...hands using WRIGHT'S COAL TAR SOAP as a regular pre-requisite of medical care. The unequalled reputation of WRIGHT'S with medical people rests on the proved antiseptic, anti-pruritic properties of LIQUOR CARBONIS DETERGENS contained in every tablet of WRIGHT'S COAL TAR SOAP. The value of WRIGHT'S as an aid to hygiene is widely acknowledged

by doctors and nurses throughout the country. Perhaps it is this

constant support which has helped to win for WRIGHT'S for more than half a century the certificate of Merit of the Royal Institute of Public Health & Hygiene. Certainly no other soap can claim such a record!

Gentle Reminder

Even the healthiest person suffers occasionally from alimentary disorders. If the trouble is of a minor nature - brought on, perhaps, by unwise diet - Andrews may well be the answer.

Andrews neutralizes stomach acids, stimulates bile flow. It assists elimination by introducing liquid into the bowel by osmosis. Used judiciously as a corrective to a faulty diet, Andrews encourages the body to perform its normal functions in a perfectly natural and gentle way.

LEEDS MEDICAL EXHIBITION Town Hall, Leeds

2nd to 6th June, 1958

Open Monday, 2.30 p.m.-7 p.m.; Wednesday, 11.30 a.m.-7.30 p.m.; Tuesday, Thursday and Friday, 11.30 a.m.-6.30 p.m.

For professional men in the Midlands this exhibition will provide an event of more than usual medical interest and importance. On Monday, 2nd June, at 2.45 p.m., the Exhibition will be officially opened by Professor S. J. Hartfall, M.D., F.R.C.P., Professor of Clinical Medicine, University of Leeds.

The wide range of exhibits by many leading British firms will include the latest ethical medical preparations, surgical instruments, medical equipment, books, hospital equipment, etc. There will be daily performances of films selected for their exceptional medical interest, and facilities will be provided for obtaining light meals and refreshments. Copies of the invaluable reference book, The London Medical Handbook, will be available to visitors at the specially reduced price of 2s. 6d.

Admission is by official invitation card, posted to arrive by 28th May. Letters referring to non-arrival of invitations should not be sent before that date.

Applications for further information should be addressed to:

The London Medical Exhibition, 194-200, Bishopsgate, London, E.C.2;

BIOTEXIN

the oral antibiotic
with rapid and intensive antibacterial effect

Biotexin (novobiocin sodium Glaxo) is the antibiotic that will deliver an overwhelming knock-out blow even to 'last-ditch' resisters.

Given by mouth, well absorbed and well tolerated, it produces high, sustained and selective antibacterial activity in the blood more rapidly than any other oral antibiotic.

Biotexin can be successfully used in the treatment of septicaemia, staphylococcal enterocolitis, infections of the soft tissues and other conditions that may be caused by staphylococci.

TAPING YOUR OWN MEDICINE

No one could blame you for feeling that the phrase 'a full life' ought to mean other than thirty people coughing in your waiting room and a long list of calls to be made as soon as they've gone. The dedicated life has disadvantages.

Don't you for instance sometimes think how good it would be to tick a concert that interests you in the Radio Times and then actually hear it? Or wish that you might sit with your feet up and hear a sports commentary all through—and at a time convenient to the peculiar hours your profession requires you to keep?

A Grundig tape recorder would enable you to do either of those things—and a lot more beside. It provides a source of entertainment quite independent of normal listening times. Acting, as it were, as a sort of locum for listening it soon builds an excellent and highly individual library of music or drama or whatever your choice may be. And it does so at far less cost than you could achieve it—
if you could achieve it—in any other way.

Professionally, you'll find it equally accommodating. All incoming telephone calls can be accurately recorded in your absence or it will serve as a dictating machine to handle your correspondence. It can even be used to record notes and case histories and reduce your paper work. A tape, by the way, will record for two or three hours and can be stored for replay as frequently as you wish or erased and used again many thousands of times.

'DEGRANOL'

BRAND OF

MANNOMUSTINE (B.C.M.)

