Sometime Professor Emeritus of Anatomy, University of Edinburgh

VOLUME III. HEAD AND NECK. BRAIN.

JUST PUBLISHED

532 pages

231 illustrations

28s. net

The principal change in this new edition is the use of English equivalents of the Paris Nomenclature. Whilst this nomenclature has been largely used throughout the text it has not been adopted in its entirety as modifications will certainly be proposed in the near future. For this reason some of the more familiar terms of the Birmingham Revision have been retained and, where necessary, the equivalent term in the Paris Nomenclature is given in brackets. Illustrations have been carefully reviewed and a number of new ones have replaced some that have been in use since this work was first published.

VOLUME I. UPPER LIMB. LOWER LIMB. Already published. 25s. net.

VOLUME II. THORAX AND ABDOMEN will be published in September 1958.

Gentle Reminder

Even the healthiest person suffers occasionally from alimentary disorders. If the trouble is of a minor nature - brought on, perhaps, by unwise diet - Andrews may well be the answer.

Andrews neutralizes stomach acids, stimulates bile flow. It assists elimination by introducing liquid into the bowel by osmosis. Used judiciously as a corrective to a faulty diet, Andrews encourages the body to perform its normal functions in a perfectly natural and gentle way.

APPROX. COMPOSITION

Acid Tart.	23%
Sod. Bicarb.	23%
Sucros	37%
Mag. Sulph. Exsic.	17%

An 8 oz. tin for clinical trial
will gladly be sent on request

RHEUMATISM AND KINDRED AILMENTS

Harrogate, the largest treatment centre in Great Britain, is actively engaged in providing all types of physical treatment in connection with the rheumatic diseases and all types of physical rehabilitation. Extensive alterations have taken place, including the equipment of the establishment with DEEP POOL THERAPY, medical gymnastic facilities and occupational therapy.

HARROGATE

Treats both private patients under its All-inclusive Treatment Scheme, and National Health patients.

Medical enquiries as to cost, and how treatment can be obtained, will be welcomed by :

E. ROBERTS, Manager,
Section I

Treatment of DIABETES MELLITUS without injections

Rastinon «Hoechst» tablets provide an oral treatment for certain diabetic patients.

EFFECTIVE A number of patients on small regular doses of insulin have been found to be suitable for treatment with Rastinon «Hoechst» tablets. Clinical work throughout the world has shown that approximately a quarter of all diabetics can be stabilized on Rastinon «Hoechst» tablets. A few of the more recent references to the literature are given opposite.

SAFE The selection and stabilization of diabetic patients should be carried out under strict medical supervision. For those patients found to be suitable, Rastinon «Hoechst» tablets provide a safe form of therapy and many have now been on oral treatment for two years. No cases of proven dyshaemopoiesis or other serious side-effects due to the drug have been reported.

SIMPLE From 2 to 4 tablets a day are normally all that is required to replace the insulin with its concomitant syringe, needles, swabs, and often nursing assistance as well. The normal regime of urine examination and dietary control remains necessary.

Packs: bottles of 100 and 500 tablets.

The basic price to the National Health Service as dispensed from a 500 tablet bottle is 2.97d per tablet and the total cost to the National Health Service, with all allowances, is less than 4d per tablet.

Each tablet contains 0.5 G. of N-Butyl-N'-toluene-p-sulphonylurea; (Tolbutamide).

PENICILLIN	G	V	V-K
-------------------	----------	----------	------------

Choose from the GLAXO range

The Glaxo range of penicillins offers you the widest possible choice—each penicillin being as good as Glaxo's vast experience in the antibiotic field can make it.

CRYSTAPEN INJECTION

Even the newest oral penicillins have not displaced sodium penicillin G by injection as the treatment of choice for acute, overwhelming infections; there is still nothing better than Crystapen Injection for dealing the first decisive blow.

CRYSTAPEN TABLETS & LIQUID

As tablets and liquid, Crystapen has become the foremost oral penicillin because of its reliability and low cost. Clinically as effective as any form of penicillin V, Crystapen is only about one third the cost. It plays by far the best supporting role to penicillin by injection.

