TETRACYCLINE BUFFERED WITH SODIUM METAPHOSPHATE

*Absorption is faster . . . blood level*

ACHROMYCIN V is Lederle's latest contribution to medical science. It results from intensive research on methods of increasing the therapeutic potency of ACHROMYCIN tetracycline—already recognised as today's foremost self-sufficient broad-spectrum antibiotic. ACHROMYCIN V consists of ACHROMYCIN tetracycline buffered with sodium metaphosphate—believed to have the ability of binding certain metal ions present in the intestinal tract, which, when free, combine with some of the tetracycline and prevent its absorption. ACHROMYCIN V is now available to doctors who want the maximum benefits

from oral therapy with ACHROMYCIN. Initial clinical investigations show that ACHROMYCIN V possesses all the acknowledged clinical virtues of ACHROMYCIN tetracycline plus the following advantages:

It is more rapidly absorbed from the intestinal tract

It provides higher blood levels of tetracycline more rapidly

The high tetracycline levels attained with ACHROMYCIN V are noticeable even within the first hour or two after administration.

# POLYBACTRIN

## antibiotic powder spray

### INVALUABLE IN ALL BRANCHES OF SURGERY

*Polybactrin* provides a unique and economical means of applying a combination of Zinc Bacitracin, Neomycin Sulphate and Polymyxin 'B' Sulphate—the three antibiotics of choice for topical use. The antibiotics are presented in an ultra-fine powder form dispersed under pressure with a propellant, and unlike other means of powder insufflation in common use, there is no risk of contamination of the antibiotics by airborne pathogens obtaining entry into the unit by suction.

### A FRACTIONAL RELEASE GIVES COMPLETE DISPERSAL OF POWDER OVER THE WOUND

1. The *Polybactrin* unit offers a new technique for topical application of antibiotic therapy, enabling an efficient, economical and dry coverage of the wound area to be made.
2. The extensive range of bactericidal activity afforded by the triad of bacitracin, neomycin and polymyxin gives an extremely wide coverage of wound pathogens without the risk of inducing resistant strains of organisms.
3. *Ps. pyocyaneus*, particularly present in burns, is completely inhibited by polymyxin, considerably reducing the healing time.
4. *Polybactrin* is not readily absorbed and there is no risk of systemic toxicity occurring.
5. The propellant gas is non-toxic and does not support combustion.
6. There are no contra-indications to the use of *Polybactrin*. Systemic therapy may be given concurrently if necessary.

**FORMULA:** Each pack contains: Neomycin Sulphate 750 mg. Polymyxin 'B' Sulphate 150,000 units. Zinc Bacitracin 37,500 units. Propellant 83.5 g. Contents 85 g. (approx).

## A sprained ankle—if nothing worse

The hazards of our modern urban civilization provide a rich harvest of strains and sprains. Elastoplast Bandages are used as routine in the remedial procedures following such injuries.

Porosity of Elastoplast Bandages permits free evaporation of sweat. Firm elastic support with desired amount of stretch and regain is assured.

Adhesive is not spread to the fluffy edges of the bandage—minimising rucking of bandages and soiling of overlying stockings. Elastoplast Bandages are made to the well-known Smith & Nephew high standard of quality.

Elastoplast elastic adhesive porous bandages are available in 3-yard lengths and 2", 2½", 3" and 4" widths. Prescribable on Form E.C.10.

# Elastoplast

**Elastic adhesive bandages (Porous) B.P.C.**

For a sprained ankle the Elastoplast should be applied from without, inwards, from the base of the toes to the knee. It should be applied as soon after the accident as possible, thus immediately providing firm support and controlling the formation of effusion and hæmatoma. Small pads of wool or plasticine in the malleolar sulci prevent hæmatoma formation.

# ADRENOXYL

## Reduces the mean bleeding-time

Adrenoxyl reduces the mean bleeding-time by decreasing the permeability and increasing the contractility and resistance of the capillary wall.

## A dry field at operation

Adrenoxyl has been successful in diminishing capillary bleeding in a wide range of surgical operations. It has proved particularly useful in ear, nose and throat, ophthalmic and plastic surgery. In plastic surgery of the face it has been reported that, post-operatively, there is less swelling and bruising when Adrenoxyl has been used.

## No side effects

Adrenoxyl does not have any side effects or contraindications. It does not affect blood coagulation, blood pressure or pulse rate and does not possess any sympathomimetic properties.

## In medical conditions

Adrenoxyl has been used with success in those medical conditions associated with capillary fragility.

*In the British Medical Journal (April 21st, 1956) a correspondent confirmed the value of Adrenoxyl in providing a dry field for the surgeon and in shortening the duration of the operation.*

## Packs

## NO ESCAPE?

Upon many of its victims, hay-fever imposes an almost intolerable burden . . . a life sentence of disrupted summers. To such patients, 'Actidil' can mean the rediscovery of summer's pleasures. Most potent of all antihistamines, 'Actidil' is remarkably quick to take effect. Indeed, the interval between administration and onset of relief has been reduced to a matter of minutes. Yet these exceptional benefits are available to patients of all ages, for 'Actidil' has a particularly wide safety margin and little tendency to evoke the drowsiness and other side-effects so often associated with antihistamine action.

## Results

"The immediate clinical results were assessed after the first month's treatment in four main groups: (A) pronounced relief (symptom free); (B) definite relief (minor symptoms with no pain); (C) doubtful relief (symptoms persisting but improved); (D) no relief.

"Table II shows that 81% of cases became symptom-free—70% of them during the first week and 30% during the second week; a further 9% were relieved of the majority of their symptoms. Thus there was a satisfactory response in 90% of cases.