Preliminary announcement to the profession

Arrangements have been made with the Hungarian authorities for the general availability for the first time in this country of a new type of cytostat. This product was first prepared by Dr. L. Vargha of Hungary by linking nitrogen mustard with mannitol to form 1, 6-bis-(beta-chloroethylamino)-1, 6-desoxy-D-mannitol-dihydrochloride (known to research workers as B.C.M.):

The product strongly inhibits proliferating lymphocytes and it is also being investigated for its effect on metastasising tumours. Extensive clinical investigation in Hungary shows it to be of particular interest in the treatment of:—

***Chronic Lymphoid Leukaemia,
Chronic Myeloid Leukaemia,
Lymphadenoma, Lymphosarcoma.
Reticulosarcoma, Myeloma.***

Carcinoma and Sarcoma DEGRANOL is being used experimentally in Hungary for administration before and after surgical treatment especially in gastric, intestinal and rectal cancer, to prevent tumour cells from being spread by the operation. In non-operable cases palliative effects have been obtained with DEGRANOL in a number of cases, with relief from pain, gain in weight and subjective improvement.

Toxicity, side effects etc. DEGRANOL has been exhaustively tested clinically in Hungary and is now undergoing large scale controlled clinical trials in this country. When used in accordance with instructions DEGRANOL is remarkably free from side effects. It is very much less toxic than nitrogen mustard and even unusually large doses are well tolerated.

Administration DEGRANOL is available in the form of 50mg ampoules, and is administered by intravenous injection.

Treatment of DIABETES MELLITUS without injections

Rastinon «Hoechst» tablets provide an oral treatment for certain diabetic patients.

EFFECTIVE A number of patients on small regular doses of insulin have been found to be suitable for treatment with Rastinon «Hoechst» tablets. Clinical work throughout the world has shown that approximately a quarter of all diabetics can be stabilized on Rastinon «Hoechst» tablets. A few of the more recent references to the literature are given opposite.

SAFE The selection and stabilization of diabetic patients should be carried out under strict medical supervision. For those patients found to be suitable, Rastinon «Hoechst» tablets provide a safe form of therapy and many have now been on oral treatment for two years. No cases of proven dyshaemopoiesis or other serious side-effects due to the drug have been reported.

SIMPLE From 2 to 4 tablets a day are normally all that is required to replace the insulin with its concomitant syringe, needles, swabs, and often nursing assistance as well. The normal regime of urine examination and dietary control remains necessary.

Packs: bottles of 100 and 500 tablets.

The basic price to the National Health Service as dispensed from a 500 tablet bottle is 2.97d per tablet and the total cost to the National Health Service, with all allowances, is less than 4d per tablet.

Each tablet contains 0.5 G. of N-Butyl-N¹-toluene-p-sulphonylurea; (Tolbutamide).

Today's foremost antibiotic

Of all Lederle's major contributions to medical science for the benefit of mankind, none has had a more spectacular rise to fame than ACHROMYCIN tetracycline. Introduced by Lederle in 1954, ACHROMYCIN set a record for rapid acceptance by the medical profession. It has now become recognised as today's foremost antibiotic. ACHROMYCIN has everything a true broad-spectrum antibiotic must have. It is unexcelled for its wide range of antimicrobial activity, faster diffusion, greater stability and more prolonged action. It results from Lederle's leadership in antibiotic research . . . it leads the field in clinical reliability and flexibility.

The new 'prolonged-action' sulphonamide, MIDICEL*, maintains full therapeutic effect with only one tablet daily. Thus, the patient's comfort and convenience are enhanced and nursing care is simplified.

Comparable in price with other sulphonamides MIDICEL provides added advantage without added cost.

Absorption of MIDICEL is rapid and tissue diffusion is good. In the circulation a high proportion of the contained sulphonamide is in the free active form ensuring full therapeutic action.

