## "IMPROVED THERAPY FOR PEPTIC ULCER"

Extract reprinted from the *American Journal of Gastroenterology*, (1957) 28, 439.

"The medication investigated is known as Roter tablets . . . The dosage employed in the treatment of gastric or duodenal ulcer was 2 tablets, taken three times a day with tepid water immediately after meals . . . this therapy is applicable to ambulatory patients."

### SUMMARY

"In a series of 155 cases of peptic ulcer treated with . . . (Roter) tablets for three to six weeks, there was immediate relief of pain in 92 per cent of cases and roentgenological healing of the ulcer in 81 per cent. The average weight gain was 7.9 lbs. and occult blood disappeared from the stools in all of the six cases in which it was found.

"The benefit provided by the medication is attributed to the minute particulation of the bismuth subnitrate, produced by a special process of trituration in association with a synergistic antacid combination.

"The special features of this medication are immediate and prolonged relief of pain, correction of gastric hyperacidity, absence of side reactions, effectiveness for ambulatory patients, and early healing of the ulcer in most cases.

"There was no acid rebound in therapeutic dosage and no adverse effects were reported."

# The esters of NICOTINIC, SALICYLIC and p-AMINO BENZOIC acids bring relief to cases of arthritis and rheumatism

IN CASES of soft-tissue rheumatism, and arthritic disorders, many doctors are tending more and more to regard Transvasin as an indispensable adjuvant to treatment.

For Transvasin is composed of the esters of nicotinic, salicylic and p-aminobenzoic acids. These esters readily pass the skin barrier in therapeutic quantities, and so enable an effective concentration of drugs to be built up where they are needed.\*

Transvasin not only induces vasodilation of the skin with a superficial erythema, but also brings about a deep hyperaemia of the underlying tissues. It is non-irritant and can be safely used on delicate skins.

It is now being widely prescribed, with successful clinical results. Since a very small quantity is sufficient for each application, the cost of treatment is extremely low.

and without drugs is to provide an attractive, readily assimilable dietary supplement of high calorie value. Wate-on does this by incorporating large amounts of a vegetable oil which is rich in readily assimilable, highly unsaturated fatty acids, and glucose which is the most easily assimilated type of carbohydrate. The physiological advantages of these two materials have been firmly established by medical research.

Wate-on is also rich in lecithin which, in addition to its basic calorie value, is also of high physiological value.

Wate-on is further supplemented by the more important vitamins and minerals.

## DUST-BORNE CROSS-INFECTION

### The problem

A disquieting situation arising in hospitals throughout the country is the closure of wards due to dust-borne cross-infection. The floors act as a depository for dust and dirt (whether by settlement or displacement) and bacteria-laden particles can be seriously disturbed by brooms, mops or non-approved polishing and vacuum cleaning machines.

### The solution

Medical research has established that suitable, controlled conditions can help to eliminate or reduce to acceptable proportions the risk of cross-infection from pathogenic bacteria.

Now, for the first time, a floor cleaning machine has been developed which makes a positive contribution towards overcoming the risk of cross-infection. This machine, the

Columbus Dixon Model III Suction Polisher and Cleaner, has undergone laboratory tests at a London Hospital, and the results of these tests are now available in our new publication. The detailed case-history of the outbreak of cross-infection, which prompted the development and testing of this machine, has already been published.\*

\*THE LANCET (1958), ii 713.

Micro-photographs, reproduced top left, illustrate the reduction in the bacterial count where the new COLUMBUS Machine, with two-stage dust control and disposable dust-bag, was employed.

A Blood Agar test plate is clipped in position on controlled exhaust outlet. This ensured that the test covered maximum possible pollution.

A Columbus-Dixon Suction Polisher being subjected to one of a series of tests.

Contaminated plates were incubated for the appropriate period. Following the three timed tests, counts of three, one and two bacterial colonies only were recorded.

