CLINICAL PATHOLOGY IN GENERAL PRACTICE

321 pages. Price 21s. (by post—inland and overseas
22s. 3d.)

This handbook on clinical pathology meets the needs of the general practitioner, the houseman, and the senior student. It contains thirty-nine articles comprising a series specially written for the *British Medical Journal*. Each article has been revised and brought up to date by its author. The book gives authoritative information on—

- available laboratory facilities
- reliable tests and which to use
- techniques for collecting and preserving specimens
- interpretation of results and significance of abnormal findings

Obtainable from booksellers or by post from Publishing

THE SUCCESS ATTENDING THE USE OF RESINOL OINTMENT

for the relief of persistent irritation present in cases of Varicose Ulcer, Dry Eczema, Haemorrhoids etc., is well known to General Practitioners. Clinical tests and 6 years' practical experience have demonstrated the effectiveness of this simple, economical resorcinol preparation having the formula:

Resorcinol	2.08	Oil of Cade	6.08
Bismuth Subnitrate	4.17	Calamine	4.17
Zinc Oxide	4.17	Boric Acid	7.25
Starch	9.52	Ointment Base ad	100.00

In jars containing 3½ ozs. or 1½ ozs.

Supplies are readily available in all areas.

For his tomorrows

Like you, we want every baby to have a chance of a happy childhood well protected against the major infectious diseases. In pursuit of this ideal our scientists are constantly seeking to produce new or improved immunological substances. One of the most successful so far evolved is Triple Antigen Glaxo. This product, by reducing the number of injections required for protection against diphtheria, pertussis and tetanus, encourages parents to accept immunisation for their children. Eight injections are required for the single antigens—three only are necessary for a primary course with Triple Antigen Glaxo.

When they are old

The routine management of elderly sick or infirm patients must certainly pose a real problem to doctor and family alike, particularly when the emotional problems of the aged are complicated by advanced or malignant disease. Often the chronic patient is unwilling or unable to be admitted to hospital and the burden falls to a great extent on the general practitioner.

It is in the treatment of these patients that Sparine plays a most important role for it quickly calms the patients' agitation by inducing a state of emotional detachment without sedation, and paves the way for better reception of analgesia. Moreover, not only does it actively enhance the pain-killing effects of such drugs as morphine, allowing them to be given in smaller, safer doses, but by its anti-emetic action Sparine limits the risk of the vomiting which so often arises either as a symptom of the disease or as a reaction to drug or radiation treatment.

Gravitational Therapy in Migraine

"You are old, Father William," the young man said,
"And your hair has become very white;
And yet you incessantly stand on your head—
Do you think, at your age, it is right?"

"In my youth," Father William replied to his son,
"I did it to cure the migraine;*
But now—why, I do it entirely for fun,
And take Cafergot when I'm in pain."

AMPHETONE

REGISTERED

A GENERAL STIMULANT FOR THE CENTRAL NERVOUS SYSTEM

For cases requiring a quick-acting general stimulant without increasing the patient's appetite, we consider Amphetone unique. It combines for the first time Dexamphetamine Sulphate and Strychnine with Glycerophosphates and members of the Vitamin B Group. The Dexamphetamine provides the convalescent with an immediate feeling of well-being, this being followed by the well-known tonic effects of the other medicaments. Clinical reports have been excellent.

FORMULA

Dexamphetamine Sulphate B.P.C., 1/12 grain : Strychnine Hydrochloride B.P., 1/60 grain : Calcium Glycerophosphate B.P.C., 2 grains : Sodium Glycerophosphate B.P.C., 2 grains : Aneurine Hydrochloride B.P., 1/30 grain : Nicotinamide B.P., 1/4 grain : Riboflavin B.P., 1/60 grain : Syrup of Blackcurrant B.P.C., 2 fluid drms. : Water, to 1/2 fluid ounce.