Recommended Dosage: In adults an initial loading dose of 1 G (in severe infections only, 2 G) followed by 0.5 G daily. In children $\frac{1}{4}$ tablet (0.125 G) for each 20 lb. of bodyweight on the first day followed by half this dosage daily.

today's new
MASTER PLAN
against
migraine

Each tablet contains
 ergotamine tartrate 2 mgm.;
 caffeine (alkaloid) 100 mgm.;
 cyclizine hydrochloride 50 mgm.
In bottles of 10 and 100

The prescribing of 'Migril' makes possible at last a *planned* attack upon the three predominant symptoms of migraine. Ergotamine is present at strength in 'Migril' for its specific effect upon the characteristic headache and ocular disturbances. Caffeine is present too, since it acts as a synergist to ergotamine. Frequently, however, ergotamine tends to evoke nausea and vomiting on its own account and can therefore worsen these aspects of the condition. For this reason, the potent, rapidly acting anti-emetic cyclizine is also included in 'Migril'—to overcome any tendency to nausea or vomiting, whether caused by the ergotamine or by the condition itself. And so successfully does cyclizine achieve this aim that truly effective oral doses of ergotamine can today be given—by means of 'Migril'.

MERBENTYL

**'Merbentyl' effectively reduces the hypermotility
of the gastro-intestinal tract**

1. 'Merbentyl' has a twofold action. It is an anticholinergic and it also exerts a direct relaxing action on the smooth muscle of the gastro-intestinal tract similar to that exerted by papaverine.
2. 'Merbentyl' is virtually free from the side effects associated with the older antispasmodics, such as belladonna, and is more effective.
3. 'Merbentyl' is available in tablet form, each tablet containing 10 mgm. dicyclomine hydrochloride, or as a pleasantly flavoured syrup containing 10 mgm. in each 5 c.c. Both forms are available combined with phenobarbitone.

'Merbentyl' may safely be given to young children. Infantile colic responds dramatically to its administration.

Nervous indigestion, the bane of the elderly, responds very satisfactorily to 'Merbentyl' therapy.

In the treatment of peptic ulceration the administration of an antispasmodic together with antacids has become virtually routine. For this condition a special preparation 'Kolantyl' has been formulated.

Anabolex

the protein-anabolizing steroid

PATIENTS who are recovering from illness frequently suffer from faulty protein metabolism. They are in negative nitrogen balance. Protein, in effect, is being broken down and lost faster than it is being built up.

Anabolex (Androstanolone) restores the physiological balance. Many clinical trials have shown that, following the administration of *Anabolex*, there is an immediate return of the body's capacity to build up protein. The patient feels better, eats better and gains weight.

Anabolex can be safely given to patients of all ages and both sexes; in therapeutic doses, its virilizing properties are almost negligible. The only known contra-indication is prostatic carcinoma.

INDICATIONS:

Convalescent patients. Premature infants. Asthenia. Malnutrition. Wasting diseases. Preparation for and recovery from planned surgery.

PRESENTATION: In vials of 25 and 100 tablets, each tablet containing 25 mg. Androstanolone. *Anabolex* can be prescribed on Form E.C.10. Basic N.H.S. price 20/- and 70/-.

Effective absorption
into lipid tissue

The first factor is provided by diethylamine salicylate, which has been shown to have an absorption rate 300-500 times greater than methyl salicylate.*

The second factor is Glycol salicylate, the slow release of which from fatty tissue prolongs the action of the quicker acting diethylamine salicylate.

The local effect of these salicylates is to begin their therapeutic action at the site of the lesion. By plain inunction, about 80% of the salicylate content of the cream is taken up into the body and about 60% is excreted in the urine.

VASCUTONEX is non-staining, odourless, and contains no counter-irritants—its therapeutic action depending entirely on the effective absorption and anti-rheumatic action of the salicylates in the formula.

INDICATIONS: Fibrositis and pain associated with muscular and articular rheumatism and all soft tissue pain.

Wate-on does this by incorporating large amounts of a vegetable oil which is rich in readily assimilable, highly unsaturated fatty acids, and glucose which is the most easily assimilated type of carbohydrate. The physiological advantages of these two materials have been firmly established by medical research.

Wate-on is also rich in lecithin which, in addition to its basic caloric value, is also of high physiological value.

Wate-on is further supplemented by the more important vitamins and minerals.

The Chemotherapy of Tuberculosis

Each year many new substances are comprehensively screened for tuberculostatic activity in the Smith & Nephew Research Laboratories. In addition, world literature is carefully scanned so that information on all aspects of the control of tuberculosis is constantly available to ourselves and to interested consultants and research workers. In keeping with our policy of being fully abreast of all developments in this particular field, we screen not only compounds synthesised in our own laboratories, but also compounds which may have been reported in world literature.

