

How well do you know the Concerto in E \flat ?

... or any other famous work? Do you know every grace note—every subtle change in harmony? If you do, you are either an expert score reader, a regular concert-goer or the owner of an Avantic DL7-35 Power Amplifier.

This amplifier has been acclaimed by the critics (see *The Gramophone*, October 1956 and *Gramophone Record Review*, April 1957) as being faultless in design, construction and performance. It has a peak power output of 54 watts and a distortion content of less than 0.05% at 20 watts sine wave output. The power response at this level is linear from 30 c/s. to 20 kc/s. With a damping factor of 50 and a rise time of only 5 microseconds, an excellent transient response is assured.

Price: £33

The Avantic SP21 Stereophonic Pre-amplifier Control Unit is now available for use with either one or two DL7-35 Amplifiers for monophonic or stereophonic reproduction. It has 6 separate inputs for each channel and 9 controls.

Price: £28. 10s.

Clinical Biochemical Methods

By A. L. TARNOKY

Biochemist, Royal Berkshire Hospital

A bench-book for the pathology laboratory, giving clearly arranged instructions for the tests most commonly encountered in clinical practice.

50s. net

This is a very useful manual . . . and it should have a wide appeal to chemical pathologists throughout the country. Medical laboratory technicians working for their diplomas in chemical pathology will find it invaluable.

British Medical Journal.

Dr. Tarnoky has produced here masterpieces of concise clarity. This book will be particularly useful in hospital laboratories which do not include a biochemical department and where a morbid anatomist must take responsibility for the reliable biochemical investigation of hospital patients.

Free as the air? For thousands of chronic bronchitics and asthmatics

fresh air

is not free

Air is neither fresh nor free for most chronic bronchitics and asthmatics. They have to pay dearly for the polluted atmosphere of the towns and cities in which they live. Breathing causes them great effort—the strain on lungs and heart may eventually lead to emphysema cor pulmonale and total incapacitation.

• **LOMUDASE** cannot remedy the social problem of polluted air. But it is an effective mucolytic for all chronic bronchitics and asthmatics. Within minutes Lomudase loosens mucus plugs, reduces bronchospasm and saves the chronic bronchitic and asthmatic from the exhaustion of ineffective coughing. Lomudase removes the nidus for reinfection and reduces the hazards of recurrent exacerbations. The patient can return to work sooner and keep on working. Moreover, he now has effective treatment on hand wherever and whenever he needs it.

LOMUDASE is a revolutionary presentation of the enzyme chymotrypsin. Prepared as an ultra-fine powder of 2 to 6 μ particles homogeneous by weight, Lomudase penetrates evenly to the distal parts of the respiratory tract. Its effect on pulmonary ventilation is further enhanced by the presence of an effective bronchodilator, isoprenaline. Lomudase acts in the most efficient way—topically at the sites of the disease-process.

• **LOMUPREN** is a similar ultra-fine homogeneous presentation of isoprenaline for use when bronchodilation alone is required. It produces maximum bronchodilation almost immediately. The effective dose is so minute that Lomupren can be used repeatedly without discomfort: tolerance does not develop. Both Lomudase and Lomupren may be used in conjunction with conventional antibiotic, antihistamine or steroid therapy.

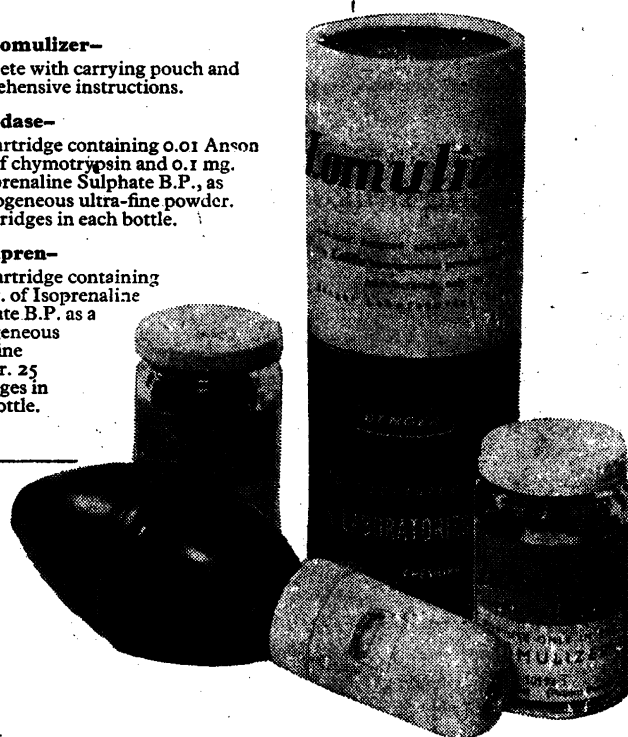

• **THE LOMULIZER** is a simple, foolproof pocket dispenser which ensures that Lomudase and Lomupren are delivered only when a suitable inspiratory effort is made.

