

A la carte!

Very enjoyable, foreign travel. But you need to know the ropes. Otherwise you're likely to find yourself à la carte (which is fractured French for 'in the cart'). Fortunately for travellers, we know the ropes, at least so far as they concern money matters and exchange regulations. And we've put a lot of helpful information on these subjects into a booklet called 'The Joys of Travel'. There's a copy waiting for you at any branch of...

In conditions where excess fluid accumulates in body tissues, prompt dispersal measures are called for. In such cases, by inhibiting carbonic anhydrase, DIAMOX acetazolamide produces prompt copious diuresis. It has proved its ability to control body-fluid balance in cardiac oedema, glaucoma and epilepsy. Published reports also show satisfactory results from DIAMOX in toxæmia and oedema of pregnancy, premenstrual tension, renal oedema, emphysema and drug-induced oedema. DIAMOX is a welcome departure from the mercurials and is well suited to long-term maintenance of ambulant and out-patient cases.

TETRACYCLINE BUFFERED WITH SODIUM METAPHOSPHATE

Absorption is faster . . . blood levels

ACHROMYCIN V is Lederle's latest contribution to medical science. It results from intensive research on methods of increasing the therapeutic potency of ACHROMYCIN tetracycline—already recognised as today's foremost self-sufficient broad-spectrum antibiotic. ACHROMYCIN V consists of ACHROMYCIN tetracycline buffered with sodium metaphosphate—believed to have the ability of binding certain metal ions present in the intestinal tract, which, when free, combine with some of the tetracycline and prevent its absorption. ACHROMYCIN V is now available to doctors who want the maximum benefits

from oral therapy with ACHROMYCIN. Initial clinical investigations show that ACHROMYCIN V possesses all the acknowledged clinical virtues of ACHROMYCIN tetracycline plus the following advantages:

It is more rapidly absorbed from the intestinal tract

It provides higher blood levels of tetracycline more rapidly

The high tetracycline levels attained with ACHROMYCIN V are noticeable even within the first hour or two after administration.

Spreading smooth and even...

A little Ef-Cortelan Skin Lotion goes a long way. Just one drop will spread smoothly and evenly to cover an extensive area. It does not stick, sting or stain—brings only swift, soothing relief in inflammatory, exudative and allergic skin disorders.

Why the spreading power of Ef-Cortelan Skin Lotion is so important.

- More intimate contact with the tissues makes the $\frac{1}{2}$ % lotion as effective as a 1% ointment
- It spreads *smoothly* without a hint of friction
- It is economical in use

have pronounced advantages over either medicament alone.

The established germicidal, stimulating and anti-pruritic properties of tar, in the treatment of sub-acute and refractory skin affections, can now be considerably enhanced by its incorporation with hydrocortisone.

Clinical trials have shown that the two medicaments together exert a powerful synergistic action that is far more rapid, more pronounced and complete than the action of either alone. These two valuable therapeutic agents are presented in a non-greasy, stainless, hydrophilic cream, known as TARCORTIN.

HERBERT M. KATZIN, MD, FACS

Director, Eye Bank Laboratory
Associate Surgeon, Manhattan Eye and Throat Hospital

Illustrations form the most important part of this new atlas, which provides a sound grounding in operating technique for graduate students of ophthalmology and for the surgeon who occasionally performs eye operations. All practising ophthalmologists will find it a clear, quick reference book.

The 464 extraordinarily fine line drawings of surgical procedures show, step by step, the operating methods for: operations for cataract, glaucoma, retinal detachment, corneal transplantation, enucleation, eversion, operations on the extra-ocular muscles, operations for pterygium. A whole chapter is devoted to anaesthesia for ocular surgery. All recent advances which concern the surgical treatment of the eye are covered. The text is brief and only summarizes information which cannot be illustrated but is extremely clearly written.

POLYBACTRIN

antibiotic powder spray

INVALUABLE IN ALL BRANCHES OF SURGERY

Polybactrin provides a unique and economical means of applying a combination of Zinc Bacitracin, Neomycin Sulphate and Polymyxin 'B' Sulphate—the three antibiotics of choice for topical use. The antibiotics are presented in an ultra-fine powder form dispersed under pressure with a propellant, and unlike other means of powder insufflation in common use, there is no risk of contamination of the antibiotics by airborne pathogens obtaining entry into the unit by suction.

