### Rely on Rybar for Instant Relief

Ever increasing numbers of medical men are relying on Rybarvin Inhalant to combat broncho-spasm. The Ministry of Health have agreed to the prices of Rybar asthma inhalants.

RYBARVIN brings relief. Consistently, often spectacularly, attacks are cut short and their frequency lessened. Free from excess acid, nonirritant and non-habit-forming, it is an ideal inhalant for all asthmatics, young and old.

# **Only Nulacin** provides intragastric milk-alkali drip therapy for the ambulatory patient

66 In view of the ineffectiveness of most of the tableted antacids, the milk alkali tablet (Nulacin) would appear to be the antacid of choice for ambulatory therapy.99

(*Medical Times* 1958, **1**, 74)

**NULACIN TABLETS** have been developed so that when allowed to dissolve slowly in the mouth, they give continuous milk-alkali drip therapy and provide a treatment of peptic ulcer and other conditions associated with hyperacidity. ### The esters of NICOTINIC, SALICYLIC and

### p-AMINOBENZOIC acids

bring relief to cases of arthritis and rheumatism

N CASES OF soft-tissue rheumatism, and arthritic disorders, many doctors are tending more and more to regard Transvasin as an indispensable adjuvant to treatment.

For Transvasin is composed of the esters of nicotinic, salicylic and p-aminobenzoic acids. These esters readily pass the skin barrier in therapeutic quantities, and so enable an effective concentration of drugs to be built up where they are needed.\*

Transvasin not only induces vasodilation of the skin with a superficial crythema, but also brings about a deep hyperaemia of the underlying tissues. It is non-irritant and can be safely used on delicate skins.

It is now being widely prescribed, with successful clinical results. Since a very small quantity is sufficient for each application, the cost of treatment is extremely low.

Transvasin is available in 1 oz. tubes, basic N.H.S. price 2/6 plus P.T., and is not advertised to the public: Samples and literature will be gladly sent on application.

### an essential advance

### in chronic

In a trial of 'Stelazine' conducted in sixty chronic schizophrenics who had been ill for 1—32 years, 'improvement became noticeable approximately ten days after commencement of treatment. This was most striking in the fading of hallucinations, cessation of impulsiveness, an awakening of interest, a desire to take part in occupations and recreations of various kinds'.

J. ment. Sci. (1958), 104, 1195-98.

### and acute

'A similar pattern of response was found as with chronic patients, except that the response was more of a total one and all groups of symptoms tended to disappear more simultaneously. In those who had lost it, insight returned at a very early stage . . . Trifluoperazine would appear to be a cheaper and more pleasant method of treating acute paranoid schizophrenia than I.C.T., and just as effective, if not more so.'

# IMPROVED THERAPY FOR PEPTIC ULCER"

Extract from the American Journal of Gastroenterology, (1957) 28, 439.

"The medication investigated is known as Roter tablets... The dosage employed in the treatment of gastric or duodenal ulcer was 2 tablets, taken three times a day with tepid water immediately after meals... this therapy is applicable to ambulatory patients."

### SUMMARY

"In a series of 155 cases of peptic ulcer treated with . . . (Roter) tablets for three to six weeks, there was immediate relief of pain in 92 per cent of cases and roentgenological healing of the ulcer in 81 per cent. The average weight gain was 7.9 lbs. and occult blood disappeared from the stools in all of the six cases in which it was found.

"The benefit provided by the medication is attributed to the minute particulation of the bismuth subnitrate, produced by a special process of trituration in association with a synergistic antacid combination.

"The special features of this medication are immediate and prolonged relief of pain, correction of gastric hyperacidity, absence of side reactions, effectiveness for ambulatory patients, and early healing of the ulcer in most cases.

"There was no acid rebound in therapeutic dosage and no adverse effects were reported."

# You have good reason to prescribe Carnation Milk

"The Feeding of Infants"—a book specially prepared for doctors—together with reprints of clinical investigations and Carnation feeding charts are available from: The Medical Dept., General Milk Products Ltd., Bush House, Aldwych, London, W.C.2.

CARNATION solves mother's problems in feed preparation—as well as meeting your exacting requirements. Clinical studies have proved that babies thrive on Carnation.

You can prescribe Carnation with complete confidence for the following reasons:—

**DIGESTIBILITY** Carnation Milk ensures maximum digestibility because of soft granular curds and homogenized butterfat.

**STERILITY** Carnation Milk is sterilized *after* the tins are sealed. No matter when or where Carnation is bought, its sterility is assured.

**EASE OF PREPARATION** Carnation Milk saves time in preparation of feeds because it blends *instantly* with boiled water.

FLEXIBILITY Carnation Milk feeds are easily adjusted to individual requirements.

**ACCURACY** Carnation Milk is a liquid and provides for accurate measurement of every feed.

VITAMIN D INCREASE Carnation Milk is adequately fortified to a safe level with Vitamin D.

**UNIFORMITY** Carnation Milk is uniform because every tin is processed to precise standards of butterfat and total solids.

These advantages uphold the highest standards of Infant Feeding when you prescribe Carnation.

THE GREAT ADVANTAGE of Codis is that it provides a codeine compound tablet in which the aspirin content is soluble in water. (The codeine constituent is also soluble, and the phenacetin is in very fine suspension.)

This is achieved by careful compounding and preparation, resulting in tablets which are quickly absorbed and well tolerated—even in cases of proven intolerance to ordinary (insoluble) aspirin.

To ensure stability and easy identification, the tablets are wrapped in moisture-proof distinctive gold foils of 10 tablets each (dispensing size), or boxes containing five foils of 4 tablets each (public size).

