SURGICAL ELASTIC STOCKINGS

OF EXCEPTIONAL QUALITY

COLBY PRODUCTS, LTD., specialise in the manufacture of high quality Surgical Hosiery and can be counted upon to supply stockings which will give firm support with comfort and a good appearance. Their full normal range includes hose in Superfine Nylon Yarn, Nylon Yarn, Nylon Net and Elastic Yarn.

Nylite is an entirely new addition to the Colby range. It is a lightweight surgical stocking knitted from Nylon Elastic Yarn, which will give reliable support with more than ordinary comfort as it has a particularly soft texture. The stocking is handsome as well as efficient, with a matt finish, that allows it to be worn (in the closed to estyle) without over-hose.

Nylite may be prescribed under the National Health Service.

WHY MORE AND MORE

PLASTERS

 \bigstar Because ZÖPLA plasters were developed in collaboration with some of the leading Hospitals.

★ Because ZOPLA plasters made by Leslies have a 135-year-old reputation for dependability and quality.

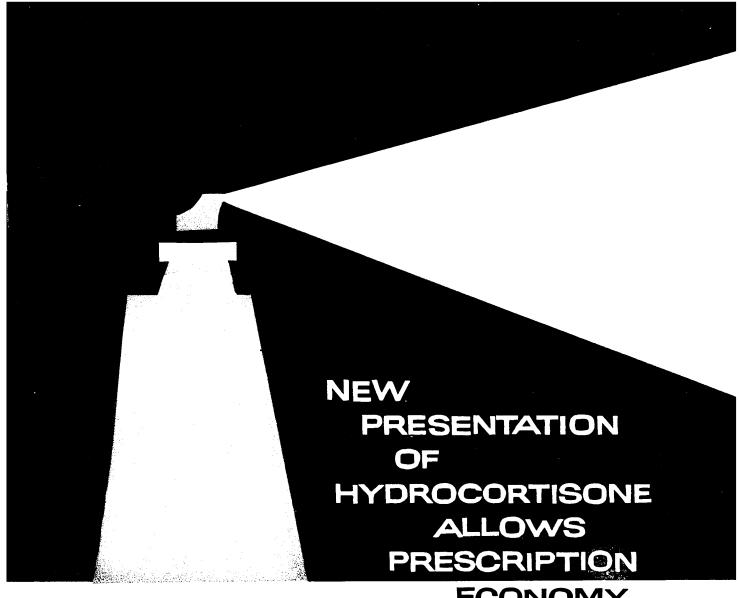

★ Because there is a ZOPLA plaster for every medical and surgical need.

 \bigstar Because ZÖPLA plasters conform to the most rigid medical specifications.

The Zopla range includes self-adhesive strappings, felts, and flexible dressings.

Details of the full range, together with samples, will gladly be sent on request.

ECONOMY

Cortril Spray adds economy to the proved effectiveness of topically applied hydrocortisone. It obviates experiments to find the correct presentation of hydrocortisone for a particular case. It saves the wastage of prescriptions part-used because of unsuitable strength or base. Cortril Spray is the only single preparation suitable for all non-infected dermatoses: moist and weeping or dry and scaling.

brand of hydrocortisone

PRESENTATION Plastic coated glass bottles containing IOO mg. hydrocortisone free alcohol for spray application.

ADMINISTRATION Cortril Spray may be used four or five times a day until the inflammation subsides. For maintenance Cortril Spray should be used once or twice a day. The instructions on the pack should be noted by the patient: shake before use, keep away from direct heat, for external use only, do not spray near the eyes.

THE
ORAL TREATMENT
OF DIABETES

An advance in the therapy of diabetes

Rastinon tablets, developed by Farbwerke Hoechst AG., of Frankfurt/M., under the research No. D860, have now an established place in the therapy of diabetes mellitus. The large volume of clinical work and the number of papers published, reflect the world-wide interest in Rastinon. This work clearly shows that for the suitable patient Rastinon tablets provide a form of therapy which is

Simple, safe, effective and economical

Rastinon is not a "sulphonamide drug," has no anti-bacterial action and does not produce crystalluria. No cases of dyshaemopoiesis or other serious side-effects have been reported among the many thousands of patients satisfactorily controlled for more than two years.

The suitability of a patient for treatment with Rastinon tablets is readily assessed in the diabetic clinic and once stabilised no difficulties have been experienced in controlling the patient. An acute intercurrent infection may necessitate a temporary return to insulin therapy.

DOSAGE

Once stabilised, from one to three tablets a day are normally all that is required to replace the insulin with its concomitant syringe, needles, swabs, and often nursing assistance as well. During the period of stabilistion it has been found that generally from four to eight tablets on the first day, three to six on the second and three to five on the third are sufficient.

The daily amount should be divided into two or three doses and taken during or after meals with a little fluid. Higher doses are not usually more effective and are not recommended as they may occasionally cause hypoglycaemic reactions. The normal regime of urine examination and dietary control remains necessary.

To lessen the possibility of the patient taking a tablet other than Rastinon in error, each tablet is engraved with the name Rastinon and the trade mark of the originators.

