

The "light diet" patient needs protein

KEEPING AN INVALID ON A LIGHT DIET may be no light matter to a busy housewife. Sick people tire quickly of milk foods—and in many cases there is a physical reaction against them.

Brand's Essence is a boon in sickness. It provides a useful protein supplement to the diet, in an ideal form for invalids: a fat-free, appetizing jelly that even the weakest system can rapidly absorb. Ready to serve in various ways, it is delicious just eaten with a spoon, spread on bread and butter, warmed up as a liquid, or mixed with milk.

Brand's Essence doesn't cloy—sick people often enjoy it when they can't take anything else. And it revives appetite amazingly.

The addition of Brand's Essence to low residue and weight-reducing diets is especially appreciated by the patient.

ACHROM

TETRACYCLINE BUFFERED WITH SODIUM METAPHOSPHATE

Absorption is faster . . . blood

ACHROMYCIN V is Lederle's latest contribution to medical science. It results from intensive research on methods of increasing the therapeutic potency of ACHROMYCIN tetracycline—already recognised as today's foremost self-sufficient broad-spectrum antibiotic. ACHROMYCIN V consists of ACHROMYCIN tetracycline buffered with sodium metaphosphate—believed to have the ability of binding certain metal ions present in the intestinal tract, which, when free, combine with some of the tetracycline and prevent its absorption. ACHROMYCIN V is now available

to doctors who want the maximum benefits from oral therapy with ACHROMYCIN.

Initial clinical investigations show that ACHROMYCIN V possesses all the acknowledged clinical virtues of ACHROMYCIN tetracycline plus the following advantages:

It is more rapidly absorbed from the intestinal tract;

It provides higher blood levels of tetracycline more rapidly;

The high tetracycline levels attained with ACHROMYCIN V are noticeable even within the first hour or two after administration.

Armamentarium against tuberculosis

Wherever P.A.S. is indicated **THERAPAS** (calcium 4-benzamido-salicylate) may be used. It is better tolerated by the patient and has a slightly sweet, not unpleasant taste. **THERAPAS** is as effective as P.A.S. in delaying the emergence of streptomycin resistance. Its value in the treatment of genito-urinary tuberculosis is well established.

THERAZID is a convenient combination of 'Therapas' and 'Pycazide'. For domiciliary treatment in particular **THERAZID** is the drug of choice. Patients complaining of gastro-intestinal upset and monotony of dosage of P.A.S. and isoniazid therapy will be happier and more co-operative on **THERAZID**. Available as powder or cachets.

PYCAZIDE is the Smith & Nephew name for isoniazid. **PYCAZIDE** syrup (blackcurrant flavoured) is available to permit greater flexibility of dosage than is possible with **PYCAZIDE** tablets, and is particularly suitable in the treatment of children. One tea-spoonful is approximately equivalent to 20 mg. of isoniazid.

P.A.S. and isoniazid are combined in **PYCAMISAN** cachets in five different strengths enabling "made to measure" dosage to be prescribed with the least waste of time and effort. **PYCAMISAN** cachets are practically tasteless and easy to swallow and their use offers distinct advantages in domiciliary treatment of tuberculosis.

'**PARAMISAN SODIUM**' is the sodium salt of P.A.S. (sodium aminosalicylate B.P.). It is recommended in the combined chemotherapy of all the forms of tuberculosis. It is rapidly absorbed, rapidly excreted, and of low toxicity.

The cachet form of '**PARAMISAN SODIUM**' ('**PASHETS**') makes oral dosage possible without any unpleasant taste in the mouth. Twelve cachets provide a day's requirements of the drug.

'**PARAMISAN SODIUM**' is also available in tablet form and in ampoules for local injection.

As an alternative to isoniazid **NUPASAL-213** (o-hydroxybenzal isonicotinyl hydrazone) may be used in cases which have already exhibited toxicity to isoniazid, for the toxicity of **NUPASAL-213** is virtually nil.

Dosages and presentations of any or all of these drugs will gladly be sent on request as space does not permit those details to be given in this advertisement.

with the proteolytic ferment

TRYPSIN

IT HAS LONG been known that the proteolytic enzyme Trypsin could resolve necrotic tissue and was in theory an ideal physiological agent for the treatment of infected wounds. Its instability has, however, until recently precluded its use for this purpose. Lloyd-Hamol of London and Zurich have now succeeded in producing

a cream, **BIOTRASE**, in which Trypsin remains physiologically active for over a year. A certificate of stability has been issued by a Department of Bio-chemistry.