PENICILLIN V TABLETS GLAXO

Penicillin V free-acid is better absorbed than penicillin G and gives higher blood levels, but its clinical effectiveness is not significantly different.

NEW ...

CRYSTAPEN V TABLETS

The newest tablet penicillin. Using the potassium (K) salt of penicillin V, Crystapen V not only ensures effective blood levels more rapidly than penicillin V free-acid; it provides distinctly better therapeutic concentrations. However, dose for dose, the clinical effectiveness of Crystapen V is only about on a par with Crystapen

CRYSTAPEN V LIQUID

This is the new, short name for Penicillin V Oral Liquid Glaxo, the palatable ready-to-use suspension of the calcium salt of penicillin V. It is the most acceptable form of oral penicillin for children.

CRYSTAPEN* INJECTION Trade Mark (soluble sodium penicillin G) <i>Injection:</i> In strengths of 100,000 units to 10 mega units of sodium penicillin G. THE FAST DIRECT ROUTE

With oral iron, the iron deficient patient's journey to health is uncertain and interrupted by innumerable stops in *your* waiting room. Oral iron may restore the haemoglobin level but, in doing so, the mucosal block becomes increasingly effective: absorption is reduced to a minimum, thus preventing the replenishment of depleted iron stores. It is the depletion of these stores which keeps your patients constantly on the verge of anaemia.

Imferon, intramuscular iron, is not affected by the mucosal block. It is rapidly absorbed and fully utilised in replenishing the body iron stores, tissue iron, and for the synthesis of haemoglobin. Imferon therapy is safe and certain, and buffers your patients against recurring iron deficiency of any degree.

The esters of NICOTINIC, SALICYLIC and p-AMINO BENZOIC acids bring relief to cases of arthritis and rheumatism

"Thank you, doctor"

IN CASES OF soft-tissue rheumatism, and arthritic disorders, many doctors are tending more and more to regard Transvasin as an indispensable adjuvant to treatment.

For Transvasin is composed of the esters of nicotinic, salicylic and p-aminobenzoic acids. These esters readily pass the skin barrier in therapeutic quantities, and so enable an effective concentration of drugs to be built up where they are needed.*

Transvasin not only induces vasodilation of the skin with a superficial erythema, but also brings about a deep hyperaemia of the underlying tissues. It is non-irritant and can be safely used on delicate skins.

It is now being widely prescribed, with successful clinical results. Since a very small quantity is sufficient for each application, the cost of treatment is extremely low.

**Therapeutische Umschau*

BUILDING for a better world

This is Lederle's new pharmaceutical plant at Gosport, Hampshire. It was inaugurated this week and is now in full production of well-known Lederle drugs that are helping doctors to conquer disease. From here come AUREOMYCIN* chlortetracycline and ACHROMYCIN† tetracycline—leaders among the antibiotics . . . LEDERCORT†—Lederle's new corticosteroid of great promise . . . LEDERKYN†—long-acting, low-dosage sulphonamide.

Lederle is a branch of the vast international Cyanamid organisation, and leadership in pharmaceutical research is but one of Cyanamid's contributions to a better world. In other fields too—industrial chemicals, plastics, agricultural products, food preservation, surgical products, etc. the latest news is often of another Cyanamid achievement that transmutes the hopes of yesterday into the realities of today.

*TRADEMARK †REGD. TRADEMARK

**Lederle proudly announces
the introduction of**

Ledercort*
TRIAMCINOLONE (9 ALPHA-FLUORO-16 ALPHA-HYDROXYPREDNISOLONE)

a new, superior corticosteroid of great promise

LEDERCORT is an achievement of Lederle corticosteroid research—created to minimise the major deterrents to all previous steroid therapy. It offers increased potency for greater clinical effectiveness; reduced dosage and the distinct advantage of fewer side effects.

LEDERCORT represents a new HIGH in anti-inflammatory effects with a lower dosage that averages $\frac{1}{3}$ less than prednisone. LEDERCORT offers a new LOW in the collateral hormonal effects associated with all previous corticosteroids since it causes: *no oedema, no hypertension, no psychosis, no weight gain or potassium depletion.*

Because of its reduced dosage, there is a lower incidence of other side effects such as *peptic ulcer, osteoporosis, epigastric distress, diabetic state, Cushingoid "obesity".*

LEDERCORT provides prolonged therapy at less cost with easier patient management.