The COLUMBUS SUCTION POLISHER AND CLEANER, which has been used successfully in hospitals for 25 years, controls and traps 98% of all floor dust and dirt. This new patented two-stage dust-bag canalises dust flow into a separate protected chamber, preventing fall-out or drop-back of dust, the disposable bag trapping bacteria to an effective degree. High speed brushes work in an unrestricted vacuum field giving 360° all round suction. A designed unit for high power suction polishing and cleaning, the new COLUMBUS is the most advanced Suction Polisher and Cleaner in the World.

the new orally active progestational agent  
the first all-British steroid discovery

The combined advantages of 'Secrosteron' will make it a distinct and welcome addition to the list of available steroids. It has *many* advantages. 'Secrosteron' acts as a pure progestational agent. It brings about true secretory changes in the endometrium; and it has no oestrogenic or androgenic action. Above all 'Secrosteron' has increased potency over ethisterone and is active in a wide range of conditions, at many times smaller dosage levels. An important aspect is that 'Secrosteron' dosage schemes are so simple—5 mg. three times daily except in the case of Habitual Abortion in which the dosage is 5 mg. daily.

# 'Decadron'

... a leap beyond  
previously available steroids

'DECADRON' is a completely new synthetic corticosteroid discovered in the Merck Sharp & Dohme Research Laboratories. 'DECADRON' has all the basic therapeutic actions of earlier steroids, but to a much greater degree. Although 'DECADRON' is

35 times more potent than cortisone,  
7 to 10 times more potent than prednisolone, and  
5 times more potent than triamcinolone  
and methylprednisolone,

the incidence of side-effects is the lowest ever reported. 'DECADRON' introduces an important change in steroid therapy, since therapeutic need — *not* side-effects — now becomes the predominant factor.

The change-over to 'DECADRON' from the older steroids is extremely simple and is covered in the literature, available on request.

# Relief of RHEUMATIC PAINS

## with diethylamine salicylate

Algesal is the original skin-penetrating cream containing diethylamine salicylate. In 1955 a report of a clinical trial with Algesal appeared in the British Journal of Physical Medicine<sup>1</sup>. The report concluded:

**"This preparation is a valuable addition to our therapeutic resources for the symptomatic relief of rheumatic pains. Clinical trial of 10% diethylamine salicylate cream (*Algesal*) showed significant relief of soft tissue rheumatic pains as compared with a dummy preparation."**

Experimental work<sup>2</sup> has proved that diethylamine salicylate has a skin penetrative power 3 to 5 times that of other salicylates studied, and is completely non-irritating to the skin.

Over the past 5 years wide medical experience with Algesal has shown that symptomatic relief of common soft-tissue rheumatism can be achieved *without* counter-irritation, by the percutaneous route.

Algesal Balm contains the single active ingredient — 10% diethylamine salicylate — in a soothing vanishing cream.

It is indicated in all the rheumatic syndromes seen in general practice: fibrositis, lumbago, osteoarthritis, tenosynovitis, pain and stiffness after exercise.

Pads of tear-off leaflets describing special remedial exercises are available for giving to patients with lumbo-sacral strain, osteoarthritis of the knee, frozen shoulder and painful foot strain.

LEDERCORT triamcinolone, Lederle's superior corticosteroid was developed to minimize the major deterrents to all previous steroid therapy. It offers increased potency for greater clinical effectiveness, reduced dosage and the distinct advantage of fewer side effects. It provides prolonged therapy more economically, with easier patient management.

LEDERCORT causes no oedema, no hypertension, no psychosis, no weight gain or potassium depletion, and there is a lower incidence of such side effects as peptic ulcer, osteoporosis, epigastric distress, diabetic state, cushinoid "obesity".

*Studies on patients changed from prednisone and prednisolone indicate an average reduction in dosage with LEDERCORT of 50 per cent in bronchial asthma, allergic rhinitis, and in inflammatory and allergic skin diseases.*

## After 4 years

Parentrovite is now established as the accepted vitamin preparation for conditions in which massive doses for injection are indicated, whether in the field of psychiatry or general medicine.

Introduced four years ago for the treatment of coma, delirium, and psychoses from alcohol, barbiturates or other drugs, it has been found equally effective in the prevention and treatment of:

- *Confusional states following severe illness or operation*
- *Gestational and puerperal psychoses*
- *Hepatic dysmetabolism*
- *and psychiatric states in the elderly.*

It is also extensively used in conjunction with electro-convulsive therapy and other drug treatment employed for the more severely affected patient in mental hospitals, the vitamins having a marked effect in promoting the physical health and well-being of the patient and thus permitting the specific measures employed to exert their maximum effect.