A FRACTIONAL RELEASE GIVES COMPLETE DISPERSAL OF POWDER OVER THE WOUND

1. The *Polybactrin* unit offers a new technique for topical application of antibiotic therapy, enabling an efficient, economical and dry coverage of the wound area to be made.
2. The extensive range of bactericidal activity afforded by the triad of bacitracin, neomycin and polymyxin gives an extremely wide coverage of wound pathogens without the risk of inducing resistant strains of organisms.
3. *Ps. pyocyanus*, particularly present in burns, is completely inhibited by polymyxin, considerably reducing the healing time.
4. *Polybactrin* is not readily absorbed and there is no risk of systemic toxicity occurring.
5. The propellant gas is non-toxic and does not support combustion.
6. There are no contra-indications to the use of *Polybactrin*. Systemic therapy may be given concurrently if necessary.

FORMULA: Each pack contains: Neomycin Sulphate 750 mg. Polymyxin 'B' Sulphate 150,000 units. Zinc Bacitracin 37,500 units. Propellant 83.5 g. Contents 85 g. (approx).

Two Outstanding Works on Surgery

OPERATIVE SURGERY

Under the General Editorship of CHARLES ROB, M.C., M.Chir., F.R.C.S., and RODNEY SMITH, M.S., F.R.C.S. In Eight Volumes and Index Volume. £5 10s. net per volume. Index, 40s. Carriage and packing extra.

"In these superb volumes, which are but the advance-guard of a monumental series, the emphasis is purposely laid on the illustrations, which are very numerous. The descriptive part is just sufficient to give a connected account of the operative procedures. When complete this will be the most elaborate and ambitious work of its kind ever published in Great Britain. In a short review there is no space for a detailed survey of all the contributions. Suffice it to say that the illustrations, which come from many artists, reach a high standard, and the whole production provides a welcome testimony to the authoritative place which British surgery has attained. We look forward to the succeeding volumes with great expectations." *British Medical Journal*.

THE PRINCIPLES AND ART OF PLASTIC SURGERY

By SIR HAROLD GILLIES, C.B.E., F.R.C.S., and RALPH MILLARD, Jr., M.D. In two volumes. Pp. 690+Index. 2,472 illustrations, 122 in colour. £12 10s. net per set. Carriage and packing 4s. extra.

This fascinating and unusual work is the outcome of a lifetime's experience in the practice of plastic surgery. Hundreds of cases are reviewed in detail, procedures are described in all their variety and innumerable controversial points are debated. These volumes cover the development of plastic surgery during this century, when the greatest advances have been made and the largest number of patients restored, and their value to plastic surgeons cannot be over-estimated.

Anxiety, apprehension or depression may cause or complicate a multitude of ills. An encouraging smile or a verbal pat on the back may help some patients to dismiss a baseless worry. But the chronic worrier needs more than encouragement if the troubles that shadow her life are to be met resolutely.

'Drinamyl' produces the peace of mind that such patients so desperately need. Smoothly and unobtrusively emotional tension is eased: harassment and anxiety give place to calm composure. The patient's competence to cope with problems is restored, and the response to treatment is improved.

DETERGENTS AND THE SKIN

"We have found . . . that the incidence of skin trouble attributable to synthetic detergents is no higher than that previously due to the use of soap products, alkalis and allied preparations"

REPORT OF THE GOVERNMENT COMMITTEE ON SYNTHETIC DETERGENTS, 1956

THE VITAL ROLE OF DETERGENTS TO-DAY

SINCE THEIR introduction six years ago the new washing products, now generally known as "detergents," have revolutionised British household washing. This is because they give superior performance in hard water, leave clothes and dishes demonstrably cleaner, and leave no dulling film as soaps usually do.

Women have been quick to appreciate these advantages. Thus, while the first weekly wash detergent (Tide) only achieved national distribution in September 1952, detergents as a whole now account for more than half of the total washing powder market. They are in constant and regular use in practically every home in this country, and there is no evidence that they have yet reached the peak of their popularity.

Their effect on the skin

Thomas Hedley & Co. Limited, makers of Tide and other detergents, constantly test their washing products to determine their effect on the skin of housewives. In addition to every kind of accepted laboratory technique, such as patch and immersion tests, Hedley have conducted, under careful medical supervision, prolonged home usage tests. These were developed to obtain a reliable measure of the mildness of washing products under normal usage conditions in the home. Observations on over 12,000 housewives have shown that household detergents as a class do not differ in their effect on the skin from all-purpose soap powders, as a group, which have been used for years.

Specifically, research has shown that Tide, the most popular of the new detergents, is as mild as other conventional general-purpose soap powders.