INDICATIONS: *Rheumatoid arthritis; bronchial asthma; dermatoses; allergic disorders; other conditions where corticosteroids have proved beneficial.*

Oral tablets of 4 mg., scored for easy division.
Bottles of 30, and 100.

“Aspirin is a serious gastric irritant, particularly in peptic ulcer patients”*

“Calcium aspirin... can be used with impunity”*

* Extracts from B.M.J., 2-7-55.

SOLPRIN is accordingly often prescribed

Solprin contains aspirin in soluble form. It is a highly efficient analgesic — the more quickly and easily absorbed by reason of its solubility. Dissolved in water, the tablets produce a solution of calcium acetylsalicylate. Solprin is extremely well tolerated, even by sufferers from peptic ulcer.

Solprin will be found particularly valuable when heavy or prolonged dosage is called for.

Patients find Solprin easy to take and palatable.

SOLPRIN

REGD.

Soluble and substantially neutral

Not advertised to the public

Solprin is available only on prescription and only in Great Britain and Northern Ireland. Clinical samples and literature will be supplied on request.

Midicel

SULPHAMETHOXYPYRIDAZINE

**sustained sulphonamide blood-level
prolonged therapeutic effect**

The new 'prolonged-action' sulphonamide, MIDICEL*, maintains full therapeutic effect with only one tablet daily. Thus, the patient's comfort and convenience are enhanced and nursing care is simplified.

Comparable in price with other sulphonamides MIDICEL provides added advantage without added cost.

Absorption of MIDICEL is rapid and tissue diffusion is good. In the circulation a high proportion of the contained sulphonamide is in the free active form ensuring full therapeutic action.

Recommended Dosage: In adults an initial loading dose of 1 G (in severe infections only, 2 G) followed by 0.5 G daily. In children $\frac{1}{4}$ tablet (0.125 G) for each 20 lb. of bodyweight on the first day followed by half this dosage daily.

Packaging: Tablets of 0.5 G in containers of 12, 100 and 250.

'Marsilid'

TRADE MARK

BRAND

IPRONIAZID

'Marsilid' is a potent amino oxidase inhibitor and, as a consequence, intervenes in the metabolism of amines such as serotonin, adrenaline and noradrenaline. It is probable that this property of 'Marsilid' accounts for many of the observed clinical effects of this drug.

The clinical uses of 'Marsilid' include:

DEPRESSIVE STATES

The typical reaction to iproniazid consisted of a feeling of well-being, accompanied by improved appetite, increased energy and diminution of sleep requirements.

J. nerv. ment. Dis., 1956, **124**, 322.

ANGINA PECTORIS

In angina pectoris, the administration of iproniazid relieves pain and increases the capacity for effort.

Arch. Inst. Cardiol. (Mexico), 1957, **27**, 563.

RHEUMATOID ARTHRITIS

The favourable effects of the hydrazides, especially iproniazid, on subjective manifestations in patients with rheumatoid arthritis were the most interesting and perhaps the most significant findings of this study.

Cleveland Clin. Quart., 1957, **24**, 30.

Marsilid Tablets 50 mg. in packings of 100.

Terramycin*

brand of oxytetracycline

— AN EXPANDING PATTERN OF USEFULNESS

Since the introduction of Terramycin a tremendous body of evidence has been published about this outstanding broad-spectrum antibiotic. Today, its value is known and established in almost every type of disease where infection is a factor. Following the course of this development we have introduced a wide variety of dosage forms, so that the clinical effectiveness of Terramycin should be enhanced by convenience and acceptability of presentation.

The very bulk of the available evidence becomes almost an embarrassment to the busy practitioner who—having accepted the clinical value of Terramycin—wants a concise picture of indications, dosage, therapeutic effect, and possible side effects, in some specific condition. To overcome this problem we are preparing a series of brief monographs on the use of Terramycin in specific groups of indications. The second of these, 'Terramycin in the treatment of Genito-Urinary Infections', is now available.

