The importance of effective vector control in Bancroftian filariasis

As in a number of tropical parasitic diseases, effective control of the transmission of Bancroftian filariasis is chiefly a problem of attack on the vector, and not directly on the causal organism—in this case, a threadlike nematode of the species *Wuchereria bancrofti*. This worm, introduced to the human bloodstream in the form of mature infective larva or microfilaria, develops to maturity in the connective tissues, blood vessels or lymphatic system of the victim.

DISTRIBUTION OF THE DISEASE

Bancroftian filariasis is widely but unevenly distributed in tropical areas, having been found in coastal areas of Africa, especially the Congo basin and the Cameroons, and in South America, coastal regions of India and in Melanesia.

Infection with this parasite frequently causes no signs or symptoms, but often grotesque elephantiasis or other lesions may develop leading to severe debility and incapacitation.

The microfilaria of the parasite is ingested by blood-sucking mosquitoes, particularly of the widespread culicine group, in which it undergoes metamorphosis. When fully developed it rests in the proboscis of the insect, finding its opportunity to infect man when the skin is pierced by mosquito bite.

In the world-wide attack on this disease, dieldrin, developed by Shell, is being used on an ever increasing scale as the most effective agent against the vectors—both as a larvicide on the breeding sites or as a residual spray against the adult mosquitoes which provide the essential link between microfilaria and man.

Keeping rigidly to a prescribed diet is generally more easily said than done since many obese patients, while anxious to lose weight, have not the will to resist the craving for food.

PRELUDIN removes the desire to overeat and enables the patient to co-operate effortlessly in any prescribed weight-reducing plan.

In cases of obesity coupled with cardiovascular disorders or hypertension Preludin is always the safe prescription since it affects neither the heart nor the blood pressure.

PRELUDIN is supplied in tablets of 25 mg. each, packed in tubes of 20 or bottles of 250.

Treatment by Compression

In certain cases where a curative course of injection cannot be given on account of systemic disease or the patient's timidity, the veins can be assisted in their normal function by the pressure of an Elastoplast Elastic adhesive bandage (Porous). It is essential to have firm compression, but the usual crepe bandage or elastic stocking does *not* afford sufficient support. The remarkable stretch and regain properties of Elastoplast ensure constant and correct compression.

Elastoplast Elastic adhesive bandages (Porous) are available in 3-yard lengths, 5 to 6 yards stretched, and 2", 2½", 3" and 4" widths. Prescribable on form E.C.10.

The limb should be covered with vertical strips of Elastoplast bandage, applied from a point just below the bend of the knee to the webs of the toes, enclosing the heel. The foot should be kept at a right-angle to the leg during bandaging, so that creases do not develop over the dorsum of the foot. The turns of bandage should overlap one another by at least half or even two-thirds of the width of the bandage to prevent ridging of the skin.

S P A R I N E

(PROMAZINE HYDROCHLORIDE)

the new phenothiazine derivative

Sparine has already brought decisive and dramatically effective relief to many hundreds of patients. It calms the troubled seas of the mind. Most of the published clinical reports are concerned primarily with its use in the management of psychiatric conditions. But evidence is accumulating rapidly in support of the many other indications for this drug in everyday medical practice.

Sparine not only controls psychomotor overactivity: it is also synergistic with analgesics, hypnotics and anaesthetics, and is a potent anti-emetic. Little wonder, therefore, that the predictions of the pharmacologists have been amply justified by the successes of Sparine treatment in such diverse conditions as terminal carcinoma and nausea of pregnancy. Full details of indications and dosage will be supplied on request.

PRO-BANTHINE* FOR ANTI-CHOLINERGIC ACTION

A Combined Neuro-Effector and Ganglion Inhibitor

Pro-Banthine consistently controls gastro-intestinal hypermotility and spasm and the attendant symptoms.*

Pro-Banthine is an improved anti-cholinergic compound. Its unique pharmacological properties are a decided advance in the control of the most common symptoms of smooth muscle spasm in all segments of the gastro-intestinal tract.

By controlling excess motility of the gastro-intestinal tract, Pro-Banthine has found wide use¹ in the treatment of peptic ulcer, functional

diarrhoeas, and regional enteritis and ulcerative colitis. It is also valuable in the treatment of pylorospasm and spasm of the sphincter of Oddi.

It was found² that Pro-Banthine orally was an "inhibitor of spontaneous and histamine-stimulated gastric secretion" which "resulted in marked and prolonged inhibition of the motility of the stomach, jejunum and colon . . ."