POISON

The esters of NICOTINIC, SALICYLIC and p-AMINO BENZOIC acids bring relief to cases of arthritis and rheumatism

IN CASES of soft-tissue rheumatism, and arthritic disorders, many doctors are tending more and more to regard Transvasin as an indispensable adjuvant to treatment.

For Transvasin is composed of the esters of nicotinic, salicylic and p-aminobenzoic acids. These esters readily pass the skin barrier in therapeutic quantities, and so enable an effective concentration of drugs to be built up where they are needed.*

Transvasin not only induces vasodilation of the skin with a superficial erythema, but also brings about a deep hyperaemia of the underlying tissues. It is non-irritant and can be safely used on delicate skins.

It is now being widely prescribed, with successful clinical results. Since a very small quantity is sufficient for each application, the cost of treatment is extremely low.

**Therapeutische Umschau*

NULACIN

provides milk-alkali drip therapy without a tube

Maintains continuous control of gastric acidity

Until a few years ago, maintained continuous control of gastric acidity was impossible without hospitalization and discomfort to the patient.

Then a unique treatment in the form of Nulacin tablets was evolved to achieve this desirable state—simply, effectively and without attendant disadvantages. In the ensuing period Nulacin therapy has been amply tried and proved by numerous clinical studies and by therapeutic use in many countries.

A Nulacin tablet placed in the mouth between the cheek and the gum dissolves slowly and releases its contained medicaments at a rate that gives continuous neutralization of the acid gastric juice. Nulacin accomplishes this without any danger of causing alkalosis or other side-effects. The results are comparable with those of intragastric milk-alkali drip therapy.

INDICATIONS: NULACIN tablets are indicated whenever neutralization of the acid gastric contents is required: in active and quiescent peptic ulcer, gastritis and other conditions of gastric hyperacidity.

Dosage: Beginning half-an-hour after food, a Nulacin tablet should be placed in the mouth between the cheek and the gum and allowed to dissolve.

During the stage of ulcer activity, up to three tablets an hour may be required. During quiescent periods, for prophylaxis in peptic ulcer and for the relief of discomfort due to gastric hyperacidity, the dose of Nulacin is one or two tablets between meals.

NULACIN tablets are not advertised to the public and have no B.P. equivalent. They may be prescribed on E.C.10. The dispensing unit of 25 tablets is free of purchase tax. (Basic price to N.H.S. . . . 2/-). Also available in tubes of 12.

NULACIN tablets are prepared from whole milk combined with dextrans and maltose, and incorporate magnesium trisilicate 3.5 grs.; magnesium oxide 2.0 grs.; calcium carbonate 2.0 grs.; magnesium carbonate 0.5 grs.; Ol. Menth. Pip. q.s.

GASTRIC ANALYSIS Superimposed gruel fractional test-meal curves of five cases of duodenal ulcer.

GASTRIC ANALYSIS Same patients as in Fig. 1, two days later, showing the striking neutralizing effect of sucking Nulacin tablets (3 an hour). Note the return of acidity when Nulacin is discontinued.

A NEW APPROACH TO WOUND HEALING

*The use of STABILIZED TRYPSIN
in the treatment of*

WOUNDS

ABRASIONS

BURNS

ULCERS etc.

IT HAS LONG BEEN KNOWN that the proteolytic enzyme Trypsin could resolve necrotic tissue and was in theory an ideal physiological agent for the treatment of infected wounds. Its instability has, however, until recently precluded its use for this purpose. Lloyd-Hamol of London and Zurich have now succeeded in producing a cream, Biotrase, in which trypsin remains physiologically active for over a year.

Biotrase also contains two new anti-septic agents, both of which are active against a wide range of gram-positive and gram-negative pathogenic organisms.

Biotrase digests purulent matter and leaves a clean granulating surface. It does not attack vital tissues.