5-Bromsalicylhydroxamic Acid

Recent publications* on a new chemotherapeutic agent, 5-Bromsalicylhydroxamic Acid, suggest that it may be of value as a replacement for PAS in combined chemotherapy of tuberculosis. A comprehensive survey of the literature, mostly published in Poland, led us to believe that investigation of the Polish claims was merited, and first-hand information was obtained from discussions with the authors of the Polish papers.

It is our considered opinion, after assessing all the available data that, whilst 5-Bromsalicylhydroxamic Acid may have a place in the chemotherapy of tuberculosis, further work, both experimental and clinical, must be undertaken with it before its use can be recommended. Therefore, extensive clinical trials in this country have been arranged and until the results of these trials are known, we cannot recommend its general use. Supplies of 5-Bromsalicylhydroxamic Acid have been made available for selected clinical investigation under controlled conditions, and a comprehensive dossier containing all available data has been compiled.

Surgeon's Scalpel (Patent Pending)

with detachable blades

This improved Surgeon's Scalpel has one standard handle and a range of three blades of different contour. The design combines the strength, rigidity, and safety of the solid forged type with the adaptability and economy of orthodox detachable patterns.

The entire blade edge is usable — it has no obstruction down its centre.

The patented fitment ensures that blades cannot pull off the handle when in use.

Each handle is supplied with a blade lifter making it safe and simple to remove the blade with forceps.

What one prominent surgeon says:

"I found the Swann Surgeon's Scalpel very satisfactory. The blade has a good edge and the whole knife is strong and stable and well suited for orthopaedic work where the usual attachment comes adrift".

Succinate-Salicylate Therapy

*a safe and effective
treatment for
rheumatic disorders*

A SUCCINATE-SALICYLATE combination was found superior to acetylsalicylic acid in rheumatic states both on grounds of therapeutic efficacy and lower toxicity. Adequate amounts of the former could be administered with more lasting effect and with fewer and milder side effects. Furthermore, succinate-salicylate affects the disease process itself, as well as relieving painful symptoms, and does not abnormally increase prothrombin time even after prolonged dosage.

The Tale of a Fee

Sir Harley Street, the famous 'Doc'
One day received a dreadful shock.
A massive crate, sent by Lord Pill
Arrived 'in payment of his bill.'
"By jove," said he, "this isn't proper,
The blighter's paid his bill in copper!"
He raised the lid—he rubbed his eyes—
Oh! what a rapturous surprise!
The explanation of his grin is
He's counting out 1,000 *Guinness*.
(He rather hopes his typist makes
Some more such fortunate mistakes).

APPOINTMENTS

Applicants should state name, address, age, nationality, qualifications, and enclose (unless otherwise specified) one copy each of 3 recent testimonials with short statement of experience and appointments held.

Applications should be sent at once if no closing date is given.

Canvassing in any form will disqualify.

★SERVICE MEMBERS may have difficulty in supplying recent testimonials, but this should not deter them from applying.

A fully registered medical practitioner who is liable for National Service must obtain deferment of recruitment in writing from the Central Medical Recruitment Committee or (in Scotland) the Scottish Central Medical Recruitment Committee before accepting any civilian appointment.

The position of provisionally registered medical practitioners who are liable for National Service has been made clear in a notice sent to them by the Ministry of Labour and National Service.

SALARY SCALES OF JUNIOR GRADES OF HOSPITAL MEDICAL STAFF

Registrar Grades, Whole-time

(a) **REGISTRAR**: Posts obtained normally not less than two years after registration as a medical practitioner and held normally for two years: £935 per annum in the first year; £1,061 10s. per annum in the second and any subsequent years. If the post is resident a deduction of £170 per annum is made.

(b) **SENIOR REGISTRAR**: Posts obtained normally not less than four years after registration as a medical practitioner and held normally for four years: £1,210 per annum in the first year; £1,320 per annum in the second year; £1,430 per annum in the third year; £1,540 per annum in any subsequent years. If the post is resident a deduction of £200 per annum is made.