Therapy with Pro-Banthine is remarkably free from reactions associated with para-sympathetic inhibition. Dryness of the mouth and blurred vision are less severe with Pro-Banthine than with certain other potent anti-cholinergic agents.

In the above series², "Side effects were entirely absent in single doses of 30 or 40 mg. . ."

Pro-Banthine Bromide (2'-diisopropylamino-ethyl xanthene-9-carboxylate methobromide) brand of propantheline bromide, is available in sugar-coated tablets of 15 mg.

For the average patient one tablet of Pro-Banthine (15 mg.) with each meal and two tablets (30 mg.) at bedtime will be adequate. Full literature is available on request. G. D. Searle & Co. Ltd., High Wycombe, Bucks. Tel. High Wycombe 1770.

Aspirin *and* Ulcer

“**ASPIRIN** is a serious gastric irritant, particularly in peptic ulcer patients”.

“Calcium aspirin does not have this irritant action unless it has deteriorated through standing, and it can be used with impunity, especially if prescribed in soluble form. When a mother cannot feed her baby herself you will find that Humanised Trufood is the best available substitute for breast milk. The total protein content of Humanised Trufood, as well as the ratio of casein to soluble protein, approximates that in human milk. The only carbohydrate present is lactose, the quantity of

which is raised to the breast milk standard so that no further additions are necessary. The full fat content is present in a highly emulsified form.

There is not enough space to give full details here but a postcard to Trufood Limited, 113 Newington Causeway, London, S.E.1, will bring full information. The Trufood milks for infants are made at the Trufood Creameries at Wrenbury in Cheshire.

Pattern for Today

Today, the preference is for oral rather than parenteral treatment—provided it is as effective. Penicillin-V has precisely this advantage, giving clinical results consistently comparable with injectable penicillin. It achieves this end because, unlike penicillin-G, it is remarkably stable in gastric secretion. Penicillin-V gives higher blood levels than other oral penicillins and is more potent, dose for dose. When penicillin is indicated, let Penicillin-V Lilly be the choice.

Announcing 'Sulmezil'

A new formulation containing Penicillin V and 'Sulphamezathine'

A NEW FORM of 'Sulmezil' is now available—'Sulmezil' V. The 'V' indicates that it contains penicillin V, the acid stable form of penicillin which is rapidly and efficiently absorbed and gives consistent and reliable blood levels. This form of penicillin has proved to be markedly superior in these respects to other oral penicillin preparations.

Combined with penicillin V is 'Sulphamezathine', which has been widely accepted for many years on account of its high potency coupled with low toxicity. It is undoubtedly the best sulphonamide for routine use.

'Sulmezil' V tablets present these two drugs in a single easily-administered form. Each tablet contains 60 mg. of penicillin V (Calcium Salt) and 0.5 g. of 'Sulphamezathine'. In packs of 25, 100 and 500.

FOR GERIATRIC PATIENTS safe, comfortable, effective HERNIAL SUPPORT

Because each Spencer Support is designed in order to meet the patient's individual needs, results are demonstrably superior.

The patient shown on left, aged 74, developed a left ventral hernia following surgery fourteen years previously. A left inguinal hernia resulted from the long wearing of a cast following a hip injury 3 years ago. "Stock" supports proved ineffective. A Spencer Support as shown was prescribed with excellent results. Her Spencer gives safe, comfortable and effective control of the hernias—improves and maintains posture—protects and supports the weak muscles of old age. With the aid of her Spencer, the patient runs her household, does all her own work, and—as she says—still has time "to enjoy life."

Prescribe Spencer with confidence for men, women, children—for abdomen, back, breasts. No case is too difficult for Spencer Designers!

They like Lucozade..

and they can keep it down—

Lucozade has won its place in the sickroom because it is so very palatable. Patients enjoy it and, what is more, they can keep it down even when other food is refused, or vomited. It is difficult to assess the value of Lucozade simply in terms of the glucose it contains. It is the patient's response which is so interesting. Its acceptance so often coincides with a distinct and happy turn for the better, well illustrated in the following brief report :

"My little boy was ill . . . and was completely off his food. I must admit that I only thought of Lucozade at the last moment, after two days of worry, but he improved from the time of taking it."

In a letter from Mrs. V. Darlington, Birkdale, Lancs.