Samples and
literature
gladly sent
on request

Indications for use

Biotrase may be used wherever there is an infected—or potentially infected—breach of surface of the skin. Common conditions for its use include the following: Wounds, second and third degree burns; infected and necrotic skin conditions, including pyodermias; boils and carbuncles (following incision); all types of ulcers. Biotrase has been found most useful in the treatment of varicose ulcers, providing these are not surrounded with avas-

cular tissue and not of long duration.

Biotrase can be prescribed on Form E.C.10.

Biotrase is in 35 gram tubes at a basic N.H.S. price of 3/9d.

Biotrase contains: Trypsin pur. 0.16%; Calcium N-Hydroxymethyl-glutamate 5.00%; 2.2'-Thiobis-(4,6-dichlorophenol) 0.50% in Polyethylene glycol.

a
truly
radical
reduction
in
sulphonamide
dosage

1

tablet instead of

8

The introduction of LEDERKYN Sulphamethoxypyridazine has radically changed the pattern of sulphonamide therapy. This is the first *long-acting* antibacterial sulphonamide to be offered for clinical use, and it is fully effective at a maintenance dosage of only $\frac{1}{2}$ Gm. daily.

This is a reduction of some seven-eighths as compared with the typical sulpha drug dosage i.e. one tablet instead of eight. Improved tolerance and a welcome freedom from side effects result from this dramatic dosage reduction. Moreover, the swift absorption and efficient diffusion of LEDERKYN lend further emphasis to its clinical value—especially in treating genito-urinary infections.

"IMPROVED THERAPY FOR PEPTIC ULCER"

Extract from the American Journal of Gastroenterology, (1957) 28, 439.

"The medication investigated is known as Roter tablets . . . The dosage employed in the treatment of gastric or duodenal ulcer was 2 tablets, taken three times a day with tepid water immediately after meals . . . this therapy is applicable to ambulatory patients."

SUMMARY

"In a series of 155 cases of peptic ulcer treated with . . . (Roter) tablets for three to six weeks, there was immediate relief of pain in 92 per cent of cases and roentgenological healing of the ulcer in 81 per cent. The average weight gain was 7.9 lbs. and occult blood disappeared from the stools in all of the six cases in which it was found.

"The benefit provided by the medication is attributed to the minute particulation of the bismuth subnitrate, produced by a special process of trituration in association with a synergistic antacid combination.

"The special features of this medication are immediate and prolonged relief of pain, correction of gastric hyperacidity, absence of side reactions, effectiveness for ambulatory patients, and early healing of the ulcer in most cases.

"There was no acid rebound in therapeutic dosage and no adverse effects were reported."

Bronchitis or Asthma?

Regular administration of Franol through the winter will usually keep the chronic bronchitic patient free from acute attacks.

In bronchial asthma Franol is well known as a valuable prophylactic. Both the number and severity of attacks are reduced and the patient's continual fear that an attack may occur at any moment is allayed and his confidence restored.

Franol, which is a combination of a bronchodilator, an antispasmodic and a sedative, is well tolerated by both adults and children.

Medical literature is available on request.

Protein Tissue Building without Virilisation

NILEVAR* promptly reverses nitrogen loss, stimulates protein tissue formation without significant androgenic effects and can be given to patients :

irrespective of age or sex

in simple daily doses

for as long as it is therapeutically needed

INDICATIONS :

Problems of protein build-up commonly occur in :

- Convalescence from acute illness
- Chronic wasting disease
- Undernourished or underweight individuals
- Recovery after surgery
- Preparation for planned surgery
- Recovery from severe burns and traumata
- Prematurely born infants

In these conditions NILEVAR is the essential treatment in restoring positive nitrogen balance and well-being.

NILEVAR is available in bottles of 25 and 50 tablets (10mg.) and in boxes of 6 ampoules (each containing 25 mg. in 1 c.c.).

Senokot

S T A N D A R D I Z E D S E N N A

A healthy child requires no laxative. In children whose bowel habits have been disturbed it is important, whenever possible, to use re-educative measures which restore normal reflexes and permit the discontinuance of treatment.

