

To lessen the fear of mutilation . . . arrange for Prosthesis before mastectomy

The psychological hazards of mastectomy are generally recognized. A woman's fear of mutilation—of its effect on her appearance—is often as great as her fear of surgery itself. That is why arranging for the correct prosthesis replacement *before* surgery helps to minimize the psychic trauma—enabling the patient to face the adjustment period with more calm and assurance.

The surgeon can prescribe Spencer Mastectomy Supports with complete confidence that they will meet both the medical and cosmetic indications. The reason: Each Spencer Breast Support and Breast Form is individually designed, cut and made for each patient.

Wherever support is indicated for breasts, back, abdomen—for women, men, children—you will find Spencer Supports demonstrably superior.

reaching high levels FAST.....

In oral penicillin therapy the most rapid and decisive results by mouth can be achieved if the antibiotic is speedily absorbed, gives a high initial destructive level, and is followed by a sustained inhibitory level at the infected focus. This is accomplished with *soluble* potassium penicillin G, the form which is absorbed from the alimentary tract with great efficiency. Such is the type of penicillin presented in Crystapen Tablets and Liquid—preparations that are readily taken and swift to act.

new

"An outstanding phenomenon in gynaecology since the war is the remarkable increase in the incidence of non-bacterial vaginitis."

Brit. Med. J. (1957) 1, 155

sterisil is effective against **TRICHOMONAS**

MONILIA

and

BACTERIA

including *Haemophilus Vaginalis*, the recently isolated organism responsible for some 'non-specific' infections.

Sterisil is an entirely new chemical entity, unrelated to any other trichomonocidal, fungicidal or bactericidal agent.

STERISIL is available in boxes containing a tube of vaginal gel (1½ oz.) and six disposable applicators. The original packing should always be prescribed to ensure that the patient receives both gel and applicators.

William R. Warner & Co Ltd, Power Road, London W4

Resistance to Sterisil has not been encountered clinically and attempts to produce resistant strains in the laboratory have not been successful, even after four months of growth in sublethal concentrations of Sterisil.

The advantages of **sterisil**

- 1 Effective against all the organisms commonly responsible for vaginitis
- 2 Non-toxic
- 3 Stable
- 4 Odourless
- 5 Non-staining — will not soil clothing
- 6 Does not cause irritation or sensitization
- 7 Marked affinity for tissues which enhances clinical effectiveness
- 8 Convenient — suitable for administration by patient
- 9 Effective against organisms resistant to antibiotics and sulphonamides

sterisil

Rubriment relieves pain in such conditions as muscular rheumatism, fibrositis, strains and sprains.

Some minutes after application the rubefacient action is apparent and lasts for many hours.

About Rubriment

the new long-acting rubefacient

Rubriment contains a new substance—the benzyl ester of nicotinic acid—which gives a long-lasting rubefacient effect. Pharmacological experiments have shown that even after prolonged and repeated application no damage or irritation to the skin was produced. Ten minutes after applying Rubriment there is a comforting feeling of warmth which lasts for many hours.

Clinical reports have been received of the efficiency of Rubriment for the relief of pain in such conditions as muscular rheumatism, lumbago, fibrositis, strains and sprains.

Rubriment may be used to give effective relief for unbroken chilblains.

Available in two forms

Rubriment (2.5% nicotinic acid benzyl ester and 0.1% Capsicin) is available either as a cream or as a liniment, both of which are non-greasy and free from unpleasant odour.

The cream is rapidly absorbed and needs only gentle application. *It is supplied in tubes of 20 G. (approx.).* Basic price to N.H.S. 2/2d.

The liniment lends itself to massage, if this is required. It is supplied in bottles of 2 fl. ozs. (approx.). Basic price to N.H.S. 3/-.

Rubriment is not advertised to the public and can be prescribed on form E.C.10.