BIOTRASE also contains two new antiseptic agents, both of which are active against a wide range of gram-positive and gram-negative pathogenic organisms. Unlike sulpha drugs and antibiotics they do not cause skin sensitivity.

BIOTRASE debrides necrotic tissue and purulent matter and leaves a clean granulating surface. It does not attack vital tissues.

INDICATIONS FOR USE

BIOTRASE may be used wherever there is an infected—or potentially infected—breach of surface of the skin. Common conditions for its use include the following: wounds; second and third degree burns; infected and necrotic skin conditions, including pyodermias; boils and carbuncles (following incision); all types of skin ulcers. **BIOTRASE** has been found most useful in the treatment of varicose ulcers, providing these are not surrounded with avascular tissue and of long duration.

Biotrase

BIOTRASE is available in 35 g. tubes at a basic N.H.S. price of 3/9d., and may be prescribed on Form E.C.10.

BIOTRASE contains:

Trypsin pur. 0.16%; *Ca-N-Hydroxymethyl-glutamate* 5.00%; *2,2'-thiobis-(4,6-dichlorophenol)* 0.50%; *Carbamide B.P.* 5.0% in polyethylene glycol.

A Question of Stability

For many people, the stresses and strains of everyday existence may have a profound effect on the carefully built edifices of their lives and it may take just that extra jog to bring their insecure little world tumbling about their ears.

You cannot possibly control the conditions which weaken the foundations of such patients' lives. But, by prescribing Equanil, you can provide them with a cement to rebuild a steady and more stable frame of mind out of a rubble of nebulous fears and fancies. Equanil restores repose—safely, effectively and reliably.

CARNATION MILK for Infant Feeding

The advantages of Homogenisation

1. Breast Milk

2. Carnation Milk diluted to
whole milk standard

3. Cows' Milk

The reduced reproductions of photo-micrographs above (originally magnified 560 times) show a direct comparison between the fat globule size and distribution in breast milk, Carnation Milk and cows' milk. It will be seen that the homogenisation process given Carnation Milk breaks down the large globules of ordinary cows' milk and distributes them evenly.

The fat globules of ordinary cows' milk average 5 microns. Carnation globules after homogenisation average 1 micron, and this reduction in size increases the total number of fat globules by a minimum of 125 times. As only the total surface area of the globules has been increased and not the mass, the attraction between fat and serum exceeds gravitational force and a permanent emulsion is formed. Butterfat, therefore, cannot separate out.

The advantages of homogenisation when prescribing Carnation Milk are:

- 1 Fat globule surface area available for enzymic action is increased as much as five times over that of ordinary milks.
- 2 Complete digestion of the butterfat is practically assured and the irritating effect of free fatty acids, so troublesome with ordinary milk, is eliminated.
- 3 Miscibility of the fat in Carnation Milk with
 - a Water during feed preparation and without subsequent fat separation.
 - b The contents of the upper digestive tract.
- 4 Reduction below full-cream value removes proportionately the important nutrients carried by butterfat. These are the vitamins A, E and K—the phospholipids and sterols of whole milk. Homogenisation renders a full-cream

milk superior for all infant feeding.

5 Feeding bottles are easily cleaned by even inexperienced mothers. The risk of bacteria entrapped in a fat film is eliminated.

6 The adaptability of Carnation because of homogenisation permits the use of one simple milk for ALL infant feeding, with the exception of specific intolerances to milk solids other than whey proteins.

Other attributes of Carnation Milk are:

- 1 Safety, because of sterilisation after the Carnation cans are sealed.
- 2 Hypo-allergenic properties.
- 3 Uniformity—due to standardisation of solids.
- 4 Prophylactic D₃.
- 5 Accuracy of measurement.

"The Feeding of Infants"—a book specially prepared for doctors—together with reprints of clinical investigations and Carnation feeding charts are available from: Medical Department, General Milk Products Limited, Bush House, Aldwych, London, W.C.2.

Burns and scalds

An advance in antisepsis

"We rely on the antibacterial properties of chlorhexidine as our first line of defence against infection"

Lancet (1957), i, 862.

For 14 months 'Hibitane' was used in a children's hospital for the prophylactic treatment of burns and scalds. The routine adopted was based on a preliminary cleansing with 1% 'Cetavlon', followed by 'Hibitane' "soaks".

The results were excellent.

