Practical Books for the Practising Physician

Progress in Arthritis

Edited by John H. Talbott, M.D., and L. Maxwell Lockie, M.D.

Basic investigations of joint diseases, and the study of pathogenesis and clinical manifestations, have been expanding rapidly during the past decade. In this new volume, 30 authorities have contributed stimulating material based on these recent findings. Studies of pathophysiology of rheumatoid arthritis and its current therapy are emphasized, for this is now the outstanding incapacitating joint disease. Additionally, there is a detailed chapter on acute rheumatic fever in relation to both prophylaxis and management; a comprehensive section on gouty arthritis which sets forth the latest advances in the understanding of factors in intermediary metabolism; and an abundance of detailed information on each of the other important aspects of the subject. (To be published next month, 464 pp., 162 illus., 88s.)

Cardiovascular Diseases

Third Edition, Revised and Enlarged by David Scherf, M.D., F.A.C.P. and Linn J. Boyd, M.D., F.A.C.P.

IN THE LIGHT OF the unprecedented developments in cardiac surgery, diagnosis, and treatment, the authors have now completely revised, enlarged, and brought up to date their widely acclaimed volume. This new edition contains more than twice the number of illustrations, and includes new sections on pulseless diseases and cardiovascular lesions caused by carcinoids, as well as a valuable presentation of all modern aspects of therapy. Chapters such as those on congenital heart lesions, therapy of hypertension and surgery of valvular lesions have been entirely rewritten according to the most recent discoveries, to again provide the reader with a highly-informative text in keeping with the original aims of the authors—one in which physical diagnosis is stressed throughout. (To be published next month app. 800 pp., 119 illus., about 140s.)

1entle Keminder

Even the healthiest person suffers occasionally from alimentary disorders. If the trouble is of a minor nature - brought on, perhaps, by unwise diet - Andrews may well be the answer.

Andrews neutralizes stomach acids, stimulates bile flow. It assists elimination by introducing liquid into the bowel by osmosis. Used judiciously as a corrective to a faulty diet, Andrews encourages the body to perform its normal functions in a perfectly natural and gentle way.

Restoring the balanced gut flora

ENPAC is a new and unique preparation of antibiotic-resistant strains of Lacto-bacillus acidophilus in a vehicle of the vital growth factors necessary for the strains to become established and multiply in the human gut. When administered during oral antibiotic therapy, these strains replace the intestinal strains of L. acidophilus, and an important part of the bacterial flora is maintained intact. There is substantial evidence which has proved that ENPAC can also be highly beneficial in certain intestinal disorders.

Extract from Lancet article on clinical trials at Bristol:

ENPAC is prescribable on Form E.C.10. Basic N.H.S. Price 14/5 per 60 gramme tin.

"It was found that the staphylococci increased in both groups at the beginning of antibiotic therapy. Staphylococci continued to increase in the patients taking the antibiotic alone, but in those taking Enpac there was a pronounced drop in numbers following the initial rise. Simultaneously, in this latter group the lactobacilli were rapidly established and continued to multiply. This followed the elimination of the normally non-resistant lactobacilli by the antibiotic during the early days of treatment." (Lancet, 1957, i, 899)

Samples and literature will be sent to the medical profession on request.

MAKES A MOST

EFFECTIVE TONIC

Weight for weight, B12 is the most potent vitamin of all. Its effective dose is measured not in thousandths, but in millionths of one gram. Just 100 micrograms of B₁₂, injected regularly as maintenance therapy, enables the patient with pernicious anaemia to lead a normal life. The evidence of hundreds of doctors suggests that an even smaller amount, taken as liquid or tablets, exerts a marked tonic effect. The effectiveness of vitamin B₁₂ as a tonic is confirmed by the most telling evidence of allexperience in practice. The family doctor knows the many occasions when B₁₂ has relieved debility symptoms, shortened convalescence, improved the nutritional status of the chronic ill and elderly, bestowed a buoyant feeling of well-being and restored appetite, thereby turning sub-normal weight gain into steady weight progress. Few tonics show so consistently such successful results. But then few tonics contain nothing but B₁₂. It is made by Glaxo Laboratories, first to isolate the vitamin in Great Britain after years of study and research.