PACKS

Bottles of 100 and 500 tablets—each tablet contains 0.5 G. N-Butyl-N'-toluene-p-sulphonylurea (tolbutamide). The basic cost to the N.H.S. of a week's treatment is on average between 3/6d. and 5/3d.

Important Butterworth Publications—

CANCER OF THE SKIN

By J. C. BELISARIO, C.B.E., E.D., M.D., CH.M., D.D.M. Pp. xvi+268+Index. 8 photogravure colour plates, 217 illustrations. 50s. net, by post 1s. 6d. extra.

By its clear discussion of diagnostic procedure and thorough yet concise description of therapeutics, this work points the way to earlier diagnosis, more specific treatment and thus to a lowering of mortality from cancer of the skin. The superb colour photographs, reproduced by photogravure, contribute much to the value and interest of the text.

MODERN TRENDS IN SURGICAL MATERIALS

Edited by LEON GILLIS, M.B.E., M.CH. (ORTH.), F.R.C.S. (ENG.), F.R.C.S. (EDIN.), D.L.O. Pp. x+270+Index. 135 illustrations. 72s. 6d. net, by post 1s. 9d. extra.

This is a detailed examination of any materials used in the body, whether for sutures, artificial limbs and joints, or mesh for filling spaces, with discussion of their manufacture and durability, how and when they may be used and the reaction of the body to them.

MEDICAL LABORATORY INVESTIGATIONS

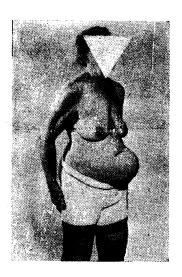

Their Use and Interpretation

By IAN DAWSON, M.A., M.D., M.R.C.P., and WILLIAM GOLDIE, M.A., M.B., F.R.C.P., F.R.C.P.(E.) Pp. xiii+233+Index. 35s. net, by post 2s. extra.

Here is a book for everyone who has to request or to interpret a laboratory investigation. It deals logically with the type and quantity of specimen needed, how it should be obtained, the degree of accuracy to be expected from the testand the significance of the results.

FOR GERIATRIC PATIENTS safe, comfortable, effective HERNIAL SUPPORT

Because each Spencer Support is designed to order to meet the patient's individual needs, results are demonstrably superior.

The patient shown on left, aged 74, developed a left ventral hernia following surgery fourteen years previously. A left inguinal hernia resulted from the long wearing of a cast following a hip injury 3 years ago. "Stock" of a cast following a hip injury 3 years ago. "Stock" supports proved ineffective. A Spencer Support as shown was prescribed with excellent results. Her Spencer gives safe, comfortable and effective control of the hernias-improves and maintains posture-protects and supports the weak muscles of old age. With the aid of her Spencer, the patient runs her household, does all her own work, and—as she says—still has time "to enjoy life."

Prescribe Spencer with confidence for men; women, children-for abdomen, back, breasts. No case is too difficult for Spencer Designers!

running noses...

and nasal congestion

Orally with

Triominic

WANDER

THE NEW CONCEPT FOR RELIEF OF THE COMMON COLD

Relief in minutes—lasts for hours

An orally administered decongestant has much better distribution to the mucous membranes of the respiratory tract than nasal sprays, drops and inhalants, and this "affords opportunity for shrinkage in areas that could not be approached by sprays, drops or actual topical application."*

'TRIOMINIC' "dries" and decongests nasal passages, combats allergic symptoms—with little likelihood of rebound congestion or pathological changes in the nasal mucosa, and without the risk of local overtreatment or "nose drop addiction." Especially valuable for night-time cough caused by postnasal drip.

* Arch. Otolaryng., 1954, 59, 48

Each "timed-release" 'TRIOMINIC' Tablet contains:

Phenylpropanolamine-HCl .. 50 mg.
Mepyramine maleate B.P. .. 25 mg.
Pheniramine maleate 25 mg.
'Triominic' Wander is Schedule 4

Dosage: 1 tablet in the morning, afternoon and in the evening if needed.

An average prescription is 12 tablets.

Packs: Supplied for dispensing in bottles of 50 and 250.

Price: N.H.S. Basic Price for 12 tablets (4 days' treatment) is 2s. 3d.

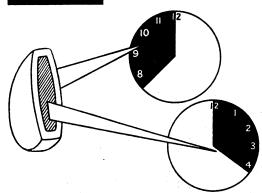

Also Available: 'Triominic' Syrup, for children and those adults who prefer a liquid medication, in bottles of 2 fl. oz. and 20 fl. oz.

(dispensing). N.H.S. Lasic Price for 2 fl. oz. is 1s. 10d.

'Triominic' "timed-release" tablets provide relief in minutes keep nasal passages clear for 6 to 8 hours.

