The Queen Victoria Maternity Hospital is one of the obstetric teaching hospitals in Adelaide and confines approximately 3,000 women annually. The resident obstetric staff consists of one Medical Superintendent and five Resident Medical Officers. Duties: The successful applicant will be responsible to the Committee of Management for the medical supervision of the Hospital and will have ample opportunity for active clinical work. Any further particulars may be obtained on application to the Secretary/Manager. Applications, in writing, comprising full personal details, particulars of experience and copies of three testimonials, are to be in the hands of the undersigned by February 23, 1957.—V. R. Atkinson, Secretary/Manager. (9117)

VACANCIES SEPTEMBER 1, 1957, FOR ONE-YEAR APPROVED RESIDENCY IN INTERNAL MEDICINE. Eleven months' service divided between the University Infirmary and the community hospital plus one month's vacation. Excellent opportunity for study and research. Qualifications: Graduate of approved medical school with one year's internship. Salary \$2,500 per year, plus maintenance. Individual arrangements to finance travel passage can be arranged. Cornell University is an approved participant in the Exchange Visitors' Programme. Write Clinical Director, Cornell University Infirmary, Ithaca, New York, U.S.A., for additional details and application form. (8901)

(8855)

CLARE COLLEGE**HARRISON WATSON STUDENTSHIP FOR MEDICAL RESEARCH**

The Governing Body of Clare College, Cambridge, invite applications for a Harrison Watson Studentship commencing on October 1, 1957. The Studentship, which is open to male graduates of any University in any country, is for research or training in research "into the causes and cure of tuberculosis, and/or other diseases of an allied character." The Governing Body intend to interpret these terms in the widest possible sense and they invite detailed enquiries. The Studentship may be: (i) a Junior Studentship of value between £500 and £650 a year, normally tenable for three years, or (ii) a Senior Studentship of value between £800 and £1,000 a year, tenable for one, two or three years. The Student may also hold another award or post, and may engage in a limited amount of teaching, if in the opinion of the Governing Body these do not interfere with his research. The Student will be required to become a member of Clare College and the University of Cambridge, and to reside and work in Cambridge. Applications should contain an account of the applicant's career, and a general statement of his proposed course of research. No testimonials need be submitted, but the names and addresses of not fewer than two referees should be sent. Applications and enquiries should be addressed to the Master, Clare College, Cambridge. The closing date for application is March 31, 1957. (8756)
