

The "light diet" patient needs protein

KEEPING AN INVALID ON A LIGHT DIET may be no light matter to a busy housewife. Sick people tire quickly of milk foods—and in many cases there is a physical reaction against them.

Brand's Essence is a boon in sickness. It provides a useful protein supplement to the diet, in an ideal form for invalids: a fat-free, appetizing jelly that even the weakest system can rapidly absorb. Ready to serve in various ways, it is delicious just eaten with a spoon, spread on bread and butter, warmed up as a liquid, or mixed with milk.

Brand's Essence doesn't cloy—sick people often enjoy it when they can't take anything else. And it revives appetite amazingly.

The addition of Brand's Essence to low residue and weight-reducing diets is especially appreciated by the patient.

THE CYTOLOGY OF EFFUSIONS

in the Pleural, Pericardial and Peritoneal Cavities
by A. I. SPRIGGS, D.M.(Oxon.), M.R.C.P.

... Dr. Spriggs gives a clear account of his not too complicated technique, which demands nothing not already in the clinical laboratory and uses the standard May-Grunwald-Giemsa blood stain. The results are illustrated in 5 colour plates. ... These plates are very good, clearly printed, with well-reproduced detail. ... There are also 40 photomicrographs in monochrome; these, on the whole, are very good too. ...

This, then, is a useful atlas which should encourage clinical pathologists to take more care with cytological preparations. ...

THERAPAS

THERAZID
(‘Therapas’ and isoniazid)

If P.A.S. is indicated, THERAPAS may be used as the drug of choice because it has these significant properties.

- ★ No unpleasant taste
- ★ Overcomes the problems of nausea and vomiting
- ★ Minimises gastro-intestinal disturbances
- ★ Breaks down in the body to yield P.A.S.
- ★ Yields more prolonged blood levels of P.A.S. than an equivalent dosage of P.A.S.

- ★ Produces high urinary concentrations of P.A.S. and is the drug of choice in the management of genito-urinary tuberculosis.

THERAZID is a convenient and easy to take combination of ‘Therapas’ and ‘Pycazide’ (Smith & Nephew’s name for isoniazid B.P.) For *domiciliary treatment* THERAZID is particularly valuable. The graph above is of an experiment to measure the effect of Transvasin on skin temperature on a subject. The red line plots the skin temperature before and at intervals after a single application of one inch of cream (0.924 grams) from a tube of Transvasin. The black line gives similar information with regard to the application of a plain vanishing cream used as a control. Skin temperatures were measured with an electro-thermo couple every five minutes for two hours. Photographs show the affected area before application; three minutes and thirty minutes later.

IT is generally agreed that cases of soft-tissue rheumatism and of many types of arthritis benefit by hyperaemia of the affected tissues. Transvasin, which contains two quick-acting esters of nicotinic acid, induces such a deep and prolonged hyperaemia at the same time as it produces superficial erythema.

In addition to the esters of nicotinic acid, Transvasin contains the fat- and water-soluble esters of salicylic and p-aminobenzoic acids. Both these well-tried analgesic drugs are readily conveyed through the skin in therapeutic quantities and enable an effective concentration to be built up where they are needed.

Transvasin is now being widely prescribed, with successful clinical results. Since a very small quantity is sufficient for each application, the cost of treatment is extremely low.

Transvasin is available in 1 oz. tubes, basic N.H.S. price 2/6 plus P.T., and is not advertised to the public. Samples and literature will be gladly sent on application.

Carnation Milk for infant feeding

The advantages of *Standardisation*

The diagram above shows the percentage of solids in Carnation Milk.

The total solids are standardised, as required by law, to a minimum of 31 %. Of this figure 9 % must be butterfat.

Previous Carnation advertisements have demonstrated that, chemically and physically, ordinary milks cannot compete with the range of tolerance and digestibility of the proteins and butterfat in Carnation Milk. These superiorities in an infant food are enhanced by the uniformity obtained by standardisation.

Uniformity in practice means :—

1. Constant calorie value. 2. Accuracy and ease of measurement. 3. Control of intake where necessary. 4. Precision in dilution.
5. A milk of known value at all times — and available everywhere.