Moreover, the results of the Hedley investigations disclosed that a washing product plays a much smaller part in determining the skin condition of the average housewife than does, for example, the coldness of the weather and the extent to which she uses hand cream.

The conclusions from these tests are fully in line with the Report of the Government Committee on Synthetic Detergents, 1956, which stated "We have found . . . that the incidence of skin trouble attributable to synthetic detergents is no higher than that previously due to the use of soap products, alkalis and allied preparations."

"A STUDY OF THE EFFECT OF THE NEW DETERGENTS ON THE SKIN"

This is the title of a booklet which describes a comprehensive research programme carried out under medical supervision to determine the effect of detergents on the skin. If you would like a copy, please send your request on a postcard with your name and address, to Thomas Hedley & Co. Limited, Dept. B.M., Gosforth, Newcastle upon Tyne 3.

OPERATION SAFETY

Give the lever a nudge with the elbow and out comes a comfortably warm spray, neither too hot nor too cold. It stays warm because you are using a Leonard Thermostatic Mixing Valve — the valve that *automatically* mixes hot and cold water and holds the temperature steady. The thermostat in the Leonard valve levels off all the ups and downs and gives a flow of warm water as smooth, as steady, as even as the tide over a weir.

Leonard Thermostatic Hot and Cold Water Mixing Valves are used in nearly all hospitals, and are specified more and more every day. They save water, save heat, save risk. Sales and service everywhere.

NO ESCAPE?

Upon many of its victims, hay-fever imposes an almost intolerable burden . . . a life sentence of disrupted summers. To such patients, 'Actidil' can mean the rediscovery of summer's pleasures. Most potent of all antihistamines, 'Actidil' is remarkably quick to take effect. Indeed, the interval between administration and onset of relief has been reduced to a matter of minutes. Yet these exceptional benefits are available to patients of all ages, for 'Actidil' has a particularly wide safety margin and little tendency to evoke the drowsiness and other side-effects so often associated with antihistamine action.

Dear Doctor,

re Prescriptions on Form E.C.10.

During the last few weeks we have received several orders from chemists calling for a supply of "Ionex-tabs" to meet prescriptions. "Ionex-tabs" is a generic term for our range of sustained action tablets which are based on the principle of ionic exchange. The products included in this range are as follows:

'ASMAPAX' tablets for 10-12 hours prophylaxis in bronchial asthma (ephedrine resinate complex)

'DEXTEN' tablets for day-long appetite suppression and relief of depression (dexamphetamine resinate)

'BARBIDEX' tablets for day-long relief of anxiety and depression plus day-long appetite control (dexamphetamine resinate with phenobarbitone)

We were naturally unable to execute these orders because we did not know which of these products was required. As a result the prescriptions had to be referred back to the doctor and several days delay ensued.

May we respectfully request you, when prescribing our sustained action tablets, to specify ASMAPAX, DEXTEN or BARBIDEX, as the case may be, omitting reference to the generic term.

We shall be pleased to send you clinical samples and literature together with case reports of any one or all of these products on request.

Thanking you for your co-operation.

Yours truly,

S.P. Rety

"This extraordinary drug"

In Prolapsed Intervertebral Disc

Two recent reports praise the high value of BUTAZOLIDIN in the treatment of disc lesions.

One author, reporting a "90% success rate" in over 50 cases and "dramatic relief in the first 36 to 40 hours," expressed his belief that it performs a "medical manipulation." (1)

The second author stated that "in all the patients (25) the relief from pain was rapid and the condition was usually cured by the end of the 6-week period." (2)

The original easy-to-take,
two-in-one tablet

for the prompt and prolonged
relief of **ASTHMA**

ISO-BRONCHISAN was first produced in 1953 and offers a fresh approach to the problem of effective asthma control. The tablets, which are pleasant to take, have a coating containing easily dissolved Isopropyl-Nor-Adrenaline, a most potent bronchodilator, which, when absorbed by the sublingual route, produces the prompt relief of bronchospasm. The rest of the tablet, when swallowed, releases Ephedrine and Theophylline in balanced proportions and these, slowly absorbed along the alimentary tract, ensure long sustained antispasmodic action on the bronchial smooth muscle.

ISO-BRONCHISAN

Prescribable on Form E.C.10.

IMMEDIATE RELIEF

PROLONGED ACTION

Each tablet contains Isopropyl-Nor-Adrenaline (Isoprenaline) sulphate gr. 1; Ephedrine hydrochlor. gr. 2/5; Theophylline gr. 2. In tubes of 20 tablets and bottles of 100 tablets. Tablets containing smaller quantities of the effective ingredients are now available for use in Paediatrics.