FIRST

the outer layer dissolves within minutes to produce 3 to 4 hours' relief

THEN

the inner core disintegrates to give 3 to 4 more hours' relief

THUS

3 tablets daily "unblock around the clock"

Literature and sample on signed request (S4) of physicians only

M409

Let's

consider children

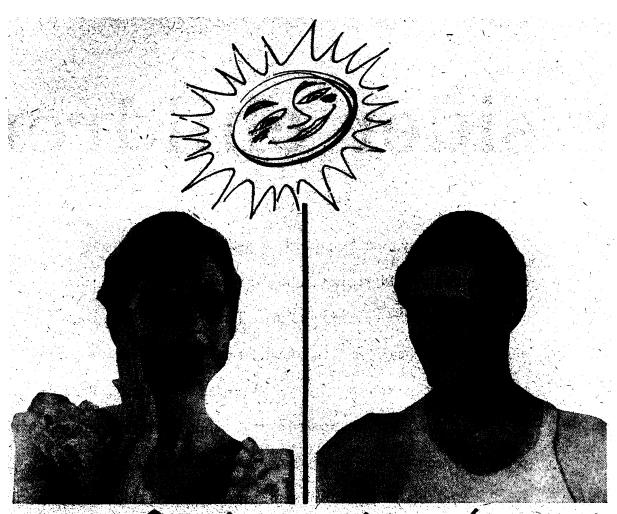

Take young Terry as an example. He's not what you'd normally call an awkward child, yet he can be as unpredictable and difficult as any patient you're ever likely to meet. But his co-operation is most important when penicillin is indicated, for continuous levels are essential. Predictable patient acceptance as well as predictable, effective blood levels go hand in hand when you prescribe oral Penidural. It is the combination of palatability, convenient 6 to 8 hourly, teaspoonful dosage, and reliability that has won this unique penicillin the title of the ideal children's antibiotic.

PACKS:

Suspension in 60 ml. bottles (300,000 units benzathine penicillin per 5 ml. teaspoonful). Paediatric Drops in 10 ml. bottles (complete with dropper delivering 100,000 units).

How Heinz Baby Foods simplify mixed feeding

The days are gone when mixed feeding involved mother in hours of work, sieving and straining meat and vegetables for her baby's dinner.

To-day, she finds it much more simple and pleasant—when you recommend Heinz Baby Foods as soon as baby is 11 or 12 weeks old. Baby takes his food more readily from a calm and relaxed mother, and this should result in happy, contented mealtimes that both mother and baby enjoy. And, with the 25 varieties of Heinz Baby Foods, a mother can give her baby the very best fruits, vegetables and meats all the year round.

All the ingredients used by Heinz are carefully selected, prepared in scrupulously hygienic conditions, and specially cooked to retain the maximum nutritional value. Accustoming baby as early as possible to this wide range of foods, trains growing appetites along healthy lines.

Further information about Heinz Baby Foods will be gladly sent on request. Please write to: H. J. Heinz Company Limited, Harlesden, London N.W.10

a 'wait' of patients...

... winter's contribution to your routine practice... increasing the demand for relief from sore throats and stuffy heads. Then, the simplest, most effective treatment for upper respiratory tract congestion is KARVOL Inhalant Capsules.

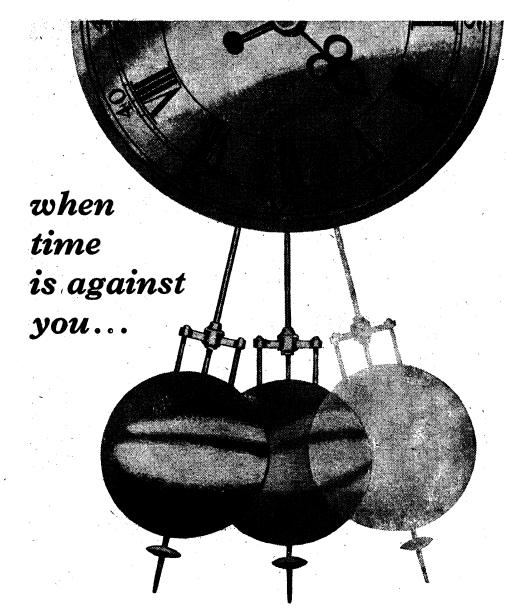

Soothing, decongestant KARVOL is available in convenient single dose capsules. It is readily expressed into hot water or onto handkerchief, pyjamas or pillow without fear of staining.

the new orally active progestational agent the first all-British steroid discovery

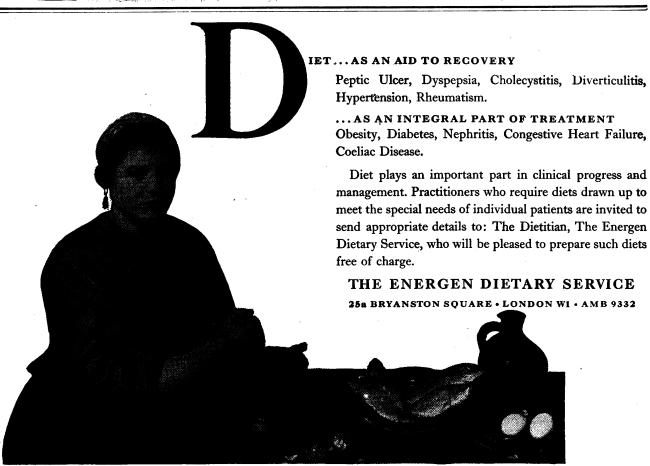

The combined advantages of 'Secrosteron' will make it a distinct and welcome addition to the list of available steroids. It has many advantages. 'Secrosteron' acts as a pure progestational agent. It brings about true secretory changes in the endometrium; and it has no estrogenic or androgenic action. Above all 'Secrosteron' has increased potency over ethisterone and is active in a wide range of conditions, at many times smaller dosage levels. An important aspect is that 'Secrosteron' dosage schemes are so simple—5 mg. three times daily except in the case of Habitual Abortion in which the dosage is 5 mg. daily.