NORMAL FOOD

3 days a week

FORTIFIED DIET

A scientifically balanced food supplement which acts normally and safely!

Medical practitioners will perhaps agree that the correct basis of slimming is to reduce calorie intake but to maintain the dietary essentials, namely protein, vitamins and minerals. Some dieting procedures, while scientifically correct, are unpleasant or inconvenient and may even bring discomfort. It is a common experience that slimming is mainly a matter of strength of character, and any dietary scheme which helps to make slimming a pleasant and convenient procedure has obvious advantages. LARSON'S SWEDISH MILK DIET achieves all these objects and in addition permits great flexibility in application. In this system each of the four daily meals is considered as a unit which can be replaced, as required, by an attractive, conveniently prepared and cheap food. If all four meals are replaced by

Swedish Milk Diet the daily calorie intake is reduced to about 650, but all the vitamin and mineral requirements and roughly half the protein requirements for the day are met. In the full system the four meals on three days a week, say Monday, Wednesday and Friday, are replaced by the diet, but individual meals can be replaced at any time as desired. For example, the Swedish Milk Diet can be taken in place of breakfast and tea, or in place of lunch and tea every day.

The diet is simplicity itself. It is prepared by adding a heaped teaspoonful of the supplement to a glass (8 fluid ozs.) of milk which may be cold, warm or hot as desired. Flavouring can be added if wished. The composition of the LARSON'S SWEDISH MILK DIET is as follows:

One heaped teaspoonful with an 8 ounce glass of milk taken four times daily supplies:—

3 grms. Calcium . . . over 100% M.D.R.*	
3 grms. Phosphorus . . . over 100% M.D.R.	
2,500 International Units Vitamin A . . . 50% M.D.R.	
200 International Units Vitamin D . . . 50% M.D.R.	
1.2 mg. Vitamin B ₁ . . . 100% M.D.R.	4 mg. Calcium pantothenate
2 mg. Vitamin B ₂ . . . 100% M.D.R.	31 gm. Protein
6 mg. Nicotinamide . . . 50% M.D.R.	50 gm. Carbohydrate
0.1 mg. Vitamin B ₆	34 gm. Fat

Equivalent to 650 Calories

*M.D.R. means adult Minimum Daily Requirement.

The minimum daily requirement for vitamin B₆ and calcium pantothenate has yet to be established.

It will thus be seen that the diet is not only medically and scientifically sound in principle, but is very convenient to use. Milk can be obtained anywhere and travellers can easily take with them sufficient supplement for their journey. On those rare occasions when milk cannot be obtained, milk powder can readily be used as a substitute.

One ounce of powder should be reconstituted in seven fluid ounces of water, and the supplement then added in the usual way. Spray-dried powder is recommended, as it is more easily reconstituted, and if spray-dried skim milk is used, there will, of course, be a further reduction in calorie intake.

THE BRITISH DRUG HOUSES LTD. LONDON N.1

UNIQUE FAT STORAGE

Most of the advantages of 'TACE' are derived from its storage in body fat. Pharmacological evidence has been provided by articles published^{1,2}, and from results demonstrated by radio-autographs. Abundant clinical confirmation is also available.

No other oestrogen at present available has this property. Because 'TACE' is stored in body fat no sudden drop in oestrogen blood level occurs. The oestrogenic effect persists for up to 3 months after administration ceases.

High doses are unnecessary, since 'TACE' is metabolized by the liver to a more potent oestrogenic compound.

1. *Amer. J. Obst. Gynec.* (1952) **63**:1361.
2. *Proc. Soc. exp. Biol.* (1953) **84**:491.

DOSE: 2 capsules daily for one month.

PACKS: 'TACE' is available as green capsules, each containing 12 mgm. chlorotrianisene dissolved in oil: Bottles containing 60 to 300 capsules. The basic N.H.S. costs are 18/4d. and 73/-.

Feeling of Well Being

The feeling of well being, so important to the patient, is characteristic of 'TACE' therapy.

