LABORATORY APPLICATIONS IN CLINICAL PEDIATRICS

IRVING J. WOLMAN, MD

*Director of Clinical Laboratories
 The Children's Hospital of Philadelphia
 Associate Professor of Paediatrics
 Undergraduate and Graduate Schools of
 Medicine, University of Pennsylvania*

The intelligent use of routine laboratory tests can be a great help in dealing with children's diseases. This practical reference book is written for the general practitioner who is constantly dealing with children, as well as for the paediatrician. It describes the applications of laboratory tests, rather than how to perform them. All material included is useful for diagnosis and enables the doctor to begin with the patient's symptoms. Diseases are grouped under the tests most likely to reveal abnormalities; this is in accord with usual hospital practice. Particular attention is given to the disturbances in physiological functions which accompany disease.

POLYBACTRIN

antibiotic powder spray

INVALUABLE IN ALL BRANCHES OF SURGERY

Polybactrin provides a unique and economical means of applying a combination of Zinc Bacitracin, Neomycin Sulphate and Polymixin 'B' Sulphate—the three antibiotics of choice for topical use. The antibiotics are presented in an ultra-fine powder form dispersed under pressure with a propellant, and unlike other means of powder insufflation in common use, there is no risk of contamination of the antibiotics by airborne pathogens obtaining entry into the unit by suction.

A FRACTIONAL RELEASE GIVES COMPLETE DISPERSAL OF POWDER OVER THE WOUND

1. The *Polybactrin* unit offers a new technique for topical application of antibiotic therapy, enabling an efficient, economical and dry coverage of the wound area to be made.
2. The extensive range of bactericidal activity afforded by the triad of bacitracin, neomycin and polymixin gives an extremely wide coverage of wound pathogens without the risk of inducing resistant strains of organisms.
3. *Ps. pyocyanus*, particularly present in burns, is completely inhibited by polymixin, considerably reducing the healing time.
4. *Polybactrin* is not readily absorbed and there is no risk of systemic toxicity occurring.
5. The propellant gas is non-toxic and does not support combustion.
6. There are no contra-indications to the use of *Polybactrin*. Systemic therapy may be given concurrently if necessary.

FORMULA: Each pack contains: Neomycin Sulphate 750 mg. Polymixin 'B' Sulphate 150,000 units. Zinc Bacitracin 37,500 units. Propellant 83.5 g. Net contents 85 g.

Facts his doctor wasn't told...

Retired for the last three years, the patient complains that he's unable to keep pace with his gentle present-day routine. 'Says he's always tired . . . can't understand it as he's always been so active for his age. He doesn't say however that since his wife died, he's lost interest in his food . . . his attention to diet has been lacking and regular meals have been replaced by casual snacks.

GEVRAL Geriatric Vitamin—Mineral Supplement was evolved to enable doctors to treat just such patients—to provide a balanced ration of essential nutrients in the simplest form. The usual dosage is one capsule daily—and the GEVRAL formula is so comprehensive that this routine provides effective all-round supplementation. Indeed, for many elderly patients the result is a gratifying return of general well-being—and the rediscovery that life is worth living!

"I'm going to prescribe Lastonet stockings"

And this is how to do it. The words "ELASTIC NET STOCKINGS" *must* be written on the E.C.10 to obtain Lastonet stockings for supply under the National Health Service.

The quantity required and whether thigh or knee length should also be included.

The correct wording is important to ensure Lastonet stockings which are made only to individual measures and so ensure a perfect fit.

A Superior Buffered Analgesic

'ALASIL' TABLETS—the improved form of salicylate medication—provide the efficient analgesia expected from their content of aspirin. Their superior acceptability derives from their content of a reliable buffer which minimizes the tendency to gastric irritation sometimes caused by the use of aspirin alone.

Advantages

'Alasil' is an advanced sedative and antipyretic; it does not tend to induce gastric irritation; because of its high tolerability, it may be used for long-term administration even to those with sensitive stomachs, and to children.