LOMUDASE AND LOMUPREN may be prescribed under the National Health Service. The LOMULIZER until June 1st is obtainable by the patient at the retail price of 12/4½d.

The Lomulizer—
Complete with carrying pouch and comprehensive instructions.

Lomudase—
each cartridge containing 0.01 Anson units of chymotrypsin and 0.1 mg. of Isoprenaline Sulphate B.P., as a homogeneous ultra-fine powder. 25 cartridges in each bottle.

Lomupren—
each cartridge containing 0.1 mg. of Isoprenaline Sulphate B.P. as a homogeneous ultra-fine powder. 25 cartridges in each bottle.

DOSAGE—
depends on individual requirements and will vary from time to time in the same patient.

When expectoration is difficult
one cartridge of LOMUDASE on waking, and one or two more according to requirements, during any 24 hour period.

When bronchospasm persists
two to four LOMUPREN cartridges, in addition to the Lomudase may be used in 24 hours.

When bronchospasm alone occurs
two to six LOMUPREN cartridges daily as required.

because unlike other steroids

it promotes a *natural* sense of well-being

An unexpected but very acceptable finding during widespread experience with 'Decadron' is that in a great variety of disorders patients report that they *feel* better. This healthy sense of *improvement* is particularly felt by patients who have previously been treated with other steroids, and, as a result, their co-operation during a prolonged and difficult illness is much easier to obtain. Reduction in the incidence and severity of many of the side-effects associated with the older steroids (e.g. oedema and hypertension) has made possible the treatment of patients with cardiovascular disease, and the relative freedom from diabetogenic effect allows 'Decadron' to be given to diabetics when indicated. Thus, the discovery of 'Decadron' has increased still further the number of patients who may now be given the immense benefits of corticosteroid therapy.

'Decadron' (Dexamethasone) is now available in TWO strengths:

'Decadron'-75 (0.75 mg.), green, half-scored tablets.

'Decadron' (0.5 mg.), yellow, half-scored tablets.

United Kingdom N.H.S. basic cost is 24s. 0d. per 30 x 0.5 mg. tablets.

Over 1,000 published articles substantiate the clinical value of Rastinon (tolbutamide). Thousands of patients have been effectively controlled for more than three years.

SAFE

No cases of dyshaemopoiesis, jaundice or other serious side-effects have been reported. Analysis of over 10,000 case histories shows Rastinon to be completely safe for suitable diabetics.

Rapid excretion precludes cumulative effects. The significant difference between Rastinon and all other available anti-diabetic agents is that there is virtually no danger of hypoglycaemic reactions as a result of Rastinon therapy.

SIMPLE

One tablet by mouth once or twice a day is all that is necessary for maintenance. There is no added cost of treatment for the patient previously on insulin.

DONNATAL

antispasmodic

Anticholine drugs

"... in the United States the preparation which is by far the most widely prescribed is "donnatal"; a mixture of the naturally occurring substances atropine, hyoscyne, and hyoscyamine."

British Medical Journal, 1958, *i*, 882

If adequate physical expression of emotional tension is blocked at the hypothalamic and limbic centres, the emotion finds its outlet in the viscera with which these centres are connected.

1) By allaying emotionality, Donnatal's phenobarbital component helps to prevent the rise of autonomic, spastic stimulation, and spastic impulses from higher centres.

2) By blocking the impulse at the nerve end near the viscera, Donnatal's belladonna alkaloids inhibit development of spasm (whether originating in the higher centres or within the autonomic reflex arc).

As recently annotated in the B.M.J., Donnatal contains *natural* belladonna alkaloids, atropine, hyoscyne and hyoscyamine, with added phenobarbitone. In the United States it is, as quoted, "the most widely prescribed preparation" where spasmolysis with non-toxic sedation is indicated. Since the original introduction of Donnatal some years ago, a wealth of clinical evidence has been steadily accumulating, testifying to the remarkable success of this unique formulation in the treatment of a wide range of gastro-intestinal, genito-urinary and other disorders where the control of spasm is called for.