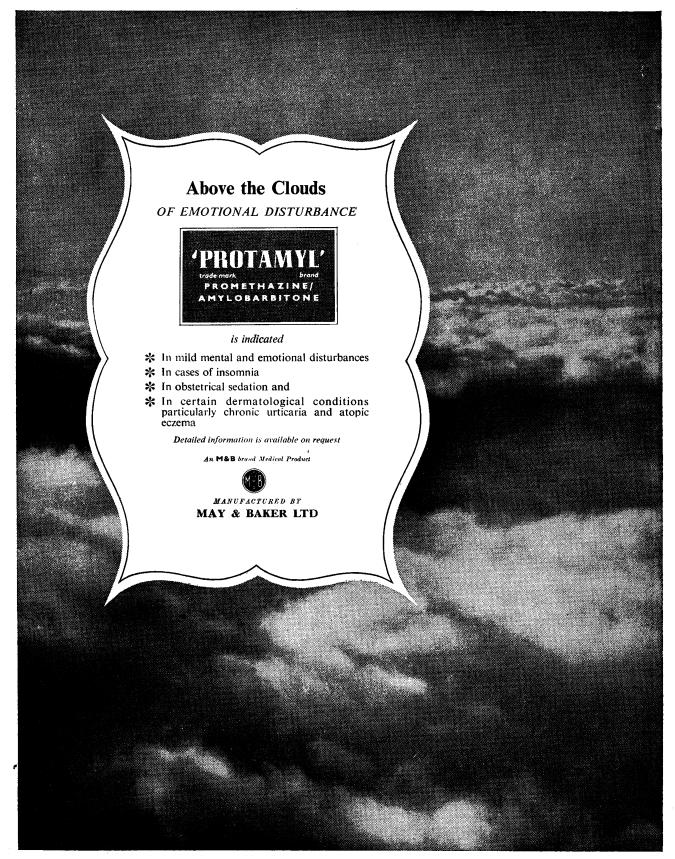

Basic N.H.S. Prices
Tablets 5 mg. Bottle of 30 at 25/Bottle of 100 at 75/-

* We have prepared a Booklet on 'Secrosteron'. Please do not hesitate to write to us for a copy.

a New Era in the treatment of Hypertension

'SALURIC', already universally accepted as the only oral diuretic as effective as mersalyl, possesses the unique and additional property of hypotensive activity. Frequently it may be possible to control blood pressure with 'SALURIC' alone or with the addition of only a sedative or mild hypotensive agent. But when ganglion blocking agents are required in addition, the dosage and administration of these is greatly simplified.

LONGER LIFE FOR HYPERTENSIVES

'INVERSINE' and 'SALURIC' concurrently provide: Smaller dosage of 'INVERSINE'; Smoother control of blood pressure; Freedom from, or diminution in, side-effects usually associated with ganglion blockade.

How supplied:

'INVERSINE': 10 mg. tablets (white, quarter-scored); 2.5 mg. tablets (yellow, half-scored).

'SALURIC': 0.5 G. tablets (half-scored).

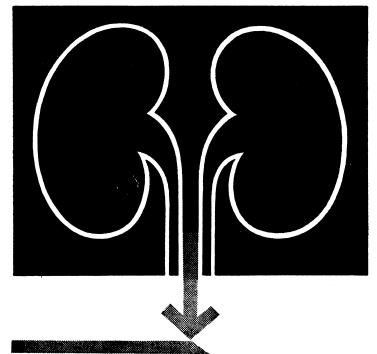

Inversine' and 'Saluric' are not supplied in a combined tablet.
'INVERSINE' and 'SALURIC' were discovered and developed in the Merch Sharp & Dohne Research Laboratories, and are manufactured in England exclusively by the Merch Sharp & Dohnie Organisation. 'Inversine' and 'Saluric' are Registered Trade Marks.'

Please consult literature for dosage.

MERCK SHARP & DOHME LIMITED, HODDESDON, HERTS

The most potent diuretic Fully active orally

Esidrex_{***}

For oedema and hypertension

Well tolerated (non-mercurial).
Suitable for all grades of oedema.
Largely supersedes injections.
Antihypertensive effect.

Indications include acute and chronic heart failure; toxaemia and oedema of pregnancy; renal, hepatic, drug-induced and premenstrual oedema; and obesity with fluid retention.

The dosage range of Esidrex is usually 1-4 tablets (25 to 100 mg.) daily taken in two doses, after breakfast and after lunch.

A card giving full details of precautions and dosage is available on request.

Tablets of 25 mg. 6-chloro-7-sulphamyl-3,4-dihydro-1, 2,4-benzothiadiazine-1,1-dioxide (hydrochlorothiazide) in bottles of 25, 100 and 500.

Esidrex is a product of CIBA Research.