TABLE II

Group	Active Ulcers	Presumptive Ulcers	Totals
A	63 (79.6%)	17 (89.0%)	80 (81.7%)
B	8 (10.2%)	1 (5.5%)	9 (9.2%)
C	6 (7.6%)	1 (5.5%)	7 (7.1%)
D	2 (2.5%)	0 (—)	2 (2.0%)
TOTALS	79 (100%)	19 (100%)	98 (100%)

"Four of the nine cases in groups C and D have elected to go to surgery, and one of the remaining cases has a hiatus hernia as well as a duodenal ulcer. Experience of treating these 'Failures' over the past six years leads one to believe that no form of medical treatment will be effective and that surgery is the only hope of relieving their symptoms. In 75% of cases the patients were of the opinion that the tablets were superior to alkaline powders, and they found that they were able to take foods which they had avoided for years."

Extracts from the  
BRITISH MEDICAL JOURNAL  
1955, 2, 827

"SUMMARY: Seventy-nine cases of peptic ulcer and 19 of presumptive peptic ulcer have been treated with Roter tablets. Immediate clinical response was satisfactory in 90% of patients, with a relapse rate of 57% in the first year; a reduction in the average number of relapses was recorded in 15 cases kept on a maintenance dose for one year."

PACKINGS: Tins of 40, 120, 640, and dispensing size 720 (P.T. exempt). Basic N.H.S. price: 1/- for 10 tablets.

Mr. B-S: "How's the pain now Mr.  
Stallworthy? Not so bad, eh?  
Well, Dr. Beresford and I will

MR. BINDER-SCOTT AND Dr.  
BERESFORD ENTER. THE DOOR

Dr. B: "Do you remember taking his

Mr. B-S: "Nothing. I looked up the notes  
when you 'phoned. It was five  
years ago. Normal appendix -  
nothing to account for his pain  
then - probably nothing now,  
even if we did a laparotomy."

Dr. B: "There's nothing P.R. is there?  
I made sure of that."

Mr. B-S: "No. And the story has not

Dr. B: "He's pretty fit really, you

He doesn't like his work and I

# CHEMOTHERAPY OF TUBERCULOSIS

the newest proven modification of PAS for safe, acceptable, convenient and therapeutically reliable performance in combined regimens with Isoniazid.

B-PAS (Wander), 4-benzoylamino-2-hydroxybenzoate, first introduced by our Research Laboratories in 1948, is an acknowledged contribution to tuberculo-therapy.

## ADVANTAGES

CALCIUM B-PAS (Wander) is virtually insoluble.  
It provides high blood levels of extended duration.  
It is practically tasteless.  
It is well tolerated and best suited for domiciliary use.

## MULTIPLE PRESENTATION FOR COMBINED REGIMENS

CALCIUM B-PAS (Wander) is available as such in two convenient forms: Powder and Cachets. Content in each form is ranged so that the daily regimen is simplified. The 3.5 g. Powders taken with a draught of water or milk are especially acceptable. For combined regimens of B-PAS and INAH, 'B-PASINAH' Powders and Cachets according to preference supply the advantage of concurrent therapy in readily acceptable form which practically ensures the patient's co-operation in carrying out instructions.

## Nutrition in Geriatrics

An adequate diet plays a considerable part in maintaining the health and vitality of the elderly. Although this fact is well known, malnutrition tends to be more prevalent in the higher age groups, as physical and economic factors may restrict the choice of food and render preparation and cooking troublesome.

Marmite is a useful source of the B vitamins and has the added advantage of requiring very little preparation. Sandwiches made with Marmite are very popular with old people, who appreciate the piquant flavour. Appetising drinks can also be quickly made by stirring Marmite into boiling water or hot milk.

## APPOINTMENTS

Applicants should state name, address, age, nationality, qualifications, and enclose (unless otherwise specified) one copy each of 3 recent ★ testimonials with short statement of experience and appointments held.

Applications should be sent at once if no closing date is given.

Canvassing in any form will disqualify.

★SERVICE MEMBERS may have difficulty in supplying recent testimonials, but this should not deter them from applying.

A fully registered medical practitioner who is liable for National Service must obtain deferment of recruitment in writing from the Central Medical Recruitment Committee or (in Scotland) the Scottish Central Medical Recruitment Committee before accepting any civilian appointment.

The position of provisionally registered medical practitioners who are liable for National Service has been made clear in a notice sent to them by the Ministry of Labour and National Service.

## 'MYANESIN'

TRADE MARK

### ELIXIR & TABLETS

Carefully controlled experiments have demonstrated that muscle tension is greater in anxious patients than in healthy persons. The more severe the symptoms of anxiety the greater is the tension in the muscles.

It is now becoming recognised

Myanesin Elixir and Tablets are also valuable in the treatment of:—

Backache	One tablespoonful or two tablets four times daily
Headache	
Bronchial Asthma	
Neurodermatoses	
Dysmenorrhoea	
Premenstrual Tension	One tablespoonful at night
Insomnia	
Nocturnal Cramp	

that many cases diagnosed as psychogenic rheumatism are in fact cases of anxiety-induced muscle tension and can therefore logically be treated with Myanesin Elixir and Tablets.

The suggested dosage is—One tablespoonful or two tablets four times daily.

## Availability of Vitamins in Yeast

Deficiencies of single factors of the Vitamin B Group do not occur. Accordingly, even if a deficiency condition appears to result from the lack of an individual factor of the group and it is considered necessary to give intensive treatment with this factor, the entire Vitamin B Complex should always be administered concurrently.

It is, however, extremely important, in view of suggestions in recent publications, that the vehicle selected as a source of the entire B Complex does not withhold its vitamin content from the patient.

Human experiments show that the rich, natural vitamin potency of Aluzyme is totally available to the human system.

- Aluzyme is not advertised to the public and may be prescribed on Form E.C.10
