There are plenty of novels about doctors but **NO MARGIN FOR ERROR** is in a class by itself. The author, MADELAINE DUKE, medically trained and a physician's wife, tells a gripping informed story about research workers in the poisoned field of nuclear radiation. A brilliant idea—the possibility of a 'bone-marrow bank'—illustrates the relations between the laboratory and the world of politics, administration and pressure groups.

Effective Penetration of the Intact Skin

Vascutonex Cream

**A TOPICAL SALICYLATE THERAPY WHICH
INCORPORATES TWO ESSENTIAL FACTORS**

**Effective skin
penetration**

**Effective absorption
into lipid tissue**

The first factor is provided by diethylamine salicylate, which has been shown to have an absorption rate 300-500 times greater than methyl salicylate.*

The second factor is glycol salicylate, the slow release of which from fatty tissue prolongs the action of the quicker acting diethylamine salicylate.

The local effect of these salicylates is to begin their therapeutic action at the site of the lesion. By plain inunction, about 80% of the salicylate content of the cream is taken up into the body and about 60% is excreted in the urine.

VASCUTONEX is non-staining, odourless, and contains no counter-irritants — its therapeutic action depending entirely on the effective absorption and anti-rheumatic action of the salicylates in the formula.

INDICATIONS: Fibrositis and pain associated with muscular and articular rheumatism and all soft tissue pain.

TEN YEARS' EXPERIENCE**TELLS YOU****When the patient needs B₁₂****SIMPLY GIVE B₁₂**

When, ten years ago, vitamin B₁₂ was isolated at Glaxo Laboratories, the complete control of pernicious anæmia became a certainty. Much experience since then has proved that the pure vitamin, given as Cytamen Injection or Cytacon Oral Liquid, will produce remission alone and unaided. But . . . there is a qualitative difference in the responses achieved.

In pernicious anæmia pre-treatment serum and tissue levels of B₁₂ are invariably low. The swiftest, most economical and most certain method of restoring these levels to normal . . . and of preventing insidious development of neurological complications . . . is by injection of Cytamen.

When, in very special circumstances, oral treatment of pernicious anæmia is unavoidable, 100 micrograms or more of B₁₂ in solution, daily, as in Cytacon, needs no help from any other substance. The principal use for oral B₁₂ is, of course, in conditions other than pernicious anæmia: deficiency of B₁₂ absorption is not then in question and Cytacon in lower doses is the rational preparation to prescribe.

In short, when your patients need B₁₂—in pernicious anæmia, Cytamen for *certain*—in other conditions, simply Cytacon.

The News Chronicle offers you a chance to get ahead

To build a successful business you need an idea—an idea backed up by shrewdness, commonsense and flair. But you need capital too; enough to make that scheme of yours earn money for you all the rest of your life. Once again the News Chronicle is offering a prize of £5,000 to a man or woman with a bright and promising business idea. It may be an entirely new idea, or it may be an existing one that just needs a financial boost to make it practicable—and profitable. Either way this could be the windfall you've been waiting for! This could be your chance to get ahead.

COULD YOU TURN A £5000 PRIZE INTO A FORTUNE?

EXPLAIN YOUR 'GET AHEAD' PLAN ON T.V!

The contest heats and the Grand Final are all being televised by the B.B.C. on eight successive Tuesday evenings—the first was on March 17th. Did you see it? There will be a special heat for women and there is still time for everyone to enter. If a panel of experts thinks that your idea deserves, on all-round merit, to succeed, you'll be invited to explain it to a nation-wide audience in one of these programmes. During the heats, prizes totalling £2,500 must be won (£1,000 by a woman) and if you are judged the overall winner you will receive more than £5,000 in all!

an essential advance

in chronic

In a trial of 'Stelazine' conducted in sixty chronic schizophrenics who had been ill for 1—32 years, 'improvement became noticeable approximately ten days after commencement of treatment. This was most striking in the fading of hallucinations, cessation of impulsiveness, an awakening of interest, a desire to take part in occupations and recreations of various kinds'.

J. ment. Sci. (1958), **104**, 1195-98.

and acute

'A similar pattern of response was found as with chronic patients, except that the response was more of a total one and all groups of symptoms tended to disappear more simultaneously. In those who had lost it, insight returned at a very early stage . . . Trifluoperazine would appear to be a cheaper and more pleasant method of treating acute paranoid schizophrenia than I.C.T., and just as effective, if not more so.'

It is non-poisonous, non-corrosive and non-staining.

It is well tolerated on the skin and tissues in high concentrations.

It retains a high degree of efficiency in the presence of organic matter.

It is compatible with soap.

Inability to take aspirin . . .