Other attributes of Carnation Milk are :

- Safety, because of sterilisation *after* the Carnation cans are sealed — Hypo-allergenic properties
- Homogenisation — Prophylactic D₃.

"The Feeding of Infants"—a book specially prepared for doctors together with reprints of clinical investigations and Carnation feeding charts are available from : Medical Dept., General Milk Products Ltd., Bush House, Aldwych, London, W.C.2.

Distinguished Record

Three years of clinical use have given 'Ilotycin' brand Erythromycin a distinguished record of remarkable safety. Highly effective against staphylococci, streptococci and pneumococci, 'Ilotycin' exerts negligible effect on the colon bacillus and does not give rise to the extremely dangerous staphylococcal enterocolitis. It is particularly valuable against penicillin-resistant staphylococci and has become the logical first choice antibiotic after penicillin. 'Ilotycin' is the surest and safest way of combating a wide range of common infections encountered in general and hospital practice, and can be life-saving in overwhelming infections where prompt response is vital.

The average daily dose is 1 Gm., increased in severe infections.

'Ilotycin' is available as Tablets of 100 mg. and 250 mg., and as 'Ilotycin' Paediatric for oral suspension.

EAR WAX *Removed this easy way*

The removal of wax from the external auditory meatus has, in the past, normally entailed attendance by the patient for diagnosis and for the prescription of a suitable loosening agent, and a second attendance a few days later for syringing.

Now, by the use of Cerumol Ear Drops, wax can be removed in most cases at one visit. A few drops of Cerumol can be instilled into the ear and, while another patient is being attended to, the soft cerumen dissolves and the harder wax disimpacts. The wax can then be removed by gentle syringing or with cotton wool. The wax may even be found to run out of the ear on its own accord, in which case patients themselves may instil Cerumol at home, obviating further attendances.

Cerumol is anti-bacterial, non-irritating and harmless to the lining of the external auditory meatus or the tympanic membrane. Cerumol is included in Category No. 4 of the M.O.H. classified list of Proprietary Preparations and may be prescribed on N.H.S. Form E.C.10.

Results

"The immediate clinical results were assessed after the first month's treatment in four main groups: (A) pronounced relief (symptom free); (B) definite relief (minor symptoms with no pain); (C) doubtful relief (symptoms persisting but improved); (D) no relief.

"Table II shows that 81% of cases became symptom-free—70% of them during the first week and 30% during the second week; a further 9% were relieved of the majority of their symptoms. Thus there was a satisfactory response in 90% of cases.

TABLE II

Group	Active Ulcers	Presumptive Ulcers	Totals
A	63 (79.6%)	17 (89.0%)	80 (81.7%)
B	8 (10.2%)	1 (5.5%)	9 (9.2%)
C	6 (7.6%)	1 (5.5%)	7 (7.1%)
D	2 (2.5%)	0 (—)	2 (2.0%)
TOTALS	79 (100%)	19 (100%)	98 (100%)

"Four of the nine cases in groups C and D have elected to go to surgery, and one of the remaining cases has a hiatus hernia as well as a duodenal ulcer. Experience of treating these 'Failures' over the past six years leads one to believe that no form of medical treatment will be effective and that surgery is the only hope of relieving their symptoms. In 75% of cases the patients were of the opinion that the tablets were superior to alkaline powders, and they found that they were able to take foods which they had avoided for years."

Extracts from the
BRITISH MEDICAL JOURNAL
1955, 2, 827

"SUMMARY: Seventy-nine cases of peptic ulcer and 19 of presumptive peptic ulcer have been treated with Roter tablets. Immediate clinical response was satisfactory in 90% of patients, with a relapse rate of 57% in the first year; a reduction in the average number of relapses was recorded in 15 cases kept on a maintenance dose for one year."

Safe—Libby's Evaporated Milk is fresh cow's milk concentrated, sealed in cans and sterilized so that it remains sweet and safe indefinitely. It cannot cause diarrhoea or other digestive symptoms due to bacterial contamination.

Simple—In making the formula, no boiling or straining of the milk is required. It is prepared simply by adding boiled water and granulated sugar.

Easily Digested—Digestibility depends upon low curd tension and small curd particle size.—The sterilization by heat of Libby's Milk is far more effective than is boiling in lowering curd tension.