Each Donnatal Tablet or 5 ml. (teaspoonful) elixir contains:

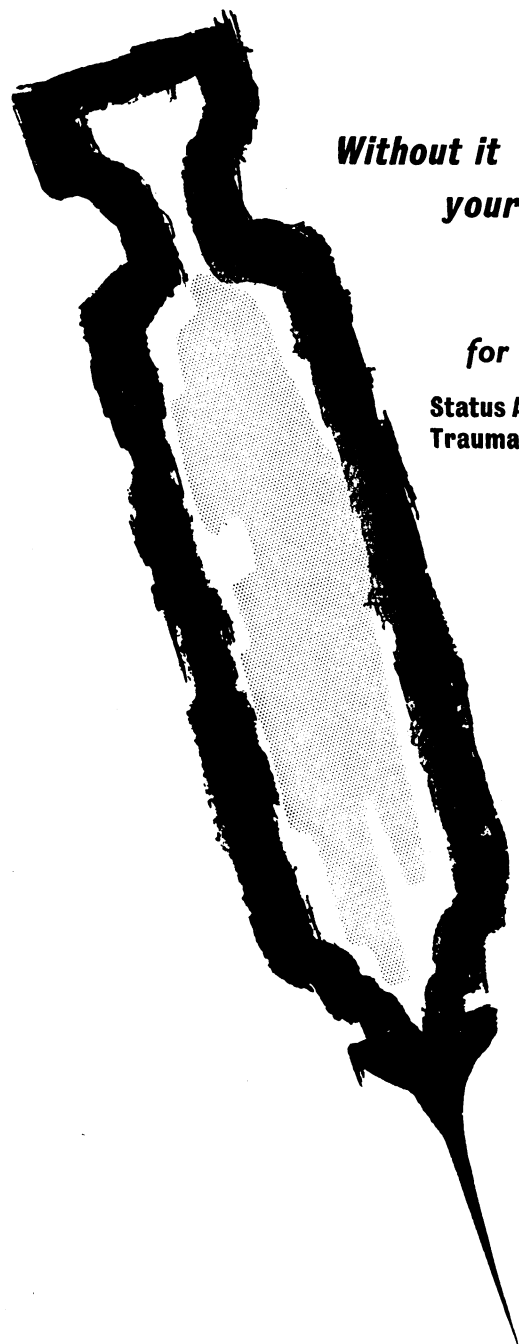

Hyoscyamine Sulphate	0.1037 mg.
Atropine Sulphate	0.0194 mg.
Hyoscyne Hydrobromide	0.0065 mg.
Phenobarbitone ($\frac{1}{4}$ gr.)	16.2 mg.

Available as tablets in bottles of 50 and elixir in bottles of 4 fluid ounces.

In the treatment of diarrhoea

Ivax

Effective!

Palatable!

Economical!

Ivax is an effective, palatable preparation of neomycin, sulphaguanidine and kaolin which consolidates the stools, suppresses the infecting organisms and soothes the irritated tissues. Relief is quickly obtained and Ivax is readily accepted by both children and adults.

Ivax is indicated in the treatment of 'summer diarrhoea', bacillary dysentery, food-poisoning (including salmonellosis), infantile diarrhoea and other specific and non-specific diarrhoeas.

Ivax is available in 6 fl. oz. bottles at the basic N.H.S. price of 7/8 per bottle.

Each fluid ounce contains:

Neomycin Sulphate B.P. .. 300 mg.

Sulphaguanidine B.P. .. 4 g.

Light Kaolin B.P. .. 6 g.

Literature and further information gladly sent on request.

APPOINTMENTS

Applicants should state name, address, age, nationality, qualifications, and enclose (unless otherwise specified) one copy each of 3 recent ★ testimonials with short statement of experience and appointments held.

Applications should be sent at once if no closing date is given.

House Officers should submit a separate application for each post for which they apply.

Canvassing in any form will disqualify.

★ *SERVICE MEMBERS may have difficulty in supplying recent testimonials, but this should not deter them from applying.*

A fully registered medical practitioner who is liable for National Service must obtain deferment of recruitment in writing from the Central Medical Recruitment Committee or (in Scotland) the Scottish Central Medical Recruitment Committee before accepting any civilian appointment.

The position of provisionally registered medical practitioners who are liable for National Service has been made clear in a notice sent to them by the Ministry of Labour and National Service.

SALARY SCALES OF JUNIOR GRADES OF HOSPITAL MEDICAL STAFF

Registrar Grades, Whole-time

(a) **REGISTRAR:** Posts obtained normally not less than two years after registration as a medical practitioner and held normally for two years: £972 8s. per annum in the first year; £1,103 19s. per annum in the second and any subsequent years. If the post is resident a deduction of £170 per annum is made.

(b) **SENIOR REGISTRAR:** Posts obtained normally not less than four years after registration as a medical practitioner and held normally for four years: £1,258 8s. per annum in the first year; £1,372 16s. per annum in the second year; £1,487 4s. per annum in the third year; £1,601 12s. per annum in any subsequent years. If the post is resident a deduction of £200 per annum is made.