Senokot—standardized total senna principles—stimulates peristalsis by a mechanism which closely resembles that of normal defæcation (*Lancet*, 1952, *i*, 655). Its regular administration restores bowel tone, sensitivity and natural rhythm and allows dosage to be gradually reduced and finally discontinued.

Re-training therefore is the aim of Senokot therapy.

Senokot is entirely British

unrivalled speed of absorption

For rapid absorption Chloromycetin* is unique among present-day antibiotics. Effective anti-bacterial levels at most sites of infection can readily be obtained by oral administration.

As blood-levels may conveniently be adjusted to control any grade of infection,

Chloromycetin therapy produces swift response, and the duration of treatment is, therefore, reduced. The completeness of absorption also lessens the possibility of gastro-intestinal upset.

For the inveterate victims of winter ills, the further outlook is indeed unsettled. Yet the prospects for such individuals need not be gloomy—provided steps are taken *now* to maintain their nutritional status at a really satisfactory level. It was for precisely this purpose that Vi-MAGNA Multivitamins was formulated. The special merits of Vi-MAGNA can be simply defined—a comprehensive formula . . . at an outstandingly high concentration, and only one capsule or teaspoonful of syrup daily.

The original easy-to-take,
two-in-one tablet

for the prompt and prolonged
relief of **ASTHMA**

ISO-BRONCHISAN was first produced in 1953 and offers a fresh approach to the problem of effective asthma control. The tablets, which are pleasant to take, have a coating containing easily dissolved isopropyl-Nor-Adrenaline, a most potent bronchodilator, which, when absorbed by the sublingual route, produces the prompt relief of bronchospasm. The rest of the tablet, when swallowed, releases Ephedrine and Theophylline in balanced proportions and these, slowly absorbed along the alimentary tract, ensure long sustained antispasmodic action on the bronchial smooth muscle.

ISO-BRONCHISAN

Prescribable on Form E.C.10.

IMMEDIATE RELIEF

PROLONGED ACTION

Each tablet contains Isopropyl-Nor-Adrenaline (Isoprenaline) sulphate gr. 1; Ephedrine hydrochlor. gr. 2/5; Theophylline gr. 2. In tubes of 20 tablets and bottles of 100 tablets. Tablets containing smaller quantities of the effective ingredients are now available for use in Paediatrics.

Samples and literature available on request.

Brand of Narcotine Linctus

A NEW Cough Reflex Inhibitor

NICOLANE Linctus presents narcotine for the suppression of unproductive cough, with an activity in this respect equal to or greater than codeine and the following important advantages :

It will not produce addiction as it is absolutely free from such properties associated with other opium alkaloids.

It is particularly effective against the "Allergic cough."

Tolerance and side effects are minimal and it has no adverse effects on respiration or the central nervous system.

It has a wide margin of safety and provides adequate control in oral dosage over long periods.

NICOLANE Linctus contains 15 mg. narcotine in each teaspoonful (4 ml) and is available in bottles of 4 fluid ounces.

Samples will gladly be made available to the medical profession for clinical trial.

PRO-BANTHINE* IN ULCER HEALING

FIG. 1. "But X-ray study at this time still revealed the ulcer niche."

FIG. 2. In ten weeks "the niche was no longer visible radiologically or gastroscopically."

Clinical Report on Pro-Banthine

The case-history below of ulcer on the gastric side of gastro-jejunal stoma reveals significantly the high potency in low dosage of the well-tolerated anti-cholinergic agent, Pro-Banthine..

