## **TRYPSIN**

IT HAS LONG been known that the proteolytic enzyme Trypsin could resolve necrotic tissue and was in theory an ideal physiological agent for the treatment of infected wounds. Its instability has, however, until recently precluded its use for this purpose. Lloyd-Hamol of London and Zurich have now succeeded in producing

a cream, **BIOTRASE**, in which Trypsin remains physiologically active for over a year. A certificate of stability has been issued by a Department of Bio-chemistry.

**BIOTRASE** also contains two new anti-septic agents, both of which are active against a wide range of gram-positive and gram-negative pathogenic organisms. Unlike sulpha drugs and antibiotics they do not cause skin sensitivity.

**BIOTRASE** debrides necrotic tissue and purulent matter and leaves a clean granulating surface. It does not attack vital tissues.

### **INDICATIONS FOR USE**

**BIOTRASE** may be used wherever there is an infected—or potentially infected—breach of surface of the skin. Common conditions for its use include the following: wounds; second and third degree burns; infected and necrotic skin conditions, including pyodermias; boils and carbuncles (following incision); all types of skin ulcers. **BIOTRASE** has been found most useful in the treatment of varicose ulcers, providing these are not surrounded with avascular tissue and of long duration.

# Biotrase

To this question, ACHROMYCIN tetracycline has undoubtedly provided the conclusive answer—for here, indeed, is the *self-sufficient* antibiotic. No other antibiotic has a broader antimicrobial spectrum. No other antibiotic—or combination of antibiotics—offers a wider measure of effective control. E. Barrington-Spencer M.D., M.R.C.P.	-	Consultant in general medicine with a special interest in the thyroid.
Michael Watsen M.B., Ch.B.	-	General Practitioner
Mrs. Angela Trimble	-	A patient aged 34

The scene is set in the sitting room  
of the patient's house during  
a domiciliary visit.

(Although this conversation is based on a real  
case, the characters portrayed are fictitious.  
Any resemblance to persons whether living or  
dead is purely coincidental).

Mrs. TRIMBLE'S SITTING ROOM.  
THE BEDROOM DOOR IS OPEN.

"Well, Mrs. Trimble, Dr. Watsen  
and I will go and have a chat.  
We'll tell you when we are  
ready."

DR. BARRINGTON-SPENCER ENTERS,  
CLOSELY FOLLOWED BY DR. WATSEN.  
THE DOOR CLOSSES.

Dr. W. "Hope you don't think I've  
wasted your time, Ted, bringing  
you out on a domiciliary."

Dr. B-S: "Not at all, Michael.  
Good case - but I don't think  
she's thyrotoxic."

Dr. W: "Then what about her eyes?"

Dr. B-S: "I agree they're exophthalmic  
and she's got lid-lag, but I  
think that's due to her myopia.  
Short-sighted people do  
sometimes have pop eyes."

Dr. W: "Then the tachycardia,  
jumpiness, exaggerated  
reflexes, and so on, would be  
due to anxiety?"

Dr. B-S: "Yes, I think so. She's had a  
tough time lately, losing the  
baby and then the haemorrhage.  
It's pretty well flattened her  
and has precipitated this  
acute anxiety."

Dr. W: "What do you suggest we do?"

Dr. B-S: "Well, I think we've got to do  
the routine investigations -  
chest X-Ray, haematology.  
Meantime, she needs sedating  
but not too heavily."

Dr. W: "Phenobarb, eh?"

Dr. B-S: "No. She's depressed enough  
already. I'd try her on this  
new, long-acting derivative of  
Oblivon. It's safe and if it  
works it will confirm the  
diagnosis."

# Facts his doctor wasn't told...

Retired for the last three years, the patient complains that he's unable to keep pace with his gentle present-day routine. 'Says he's always tired . . . can't understand it as he's always been so active for his age. He doesn't say however that since his wife died, he's lost interest in his food . . . his attention to diet has been lacking and regular meals have been replaced by casual snacks.

GEVRAL Geriatric Vitamin—Mineral Supplement was evolved to enable doctors to treat just such patients—to provide a balanced ration of essential nutrients in the simplest form. The usual dosage is one capsule daily—and the GEVRAL formula is so comprehensive that this routine provides effective all-round supplementation. Indeed, for many elderly patients the result is a gratifying return of general well-being—and the rediscovery that life is worth living!

## Availability of Vitamins in Yeast

Deficiencies of single factors of the Vitamin B Group do not occur. Accordingly, even if a deficiency condition appears to result from the lack of an individual factor of the group and it is considered necessary to give intensive treatment with this factor, the entire Vitamin B Complex should always be administered concurrently.

It is, however, extremely important, in view of suggestions in recent publications, that the vehicle selected as a source of the entire B Complex does not withhold its vitamin content from the patient.

Human experiments show that the rich, natural vitamin potency of Aluzyme is totally available to the human system.

- Aluzyme is not advertised to the public and may be prescribed on Form E.C.10

The original easy-to-take,  
two-in-one tablet

for the prompt and prolonged  
relief of **ASTHMA**

ISO-BRONCHISAN was first produced in 1953 and offers a fresh approach to the problem of effective asthma control. The tablets, which are pleasant to take, have a coating containing easily dissolved Isopropyl-Nor-Adrenaline, a most potent bronchodilator, which, when absorbed by the sublingual route, produces the prompt relief of bronchospasm. The rest of the tablet, when swallowed, releases Ephedrine and Theophylline in balanced proportions and these, slowly absorbed along the alimentary tract, ensure long sustained antispasmodic action on the bronchial smooth muscle.

**ISO-BRONCHISAN**

Prescribable on Form E.C.10.

IMMEDIATE RELIEF

PROLONGED ACTION

Each tablet contains Isopropyl-Nor-Adrenaline (Isoprenaline) sulphate gr.  $\frac{1}{4}$ ; Ephedrine hydrochlor. gr.  $\frac{2}{5}$ ; Theophylline gr. 2. In tubes of 20 tablets and bottles of 100 tablets. Tablets containing smaller quantities of the effective ingredients are now available for use in Paediatrics.

## SUCCESSFUL TREATMENT OF VARICOSE ULCERS

In a clinical trial (*Medical Press*, 1951, 226, 483) on 103 cases of varicose ulceration, 100 either healed or improved by treatment with Viacutan Solution and tight supportive bandaging. More recently (*Brit. Med. J.*, 1957, i, 43) 61 cases of gravitational and ischaemic ulcers were treated with a new Viacutan Emulsion (1% Silver Dinaphthylmethane Disulphonate) applied under tight supportive bandaging with the following advantages:—  
There was no pain on application and on pressure bandaging; Dressings were applied only once daily and were removed without discomfort; The healing time was shortened. Once the ulcers have been dried up as a result of applying Viacutan Emulsion, dressings of Viacutan Cream, covered by the tight bandaging, may be used as an alternative.

*"Summer is ycumen in  
Loude sing Cuckoo!"*

(13th cent. song)

Like the medieval poet most of us welcome the approach of summer, but for many, the Cuckoo heralds a Hay Fever season and acute distress. Pabracort insufflations have proved their value in the control of Hay Fever both by clinical trial\* and in general practice. Dramatic relief is usually obtained within two or three days and complete alleviation after two weeks treatment. Each insufflation capsule contains 15 mg. hydrocortisone acetate in a specially prepared snuff base (micronized).