The use of stabilized Trypsin

A NEW TREATMENT FOR **ULCERS** **ABRASIONS** **BURNS** **PYODERMIAS**

ANY MEDICAL PRACTITIONER knows how stubbornly resistant to any therapy a long-standing varicose ulcer can be. The reason is partly the diminished blood supply, but more perhaps the formation of a pus-containing layer and of crusts which cover the ulcer and impede the healing process. Similar difficulties are often encountered in the treatment of wounds and abrasions.

PROTEOLYTIC ACTION

It has long been known that the proteolytic enzyme trypsin could digest crusts by the process of physiological curettage. The difficulty has been to incorporate the trypsin in a stable preparation. In Biotrase, trypsin remains active physiologically for over one year. It rapidly dissolves crusts and scabs and leaves a clean, granulating surface. A certificate of stability has been issued by a Department of Bio-chemistry.

Biotrase has been designed by Lloyd-Hamol of London and Zurich for the treatment of infected skin lesions. Apart from trypsin, it contains two new

antiseptic agents of proved bacteriolytic properties, Ca-N-Hydroxymethylglutamate and 2,2¹ thiobis-(4,6-dichlorophenol), designated bithionol, both of which are effective against a wide range of gram-positive and gram-negative pathogenic organisms and do not cause skin sensitivity. Biotrase also contains carbamide, included for its buffering properties.

INDICATIONS FOR USE

Biotrase may be used wherever there is an infected—or potentially infected—breach of surface of the skin. Common conditions for its use include the following: Varicose, diabetic and post-thrombotic ulcers; wounds, and second and third degree burns; infected and necrotic skin conditions, including pyodermias; boils and carbuncles (following incision).

COMPOSITION OF BIOTRASE

<i>Trypsin pur.</i>	0.16%
<i>Ca-N-Hydroxymethylglutamate</i>	5.00%
<i>2,2¹ thiobis-(4,6-dichlorophenol)</i>	0.50%
<i>Carbamide B.P.</i>	5.00%
<i>In polyethylene glycol</i>	

Biotrase is available in 35 g. tubes at a basic N.H.S. price of 3/9d. plus Purchase Tax. Samples and literature are available to medical practitioners on request.

Relief of Rheumatic Pain in General Practice

1. Formulation of succinate overcomes toxicity of massive dosage of aspirin

Pain caused by all forms of rheumatism can now be relieved promptly by massive aspirin dosage *without fear of toxicity*. The Berex formulation of aspirin (3.7 gr.) and calcium succinate (2.8 gr.) has overcome this old problem so effectively that your patients can safely administer the drug themselves. Repeated visits to the surgery for supervision of administration are unnecessary.

2. Side-effects fewer and milder

Even after prolonged dosage, Berex produces no toxic effects. The prothrombin level is maintained and there is no hæmorrhagic tendency.* Prolonged periods of relief can be enjoyed in safety. The patient is simply instructed to reduce the initial high dosage as soon as the pain diminishes. Side effects, if present at all, are fewer and milder.

3. Encourages tissue respiration

Experimentally, by Warburg test, it has been shown that the inhibitory action of salicylate on tissue respiration is completely offset when it is combined with succinate. Succinate encourages cellular respiration and stimulates the respiratory enzyme systems. It is to this stimulating action that the beneficial effect of succinate is attributed.

* "No abnormal prolongation of prothrombin time even after 68 days of succinate-salicylate." "The results also show that this succinate-salicylate formulation combines safety and efficacy, permitting wide use both for treatment and maintenance without the excessive supervision required in many other forms of therapy."

Delaware State Med. J., 1954, 26, 22.

years of discretion?

Wisdom may be said to grow with the years, yet dietary discretion is often sadly lacking in the elderly patient. Indifference to food is reflected in irregular, ill-chosen meals—often leading to impaired nutrition and anaemia states. For just such cases PERIHEMIN Haematinic is an eminently sound prescription. Here, in convenient capsule form, are all the principal haemopoietic substances in therapeutic amounts. PERIHEMIN is therefore valuable for closing the gaps which may exist in the body's anti-anaemia defences.