M. D., female, age 48, had a posterior gastro-jejunosomy fourteen years previously for duodenal ulcer. Nine months prior to her first visit severe intractable pain recurred and a subtotal gastrectomy was performed at another hospital. She remained well for a few months and then because of recurrence of severe pain and marked weight loss, she was referred for treatment. X-ray study revealed a large ulcer niche on the gastric side of the anastomosis. Antacids and sedatives gave no relief from pain. She was given 45 mg. of Pro-Banthine four times a day and within seventy-two hours was able to sleep through the night for the first time in weeks. After two weeks of Pro-Banthine treatment the patient felt completely well, but X-ray study at this time still revealed the ulcer niche (Fig. 1). After a further ten weeks' treatment the niche was no longer visible radiologically or gastroscopically

(Fig. 2). In the five months prior to the report she was maintained on 30 mg. of Pro-Banthine four times daily without any recurrence of symptoms.

Pro-Banthine is the safe, potent anti-cholinergic agent which effectively controls excessive parasympathetic activity in the gastro-intestinal and genito-urinary tracts.

Pro-Banthine tablets containing 15 mg. of propantheline bromide are available in bottles of 40, 100 and 1000 tablets.

Parenteral Pro-Banthine is available in vials containing 30 mg. of propantheline bromide as a dry sterile powder, in boxes of 6 and 25 vials, for injection where needed.

Pro-Banthine with phenobarbitone tablets (15 mg. of each) are available in bottles of 40, 100 and 1000 tablets. G. D. Searle and Co. Ltd., High Wycombe, Bucks. Telephone: High Wycombe 1770.

*getting the
measure of*
CORTISONE

For the statistically-minded, Roussel's production of Cortisone and its derivatives offers an interesting study in extremes. To produce one kilogram of the drug, some *two tons* of raw material are required. Only one part in 2,000 of the starting material comprises the end result! Moreover, the complex synthesis calls for more than ninety different basic materials, solvents and reagents. Despite such seemingly massive requirements for a diminutive yield, Roussel 'have the measure' of cortisone. Today the British production plant of the Roussel Group is fully geared to meet the growing demand—here and abroad—for Cortisyl, Hydrocortisyl, Decortisyl, and Precortisyl products.

PERU STREET, SALFORD 3, LANCS.

'RAUWILOID'

is essential
for Hypertension

'Rauwiloid', a purified and standardised fraction of Rauwolfia serpentina alkaloids, can be considered a basic treatment for hypertension. It lowers blood pressure more effectively than phenobarbitone or its combinations with theobromine and is less likely to cause depression than reserpine.

IMPORTANT

'Rauwiloid' may require more than a week for a significant anti-hypertensive effect to develop. Any previous treatment, particularly barbiturate, should be gradually reduced over this period.

In Mild to Moderate Hypertension

In most cases 'Rauwiloid' will provide adequate control by itself. Combination therapy is not necessary.

In Moderate to Severe Hypertension

When a greater hypotensive effect is required, 'Rauwiloid' should be combined with veratrum in the form of 'Rauwiloid + Veriloid'. 'Veriloid' is a biologically standardised alkaloidal extract of Veratrum viride. Such a combination with 'Rauwiloid' enables adequate doses of veratrum to be given for a satisfactory hypotensive response.
(See detailed literature).

In Severe or Malignant Hypertension

'Rauwiloid' used in conjunction with ganglionic blocking agents enables a smaller dose of the more potent medicament to be used, thereby minimising side-effects and decreasing the tendency for tolerance to develop.

'Rauwiloid' is available in 2 mg. tablets in bottles of 60 and 500.
Dosage, two tablets at night.

'Rauwiloid' and 'Veriloid' are registered trade marks

A practical reference manual on contraception *available free to all doctors*

The Report of the Royal Commission on Population (1949) states:

"...there is nothing inherently wrong in the use of mechanical methods of contraception... public policy should be based on acceptance of voluntary parenthood and contraception."

These words give authoritative support to the use of conception control methods as a means of planning the size of the family.

MODERN CONTRACEPTIVE TECHNIQUE presents a concise and compact survey of methods commonly used. There are notes on methods which have medical approval, and also on others which are medically contra-indicated.