**CODIS**  
Analgesic — Antipyretic — Sedative

"CODIS" is a combination of aspirin, phenacetin, and codeine phosphate—a combination well known and accepted medically as giving pain relief in a wide range of conditions.

The unique feature of the tablets is that the aspirin is formulated by a special process to make it soluble in water and is so prepared by a special process for use in the tablets.

**CODIS**  
SOLUBLE ASPIRIN WITH  
CODEINE AND PHENACETIN

# CODIS AND SOLUBILITY

THE GREAT ADVANTAGE of Codis is that it provides a codeine compound tablet in which the aspirin content is soluble in water. (The codeine constituent is also soluble, and the phenacetin is in very fine suspension.)

This is achieved by careful compounding and preparation, resulting in tablets which are quickly absorbed and well tolerated—even in cases of proven intolerance to ordinary (insoluble) aspirin.

To ensure stability and easy identification, the tablets are wrapped in moisture-proof distinctive gold foils of 10 tablets each (dispensing size), or boxes containing five foils of 4 tablets each (public size).

The indications for 'HydroSALURIC' are similar to those for 'Saluric', namely, all conditions in which diuretic therapy is required. Present evidence suggests that 'HydroSALURIC', like 'Saluric', may also be used as adjunctive therapy in the treatment of hypertension.

'HydroSALURIC' may be particularly useful in patients who have failed to give adequate response to mersalyl, or other diuretics.

# YOU, THE DOCTOR —and the *Clarks* story

*Clarks advertising is widespread—in the Press and on Television. Though it is not directed at the medical profession, you have probably seen it in the course of normal reading or viewing. Here we should like to tell you about the thinking which lies behind those advertisements.*

Most doctors seem to agree that a large number of the foot ailments suffered by adults are the result of wearing badly fitting shoes in childhood. Clarks have long been concerned with this problem—in fact, we have built up our business in the sincere belief that something ought to be done about it. We have tried to make available well designed and well constructed shoes for growing children. We make these in a choice of widths and in half-sizes, and we try to see to it that they are sold through authorized stockists with fully trained fittings staffs. We feel so strongly about this that we actually train our stockists' staffs in the art of foot-fitting and in the use of the Clarks Footgauge. Every Clarks specialist has one of these.

This specialised shoe-fitting service is now available in almost every town and city throughout the United Kingdom.

## For diabetics —and others on a special diet

IN RESPONSE TO REPEATED REQUESTS, a special formulation, free of sugar but retaining the Andrews characteristic palatability, has been produced for diabetic patients and others on a special diet.

Andrews Liver Salt is a pleasant-tasting effervescent aperient. Its reliable laxative action is brought about by an effervescent saline combined with magnesium sulphate, the osmotic action of which ensures the retention of sufficient fluid in the bowel for easy and comfortable evacuation.

Andrews is mildly alkaline. It is useful for counteracting stomach acidity, nausea and headaches of the migraine (bilious) type.

# Only Nulacin provides intragastric milk-alkali drip therapy for the ambulatory patient

**"In view of the ineffectiveness of most of the tableted antacids, the milk alkali tablet (Nulacin) would appear to be the antacid of choice for ambulatory therapy."**

(Medical Times 1958, 1, 74)

**NULACIN TABLETS** have been developed so that when allowed to dissolve slowly in the mouth, they give continuous milk-alkali drip therapy and provide a treatment of peptic ulcer and other conditions associated with hyperacidity. The effectiveness of Nulacin therapy has been established by clinical work in many countries. The following are a few references to the literature:

## A cough elixir for the relief of coughs associated with the upper respiratory tract

Over many years this elixir has proved to be one of the best of its kind in the treatment of troublesome and irritating coughs, and particularly acute and chronic bronchitis and cough associated with pulmonary tuberculosis. A  $\frac{1}{2}$  grain of Codeine Phosphate in each fluid drachm has a mild analgesic effect and also helps to induce sleep. The cough reflex is depressed by the action of the Codeine and combined with Terpin Hydrate, Menthol and Pine Oil, together with other essential oils, the resulting elixir assists expectoration, is distinctly sedative and engenders a warming and soothing feeling immediately a dose has been taken.