BUT curd particle size is an even more important index of digestibility than is curd tension, as shown by Doan and co-workers in the United States. Libby's Evaporated Milk, reconstituted with water and curdled with rennin, which approximates conditions occurring in the infant's stomach, remains liquid with suspension of extremely fine curds, similar to human milk, and much finer than curd from boiled or any other kind of cow's milk.

Photomicrographs showing comparison of curds from:

A—Human Milk.

B—Libby's Evaporated Milk mixed with $1\frac{1}{2}$ times its volume of water.

C—Pasteurized Milk. Each specimen was curdled by the addition of rennin. During the precipitation the milks were stirred constantly to simulate conditions in a baby's stomach.

When Fersolate was introduced as the first compound ferrous sulphate tablet nearly 25 years ago it was considered a distinct advance on existing methods of giving iron. Today, Fersolate still holds a pre-eminent place in iron therapy. Time, and the experience of countless doctors throughout the world, have amply proved its efficiency, palatability and undoubted economy.

RYOTOL

RYOTOL is lethal to *Ps. pyocyanea*, *Staphylococcus aureus*, *Proteus vulgaris* and *Streptococcus pyogenes* found in C.S.O.M. and Otitis Externa.

The presence of *Ps. pyocyanea* has been demonstrated in 90% of cases of chronically discharging ears. This gram-negative, highly resistant organism is unaffected by penicillin, sulphonamides and many other bactericides. It produces abundant pus and is therefore extremely troublesome.

RYOTOL Ear Drops are the outcome of clinical work on humans, following outstanding results obtained in the veterinary field.

It is fully equipped, has nursing and clerical assistance, its own side-room and direct access to all laboratory and X-ray facilities. S.H.O. £1,116 p.a. In addition an expatriate doctor appointed would receive an inducement allowance of £270 p.a. on a salary up to £1,284 p.a. or £300 p.a., when the salary exceeds £1,284 p.a. The appointment will be initially for two tours of from 12-18 months, and will be renewable, by mutual agreement, for a further tour, except in the case of an S.H.O., when the appointment will be for one tour of 12 months with the possibility of transfer to the J.H.M.O.'s scale thereafter. On satisfactory completion of service a gratuity of £37 10s. will be paid for each completed term of three months' service. An outfit allowance of £60 is payable on first appointment. Partly furnished quarters are provided at a rental of 8.1/3% of salary, excluding inducement allowance. An expatriate doctor appointed will be eligible for 7 days' leave on full pay for each completed month of service in Nigeria. A Nigerian doctor will qualify for 5 days' leave for each completed month of service. Free first class passages are provided for an expatriate doctor and wife on first appointment, on vacation leave and on completion of their agreement. Free first-class passages to Nigeria will, in certain circumstances, be provided for a Nigerian doctor. Successful candidates will be eligible for children's allowances in accordance with the current regulations. When necessary, a loan may be granted to assist in the purchase of a car. Arrangements can be made to enable successful candidates to continue their National Health Service Superannuation Scheme contributions, and details of the revised salary and gratuity payable in such cases will accompany application forms. Applications should be submitted not later than April 20, 1957, on the appropriate forms, which will be forwarded together with additional information on receipt of an addressed footslop envelope by the Adviser on Staff Recruitment, London Office, University College Hospital, Ibadan, 57, Catherine Place, Palace Street, London, S.W.1. THE SEARCH FOR VITAMINS

Unlike most natural substances, vitamins were appreciated long before they were identified and their chemical and physiological properties were studied. Thus, beriberi in the Japanese navy was controlled by dietary measures several decades before the isolation of thiamine.

Marmite, too, was popular long before its vitamin content was suspected and before its beneficial effects in nutritional macrocytic anaemias and in vitamin B complex deficiencies were recognised. Its haemopoietic properties were demonstrated in 1931 and subsequent analysis showed the presence of folic acid, as well as riboflavin, nicotinic acid, choline, pyridoxine, pantothenic acid, inositol, biotin, vitamin B₁₂ and p-aminobenzoic acid. Marmite is palatable and easily administered. It therefore constitutes a useful source of these vitamin B factors.