Other Grades, Whole-time

(a) HOUSE OFFICERS:

(i) *Provisionally registered medical practitioners*: £467 10s. per annum for the first post held; £522 10s. per annum for the second and all subsequent posts held;

provided that the employing authority (subject in the case of a Hospital Management Committee to the consent of the Regional Hospital Board) shall have discretion to determine that the remuneration of any officer holding his first post in the National Health Service as a House Officer shall be £522 10s. per annum if they are satisfied that the officer has held at least one hospital post outside, of not less than six months' duration, involving clinical responsibilities equivalent to those of house posts in the National Health Service and supervised by appropriate specialist staff.

(ii) *Fully registered medical practitioners*: £577 10s. per annum for any post held;

provided that in exceptional circumstances, subject to the consent of the Minister, this rate may be exceeded by up to £50 per annum where a post cannot be filled otherwise.

In each case under sub-sections (i) and (ii) above, a deduction of £125 per annum in respect of board and lodging and other services provided shall be made and each post shall be tenable for six months.

(b) **SENIOR HOUSE OFFICER**: Posts obtained by fully registered medical practitioners and held normally for one year only: £819 10s. per annum. If the post is resident a deduction of £150 per annum is made.

(c) **JUNIOR HOSPITAL MEDICAL OFFICER**: Officers who have held house appointments but who are neither Senior House Officers nor in one of the registrar grades, who have less responsibility than other hospital officers of non-consultant status, and who have been appointed for a limited or an indefinite period, not less than one year after full registration as a medical practitioner: £852 10s. by £55 to £1,182 10s. per annum. If the post is resident a deduction of £170 per annum is made.

What is Swedish Milk Diet?

The Swedish Milk Diet, or S.M.D., originated in Scandinavia. It is a low calorie Diet in which milk replaces ordinary food during certain days of the week.

Its original purpose was to re-establish the system during the 'hang-over' following indulgent food and wine feasts common to Scandinavian family reunions, marriages and similar communal gatherings. The calorific value of the Swedish Milk Diet is low—the daily intake approximating to 700 or 800. The Diet was subsequently adopted with great success for purposes of weight reduction, although for this purpose additive supplements of protein and vitamins have proved advisable. Bisk-o-Lait is the new soluble high protein and vitamin supplement recommended for use with milk as the modern application of Swedish Milk Diet for weight reduction.

Advantages of Bisk-o-Lait

Swedish Milk Diet

The daily calorie intake is reduced to 750 calories. Used on Diet No. 2 (see below), there is a weekly saving of over 3,000 calories, or the equivalent of a two-day fast. Weight is reduced each week. At the same time minimum essentials of protein, fat, carbohydrates, minerals and vitamins are ensured.

HOW TO DIET

Diet No. 1. For those excessively overweight and corpulent

Mix one teaspoonful of Bisk-o-Lait to a paste with a little cold milk and make up to $\frac{1}{2}$ pint. Drink this in place of a meal on Diet Days.

Replace ordinary meals every other day with Bisk-o-Lait and milk. Thus on, say, Monday, Wednesday, Friday and Sunday you eat normal food. On Tuesday, Thursday, Saturday and the following Monday you go on the Bisk-o-Lait Milk Diet.

Diet No. 2. For those a little too fat and needing to reduce

Replace food three days in a week with Bisk-o-Lait and milk. Thus Monday, Wednesday and Friday are Diet Days. Tuesday, Thursday, Saturday and Sunday are Food Days. On this system there is an extra day's food per week compared with Diet No. 1.

Diet No. 3. For those only moderately overweight

There are no Diet Days here. Substitute Bisk-o-Lait Milk Diet for the mid-day or evening meal.

Why has Bisk-o-Lait proved so successful?

Its basis is medically sound. The patient is safeguarded against 'ketosis' caused by unbalanced diets. Constant dietary supervision by the Practitioner is unnecessary. Prescribing Bisk-o-Lait saves valuable surgery time. Furthermore the patient finds the diet easy to follow and convenient to use. Where fresh milk is unobtainable, spray-dried skim milk powder is recommended.

What does Bisk-o-Lait contain?

Milk Proteins, 21 gm.; Glucose, 2.6 gm.; Yeast, 2 gm.; Dibasic Calcium Phosphate, 2 gm.; Saccharin, 30 mgms.; Vitamin A, 2,500 I.U.; Vitamin D, 1,000 I.U. per 1 oz.