Smooth Prolonged Action with Fewer Side Effects

Fat storage results in a steady release of oestrogen, providing a smooth action which persists for some time after administration has ceased.

Low Incidence of Withdrawal Bleeding

Owing to the gradual release of the fat stored 'TACE', no fluctuations occur in blood oestrogen levels. Withdrawal bleeding consequently is greatly diminished.

Simplicity of Dosage

'TACE' is given on a fixed dosage scheme. Higher dosage does not produce greater fat storage.

'TACE' is a registered trade mark of the Wm. S. Merrell Co., London. Distributed in Great Britain and Irish Republic by

RIKER LABORATORIES LIMITED . LOUGHBOROUGH . LEICS.

COMBINED SEDATIVE ANALGESIC

SEDUMAX

for ANXIETY, STRESS & INSOMNIA

SEDUMAX was formulated to provide the physician with an effective and innocuous therapy for patients suffering from stress, anxiety and insomnia, particularly where these symptoms are accompanied by mild pain. Carbromal and Bromvaletone were chosen because of their known value in inducing sedation in anxiety tension states. They are also non-habit forming and there is little risk of toxicity. Phenacetin was included for its sound analgesic properties, Vitamin B₁—Aneurine Hydrochloride—for its known value in the treatment of neuritis of pregnancy and the associated stress symptoms commonly experienced during gestation.

Therapeutic Effect

SEDUMAX has the following attributes:—

- 1. Effective and innocuous sedation.**
- 2. Non-habit forming.**
- 3. Relief of mild pain.**
- 4. Adaptive capacity not impaired.**
- 5. Low dosage.**

In cases of emotional stress a dosage of one tablet t.d.s. brings about a reduction of tension without the patient's adaptive capacity for meeting the stresses of everyday life being affected. SEDUMAX is particularly valuable as a sedative analgesic for the relief of insomnia due to mild pain in a host of medical conditions, pre-menstrual tension and other common symptoms of stress.

**MAXIMUM IRON UTILIZATION • RAPID ABSORPTION • NO NAUSEA
LOW PRESCRIPTION COST • NON-CONSTIPATING • NO GASTRIC UPSET**

Current clinical trials indicate that the new PLESMET SYRUP is readily acceptable to children—and to adults who cannot take tablets—it possesses the advantage of the tablets in effectively raising Haemoglobin levels without gastric irritation.

PLESMET is the Ferrous aminoacetosulphate "chelate" complex which minimizes oxidation to the irritating ferric forms and ensures maximum assimilation with a high degree of toleration.

Availability of Vitamins in Yeast

Deficiencies of single factors of the Vitamin B Group do not occur. Accordingly, even if a deficiency condition appears to result from the lack of an individual factor of the group and it is considered necessary to give intensive treatment with this factor, *the entire Vitamin B Complex should always be administered concurrently.*

It is, however, extremely important, in view of suggestions in recent publications, that the vehicle selected as a source of the entire B Complex does not withhold its vitamin content from the patient.

Human experiments show that the rich, natural vitamin potency of Aluzyme is totally available to the human system.

- *Aluzyme is not advertised to the public and may be prescribed on Form E.C.10*

RHOMEX
THE SAFE ANTHELMINTIC

Rhomex contains Piperazine Citrate—which is a considerable advance on the older anthelmintics such as Santonin and Gentian Violet in oxyuricidal efficacy, whilst being well tolerated even by infants. The Piperazine Citrate used in the manufacture of Rhomex is synthesized entirely in our own factory by a new process, the result of three years' intensive research by our chemists. It is of the highest degree of purity and being in a readily soluble form its action is swift and sure.

'TREE OF LIFE'
BIOLOGICAL TRADE MARK

Rhomex is available as a pleasantly flavoured raspberry elixir, containing 18 per cent w/v Piperazine Citrate BP, in 4½ oz. Polythene Bottles and 2 litre Polythene Dispensing Packs. Also available in tablet form, in bottles of 25, 50 and 100 tablets, each tablet containing 0.3 gm. Piperazine Citrate BP.