In iron therapy, the permanent way is the intramuscular way. Following Imferon treatment, the perennial anaemic—the patient who even after months or years of treatment with oral iron is constantly on the verge of anaemia and constantly in the surgery—is buffered against relapse. This is because Imferon re-charges the body's 'stores' of iron. Oral iron cannot do this (except possibly after an unacceptably long period of treatment) because it is impeded by the mucosal block. This barrier becomes more and more effective as the Hb level rises—and depleted body iron stores remain depleted.

Imferon, intramuscular iron, by-passes the mucosal block. It is fully absorbed, fully utilised ... safe and certain.

ACTH

GENERAL RELEASE TO HOSPITALS FROM APRIL 1st

We welcome the decision of the Ministry of Health to release ACTH from specific control under which the Armour Laboratories have supplied ACTHAR and H.P* ACTHAR Gel since 1950.

* The Armour Laboratories brand of HIGHLY PURIFIED long-acting Corticotrophin (ACTH) (in Gelatin)

HP* ACTHAR Gel is a highly purified ACTH of high potency in gelatin with rapid action and prolonged effect by subcutaneous or intramuscular injection in collagen diseases, hypersensitivities, certain skin diseases and ophthalmic conditions.

By maintaining the physiological integrity of the adrenal cortex, ACTH offers distinct advantages by comparison with the corticosteroids, which, being substitutional, produce adrenal suppression and unresponsiveness to stress. ACTH is, in fact, administered to counteract such results of corticosteroid therapy.

Easy painless administration
Fewer injections required
Minimum discomfort
Low maintenance dosage
Economy in use
Available in 5 ml. vials (20 and 40 I.U. per ml.).
Stable at room temperature for two years.

Refrigeration not required.

ACTHAR is also available in the form of rapid-acting lyophilized powder, supplied in vials containing 10, 25 and 40 I.U. per vial.

Full documented literature will be gladly supplied on request.

Treatment of DIABETES MELLITUS without injections

Rastinon "Hoechst" tablets provide an oral treatment for certain diabetic patients.

EFFECTIVE A number of patients on small regular doses of insulin have been found to be suitable for treatment with Rastinon "Hoechst" tablets. Clinical work throughout the world has shown that approximately a quarter of all diabetics can be stabilized on Rastinon "Hoechst" tablets. A few of the more recent references to the literature are given opposite.

SAFE The selection and stabilization of diabetic patients should be carried out under strict medical supervision. For those patients found to be suitable, Rastinon "Hoechst" tablets provide a safe form of therapy and many have now been on oral treatment for two years. No cases of proven dyshaemopoiesis or other serious side-effects due to the drug have been reported.

SIMPLE From 2 to 4 tablets a day are normally all that is required to replace the insulin with its concomitant syringe, needles, swabs, and often nursing assistance as well. The normal regime of urine examination and dietary control remains necessary.

Packs: bottles of 100 and 500 tablets.

The basic price to the National Health Service as dispensed from a 500 tablet bottle is 2.97d per tablet and the total cost to the National Health Service, with all allowances, is less than 4d per tablet.

Each tablet contains 0.5 G. of N-Butyl-N¹-toluene-p-sulphonylurea; (Tolbutamide).

changes the concept of sulpha therapy...

tablet instead of

The advent of Lederkyn sulphamethoxypyridazine, Lederle's low-dosage, long-acting sulphonamide, heralds a new era in sulpha therapy. Lederkyn exhibits a powerful broad-range effectiveness at radically reduced dosage. Treatment with Lederkyn means:—

- Dramatic dosage reduction—for maintenance, one tablet daily instead of eight
- Rapid diffusion in body fluid and tissue
- Therapeutic levels within the hour . . . blood concentration peaks within two hours
- Slow excretion rate with prolonged action
- Safety in use

Lederkyn is issued in oral tablets of 0.5 Gm. Bottles of 24, 100 and 1000

Apprehension of painful bowel movement in anorectal conditions initiates a vicious cycle...

"Bowel Fear" in Anorectal Surgery and Haemorrhoids

A most difficult problem in treating anorectal conditions is bowel hygiene. The patient's fear of pain in the presence of haemorrhoids or following surgery often sets up a psychosomatic condition leading to constipation.

In the management of this type of constipation and also the atonic type, purgatives should be avoided as much as possible.