Other Grades, Whole-time

(a) HOUSE OFFICERS:

(i) *Provisionally registered medical practitioners:* £486 4s. per annum for the first post held; £543 8s. per annum for the second and all subsequent posts held;

provided that the employing authority (subject in the case of a Hospital Management Committee to the consent of the Regional Hospital Board) shall have discretion to determine that the remuneration of any officer holding his first post in the National Health Service as a House Officer shall be £543 8s. per annum if they are satisfied that the officer has held at least one hospital post outside, of not less than six months' duration, involving clinical responsibilities equivalent to those of house posts in the National Health Service and supervised by appropriate specialist staff.

(ii) *Fully registered medical practitioners:* £600 12s. per annum for any post held;

provided that in exceptional circumstances, subject to the consent of the Minister, this rate may be exceeded by up to £50 per annum where a post cannot be filled otherwise.

In each case under sub-sections (i) and (ii) above, a deduction of £125 per annum in respect of board and lodging and other services provided shall be made and each post shall be tenable for six months.

(b) **SENIOR HOUSE OFFICER:** Posts obtained by fully registered medical practitioners, and held normally for one year only: £852 6s. per annum. If the post is resident a deduction of £150 per annum is made.

(c) **JUNIOR HOSPITAL MEDICAL OFFICER:** Officers who have held house appointments but who are neither Senior House Officers nor in one of the registrar grades, who have less responsibility than other hospital officers of non-consultant status, and who have been appointed for a limited or an indefinite period, not less than one year after full registration as a medical practitioner: £886 12s. by £57 4s. to £1,229 16s. per annum. If the post is resident a deduction of £170 per annum is made.

REQUIRED EXPERIENCED PSYCHIATRISTS for Senior posts with the Psychiatric Services SASKATCHEWAN DEPARTMENT OF PUBLIC HEALTH

There are a number of openings in mental hospitals, psychiatric wards of general hospitals, and mental health clinics for Psychiatrists qualified to supervise general areas of the services provided by such facilities. Most of the appointments will be made under the classification Senior Psychiatrist (salary range \$8,832 to \$10,740), for which the minimum qualifications include certification as a specialist by the Royal College of Physicians and Surgeons of Canada or, alternatively, the Diploma in Psychological Medicine and significant, diversified training and experience over a period of at least five years.

Suitable applicants will find that promotional opportunities occur rapidly in the expanding community, hospital and research programmes. Such promotions may be to higher ranking positions in the mental hospitals, or to directorships of community out-patient clinics or psychiatric wards of general hospitals. Transfers within the Service to positions suited to the particular interests and aptitudes of the psychiatrist can usually be arranged with little delay.

Detailed information about these openings in a growing and progressive programme may be obtained by writing to the Departmental Personnel Officer, Provincial Health Building, Regina. (8336)

'Deaner'

SOMETHING NEW IN THERAPY

OF CONSIDERABLE PROMISE IN GENERAL PRACTICE

'Deaner'

according to early reports

gradually restores the debilitated or depressed patient to his normal level of well-being because it increases brain acetylcholine. There is no abrupt effect or let-down when treatment is discontinued, properties which render central nervous stimulants of little value in practice.

There are usually no side effects with 'Deaner' and whilst clinical studies indicate that improvement may be noticed at the end of a week's treatment, full benefit is not likely to be obtained for two to three weeks.

INDICATIONS

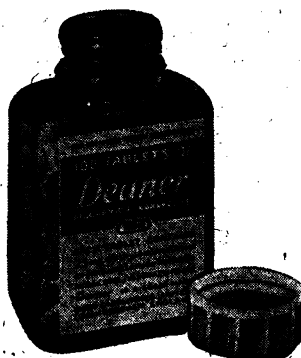

General debility, subclinical depression. 'Deaner' has also been found of value in behaviour disorders in children.

EXPERIMENTAL INDICATIONS

Chronic or tension headache, Migraine.

AVAILABILITY

'Deaner' is available in tablets, each containing 25 mg. of dimethylaminoethanol, as the para-acetamidobenzoic acid salt. Bottles of 100 Basic N.H.S. Cost 22s. 0d. plus Purchase Tax. Bottles of 500 Basic N.H.S. Cost 90s. 0d. plus Purchase Tax.

DOSE

Initially, two tablets a day, increasing or decreasing after a fortnight as required. Basic N.H.S. Cost per week of treatment with 'Deaner', on a dosage of two tablets a day, is 2s. 6d., plus Purchase Tax.