Obstetrician's Ode

When Obstetricians meet and chat
They talk of this and talk of that.
The treatment mentioned more than others
Is Guinness for the Nursing Mothers.
For Guinness is and Guinness was
The best galactagogue, because
Their cares and worries whisked away
Those Mothers thrive from day to day
(And hope their babes, the little tinkers,
Will also turn out Guinness drinkers !)

NOTE—The therapeutic dose for Lactating
Mothers is increased considerably when
dealing with Celebrating Fathers !

MEDICAL OFFICERS

THE UNITED KINGDOM ATOMIC ENERGY AUTHORITY INDUSTRIAL GROUP

requires

MEDICAL OFFICERS

at its establishments in the North
of England and in Scotland

There is, as yet, no special qualification in radiological protection, but qualifications or experience in any of the following will be an advantage:

Industrial Medicine

Radiology

Pure Science

The field of health and safety in atomic energy offers good career prospects to those who wish to specialize in either industrial medical practice or the broader aspects of radiological protection, including health physics. The Authority will provide a certain amount of initial training and it is expected that, in due course, there will be a formal training scheme which will lead to specialization in radiological protection. Candidates for these advanced courses will normally be selected from the Medical Officers in post.

The upper salary limit for these posts is £2,400.

The posts are permanent and pensionable. Housing will be available, if required.

Write, in confidence, to

Director of Personnel and Administration,
United Kingdom Atomic Energy Authority,
Industrial Group Headquarters,
Risley, Warrington, Lancashire.

Please quote reference 2370.

Medically qualified candidates who have applied against the recent general advertisement for ★ Health and Safety staff will be automatically ★ considered for these posts. Closing date April 28, 1958.

National Association for the Prevention of Tuberculosis,

REFRESHER COURSE FOR GENERAL PRACTITIONERS

*Second Collection and
Third Collection with classified contents list to volumes 1, 2 and 3
Price 25s. each (by post—inland 26s. 6d., overseas 26s.)*

Each book contains a collection of sixty Refresher Course articles from the *British Medical Journal*. Each article, written by an acknowledged expert, has been revised by its author. The articles cover a wide range. Their object is to refresh the reader's memory of what is old and well-established and to tell him about new developments.

They are invaluable to general practitioners and residents as practical reference books, to specialists as a means of keeping in touch with developments outside their own field, and to final-year students as up-to-date and reliable text-books.

The Third Collection has a cumulative classified contents list to the three volumes of "Refresher Course for General Practitioners."

APPOINTMENTS

Applicants should state name, address, age, nationality, qualifications, and enclose (unless otherwise specified) one copy each of 3 recent testimonials with short statement of experience and appointments held.

Applications should be sent at once if no closing date is given.

Canvassing in any form will disqualify.

★SERVICE MEMBERS may have difficulty in supplying recent testimonials, but this should not deter them from applying.

A fully registered medical practitioner who is liable for National Service must obtain deferment of recruitment in writing from the Central Medical Recruitment Committee or (in Scotland) the Scottish Central Medical Recruitment Committee before accepting any civilian appointment.

The position of provisionally registered medical practitioners who are liable for National Service has been made clear in a notice sent to them by the Ministry of Labour and National Service.

SALARY SCALES OF JUNIOR GRADES OF HOSPITAL MEDICAL STAFF

Registrar Grades, Whole-time

(a) **REGISTRAR**: Posts obtained normally not less than two years after registration as a medical practitioner and held normally for two years: £935 per annum in the first year; £1,061 10s. per annum in the second and any subsequent years. If the post is resident a deduction of £170 per annum is made.

(b) **SENIOR REGISTRAR**: Posts obtained normally not less than four years after registration as a medical practitioner and held normally for four years: £1,210 per annum in the first year; £1,320 per annum in the second year; £1,430 per annum in the third year; £1,540 per annum in any subsequent years. If the post is resident a deduction of £200 per annum is made.