IT HAS BEEN reported (*Brit. med. J.*, 1 : 444, 1957) that of 178 rheumatic patients, 25% could not take plain aspirin in adequate dosage.

Of this 25%, however, the great majority tolerated a modified aspirin such as Paynocil.

Not only are Paynocil tablets usually well tolerated by the stomach (even on the heavy dosage needed for rheumatoid arthritis), but they are extremely palatable, disintegrate instantly on the tongue without water, and cause no discomfort or unpleasant after-sensation.

INTRODUCING DROXALIN GEL

Rapid adsorption of gastric hydrochloric acid is accepted as the most effective method of obtaining relief in peptic ulcer pain.

- * In two minutes a single teaspoonful (3.5 mls.) of DROXALIN GEL will neutralise 50 mls. of N/10 HCl. This is several times the speed of acid adsorbents prepared by usual methods.

Using the well established Droxalin formulation a new and exclusive manufacturing technique has produced in DROXALIN GEL an antacid possessing this significant increase in initial acid adsorption. The advantages of quicker acting DROXALIN GEL in peptic ulcer therapy and hyperacidity will be readily recognised. The palatability of Droxalin Tablets is achieved.

A NEW CONCEPT IN ANTISEPSIS

Iodevan (an iodophor consisting of a 1% aqueous solution of iodine solubilised with a non-ionic surface active agent) presents iodine in a form ideal for disinfection and antiseptics and from which the undesirable properties of iodine are eliminated.

THE ADVANTAGES OF IODEVAN

POWERFUL ANTISEPTIC ACTIVITY: undiluted IODEVAN contains approx. 8,000 parts per million active iodine.

ABSENCE OF TOXICITY: It is non-corrosive and causes no pain when applied to open wounds.

NON-STAINING: It is not permanently staining to clothes or skin.

BUILT-IN INDICATOR: the amber colour of IODEVAN is a reliable indicator of the germicidal potency of the solution.

Something new for coughs

Thorpax syrup

TRADE MARK

a new non-narcotic antitussive

'Thorpax' is a palatable syrup for the relief of unproductive or exhausting coughs. The active constituents are dimethoxanate hydrochloride, a recently discovered potent antitussive, and 'Nilergex'—isothipendyl hydrochloride, the new highly effective non-sedative antihistamine.

A single dose of 'Thorpax' produces an almost immediate response and is effective for 3-5 hours. During this period voluntary clear-

ing of the airways remains adequate.

'Thorpax' is well tolerated by patients of all ages and does not cause sedation, respiratory depression, gastric disturbance or constipation.

Being non-narcotic and non-addictive it is eminently suitable for long-term treatment.

EXPERIMENTAL INDICATIONS
Chronic or tension headache, Migraine.

Relief of RHEUMATIC PAINS

with diethylamine salicylate

Algesal is the original skin-penetrating cream containing diethylamine salicylate. In 1955 a report of a clinical trial with Algesal appeared in the British Journal of Physical Medicine¹. The report concluded:

"This preparation is a valuable addition to our therapeutic resources for the symptomatic relief of rheumatic pains. Clinical trial of 10% diethylamine salicylate cream (*Algesal*) showed significant relief of soft tissue rheumatic pains as compared with a dummy preparation."

Experimental work² has proved that diethylamine salicylate has a skin penetrative power 3 to 5 times that of other salicylates studied, and is completely non-irritating to the skin.

Over the past 5 years wide medical experience with Algesal has shown that symptomatic relief of common soft-tissue rheumatism can be achieved *without* counter-irritation, by the percutaneous route.

Algesal Balm contains the single active ingredient — 10% diethylamine salicylate — in a soothing vanishing cream.

It is indicated in all the rheumatic syndromes seen in general practice: fibrositis, lumbago, osteoarthritis, tenosynovitis, pain and stiffness after exercise.

Pads of tear-off leaflets describing special remedial exercises are available for giving to patients with lumbo-sacral strain, osteoarthritis of the knee, frozen shoulder and painful foot strain.

EMERGENCIES IN GENERAL PRACTICE

from the British Medical Journal
470 Pages (cloth bound), with full index

This book deals with medical emergencies in a wide sense; acute clinical emergencies requiring prompt and skilful treatment; conditions such as faints and fits and giddy turns, the careful elucidation of which may mean the difference to a patient between a life of activity and one of restriction; acute psychiatric states; accidents of treatment, such as dangerous reactions to drugs or collapse during anaesthesia; and emergency calls when the doctor is isolated, as on a ship.

It comprises 57 specially commissioned articles which appeared originally in the *British Medical Journal*.

The author of each is an acknowledged authority. This collection, now revised by the authors, will be of value not only to general practitioners but also to senior students, house-physicians, house-surgeons, and to those supervising their work in hospitals.