### STRAINS AND SPRAINS...

These minor but incapacitating injuries occur chiefly around the joints. Supportive treatment with Elastoplast porous elastic adhesive bandages is usually the most satisfactory procedure.

All Elastoplast bandages are porous so that while providing firm elastic support with the desired amount of stretch and regain they also permit evaporation of sweat. In order to minimise rucking of bandages and soiling of stockings the adhesive is not spread to the fluffy, protective edges of the bandage. Elastoplast elastic adhesive porous bandages are available in 3-yard lengths and 2",  $2\frac{1}{2}$ ", 3" and 4" widths. Prescribable on Form E.C.10.

For sprains of the lateral ligament of the foot the Elastoplast should be applied from without, inwards, from the base of the toes to the knee. It should be applied as soon after the accident as possible, thus immediately providing firm support and controlling the formation of effusion and haematoma. Small pads of wool or plasticine in the malleolar sulci prevent haematoma formation.

The days are gone when mixed feeding involved mother in hours of work, sieving and straining meat and vegetables for her baby's dinner.

To-day, she finds it much more simple and pleasant—when you recommend Heinz Baby Foods as soon as baby is 11 or 12 weeks old. Baby takes his food more readily from a calm and relaxed mother, and this should result in happy, contented mealtimes that both mother and baby enjoy. And, with the 25 varieties of Heinz Baby Foods, a mother can give her baby the very best fruits, vegetables and meats all the year-round.

All the ingredients used by Heinz are carefully selected, prepared in scrupulously hygienic conditions, and specially cooked to retain the maximum nutritional value. Accustoming baby as early as possible to this wide range of foods, trains growing appetites along healthy lines.

Further information about Heinz Baby Foods will be gladly sent on request. Please write to: H. J. Heinz Company Limited, Harlesden, London N.W.10

### A most valuable addition to DANDRUFF THERAPY

SEBODERM masters DANDRUFF

Seboderm contains 15.6% Cetrimide B.P., recently described as perhaps the most valuable addition to dandruff therapy.

Leaves the scalp free from irritation and the hair soft, silky and clean. A once-weekly treatment is normally sufficient to ensure control.

Seboderm is free from any form of irritant and is therefore valuable and effective in both simple dandruff and seborrhoeic dermatitis.

Professional sample will be gladly sent on request.

## TARCORTIN CREAM

have pronounced advantages over either medicament alone

The established germicidal, stimulating and anti-pruritic properties of tar, in the treatment of sub-acute and refractory skin affections, can now be considerably enhanced by its incorporation with hydrocortisone.

\*Clinical trials have shown that the two medicaments together exert a powerful synergistic action that is far more rapid, more pronounced and complete than the action of either alone.

These two valuable therapeutic agents are presented in a non-greasy, stainless, hydrophilic cream, known as TARCCRTIN.

TARCORTIN CREAM is supplied in 7 grm. and 15 grm. tubes, containing 0.5% Hydrocortisone in a special coal-tar extract.

## An analgesic cream for the treatment of neuromuscular pain

This analgesic cream is very effective in the treatment of fibrositis, muscular pain, lumbago, neuritis, neuralgia and sciatica. Free from objectionable odour, it is formulated to produce a readily absorbed cream, and helps to give rapid relief from pain.

The presence of Methyl Nicotinate produces dilation of the surface blood vessels and allows penetration of the analgesics Glycol Salicylate and Benzocaine.

**B-PAS** (Wander), 4-benzoylamino-2-hydroxybenzoic acid, first introduced by our Research Laboratories in 1948, is the drug of choice in regimens comprising PAS in concurrent therapy.

In the form of its calcium salt, it provides extended bacteriostatic levels, induces only minimal side-effects as compared with sodium PAS, and because of its high acceptability guarantees as far as possible that patients, particularly on domiciliary treatment, do take their medication.

Available in 3.5 g. envelopes and in 1 g. cachets; and as bulk powder.

'B-PASINAH' is available in two

convenient forms:

Powders each containing

How these stockings help the busy Medical man...

EVERY professional man knows the woman patient who resists advice to take preventive action over leg afflictions. . . and later, helps to over-crowd his surgery, when her condition becomes painfully serious.

Lastonet Elastic Net Stockings are of great assistance in preventing such occurrences. Their excellent appearance (they are virtually invisible under ordinary nylons)—their exceptional airycool comfort, their perfect, made-to-measure individual fit—all recommend them to women who object to wearing ordinary surgical stockings.

#### New, Light-Resistant Rubber

The recent incorporation of a new, light-resistant rubber in Lastonet lessens perishing, gives longer life and increased retention of fit. A longer lasting stocking reduces frequency of request for prescriptions — and so Lastonet helps reduce your surgery 'queue'... besides economising in N.H.S. prescription costs. Lastonet are available in thigh or knee length.

## **MARMITE**

yeast extract

contains

Riboflavin (vitamin B<sub>2</sub>) 1.5 mg. per oz. Niacin (nicotinic acid) 16.5 mg. per oz.

## In Pregnancy

During pregnancy the demands on all maternal resources are increased. Diet, therefore, assumes a particular importance during this period. Marmite, taken as a drink or in sandwiches, or used in cooking, is popular among expectant mothers and raises the level of the B vitamins in their diet.

## In Geriatrics

The opinion has been expressed that the need for vitamins, especially those of the B complex, is increased in frail elderly persons. These essential nutrients seem to exert a beneficial effect even when the diet appears to be adequate. Marmite is a yeast extract containing all the known factors of the vitamin B group; it can easily be incorporated in the diet and is economical to use.