Basic N.H.S. cost of treatment varies from 4d. to 1/- (+P.T.) per day

You have good reason to prescribe Carnation Milk

"The Feeding of Infants"—a book specially prepared for doctors—together with reprints of clinical investigations and Carnation feeding charts are available from: The Medical Dept., General Milk Products Ltd., Bush House, Aldwych, London, W.C.2. CARNATION solves mother's problems in feed preparation—as well as meeting your exacting requirements. Clinical studies have proved that babies thrive on Carnation.

You can prescribe Carnation with complete confidence for the following reasons:—

DIGESTIBILITY Carnation Milk ensures maximum digestibility because of soft granular curds and homogenized butterfat.

STERILITY Carnation Milk is sterilized after the tins are sealed. No matter when or where Carnation is bought, its sterility is assured.

EASE OF PREPARATION Carnation Milk saves time in preparation of feeds because it blends *instantly* with boiled water.

FLEXIBILITY Carnation Milk feeds are easily adjusted to individual requirements.

ACCURACY Carnation Milk is a liquid and provides for accurate measurement of every feed.

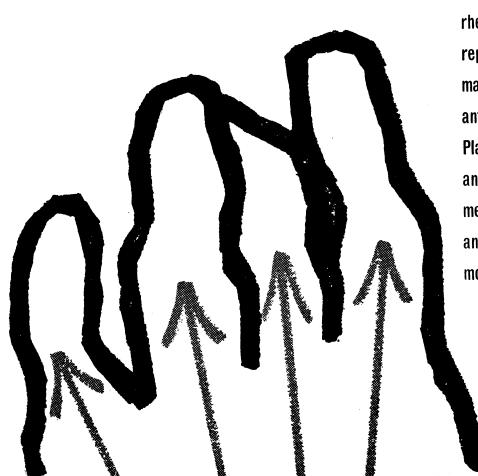

VITAMIN D INCREASE Carnation Milk is adequately fortified to a safe level with Vitamin D.

UNIFORMITY Carnation Milk is uniform because every tin is processed to precise standards of butterfat and total solids.

These advantages uphold the highest standards of Infant Feeding when you prescribe Carnation.

For the best start in life Carnation

70 per cent of rheumatoid patients are reported as showing major improvement with anti-malarial drugs. Plaquenil is the newest and least toxic member of this group and clinical reports are most encouraging

When you examine

TAMPAX

please note ...

HAVE YOU EXAMINED TAMPAX RECENTLY? Professional samples and literature will gladly be supplied by Medical Department, Tampax Limited, Belvue Road, Northolt, Greenford, Middlesex.

Fine surgical cotton forms the Tampax tampon—the kind a surgeon might use for a surgical dressing. Its contact with the resilient stratified squamous epithelium of the vaginal canal—ever protectingly moistened by its own transudate and by uterine secretion—is altogether gentle and non-irritant.

Yet its superior absorbency affords a safe margin of protection without bulky packing—compression of the tampon permitting easy insertion, and flat expansion conforming it to the vaginal cross-section. Indeed, so comfortable is Tampax *in situ*, (when correctly placed well within the introitus) that the user is hardly aware of its presence.

Designed by a physician, Tampax is supplied in two absorbencies (Regular and Super) to meet individual requirements. Its central stitching precludes the possibility of disintegration, and its positive "wick" action prevents any blocking of the flow.

The comfort, convenience, and freedom it affords your patients can reflect your own judgment as to the hygienic superiority of this internal form of menstrual protection.

Tampax provides better physical management of menstrual hygiene

FOR SUPPRESSION OF

Severe Se

- 'PHYSEPTONE' LINCTUS has a direct suppressive action on the cough reflex. It is especially valuable in such conditions as bronchiectasis, pertussis, post-influenzal tracheitis, chronic passive pulmonary congestion, pulmonary tuberculosis, and other conditions requiring a powerful cough suppressant.
- 'PHYSEPTONE' LINCTUS carries negligible risk of addiction, does not constipate and seldom causes other side-reactions.
- 'PHYSEPTONE' LIGICTUS contains 2 mgm. of methadone hydrochloride in each fluid drachm (the recommended adult dose). For children it should be diluted with simple syrup in the proportion of one part linctus and seven parts syrup—one to two teaspoonfuls (0.25—0.5 mgm.) of this diluted linctus to be given according to the age of the child.

4 days a week NORMAL FOOD 3 days a week

FORTIFIED DIET

A scientifically balanced food supplement which acts normally and safely!

Medical practitioners will perhaps agree that the correct basis of slimming is to reduce calorie intake but to maintain the dietary essentials, namely protein, vitamins and minerals. Some dieting procedures, while scientifically correct, are unpleasant or inconvenient and may even bring discomfort. It is a common experience that slimming is mainly a matter of strength of character, and any dietary scheme which helps to make slimming a pleasant and convenient procedure has obvious advantages. LARSON'S SWEDISH MILK DIET achieves all these objects and in addition permits great flexibility in application. In this system each of the four daily meals is considered as a unit which can be replaced, as required, by an attractive, conveniently prepared and cheap food. If all four meals are replaced by Swedish Milk Diet the daily calorie intake is reduced to about 650, but all the vitamin and mineral requirements and roughly half the protein requirements for the day are met. In the full system the four meals on three days a week, say Monday, Wednesday and Friday, are replaced by the diet, but individual meals can be replaced at any time as desired. For example, the Swedish Milk Diet can be taken in place of breakfast and tea, or in place of lunch and tea every day.