'CORTISPORIN'
*kills the bacteria of
surface infections*

This new ointment contains bacitracin, neomycin and polymyxin B sulphate. It has a wider range of activity than any single antibiotic, destroying gram-positive and gram-negative organisms, including *Ps. pyocyanea*, *proteus* and staphylococci. Bacterial resistance or skin sensitisation are unlikely with 'Cortisporin'; nor does it induce cross-resistance or cross-sensitisation to penicillin or other antibiotics. It often succeeds where other antibiotics fail. 'Cortisporin', by virtue of its other constituent, hydrocortisone, also reduces inflammation.

For further information please apply to BURROUGHS WELLCOME & CO., The Wellcome Building, Euston Road, London, N.W.1.

a new antibiotic
of life-saving
potential

DISCOVERED IN THE MERCK SHARP & DOHME RESEARCH LABORATORIES

'CATHOMYCIN' is well absorbed when given orally and is indicated principally in the treatment of STAPHYLOCOCCAL INFECTIONS including those resistant to all other antibiotics.

'CATHOMYCIN' is also effective in conditions due to susceptible strains of PROTEUS and certain infections due to streptococcus, diplococcus, corynebacterium and pasteurilla.

Excellent results have been reported in the following conditions:

Post-operative wound infections
Cellulitis
Staphylococcal septicaemia
Varicose ulcers
Recurrent and persistent carbuncles
Various skin abscesses
Enteritis
Whitlows and paronychia
Maxillary sinusitis
Osteomyelitis
Infected amputation stump
Infected burns

For SUB-ACUTE and Chronic dermatoses

TAR + HYDROCORTISONE

combined in

TARCORTIN CREAM

have pronounced advantages over either medicament alone.

The established germicidal, stimulating and anti-pruritic properties of tar, in the treatment of sub-acute and refractory skin affections, can now be considerably enhanced by its incorporation with hydrocortisone.

Clinical trials have shown that the two medicaments together exert a powerful synergistic action that is far more rapid, more pronounced and complete than the action of either alone. These two valuable therapeutic agents are presented in a non-greasy, stainless, hydrophilic cream, known as TARCORTIN.

TARCORTIN CREAM

*is supplied in 7 grm.
tubes, containing 0.5%
Hydrocortisone in a
special coal-tar extract.*

Availability of Vitamins in Yeast

Deficiencies of single factors of the Vitamin B Group do not occur. Accordingly, even if a deficiency condition appears to result from the lack of an individual factor of the group and it is considered necessary to give intensive treatment with this factor, *the entire Vitamin B complex should always be administered concurrently.*

It is, however, extremely important, in view of suggestions in recent publications, that the vehicle selected as a source of the entire B Complex does not withhold its vitamin content from the patient.

Human experiments show that the rich, natural vitamin potency of Aluzyme is totally available to the human system.

- Aluzyme is not advertised to the public and may be prescribed on Form E.C.10

Intervertebral Disc

The surgeon frequently advises effective back support as treatment for this condition.

The "Strödex" Support is individually designed after a full set of measurements and an accurate figure diagnosis have been made by the trained Strödex fitter. Complete and efficient support to the back is provided as a result.

When required, 'rigid steels' in the back provide immobility of the spine in the lumbar region.

The support can also be designed with an adjustable band encircling the Pelvic Girdle and providing additional control and support in that region.

Supports are designed for both Male and Female patients.

Song from the Surgery

The Daily Round, the Common Task
Don't furnish all we need to ask
In surgery now, all day we're told
Of trivial ache and common cold!

So many patients seem to suffer
From "nerves"! — I do wish they
were tougher!
They really do *enjoy* poor health
And spout their woes at endless length.

The doctor listens to their moan,
And when the last has tottered home,
He gets his wife to pour him out
A glorious glass of Guinness Stout.

M.B., Ch.B., M.R.C.S., L.R.C.P

* Doctors, too, enjoy writing verses about Guinness. The above contained in a letter addressed to Guinness by one of them is published by kind permission.