Infection was rare (2% in 108 patients as compared with 11% in 92 cases over the previous 12 months). Superficial burns healed rapidly and deep burns developed a clean granulating surface which was eminently suitable for grafting.

These, the latest investigations that have been published, once again demonstrate the exceptional value of 'Hibitane' as a prophylactic agent in the antiseptic field.

MICTINE*

Effective,
Non-Mercurial
Oral Diuretic

STRUCTURE

"Mictine," brand of aminometradine, is 1-allyl-3-ethyl-6-aminotetrahydropyrimidinone. It avoids the undesirable side-effects associated with mercurial, xanthine or sulphonamide agents.

ACTION AND EFFECTIVENESS

"Mictine" is believed to act by inhibition of sodium ion absorption in the renal tubule. In therapeutic dosage it has not caused any effect on glomerular filtration rate, renal plasma flow, cardiac output, heart rate or blood pressure, nor any alteration in the blood or blood-forming tissues or in renal or hepatic function. In a group of unselected patients 70 per cent. may be expected to respond to "Mictine".

TOLERANCE

"Mictine" is not toxic at therapeutic dosages. On the other hand, side-effects do occur such as headache and gastro-intestinal symptoms. These are reduced to a minimum if an interrupted dosage scheme is adopted.

ADMINISTRATION

"Mictine" is indicated in the maintenance of an oedema-free state in any patient requiring diuretic therapy and the effecting of initial diuresis in all patients but those with severe congestive failure. For these purposes the dosage is one to four tablets daily in divided doses *during meals* on alternate

THE NEPHRON UNIT

days or on three successive days followed by four days without therapy. "Mictine" is not intended to produce initial diuresis in more severe congestive failure; however, "Mictine" may be given when other diuretics are contra-indicated, or if tolerance to them has developed.

Available in bottles of 25, 100 and 500 tablets each containing 200 mg. aminometradine.

Full literature is available to the medical profession on request. G. D. Searle & Co. Ltd., High Wycombe, Bucks. Tel. High Wycombe 1770.

'Eminently suitable for medicinal purposes'

'In view of these analytical and general evidences, this brandy may be described as particularly suitable for medicinal purposes'

See Lancet, July 22, 1899, p. 219

'The evidence both of analysis and taste indicates that the high standard of purity and quality has been maintained and that the brandy is eminently suitable for medicinal purposes'

The richest source of natural vitamin C

DELROSA ROSE HIP SYRUP is the ideal medium for the administration of Vitamin C. Babies tolerate it more readily than orange juice, and children of all ages enjoy its palatable flavour. Delrosa is made from rose-hips, the richest source of Natural Vitamin C. It contains nearly three times as much Vitamin C as blackcurrant syrup B.P.C. and three times as much as fresh orange juice.

We shall be pleased to send a full size bottle for clinical trial, on request.

for Sacro-iliac Strain a narrow belt alone is not enough . . .

That is why Spencer Designers incorporate an easily-adjustable pelvic binder (see inset below) *inside* each Spencer created for sacro-iliac strain.

A narrow belt alone will not provide adequate continuous immobilization of the sacro-iliac joints, because such a belt will *not* stay in place. With ordinary body movements, any narrow belt alone will ride up and dig in at the back, thus causing faulty posture that *increases* the disability. That is why every Spencer Sacro-iliac Support is a "belt within a support" designed to the necessary heights and lengths to bridge the lumbar curve and co-relate abdominal and back support. Thus improvement in posture—essential to relief in sacro-iliac strain—is attained and maintained.

Every Spencer—for abdomen, back, breasts—is individually designed, cut and made for each patient.

*"Summer is ycumen in
Loude sing Cuckoo!"*

(13th cent. song)

Like the medieval poet most of us welcome the approach of summer, but for many, the Cuckoo heralds a Hay Fever season and acute distress. Pabracort insufflations have proved their value in the control of Hay Fever both by clinical trial and in general practice. Dramatic relief is usually obtained within two or three days and complete alleviation after two weeks treatment. Each insufflation capsule contains 15 mg. hydrocortisone acetate in a specially prepared snuff base (micronized).

From milk to mixed diet

HOW HEINZ STRAINED FOODS HELP

Mothers of three or four-month-old babies often need your practical advice about how to start baby on a mixed diet.

When you suggest Heinz Strained Foods you can do so with complete confidence. The 19 different foods, introduced gradually from about three-months onwards, between them offer scope for a varied diet. They are cooked and strained under strictly controlled conditions, with the minimum loss of food values. And, of course, they are prepared much more hygienically than they would be in an ordinary kitchen.