Other Grades, Whole-time

(a) HOUSE OFFICERS:

(i) *Provisionally registered medical practitioners*: £467 10s. per annum for the first post held; £522 10s. per annum for the second and all subsequent posts held;

provided that the employing authority (subject in the case of a Hospital Management Committee to the consent of the Regional Hospital Board) shall have discretion to determine that the remuneration of any officer holding his first post in the National Health Service as a House Officer shall be £522 10s. per annum if they are satisfied that the officer has held at least one hospital post outside, of not less than six months' duration, involving clinical responsibilities equivalent to those of house posts in the National Health Service and supervised by appropriate specialist staff.

(ii) *Fully registered medical practitioners*: £577 10s. per annum for any post held; provided that in exceptional circumstances, subject to the consent of the Minister, this rate may be exceeded by up to £50 per annum where a post cannot be filled otherwise.

In each case under sub-sections (i) and (ii) above, a deduction of £125 per annum in respect of board and lodging and other services provided shall be made and each post shall be tenable for six months.

(b) **SENIOR HOUSE OFFICER**: Posts obtained by fully registered medical practitioners and held normally for one year only: £819 10s. per annum. If the post is resident a deduction of £150 per annum is made.

(c) **JUNIOR HOSPITAL MEDICAL OFFICER**: Officers who have held house appointments but who are neither Senior House Officers nor in one of the registrar grades, who have less responsibility than other hospital officers of non-consultant status, and who have been appointed for a limited or an indefinite period, not less than one year after full registration as a medical practitioner: £852 10s. by £55 to £1,182 10s. per annum. If the post is resident a deduction of £170 per annum is made.

MEDICAL OFFICER

A major British Oil Company invites applications from registered medical practitioners (male) for the post of Medical Officer for service in the East.

Candidates should be under the age of 35 years and, if married, accommodation and free family passages will be provided.

Pensionable starting salary in local currency is equivalent to about £2,000 per annum progressive, plus local allowances.

The contract is for three years in the first instance and, if renewed, generous home leave will be granted. The post is pensionable, with widows' and children's benefits. Limited private practice is permitted.

Applicants will be required to produce evidence of good experience in medicine, midwifery, and especially surgery. The duties will entail charge of one of three hospitals varying in size between 50 and 200 beds, and out-patients, to undertake associated administrative duties and supervision of public health services.

Write, giving brief details of qualifications and experience, to Box 433, B.M.J.

VACANCIES FOR MEDICAL OFFICERS IN SOCIAL AND PREVENTATIVE MEDICINE.

SOCIETY OF APOTHECARIES OF LONDON.—**DIPLOMA IN INDUSTRIAL HEALTH.** The next examination will begin on Monday, July 14, 1958. The following examination will be held in December, 1958. For regulations apply Registrar, Apothecaries' Hall, Black Friars' Lane, London, E.C.4.

THE UNIVERSITY OF MANCHESTER

DIPLOMA IN AUDIOLOGY

The Department of Education of the Deaf with the co-operation of the Department of Otolaryngology will hold, in 1958-59, a one-year course leading to a Diploma in Audiology. This advanced course will be open to registered medical practitioners, including medical officers, also to qualified teachers of the deaf, qualified psychologists and speech therapists. The course will include the causation of deafness, physical audiology, including the application of experimental phonetics, measurement of hearing, psychology of deafness, and the educational treatment of deafness. The course will open on October 2, 1958. Forms of application and further information may be obtained from the Director of the Department of Education of the Deaf, the University, Manchester, 13. (7727)

THE WRIGHT-FLEMING INSTITUTE OF MICROBIOLOGY, St. Mary's Hospital Medical School, London, W.2

The First Almroth Wright Lecture will be given by Professor C. L. Oakley, M.D., F.R.S., University of Leeds, in the lecture theatre of the above Institute, on Monday, April 28. Subject: "Sites of Production of Antibodies." The lecture is open to all members of the medical profession and to all students in medical schools without fee. (8593)

LONDON HOSPITAL CATGUT

is a British surgical catgut, sterilised by chemical methods instead of by heat.

The process is unique—and renders L.H.C. more flexible and more elastic.

Absorption factors are reliable. Tensile strength exceeds B.P. Standards,
so that the finest gauge suited to the operation can be used with safety.

This means less scar tissue and quicker healing.

*always use **London Hospital Catgut***

the more **F·L·E·X·I·B·L·E** suture