GUINNESS

is good for you

**They like
Lucozade..**
*and they
can keep it
down—*

Lucozade has won its place in the sickroom because it is so very palatable. Patients enjoy it and, what is more, they can keep it down even when other food is refused, or vomited. It is difficult to assess the value of Lucozade simply in terms of the glucose it contains. It is the patient's response which is so interesting. Its acceptance so often coincides with a distinct and happy turn for the better.

There can be no doubt that Lucozade presents the beneficial properties of glucose in a most agreeable form.

Like father — like son

The Confederation Life Association announce the introduction of their new, and unique in this country, "Junior Partnership" Policy. In one document, covering father and son, and at a guaranteed low rate of premium, it provides:

- ★ ENDOWMENT INSURANCE FOR YOUR SON FROM AGE 21
- ★ INSURANCE PROTECTION ON YOUR LIFE WHILE YOUR SON IS STILL DEPENDENT ON YOU

This means that for a low premium, based on your son's insurance to start when he is 21, you can also provide for your dependents if you die before this.

**THIS IS A NEW INEXPENSIVE WAY OF
PROVIDING FOR YOUR CHILDREN**

Full details will be given on request to Dept. G.5.

18, PARK LANE, LONDON, W.1

APPOINTMENTS

Applicants should state name, address, age, nationality, qualifications, and enclose (unless otherwise specified) one copy each of 3 recent ★ testimonials with short statement of experience and appointments held.

Applications should be sent at once if no closing date is given.

Canvassing in any form will disqualify.

★SERVICE MEMBERS may have difficulty in supplying recent testimonials, but this should not deter them from applying.

A fully registered medical practitioner who is liable for National Service must obtain deferment of recruitment in writing from the Central Medical Recruitment Committee or (in Scotland) the Scottish Central Medical Recruitment Committee before accepting any civilian appointment.

The position of provisionally registered medical practitioners who are liable for National Service has been made clear in a notice sent to them by the Ministry of Labour and National Service.

SALARY SCALES OF JUNIOR GRADES OF HOSPITAL MEDICAL STAFF

Registrar Grades, Whole-time

(a) **REGISTRAR**: Posts obtained normally not less than two years after registration as a medical practitioner and held normally for two years: £850 per annum in the first year; £965 per annum in the second and any subsequent years. If the post is resident a deduction of £170 per annum is made.

(b) **SENIOR REGISTRAR**: Posts obtained normally not less than four years after registration as a medical practitioner and held normally for four years: £1,100 per annum in the first year; £1,200 per annum in the second year; £1,300 per annum in the third year; £1,400 per annum in any subsequent years. If the post is resident a deduction of £200 per annum is made.

Other Grades, Whole-time

(a) HOUSE OFFICERS:

(i) **Provisionally registered medical practitioners**: £425 per annum for the first post held; £475 per annum for the second and all subsequent posts held;

provided that the employing authority (subject in the case of a Hospital Management Committee to the consent of the Regional Hospital Board) shall have discretion to determine that the remuneration of any officer holding his first post in the National Health Service as a House Officer shall be £475 per annum if they are satisfied that the officer has held at least one hospital post outside, of not less than six months' duration, involving clinical responsibilities equivalent to those of house posts in the National Health Service and supervised by appropriate specialist staff.

(ii) **Fully registered medical practitioners**: £525 per annum for any post held; provided that in exceptional circumstances, subject to the consent of the Minister, this rate may be exceeded by up to £50 per annum where a post cannot be filled otherwise.

In each case under sub-sections (i) and (ii) above, a deduction of £125 per annum in respect of board and lodging and other services provided shall be made and each post shall be tenable for six months.

(b) **SENIOR HOUSE OFFICER**: Posts obtained normally not less than one year (in Scotland, two years) after registration as a medical practitioner and normally held for one year only: £745 per annum. If the post is resident a deduction of £150 per annum is made.

(c) **JUNIOR HOSPITAL MEDICAL OFFICER**: Officers who have held house appointments but who are not Registrars and who have less responsibility than other hospital officers of non-consultant status: £175 (for an officer appointed not less than one year after full registration as a medical practitioner) by £50 to £1,075 per annum. If the post is resident a deduction of £170 per annum is made.