TO GET YOUR COPY
simply write "Modern Contraceptive Technique" and "Planned Families" on your letter-heading, and post it to the address below.

FOR THE USE OF PATIENTS

PLANNED FAMILIES contains an explanation of contraceptive techniques, written in non-technical terms. Any number of copies will be supplied to doctors for distribution to their patients.

MOUNT PLEASANT · ALPERTON · WEMBLEY · MIDDLESEX

... There's no doubt about it—the steel claws in a 'WYRESOLES' tread give that extra grip which means extra safety on wet and greasy roads!

Here's why: Normally, coils of spring-steel wire embedded and vulcanised in the tread remain flush with the surface. Under load the rubber is compressed, releasing the cat-like claws, which dig down through water, mud or grease to grip the road surface. A Road Research Laboratories' test report shows that WYRESOLES give up to 40 per cent better road grip. This "Armour Plating" afforded the WYRESOLES tread also aids in resisting penetration by glass and flints.

APPOINTMENTS

Applicants should state name, address, age, nationality, qualifications, and enclose (unless otherwise specified) one copy each of 3 recent★testimonials with short statement of experience and appointments held.

Applications should be sent at once if no closing date is given.

Canvassing in any form will disqualify.

★SERVICE MEMBERS may have difficulty in supplying recent testimonials, but this should not deter them from applying.

A fully registered medical practitioner who is liable for National Service must obtain deferment of recruitment in writing from the Central Medical Recruitment Committee or (in Scotland) the Scottish Central Medical Recruitment Committee before accepting any civilian appointment.

The position of provisionally registered medical practitioners who are liable for National Service has been made clear in a notice sent to them by the Ministry of Labour and National Service.

SALARY SCALES OF JUNIOR GRADES OF HOSPITAL MEDICAL STAFF

Registrar Grades, Whole-time

(a) **REGISTRAR**: Posts obtained normally not less than two years after registration as a medical practitioner and held normally for two years: £935 per annum in the first year; £1,061 10s. per annum in the second and any subsequent years. If the post is resident a deduction of £170 per annum is made.

(b) **SENIOR REGISTRAR**: Posts obtained normally not less than four years after registration as a medical practitioner and held normally for four years: £1,210 per annum in the first year; £1,320 per annum in the second year; £1,430 per annum in the third year; £1,540 per annum in any subsequent years. If the post is resident a deduction of £200 per annum is made.

Other Grades, Whole-time

(a) HOUSE OFFICERS:

(i) *Provisionally registered medical practitioners*: £467 10s. per annum for the first post held; £522 10s. per annum for the second and all subsequent posts held;

provided that the employing authority (subject in the case of a Hospital Management Committee to the consent of the Regional Hospital Board) shall have discretion to determine that the remuneration of any officer holding his first post in the National Health Service as a House Officer shall be £522 10s. per annum if they are satisfied that the officer has held at least one hospital post outside, of not less than six months' duration, involving clinical responsibilities equivalent to those of house posts in the National Health Service and supervised by appropriate specialist staff.

(ii) *Fully registered medical practitioners*: £577 10s. per annum for any post held; provided that in exceptional circumstances, subject to the consent of the Minister, this rate may be exceeded by up to £50 per annum where a post cannot be filled otherwise.

In each case under sub-sections (i) and (ii) above, a deduction of £125 per annum in respect of board and lodging and other services provided shall be made and each post shall be tenable for six months.

(b) **SENIOR HOUSE OFFICER**: Posts obtained by fully registered medical practitioners and held normally for one year only: £819 10s. per annum. If the post is resident a deduction of £150 per annum is made.

(c) **JUNIOR HOSPITAL MEDICAL OFFICER**: Officers who have held house appointments but who are neither Senior House Officers nor in one of the registrar grades, who have less responsibility than other hospital officers of non-consultant status, and who have been appointed for a limited or an indefinite period, not less than one year after full registration as a medical practitioner: £852 10s. by £55 to £1,182 10s. per annum. If the post is resident a deduction of £170 per annum is made.