Samples and literature available on request.

THERE was once a passenger who said to a Qantas steward, 'and get this clear, *I can't stand being fussed over*'. And 24 hours later he spoke again and said coldly 'I didn't ring for you'. 'No sir,' said the steward. 'Then why are you standing there, pointing a loaded tray at my head?' 'Well sir, at exactly sundown yesterday you chose this brand of whisky and a small soda. And I thought that, as the sun has just set again . . . ' 'Nonsense' said the passenger 'use your eyes man! Sun *hasn't* set'. 'Not at this height, sir' said the steward gently, 'but at zero feet, sir, immediately below us, the sun set the best part of a minute ago'. The passenger looked down through the window. Too true, the earth was already in shadow. 'Well, well' he said with honest enthusiasm 'well, well, well!' 'Shall I leave you to pour the soda, sir?' said the steward. 'Thanks' said the passenger 'Do. And—oh, steward!' 'Sir?' 'You win.' Qantas stewards *never* fuss. But they spoil our passengers—outrageously!

APPOINTMENTS

Applicants should state name, address, age, nationality, qualifications, and enclose (unless otherwise specified) one copy each of 3 recent ★ testimonials with short statement of experience and appointments held.

Applications should be sent at once if no closing date is given.

Canvassing in any form will disqualify.

★SERVICE MEMBERS may have difficulty in supplying recent testimonials, but this should not deter them from applying.

A fully registered medical practitioner who is liable for National Service must obtain deferment of recruitment in writing from the Central Medical Recruitment Committee or (in Scotland) the Scottish Central Medical Recruitment Committee before accepting any civilian appointment.

The position of provisionally registered medical practitioners who are liable for National Service has been made clear in a notice sent to them by the Ministry of Labour and National Service.

SALARY SCALES OF JUNIOR GRADES OF HOSPITAL MEDICAL STAFF

Registrar Grades, Whole-time

(a) **REGISTRAR**: Posts obtained normally not less than two years after registration as a medical practitioner and held normally for two years: £935 per annum in the first year; £1,061 10s. per annum in the second and any subsequent years. If the post is resident a deduction of £170 per annum is made.

(b) **SENIOR REGISTRAR**: Posts obtained normally not less than four years after registration as a medical practitioner and held normally for four years: £1,210 per annum in the first year; £1,320 per annum in the second year; £1,430 per annum in the third year; £1,540 per annum in any subsequent years. If the post is resident a deduction of £200 per annum is made.

Other Grades, Whole-time

(a) HOUSE OFFICERS:

(i) *Provisionally registered medical practitioners*: £467 10s. per annum for the first post held; £522 10s. per annum for the second and all subsequent posts held;

provided that the employing authority (subject in the case of a Hospital Management Committee to the consent of the Regional Hospital Board) shall have discretion to determine that the remuneration of any officer holding his first post in the National Health Service as a House Officer shall be £522 10s. per annum if they are satisfied that the officer has held at least one hospital post outside, of not less than six months' duration, involving clinical responsibilities equivalent to those of house posts in the National Health Service and supervised by appropriate specialist staff.

(ii) *Fully registered medical practitioners*: £577 10s. per annum for any post held; provided that in exceptional circumstances, subject to the consent of the Minister, this rate may be exceeded by up to £50 per annum where a post cannot be filled otherwise.

In each case under sub-sections (i) and (ii) above, a deduction of £125 per annum in respect of board and lodging and other services provided shall be made and each post shall be tenable for six months.

(b) **SENIOR HOUSE OFFICER**: Posts obtained normally not less than one year (in Scotland, two years) after registration as a medical practitioner and normally held for one year only: £819 10s. per annum. If the post is resident a deduction of £150 per annum is made.

(c) **JUNIOR HOSPITAL MEDICAL OFFICER**: Officers who have held house appointments but who are not Registrars and who have less responsibility than other hospital officers of non-consultant status: £852 10s. (for an officer appointed not less than one year after full registration as a medical practitioner) by £55 to £1,182 10s. per annum. If the post is resident a deduction of £170 per annum is made.

ALL NATIONAL HEALTH SERVICE HOSPITAL APPOINTMENTS ARE IN ACCORDANCE WITH THE TERMS AND CONDITIONS OF SERVICE OF HOSPITAL MEDICAL STAFF

Any advertisements appearing in this issue for posts in the hospital service which quote the rates of salary which obtained before the recent percentage increases are published on the assumption that the employing authorities will make the necessary adjustments.