The diet is simplicity itself. It is prepared by adding a heaped teaspoonful of the supplement to a glass (8 fluid ozs.) of milk which may be cold, warm or hot as desired. Flavouring can be added if wished. The composition of the LARSON's SWEDISH MILK DIET is as follows:

One heaped teaspoonful with an 8 ounce glass of milk taken four times daily supplies:-

3 grms. Calcium . . . over 100% M.D.R.* 3 grms. Phosphorus . . . over 100% M.D.R.

2,500 International Units Vitamin A . . . 50% M.D.R.

200 International Units Vitamin D . . . 50% M.D.R.

1.2 mg. Vitamin B₁ . . . 100% M.D.R.

2 mg. Vitamin B₂ . . . 100% M.D.R.

6 mg. Nicotinamide . . . 50% M.D.R.

50 gm. Carbohydrate

34 gm. Fat

Equivalent to 650 Calories

*M.D.R. means adult Minimum Daily Requirement. The minimum daily requirement for vitamin B₆ and calcium pantothenate has yet to be established.

It will thus be seen that the diet is not only medically and scientifically sound in principle, but is very convenient to use. Milk can be obtained anywhere and travellers can easily take with them sufficient supplement for their journey. On those rare occasions when milk cannot be obtained, milk powder can readily be used as a substitute.

0.1 mg. Vitamin B₆

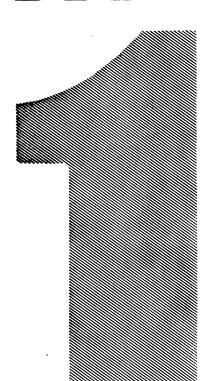

One ounce of powder should be reconstituted in seven fluid ounces of water, and the supplement then added in the usual way. Spraydried powder is recommended, as it is more easily reconstituted, and if spray-dried skim milk is used, there will, of course, be a further reduction in calorie intake.

A practical reference manual on contraception

modern contraceptive technique

available free to all doctors

The Report of the Royal Commission on Population (1949) states:

"... there is nothing inherently wrong in the use of mechanical methods of contraception... public policy should be based on acceptance of voluntary parenthood and contraception."

These words give authoritative support to the use of conception control methods as a means of planning the size of the family.

MODERN CONTRACEPTIVE TECHNIQUE presents a concise and compact survey of methods commonly used. There are notes on methods which have medical approval, and also on others which are medically contra-indicated.

TO GET YOUR COPY

simply write "Modern Contraceptive Technique" and "Planned Families" on your letter-heading, and post it to the address below.

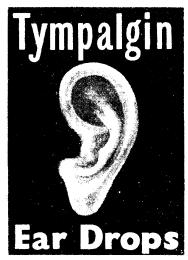

FOR THE USE OF PATIENTS

PLANNED FAMILIES contains an explanation of contraceptive techniques, written in non-technical terms. Any number of copies will be supplied to doctors for distribution to their patients.

Anaemia of Pregnancy

It has been generally accepted that the incidence of megaloblastic anaemia of pregnancy in this country is very low. Reports indicate, however, that this type of anaemia may occur more frequently than has been suspected hitherto, but remain undetected in many cases. These observations suggest that it may be advisable to administer folic acid to all women in the last trimester of pregnancy.

Marmite yeast extract is a source of all known members of the vitamin B complex and has been used with conspicuous success in the treatment of nutritional megaloblastic anaemia of pregnancy. Its haemopoietic potency may be associated with the folic or folinic acid fraction. Marmite is readily incorporated in the diet and its pleasant taste ensures easy administration.

* Doubleacting

fights both Trichomonas & Monilia

in vaginal therapy

* It has been stated that with acetarsol and sulphonamide preparations, Trichomonas and other infecting organisms are quickly destroyed, leaving the vagina clear for Monilia, which seems to flourish on the pessary debris, particularly those with a carbohydrate base. This, however, does not occur with Penotrane because of its dual activity.

Composition: PENOTRANE is the phenylmercuric salt of dinaphthylmethane disulphonic acid, coupling powerful trichomonacidal, fungicidal and bactericidal activity with deeply penetrative properties.

Advantages: PENOTRANE gives unique penetration of living tissue, and its wide range of activities is actually increased in the presence of blood and vaginal mucus. It reduces the risk of relapse to an absolute minimum. Both Penotrane Pessaries and Vaginal Cream are buffered to maintain normal vaginal acidity.

Availability:

PENOTRANE: Applicator Sets—containing Penotrane Vaginal Cream and disposable applicators.

Detergent — Bottles of 100, 500 and 2,000 c.c.

Jelly - Tubes of 1 oz.

Pessaries - Cartons of 15 and

Polythene In-Powder sufflating Containers.

Tincture — Bottles of 15, 100 500 and 2,000 c.c.

The richest source of natural vitamin **G**

Delrosa rose hip syrup is the ideal medium for the administration of Vitamin C. Babies tolerate it more readily than orange juice, and children of all ages enjoy its palatable flavour. Delrosa is made from rosehips, the richest source of Natural Vitamin C. It contains nearly three times as much Vitamin C as blackcurrant syrup B.P.C. and three times as much as fresh orange juice.