The administration of Metamucil,* a rounded teaspoonful in a glass (5-6 fl. oz.) of cool water every morning on rising, and the formation of the after-breakfast habit of defaecation are usually effective. The patient is advised to try to have the bowels act immediately after breakfast, take deep breaths and make deep pressure on the left side of the abdomen, repeating this pressure again and again until complete bowel action results.

Metamucil is not laxative in action but encourages normal peristalsis by its soft, plastic, smooth bulk, which exerts a gently stimulating effect on the intestinal musculature. Each dose of Metamucil (in a glass of cool water, milk or fruit juice) may be followed by another full glass of fluid if additional fluid intake is desired.

Metamucil is demulcent, non-allergenic and its action is natural in initiating the peristaltic reflex and abolishing the patient's fear of discomfort and pain.

Metamucil is the highly refined mucilloid of *Plantago ovata*, a seed of the psyllium group, combined with dextrose as a dispersing agent. It is supplied in tins of 4 and 16 ounces. G. D. SEARLE & CO., LTD., High Wycombe, Bucks. Telephone: High Wycombe 1770.

*Regd. Trade Mark.

SEARLE

THE GREAT ADVANTAGE of Codis is that it provides a codeine compound tablet in which the aspirin content is soluble in water. (The codeine constituent is also soluble, and the phenacetin is in very fine suspension.)

This is achieved by careful compounding and preparation, resulting in tablets which are quickly absorbed and well tolerated—even in cases of proven intolerance to ordinary (insoluble) aspirin.

To ensure stability and easy identification, the tablets are wrapped in moisture-proof distinctive gold foils of 10 tablets each (dispensing size), or boxes containing five foils of 4 tablets each (public size).

CODIS, AVAILABLE FOR DISPENSING

Not advertised to the public

UNIQUE FAT STORAGE

Most of the advantages of 'TACE' are derived from its storage in body fat. Pharmacological evidence has been provided by articles published¹², and from results demonstrated by radio-autographs. Abundant clinical confirmation is also available.

No other estrogen at present available has this property. Because 'TACE' is stored in body fat no sudden drop in estrogen blood level occurs. The estrogenic effect persists for up to 3 months after administration ceases.

High doses are unnecessary, since 'TACE' is metabolized by the liver to a more potent æstrogenic compound.

- 1. Amer. J. Obst. Gynec. (1952) 63:1361.
- 2. Proc. Soc. exp. Biol. (1953) 84:491.

Dose: 2 capsules daily for one month.

PACKS: 'TACE' is available as green capsules, each containing 12 mgm. chlorotrianisene dissolved in oil: Bottles containing 60 to 300 capsules. The basic N.H.S. costs are 18/4d. and 73/-.

Feeling of Well Being

The feeling of well being, so important to the patient, is characteristic of 'TACE' therapy.

Smooth Prolonged Action with Fewer Side Effects

Fat storage results in a steady release of estrogen, providing a smooth action which persists for some time after administration has ceased.

Low Incidence of Withdrawal Bleeding

Owing to the gradual release of the fat stored 'TACE', no fluctuations occur in blood estrogen levels. Withdrawal bleeding consequently is greatly diminished.

Simplicity of Dosage

'TACE' is given on a fixed dosage scheme. Higher dosage does not produce greater fat storage.

"TACE" is a registered trade mark of the Wm. S. Merrell Co., London. Distributed in Great Britain and Irish Republic by

RIKER LABORATORIES LIMITED . LOUGHBOROUGH . LEICS.

B12 with intrinsic factor

for oral administration

BIOPAR FORTE is the outcome of years of ARMOUR RESEARCH to combine Vitamin B12 with a much more potent intrinsic factor than hitherto, and to provide an effective oral therapy to replace injected B12 for Pernicious Anaemia.

Each Biopar Forte Tablet contains 35 mg. Intrinsic Factor and 15 µg. Vitamin B12, equivalent to 1 U.S.P. Oral Unit. Previously untreated Pernicious Anaemia will usually give a full response to a daily dosage of two Biopar Forte Tablets for a 14-day period.