Applications are invited for the post of **ASSISTANT in the Department of Physiology** Salary scale £700 by £50 to £850 per annum, with superannuation benefit and family allowance where applicable. Candidates should hold an Honours degree in Physiology or an allied subject; a medical degree is desirable but not essential. The successful applicant will be expected to take up duty on October 1, 1959, or earlier if possible. Further particulars may be obtained from the undersigned, with whom applications, giving the names of two referees, should be lodged not later than March 1, 1959.—Charles H. Stewart, Secretary to the University. (3778)

**UNIVERSITY OF EDINBURGH**  
Department of Psychological Medicine

Applications are invited for the post of **LECTURER** in the Department of Psychological Medicine Salary scale £900 by £100 to £1,300; bar: £1,400 by £100 to £1,900 per annum, with placement according to qualifications and experience, and with superannuation benefit and family allowance where applicable. The successful candidate, who must hold higher qualifications, will work in the Professorial Units of the Department at the Jordanburn Nerve Hospital and the Royal Infirmary of Edinburgh. He will be offered an honorary senior registrar appointment with the South-Eastern Regional Hospital Board, Scotland. Sound experience in general medicine, neurology, or paediatrics will compensate for shorter experience in psychiatry. Further particulars may be obtained from the undersigned, with whom applications (six copies), giving the names of two referees, should be lodged not later than February 28, 1959.—Charles H. Stewart, Secretary to the University. (3710)

## ST. ANDREW'S HOSPITAL, NORTHAMPTON For Nervous and Mental Disorders

President: The Earl Spencer. Medical Supt., Thomas Tennent, M.D., F.R.C.P., D.P.H., D.P.M. This Registered Hospital is situated in 130 acres of park and pleasure grounds. Voluntary patients who are suffering from incipient mental disorders or who wish to prevent recurrent attacks of mental trouble, temporary patients and certified patients of both sexes are received for treatment. Careful clinical, biochemical, bacteriological and pathological examinations. Private rooms with special nurses, male or female, in hospital or in one of the numerous villas in grounds of the various branches can be provided.

MOULTON PARK.—Two miles from the main hospital there are several branch establishments and villas situated in a park and farm of 650 acres. Milk, meat, fruit and vegetables are supplied to the hospital from the farm, gardens and orchards of Moulton Park. Occupational therapy is a feature of this branch and patients are given every facility for occupying themselves in farming, gardening and fruit-growing.

WANTAGE HOUSE.—This is a Reception Hospital in detached grounds with a separate entrance to which patients can be admitted. It is equipped with all the apparatus for the complete investigation and treatment of Mental and Nervous Disorders by the most modern methods; insulin treatment is available for suitable cases. There is an Operating Theatre, a Dental Surgery, an X-ray Room, an Ultra-Violet apparatus and a department of Diathermy and High-frequency treatment. It also contains laboratories for biochemical, bacteriological and pathological research. Psychotherapeutic treatment is employed when indicated.

BRYN-Y-NEUADD HALL.—The seaside house of St. Andrew's Hospital is beautifully situated in a park of 330 acres at Llanfairfechan amidst the finest scenery in North Wales. On the North-West side of the estate a mile of sea-coast forms the boundary. Patients may visit this branch for a short seaside change or for longer periods. The hospital has its own private bathing house on the seashore. There is trout-fishing in the park.

At all the branches of the hospital there are cricket grounds, football and hockey grounds, lawn tennis courts (grass and hard courts), croquet grounds, golf courses and bowling greens. Ladies and gentlemen have their own gardens, and facilities are provided for handicrafts such as carpentry, etc. For terms and further particulars apply to the Medical Superintendent (Telephone No.: Northampton 4354 (3 lines)), who can be seen in London by appointment.

## Tancolin

**The Tangerine-flavoured Children's Cough Linctus**

TANCOLIN is specifically formulated for children between the ages of six months and twelve years. The pleasant tangerine flavour makes an immediate appeal even to the most unco-operative child patient.

TANCOLIN is freely prescribable on E.C.10 (Category 3/4). An ever-increasing demand indicates full acceptability as a treatment for the distressing cough associated with the Common Cold, Bronchospasm, Bronchitis and most Inflammatory and Catarrhal affections of the respiratory tract.