We shall be pleased to send a full size bottle for clinical trial, on request.

Youth, nutrition, and supplementary foods

It is generally agreed that all children and adolescents need a supplemented diet, and, for this purpose, **Virol** can claim to provide the additional nutrients that are so essential. It can be recommended with the utmost confidence for building up the resistance of all age groups against winter ailments.

Virol is made from Malt Extract, Refined edible fat,

Maltose, Malto-dextrins, Cane sugar, Glucose, Egg, Orange juice and mineral salts.

Every ounce of **Virol** contains: Vitamin A 1500 i.u.; Vitamin D 500 i.u.; Vitamin B₁ (Aneurin) 0.4 mg.; Niacin (P.P. Vitamin) 4.5 mg.; Iron 8.0 mg.; Iodine

75 micro-g. (3 teaspoonsful of **Virol** equal 1 ounce.)

APPOINTMENTS

Applicants should state name, address, age, nationality, qualifications, and enclose (unless otherwise specified) one copy each of 3 recent testimonials with short statement of experience and appointments held.

Applications should be sent at once if no closing date is given.

House Officers should submit a separate application for each post for which they apply.

Canvassing in any form will disqualify.

*SERVICE MEMBERS may have difficulty in supplying recent testimonials, but this should not deter them from applying.

A fully registered medical practitioner who is liable for National Service must obtain deferment recruitment in writing from the Central Medical Recruitment Committee or (in Scotland) Scottish Central Medical Recruitment Committee before accepting any civilian appointment.

The position of provisionally registered medical practitioners who are liable for National rice has been made clear in a notice sent to them by the Ministry of Labour and National

SALARY SCALES OF JUNIOR GRADES OF HOSPITAL MEDICAL STAFF

Registrar Grades, Whole-time

(a) REGISTRAR: Posts obtained normally not less than two years after registration as a medical practitioner and held normally for two years: £972. 8s. per annum in the first year; £1,103.19s. per annum in the second and any subsequent years. If the post is resident a deduction of £170 per annum is made.

(b) SENIOR REGISTRAR: Posts obtained normally not less than four years after registration as a medical practitioner and held normally for four years; £1,258 8s. per annum in the first year; £1,372 16s. per annum in the second year; £1,487 4s. per annum in the third year; £1,601 12s. per annum in any subsequent years. If the post is resident a deduction of £200 per annum is made,

Other Grades, Whole-time (a) HOUSE OFFICERS:

(i) Provisionally registered medical practitioners: £486 4s. per annum for the first post held; £543 8s. per annum for the second and all subsequent posts held;

provided that the employing authority (subject in the case of a Hospital Management Committee to the consent of the Regional Hospital Board) shall have discretion to determine that the remuneration of any officer holding his first post in the National Health Service as a House Officer shall be £543 8s. per annum if they are satisfied that the officer has held at least one hospital post outside, of not less than six months' duration, involving clinical responsibilities equivalent to those of house posts in the National Health Service and supervised by appropriate specialist staff.

(ii) Fully registered medical practitioners: £600 12s. per annum for any post held;

provided that in exceptional circumstances, subject to the consent of the Minister, this rate may be exceeded by up to £50 per annum where a post cannot be filled otherwise.

In each case under sub-sections (i) and (ii) above, a deduction of £125 per annum in respect of board and lodging and other services provided shall be made and each post shall be tenable for six months.

(b) SENIOR HOUSE OFFICER: Posts obtained by fully registered medical practitioners, and held normally for one year only: £852 6s. per annum. If the post is resident a deduction of £150 per annum is made.

(c) JUNIOR HOSPITAL MEDICAL OFFICER: Officers who have held house appointments but who are neither Senior House Officers nor in one of the registrar grades, who have less responsibility than other hospital officers of non-consultant status, and who have been appointed for a limited or an indefinite period, not less than one year after full registration as a medical practitioner: £886 12s. by £57 4s. to £1,229 16s. per annum. If the post is resident a deduction of £170 per annum is made.

ALL NATIONAL HEALTH SERVICE HOSPITAL APPOINTMENTS ARE IN ACCORDANCE WITH THE TERMS AND CONDITIONS OF SERVICE OF HOSPITAL MEDICAL STAFF

Any advertisements appearing in this issue for posts in the hospital service which quote the rates of salary which obtained before the recent percentage increases are published on the assumption that the employing authorities will make the necessary adjustments. (29/12/58)

A. Williamson, Secretary, Otago Hospital Board, P.O. Box 946. Dunedin, New Zealand. (3496)

OVERSEA (Wanted)

M.R.C.P., AGED 31, SINGLE, JEWISH, Internal Medicine and Paediatrics, requires Assistantship in Canada.—Box 1715, B.M.J.

UNIVERSITY AND RESEARCH APPOINTMENTS, etc.