EMERGENCIES IN GENERAL PRACTICE

from the British Medical Journal

470 Pages (cloth bound), with full index

This book deals with medical emergencies in a wide sense; acute clinical emergencies requiring prompt and skilful treatment; conditions such as faints and fits and giddy turns, the careful elucidation of which may mean the difference to a patient between a life of activity and one of restriction; acute psychiatric states; accidents of treatment, such as dangerous reactions to drugs or collapse during anaesthesia; and emergency calls when the doctor is isolated, as on a ship.

It comprises 57 specially commissioned articles which appeared originally in the British Medical Journal.

The author of each is an acknowledged authority. This collection, now revised by the authors, will be of value not only to general practitioners but also to senior students, house-physicians, house-surgeons, and to those supervising their work in hospitals.

Succinate-Salicylate Therapy

a safe and effective treatment for rheumatic disorders

A SUCCINATE-SALICYLATE combination was found superior to acetylsalicylic acid in rheumatic states both on grounds of therapeutic efficacy and lower toxicity. Adequate amounts of the former could be administered with more lasting effect and with fewer and milder side effects. Furthermore, succinate-salicylate affects the disease process itself, as well as relieving painful symptoms, and does not abnormally increase prothrombin time even after prolonged dosage.

Summary of study on Succinate-salicylate therapy Delaware State Medical Journal (1954) 26, 22,

SUCCINATE-SALICYLATE THERAPY

Spencer Support provides relief for the Arthritic Patient

For arthritic and other spinal conditions, Spencer Designers create a spinal support that Orthopaedic opinion finds most effective. It provides positive support with less weight and more comfort than does a brace.

Where immobilisation is needed, the necessary rigidity is incorporated.

Only if individually designed, cut, made and fitted for the one patient who is to wear it, can a support be effective in the application of the necessary corrective and supportive forces as treatment aid in the specific condition.

The <u>Tral</u>*patient on the mend

* Abbott's newly-developed TRAL is an anticholinergic that is FOTENT enough to block hypersecretion and hypermotility in peptic ulcer; SELECTIVE enough to avoid the side effects which often result from anticholinergic action outside the gastrointestinal tract; SAFE enough to permit the broad range of dosage necessary to individualised therapy.

SO MUCH MORE VALUE

SO MUCH MORE in mileage, silence and grip.

SO MUCH MORE in cornering stability, even wear and comfortable riding.

SO MUCH MORE in all-round value.

This is why it was immediately fitted as standard equipment by the majority of British motor car manufacturers.

Cestra

COMBINE DRESSING PADS

Highly absorbent cotton wool in tubular woven gauze, with non-absorbent backing. An efficient protective padding for all kinds of wound dressing.

BRITISH MEDICAL FINANCE LTD.

Tavistock House South, Tavistock Square, London, W.C.I

your colostomy patient . . .

can be kept happier and more comfortable with the recently invented

HALLARD colostomy appliance

The improvements achieved are . . .

- Light in weight, only 31 ounces.
- More comfortable and safe to wear in day and night conditions
- A foamaprene pad, being porous, has air circulation obviating perspiration, and supersedes the use of cotton wool.
- A perforated polythene cup, allows air circulation which prevents a vacuum being created, and stops suction and harm to the flesh at the opening.
- A lip round the cup ensures a perfect body seal.
- For fæces (residue) removal all that need be done is unhook the brace ends and release the cup and contents for disposal, without taking the appliance off. After new cup dressing, replace it, and re-hook the brace ends.
- The appliance control is with narrow elastic web bands arrangement, so it is easy to adjust to exact fit, and to ensure absolute ease, comfort, and security.
- The dressing is two to three layers of absorbent gauze placed between body and foamaprene pad, and nested into the cup and piece of lint inside to cover the cup perforations.

The Appliance is finely made, for trouble free use, and for moderate outlay, so help and please your colostomy cases by suggesting it? It will be a pleasure to give you any further information upon request.

APPOINTMENTS

Applicants should state name, address, age, nationality, qualifications, and enclose (unless otherwise specified) one copy each of 3 recent*testimonials with short statement of experience and appointments held.

Applications should be sent at once if no closing date is given. Canvassing in any form will disqualify.

*SERVICE MEMBERS may have difficulty in supplying recent testimonials, but this should not deter them from applying.