Composition

'Alasil' Tablets contain the recognized antacid corrective, 'Alocol' (Colloidal Aluminium Hydroxide), which permits their sedative principle, acetylsalicylic acid, to exert its action with minimal risk of side-effects.

Indications

Symptomatic pain generally; rheumatism, fibrositis, lumbago, headache, dysmenorrhoea; dental pain.

The LEVIT Bath Lift

AS USED AT THE STROKE
MANDEVILLE HOSPITAL

The patient first sits on the platform with his feet on the floor and then raises his legs until he can lift them over the edge into the bath.

When the lever "L" is pushed forward, the patient is gently lowered to the bottom of the bath. Raising is effected by returning the lever to its upright position.

FOR THE INFIRM & DISABLED PATIENT

If desired, a Levit Bath Lift can be supplied on approval to Hospitals and Nursing Homes. Alternatively a 10 minute, 16 mm. sound film is available which if preferred, can be seen first.

The Levit Bath Lift enables the infirm and those incapacitated by paralysis, rheumatism and similar conditions to get into and out of the bath with minimum difficulty, and in all but the most severe cases, without assistance. It consists essentially of a seat, or platform, which can be raised to the top of the bath or gently lowered to the bottom by water pressure, whilst supporting a weight up to a maximum of 35 stone. Equally suitable for use in Hospital, Nursing Home or Patient's Home.

Rubriment relieves pain in such conditions as muscular rheumatism, fibrositis, strains and sprains.

Some minutes after application the rubefacient action is apparent and lasts for many hours.

About Rubriment

the new long-acting rubefacient

Rubriment contains a new substance—the benzyl ester of nicotinic acid—which gives a long-lasting rubefacient effect. Pharmacological experiments have shown that even after prolonged and repeated application no damage or irritation to the skin was produced. Ten minutes after applying Rubriment there is a comforting feeling of warmth which lasts for many hours.

Clinical reports have been received of the efficiency of Rubriment for the relief of pain in such conditions as muscular rheumatism, lumbago, fibrositis, strains and sprains.

Rubriment may be used to give effective relief for unbroken chilblains.

Available in two forms

Rubriment (2.5% nicotinic acid benzyl ester and 0.1% Capsicin) is available either as a cream or as a liniment, both of which are non-greasy and free from unpleasant odour.

The cream is rapidly absorbed and needs only gentle application. *It is supplied in tubes of 20 G. (approx.).* Basic price to N.H.S. 2/2d.

The liniment lends itself to massage, if this is required. It is supplied in bottles of 2 fl. ozs. (approx.). Basic price to N.H.S. 3/-.

ADRENOXYL

Reduces the mean bleeding-time

Adrenoxyl reduces the mean bleeding-time by decreasing the permeability and increasing the contractility and resistance of the capillary wall.

A dry field at operation

Adrenoxyl has been successful in diminishing capillary bleeding in a wide range of surgical operations. It has proved particularly useful in ear, nose and throat, ophthalmic and plastic surgery. In plastic surgery of the face it has been reported that, post-operatively, there is less swelling and bruising when Adrenoxyl has been used.

No side effects

Adrenoxyl does not have any side effects or contraindications. It does not affect blood coagulation, blood pressure or pulse rate and does not possess any sympathomimetic properties.

In medical conditions

Adrenoxyl has been used with success in those medical conditions associated with capillary fragility.

In the British Medical Journal (April 21st, 1956) a correspondent confirmed the value of Adrenoxyl in providing a dry field for the surgeon and in shortening the duration of the operation.

Packs

Ampoules: Boxes of 6 and boxes of 50.
Each ampoule contains 0.75 mg. of adrenochrome monosemicarbazone dihydrate.

Tablets: Tubes of 25 and bottles of 500.
Each tablet contains 2.5 mg. of adrenochrome monosemicarbazone dihydrate.

The best results are obtained when both tablets and ampoules are used.