An applicant with experience in paediatrics might be appointed as a second year Resident initially. Preference given to unmarried applicants planning to return home after the appointment. Transportation would be at the expense of the individual, but the possible support of the Fulbright Travelling Fund should be explored. A member of the Department will be in London during the week of February 24-March 1 for interview of candidates short-listed. Applicants should first apply with curriculum vitae to the Department, Alex. J. Steigman, Professor, University of Louisville Medical School, Louisville, Kentucky, U.S.A. (4734)

UNIVERSITY OF MELBOURNE

Applications are invited for positions of **SENIOR LECTURER AND LECTURERS (2) IN PHYSIOLOGY** (one position in Biophysics) **SENIOR LECTURER AND LECTURERS (2) IN BIOCHEMISTRY**

The new salary scales to operate from January 1, 1958, are as follows:

Senior Lecturers (medically qualified)—£A2,200 to £A2,800 per annum.

Senior Lecturers—£A2,100 to £A2,500 per annum.

Lecturers—£A1,450 to £A2,100 per annum.

Initial salary will be fixed according to qualifications.

Superannuation similar to F.S.S.U. in Great Britain will be provided.

Conditions of appointment may be obtained from the Secretary, Association of Universities of the British Commonwealth, 36, Gordon Square, London, W.C.1.

Applications close in Australia and London on February 28, 1958. (4738)

WANTED, INTERNS FOR JULY, 1958. SALARY \$100 monthly and full maintenance. 12 months' rotating service. Teaching programme. Write, Thomas J. Quigley, M.D., St. Vincent's Hospital, Staten Island 10, New York, N.Y.

Oversea (Vacant)—contd.**UNIVERSITY OF SASKATCHEWAN**

University Hospital, Saskatoon
Department of Anaesthesia

Applications are invited from registered medical practitioners who desire

TRAINING IN ANAESTHESIA

Experience in anaesthesia not essential, but those who have had previous training will also be considered. The post is recognized for D.A. and F.F.A., Canadian Certification, F.R.C.P.(C) and American Boards. Appointments are for 12 months in the first instance. Salary from \$150 to \$225, according to experience, with full residential emoluments. The position is vacant now, and is to be filled as soon as possible. For further details and application blanks write to Gordon M. Wyant, F.F.A.R.C.S., Professor of Anaesthesia, University Hospital, Saskatoon, Saskatchewan, Canada. (4622)

WESTERN REGION OF NIGERIA**SPECIALIST OBSTETRICIAN**

required for obstetrical and gynaecological duties, including out-patient, maternity, child welfare and antenatal work in the larger provincial hospitals of the Region (which are being enlarged up to 200 beds), and to assist in training midwives. Candidates should have registrable medical qualifications and the M.R.C.O.G., or an equivalent higher qualification with considerable experience of major surgery in their specialty, and have had at least six years' post-registration experience. Appointment (one tour of 12-24 months in the first instance) may be either: (a) on contract with gratuity (taxable) on satisfactory completion of contract at rate of £37 10s. for each completed period of three months' service (including leave); or (b) from National Health Service, candidates retaining superannuation rights and receiving gratuity (taxable) of 20% of aggregate of salary. Salary under (a) £2,664 a year, and (b) £2,200. Quarters provided at low rental. Taxes at local rates. Annual leave permissible; generous home leave granted after each tour of 12-24 months. Free return passages for officer, wife and children (up to three). Application forms from Director of Recruitment, Colonial Office, London, S.W.1, quoting BCD 117 4 0 06. (4783)

UNIVERSITY AND RESEARCH**APPOINTMENTS, etc.****LONDON SCHOOL OF HYGIENE AND TROPICAL MEDICINE**
University of London

Applications are invited from graduates in Physics, Chemistry or Engineering for the new post of