A fully registered medical practitioner who is liable for National Service must obtain deferment of recruitment in writing from the Central Medical Recruitment Committee or (in Scotland) the Scottish Central Medical Recruitment Committee before accepting any civilian appointment

The position of provisionally registered medical practitioners who are liable for National Service has been made clear in a notice sent to them by the Ministry of Labour and National

SALARY SCALES OF JUNIOR GRADES OF HOSPITAL MEDICAL STAFF Registrar Grades, Whole-time

(a) REGISTRAR: Posts obtained normally not less than two years after registration as a medical practitioner and held normally for two years: £935 per annum in the first year; £1,061 10s, per annum is made.

If the post is resident a deduction of £170 per annum is made.

(b) SENIOR REGISTRAR: Posts obtained normally not less than four years after registration as a medical practitioner and held normally for four years; £1,210 per annum in the first year; £1,320 per annum in the second year; £1,430 per annum in the third year; £1,540 per annum in any subsequent years. If the post is resident a deduction of £200 per annum is made.

Other Grades. Whole-time

(a) HOUSE OFFICERS:

(i) Provisionally registered medical practitioners: £467 10s, per annum for the first post held; £522 10s, per annum for the second and all subsequent posts held;

provided that the employing authority (subject in the case of a Hospital Management Committee to the consent of the Regional Hospital Board) shall have discretion to determine that the remuneration of any officer holding his first post in the National Health Service as a House Officer shall be £522 10s. per annum if they are satisfied that the officer has held at least one hospital post outside, of not less than six months' duration, involving clinical responsibilities equivalent to those of house posts in the National Health Service and supervised by appropriate specialist staff.

(ii) Fully registered medical practitioners: £577 10s. per annum for any post held;

provided that in exceptional circumstances, subject to the consent of the Minister, this rate may be exceeded by up to £50 per annum where a post cannot be filled otherwise.

In each case under sub-sections (i) and (ii) above, a deduction of £125 per annum in respect of board and lodging and other services provided shall be made and each post shall be tenable for six months.

(b) SENIOR HOUSE OFFICER: Posts obtained by fully registered medical practitioners and held normally for one year only: £819 10s. per annum. If the post is resident a deduction of £150 per annum is made.

(c) JUNIOR HOSPITAL MEDICAL OFFICER: Officers who have held house appointments but who are neither Senior House Officers nor in one of the registrar grades, who have less responsibility than other hospital officers of non-consultant status, and who have been appointed for a limited or an indefinite period, not less than one year after full registration as a medical practi.ioner: £852 10s. by £55 to £1,182 10s. per annum. If the post is resident a deduction of £170 per annum is made.

UNIVERSITY OF LONDON

Institute of Obstetrics and Gynaecology (Iucorporating the teaching facilities of Queen Charlotte's Maternity Hospital, Chelsea Hospital for Women, and the Department of Obstetrics and Gynaecology at Hammersmith Hospital)

Applications are invited from graduates with a resistrable qualification for enrolment for the Autumn Term (September 1 to November 29, 1958). Graduates attend each of the constituent hospitals in turn for clinical work, and attend lectures and special demonstrations at all three hospitals. Enrolment fee £3. Tuition fee £36 a term. General practitioners wishing further experience in obstetrics may be accepted to attend the course at Queen Charlotte's Maternity Hospital for shorter periods, i.e., 2-4 weeks. They will have the opportunity of attending the labour ward in addition to combined classes of lectures and demonstrations at the three hospitals of the Institute. Ministry of Health grants are payable to approved general practitioners attending for a period of one or two weeks. An intensive course for those preparing for M.D. and M.R.C.O.G. will be held from December 1 to December 13, 1958, During the winter vacation, a limited number of graduates may attend the practice of the hospital. Hosted accommodation is available at Queen Charlotte's Hospital and at Hammersmith Hospital. Further particulars can be obtained from the Secretary. Institute of Obstetrics and Gynaecology, Chelsea Hospital for Women, Dovehouse Street, London, S.W.3.

a NEW Bayer Product

For the treatment of Seborrhoea and Dandruff

Lenium combines the recognised action of selenium sulphide with that of the powerful, new antibacterial agent, Lorothidol for maximum control of seborrhoea and dandruff.

Lenium is extensively used in Sweden, where it was developed and clinically evaluated. Now manufactured in England, Lenium is available for the first time to doctors in the British Isles.

Supplied as a cream, Lenium is convenient and pleasant to use—leaves the scalp clean and hair manageable.

LENIUM