REFRESHER COURSE FOR GENERAL PRACTITIONERS

Second Collection and

*Third Collection with Classified Contents list to
volumes 1, 2 and 3*

Price 25s. each (by post—inland 26s. 6d., overseas 26s.)

Each book contains a collection of sixty Refresher Course articles from the *British Medical Journal*. Each article, written by an acknowledged expert, has been revised by its author. The articles cover a wide range. Their object is to refresh the reader's memory of what is old and well-established and to tell him about new developments.

They are invaluable to general practitioners and residents as practical reference books, to specialists as a means of keeping in touch with developments outside their own field, and to final-year students as up-to-date and reliable text-books.

The Third Collection has a cumulative classified contents list to the three volumes of "Refresher Course for General Practitioners."

APPOINTMENTS

Applicants should state name, address, age, nationality, qualifications, and enclose (unless otherwise specified) one copy each of 3 recent ★ testimonials with short statement of experience and appointments held.

Applications should be sent at once if no closing date is given.

Canvassing in any form will disqualify.

★ *SERVICE MEMBERS may have difficulty in supplying recent testimonials, but this should not deter them from applying.*

A fully registered medical practitioner who is liable for National Service must obtain deferment of recruitment in writing from the Central Medical Recruitment Committee or (in Scotland) the Scottish Central Medical Recruitment Committee before accepting any civilian appointment.

The position of provisionally registered medical practitioners who are liable for National Service has been made clear in a notice sent to them by the Ministry of Labour and National Service.

SALARY SCALES OF JUNIOR GRADES OF HOSPITAL MEDICAL STAFF

Registrar Grades, Whole-time

(a) **REGISTRAR**: Posts obtained normally not less than two years after registration as a medical practitioner and held normally for two years: £935 per annum in the first year; £1,061 10s. per annum in the second and any subsequent years. If the post is resident a deduction of £170 per annum is made.

(b) **SENIOR REGISTRAR**: Posts obtained normally not less than four years after registration as a medical practitioner and held normally for four years: £1,210 per annum in the first year; £1,320 per annum in the second year; £1,430 per annum in the third year; £1,540 per annum in any subsequent years. If the post is resident a deduction of £200 per annum is made.

Other Grades, Whole-time

(a) HOUSE OFFICERS:

(i) *Provisionally registered medical practitioners*: £467 10s. per annum for the first post held; £522 10s. per annum for the second and all subsequent posts held;

provided that the employing authority (subject in the case of a Hospital Management Committee to the consent of the Regional Hospital Board) shall have discretion to determine that the remuneration of any officer holding his first post in the National Health Service as a House Officer shall be £522 10s. per annum if they are satisfied that the officer has held at least one hospital post outside, of not less than six months' duration, involving clinical responsibilities equivalent to those of house posts in the National Health Service and supervised by appropriate specialist staff.

(ii) *Fully registered medical practitioners*: £577 10s. per annum for any post held; provided that in exceptional circumstances, subject to the consent of the Minister, this rate may be exceeded by up to £50 per annum where a post cannot be filled otherwise.

In each case under sub-sections (i) and (ii) above, a deduction of £125 per annum in respect of board and lodging and other services provided shall be made and each post shall be tenable for six months.

(b) **SENIOR HOUSE OFFICER**: Posts obtained normally not less than one year (in Scotland, two years) after registration as a medical practitioner and normally held for one year only: £819 10s. per annum. If the post is resident a deduction of £150 per annum is made.

(c) **JUNIOR HOSPITAL MEDICAL OFFICER**: Officers who have held house appointments but who are not Registrars and who have less responsibility than other hospital officers of non-consultant status: £852 10s. (for an officer appointed not less than one year after full registration as a medical practitioner) by £55 to £1,182 10s. per annum. If the post is resident a deduction of £170 per annum is made.

ALL NATIONAL HEALTH SERVICE HOSPITAL APPOINTMENTS ARE IN ACCORDANCE WITH THE TERMS AND CONDITIONS OF SERVICE OF HOSPITAL MEDICAL STAFF

Any advertisements appearing in this issue for posts in grades up to and including senior registrar which quote the rates of salary which obtained before April 1, 1957, are published on the assumption that the employing authorities will make the necessary adjustments.

Registered Mental Hospital

President:

The Right Hon. The Earl of Derby, M.C.

Medical Superintendent:

W. V. Wadsworth, B.Sc., M.B., M.R.C.P., D.P.M.

This hospital receives all types of patients who are suffering from psychological and senile illnesses. It has recently been extensively redecorated and central heating has been installed throughout, making it one of the most luxuriously appointed hospitals in the country. Private rooms, with special nurses, can be provided.