OCCUPATIONAL HYGIENIST

in the Rockefeller Unit of Occupational Health at the school. Duties call for development of research in studying the working environment in relation to disease. Salary in the lecturers' scale of £1,100 to £1,600, with F.S.S.U., child and London allowances. Applications, supported by the names of two referees, should be sent by February 14, 1958, to the Dean, London School of Hygiene and Tropical Medicine, Keppel Street, Gower Street, W.C.1, from whom further particulars may be obtained. (4612)

THE ROYAL FREE HOSPITAL

Applications are invited for

THREE ASSISTANTS

in the Department of Pathology. The successful candidates will be required to work under the direction of the Professor of Pathology and assist in the routine work in morbid anatomy, and also assist in a research project, either on liver or ischaemic heart disease. The appointment will be made for one year in the first instance, commencing April 1, 1958, and preference will be given to candidates with a postgraduate degree and previous experience in pathology; these latter two qualifications are not essential, and the appointment can be considered as a training post. Salary will be £935 per annum, and will carry superannuation. Applications should be sent to the Professor of Pathology, Royal Free Hospital, Gray's Inn Road, London, W.C.1, with the names of two referees, before March 1, 1958. (4610)

UNIVERSITY OF LONDON

The Senate invite applications for the **READERSHIP IN MEDICINE** tenable at St. Bartholomew's Hospital Medical College (salary £2,050 by £100 to £2,550 a year). Applications (10 copies) must be received not later than February 17, 1958, by the Academic Registrar, University of London, Senate House, W.C.1, from whom further particulars may be obtained. (4689)

MEDICAL RESEARCH COUNCIL**FELLOWSHIPS IN CLINICAL RESEARCH**

The Medical Research Council invite applications for Fellowships in Clinical Research, tenable at centres in the United Kingdom during the academic year 1958-59. These Fellowships are open to suitably qualified medical graduates who desire to prepare themselves for a career in clinical research. In general, it is intended that each Fellow appointed under the scheme should be given an opportunity, as part of his training for clinical research, to study methods of research in the basic subject most relevant to his particular clinical interest. The awards will be made for a period of one year in the first instance and will be renewable annually in approved cases up to a maximum of three years in all. Stipend will be at the rate of £950 per annum, rising by annual increments of £75 to £1,100 per annum, with superannuation provision in addition. Candidates for these Fellowships, which are ordinarily restricted to British subjects resident in the United Kingdom, must be medically qualified and clinically experienced, and should preferably have worked for a period in a department in which clinical research was in progress. Applicants will be invited to submit their own proposals as to type and place of work, but the Council will be glad to advise successful candidates on the selection of suitable centres of study and to assist in placing them in departments of laboratories where the desired training and experience can be obtained. Applications must be sponsored in each case by the head of the appropriate department in the candidate's University or Medical School, and an undertaking will be required that a suitable academic post in the clinical department will be available to the candidate in that institution on satisfactory completion of the period of study under the Fellowship. Forms of application for these Fellowships may be obtained from the Secretary, Medical Research Council, 38, Old Queen Street, London, S.W.1, with whom applications should be lodged as soon as possible, and in any event not later than March 1, 1958. (4678)

UNIVERSITY OF LONDON

Application is invited for the

MARY SCHARLIEB RESEARCH STUDENTSHIP

of the value of £250, for one year in the first instance. The Studentship is open to graduates of the University who are registered medical practitioners or possess other qualifications which, in the opinion of the Senate, would enable them to undertake postgraduate medical research. Application (on prescribed form) must reach the Secretary to the Scholarships Committee, Senate House, London, W.C.1 (from whom forms and further particulars may be obtained), not later than February 28, 1958. (4776)

NOTICES

APPLICANTS ARE ADVISED NOT TO SEND original testimonials when replying to advertisements. Copies will answer the purpose quite as well, and in the event of their being lost or mislaid, no inconvenience will ensue.