THE ROYAL SOCIETY

LOCKE RESEARCH FELLOWSHIP

LOCKE RESEARCH FELLOWSHIP

Applications are invited by the Council of the Royal Society for a Locke Research Fellowship, tenable at any place approved by the Council of the Royal Society, for research in the general field of experimental physiology and pharmacology. Candidates should supply the usual personal details and give the names of two referees. Testimonials will not be considered. Applicants and referees at a distance may write direct to the address given below, without first obtaining forms. The subject of the proposed research and the place at which it would be carried out, together with the name of the Head of the Department, whose permission should be first obtained, must be stated. The appointment falls into the category of the Society's research fellowships, which are intended for younger persons. It will be for two years in the first instance, from October 1, 1959, or a date to be arranged, and may be renewed annually for such periods as the Council may determine. It will be subject to the conditions governing Royal Society Research Appointments. The stipend will be in the range from £1,450 to £1,850 per annum, depending upon qualifications. There will be superannuation benefits, to which the society will contribute a sum equivalent to 10% of the annual stipend. Children's allowances are payable. Application should be made on forms to be obtained from the Assistant Secretary, the Royal Society, Burlington House. London, W.1, and should be received not later than March 31, 1959. (3325)

MEDICAL RESEARCH COUNCIL OF IRELAND

ELI LILLY TRAVELLING **FELLOWSHIP**

Applications are invited from qualified practitioners, who are nationals of the Republic of Ireland, for one Eli Lilly Travelling Fellowship, tenable in the United States af America. The Fellowship allows for one year of postgraduate study commencing in September, 1959. The preferred age of candidates is 25-35 years. and the closing date for entries is April 30. Application forms and full particulars may be obtained from:

The Secretary. Medical Research Council of Ireland, 50, Merrion Square, Dublin.

THE CENTRAL COUNCIL FOR HEALTH EDUCATION

Applications invited for the whole-time appoint-DEPUTY MEDICAL DIRECTOR

within the salary range of £1,520 by £50 to £1,955. Candidates should be registered medical practitioners with a Diploma in Public Health and with experience of public health work under a local authority; they should also have had some experience of lecturing to professional and lay audiences. Application forms and full particulars of the duties and conditions of employment may be obtained from the Medical Director, The Central Council for Health Education, Tavistock House North, Tavistock Square, London, W.C.1, and should be returned to him, together with the names of three persons to whom reference may be made, not later than March 2, 1959.

THE ROYAL FREE HOSPITAL

Applications are invited for the whole-time post of

RESEARCH ASSISTANT

RESEARCH ASSISTANT

(British Empire Cancer Campaign) for investigations on the metabolic changes resulting from hypophysectomy and on hormone-sensitivity of tumours. Candidates should have had laboratory experience in chemical pathology, endocrinology or tissue metabolism. Med.cal qualification preferred. The status of the post is about that of Lecturer, the starting salary £1,100 to £1,500 per annum, according to qualifications and experience. The post is vacant from April 10, and applications should be sent, by March 2, to the Department of Chemical Pathology, Royal Free Hospital, London, W.C.1, whence further particulars can be obtained. (3502) obtained.

THE ROYAL SOCIETY

STOTHERT RESEARCH FELLOWSHIP

STOTHERT RESEARCH FELLOWSHIP

Applications are invited by the Council of the Royal Society for a Stothert Research Fellowship in the field of Medicine, including the sciences on which medical knowledge is based. The Fellowship will be tenable in any hospital, medical school or other appropriate research institution or university department in the British Isles or at any other place approved by the Council of the Royal Society. Candidates, who must be of British nationality, should supply the usual personal details and give the names of two referees. Testimonials will not be considered. Applicants and referees at a distance may write direct to the address given below without first obtaining forms. The subject of the proposed research, and the place at which it would be carried out, together with the name of the Head of the Department, whose consent should first be obtained, must be stated. The appointment, which is in the category of the Society's research appointments which are intended for young persons who show exceptional promise in research, is tenable for two years in the first instance from October 1, 1959, and may be renewed annually up to a total of four years. The stipend will be in the range from £850 to £1,050, depending upon qualifications. There will be superannuation benefits, to which the successful candidate will be required to contribute 5% of annual stipend. Children's allowances are payable. Application should be made on forms to be obtained from the Assistant Secretary, the Royal Society, Burlington House, London, W.1, and should be received not later than March 31, 1959.

CLINICAL TRIALS

Applications are invited from registered medical practitioners of wide clinical experience for a vacancy in the Medical Department of a major Pharmaceutical Company.

The post, which is a new one, will entail responsibility for arranging clinical investigations and thus making medical evaluation of the Company's pharmaceutical products. This will concern, to some extent, established preparations but will largely deal with new products still in the development stage.

A vigorous mental outlook is essential and the work involves considerable travelling within the United Kingdom.

In addition to those in other branches of medicine, regular Medical Officers who are presently leaving one of the Services are invited to apply if they consider they have the necessary qualifications. Salary according to experience and qualifications, but not less than £1,750 per annum. Company operates a noncontributory Pension Scheme. Please apply to the Medical Director, Box 1692, B.M.J.

The improved London Hospital eyeless needle combines the traditional safety of stainless steel with a new standard in the several qualities required by surgeons.

These eyeless needles are the result of new methods of manufacture and are available in the London Hospital standard range.

Improved temper
Sharper points
Maximum strength of join
No hilt distortion
Smallest ratio of needle diameter to size of catgut — minimizing tissue trauma.

London Hospital EYELESS NEEDLES