All patients receive very careful and thorough clinical and pathological investigation, the most modern psychiatric treatment is available, including deep insulin therapy. Psychotherapeutic treatment is employed in suitable cases.

OCCUPATIONAL THERAPY is a special feature of the hospital and there are excellent facilities for indoor and outdoor recreation—tennis, cricket, croquet, badminton, billiards, cinema, television, etc.

GERIATRIC UNITS for mild cases of senility are provided where patients can pursue as normal a life as possible.

The hospital is situated in 300 acres of pleasant Cheshire parkland, and yet is only 9 miles from Manchester.

GLAN-Y-DON is the hospital's convalescent home overlooking the sea at Colwyn Bay. It is extremely comfortable and well appointed and has its own farm and market garden.

For terms and further particulars, apply to the Medical Superintendent. Telephone: GATLEY 2231.

ST. ANDREW'S HOSPITAL, NORTHAMPTON
for Nervous and Mental Disorders

President: The Earl Spencer. Medical Supt.,

Thomas Tennent, M.D., F.R.C.P., D.P.H., D.P.M.

This Registered Hospital is situated in 130 acres of park and pleasure grounds. Voluntary patients who are suffering from incipient mental disorders or who wish to prevent recurrent attacks of mental trouble, temporary patients and certified patients of both sexes are received for treatment. Careful clinical, biochemical, bacteriological and pathological examinations. Private rooms with special nurses, male or female, in Hospital or in one of the numerous villas in grounds of the various branches can be provided.

MOULTON PARK.—Two miles from the main Hospital there are several branch establishments and villas situated in a park and farm of 650 acres. Milk, meat, fruit and vegetables are supplied to the Hospital from the farm, gardens, and orchards of Moulton Park. Occupational therapy is a feature of this branch and patients are given every facility for occupying themselves in farming, gardening and fruit-growing.

WANTAGE HOUSE.—This is a Reception Hospital in detached grounds with a separate entrance to which patients can be admitted. It is equipped with all the apparatus for the complete investigation and treatment of Mental and Nervous Disorders by the most modern methods; insulin treatment is available for suitable cases. It contains special departments for hydrotherapy by various methods, including Turkish and Russian baths, the prolonged immersion bath, Plombière's treatment, etc. There is an Operating Theatre, a Dental Surgery, an X-ray Room, an Ultra-Violet Apparatus, and a department for Diathermy and High-frequency treatment. It also contains Laboratories for biochemical, bacteriological and pathological research. Psychotherapeutic treatment is employed when indicated.

BRYN-Y-NEUADD HALL.—The seaside house of St. Andrew's Hospital is beautifully situated in a Park of 330 acres at Llanfairfechan amidst the finest scenery in North Wales. On the North-West side of the Estate, a mile of sea-coast forms the boundary. Patients may visit this branch for a short seaside change or for longer periods. The hospital has its own private bathing house on the seashore. There is trout-fishing in the park.

At all the branches of the Hospital there are cricket grounds, football and hockey grounds, lawn tennis courts (grass and hard courts), croquet grounds, golf courses and bowling greens. Ladies and gentlemen have their own gardens, and facilities are provided for handicrafts such as carpentry, etc.

For terms and further particulars apply to the Medical Superintendent (Telephone No.: Northampton 5354 (3 lines)), who can be seen in London by appointment.

In Hypertension

RAUWILOID

Reduce the pressure gradually and safely . . .

Of *proved* value in the treatment of mild to moderate hypertension, 'Rauwiloid' is a purified and standardized fraction of *Rauwolfia serpentina* in tablet form. It lowers elevated blood pressure *gradually*, slows the pulse rate, and so reduces cardiac effort. A calm, tranquil sense of well-being is induced, without drowsiness, and with little impairment of alertness. Dosage is not critical, and there are no important side-effects or contra-indications. Mental depression is unlikely to be encountered when 'Rauwiloid' is used in the recommended dosage. It is the medicament of choice for hypertension in its early stages, in order to arrest progression.

'Rauwiloid' contains 2 mg. of the active hypotensive alkaloids of *Rauwolfia serpentina* per tablet, undesirable constituents of the crude root being excluded by the extraction process.

Dosage is simple—two tablets taken at bedtime.

Full literature on request.

'Rauwiloid' is a registered trade-mark.