For full details of the nutrient values of the 19 varieties of Heinz Strained Foods, write to Dept. T1, H. J. Heinz Co. Ltd., Harlesden, London N.W.10.

They build durability at Fort Dunlop

DUNLOP TUBELESS

The tyre chosen by the majority of British car manufacturers to give you more confident motoring.

with Science, Accuracy and Experience

More miles; extra toughness;
longer life and complete
reliability—that's what they

build into tyres at Fort Dunlop.

The scientists, the engineers and the men on the production line are all experts because tyre building is an expert's business, and they know more about tyre building at Fort Dunlop than anywhere else in the world.

Atoms for accuracy.

Atomic radiation operates this Beta Ray Gauge, which maintains a continuous check on rubber thickness and reveals the smallest deviation from specification. The thickness covering each layer of cord must be absolutely uniform and accurate within minute tolerances to produce true durability.

APPOINTMENTS

Applicants should state name, address, age, nationality, qualifications, and enclose (unless otherwise specified) one copy each of 3 recent ★ testimonials with short statement of experience and appointments held.

Applications should be sent at once if no closing date is given.

Canvassing in any form will disqualify.

★SERVICE MEMBERS may have difficulty in supplying recent testimonials, but this should not deter them from applying.

A fully registered medical practitioner who is liable for National Service must obtain deferment of recruitment in writing from the Central Medical Recruitment Committee or (in Scotland) the Scottish Central Medical Recruitment Committee before accepting any civilian appointment.

The position of provisionally registered medical practitioners who are liable for National Service has been made clear in a notice sent to them by the Ministry of Labour and National Service.

SALARY SCALES OF JUNIOR GRADES OF HOSPITAL MEDICAL STAFF

Registrar Grades, Whole-time

(a) **REGISTRAR**: Posts obtained normally not less than two years after registration as a medical practitioner and held normally for two years: £935 per annum in the first year; £1,061 10s. per annum in the second and any subsequent years. If the post is resident a deduction of £170 per annum is made.

(b) **SENIOR REGISTRAR**: Posts obtained normally not less than four years after registration as a medical practitioner and held normally for four years: £1,210 per annum in the first year; £1,320 per annum in the second year; £1,430 per annum in the third year; £1,540 per annum in any subsequent years. If the post is resident a deduction of £200 per annum is made.

Other Grades, Whole-time

(a) HOUSE OFFICERS:

(i) *Provisionally registered medical practitioners*: £467 10s. per annum for the first post held; £522 10s. per annum for the second and all subsequent posts held;

provided that the employing authority (subject in the case of a Hospital Management Committee to the consent of the Regional Hospital Board) shall have discretion to determine that the remuneration of any officer holding his first post in the National Health Service as a House Officer shall be £522 10s. per annum if they are satisfied that the officer has held at least one hospital post outside, of not less than six months' duration, involving clinical responsibilities equivalent to those of house posts in the National Health Service and supervised by appropriate specialist staff.

(ii) *Fully registered medical practitioners*: £577 10s. per annum for any post held; provided that in exceptional circumstances, subject to the consent of the Minister, this rate may be exceeded by up to £50 per annum where a post cannot be filled otherwise.

In each case under sub-sections (i) and (ii) above, a deduction of £125 per annum in respect of board and lodging and other services provided shall be made and each post shall be tenable for six months.

(b) **SENIOR HOUSE OFFICER**: Posts obtained normally not less than one year (in Scotland, two years) after registration as a medical practitioner and normally held for one year only: £819 10s. per annum. If the post is resident a deduction of £150 per annum is made.

(c) **JUNIOR HOSPITAL MEDICAL OFFICER**: Officers who have held house appointments but who are not Registrars and who have less responsibility than other hospital officers of non-consultant status: £852 10s. (for an officer appointed not less than one year after full registration as a medical practitioner) by £55 to £1,182 10s. per annum. If the post is resident a deduction of £170 per annum is made.

ALL NATIONAL HEALTH SERVICE HOSPITAL APPOINTMENTS ARE IN ACCORDANCE WITH THE TERMS AND CONDITIONS OF SERVICE OF HOSPITAL MEDICAL STAFF

Any advertisements appearing in this issue for posts in the hospital service which quote the rates of salary which obtained before the recent percentage increases are published on the assumption that the employing authorities will make the necessary adjustments.
