TEN YEARS' EXPERIENCE**TELLS YOU****When the patient needs B₁₂****SIMPLY GIVE B₁₂**

When, ten years ago, Vitamin B₁₂ was isolated at Glaxo Laboratories, the complete control of pernicious anæmia became a certainty. Much experience since then has proved that the pure vitamin, given as Cytamen Injection or Cytacon Oral Liquid, will produce remission alone and unaided. But . . . there is a qualitative difference in the responses achieved.

In pernicious anæmia pre-treatment serum and tissue levels of B₁₂ are invariably low. The swiftest, most economical and most certain method of restoring these levels to normal . . . and of preventing insidious development of neurological complications . . . is by injection of Cytamen.

When, in very special circumstances, oral treatment of pernicious anæmia is unavoidable, 100 micrograms or more of B₁₂ in solution, daily, as in Cytacon, needs no help from any other substance. The principal use for oral B₁₂ is, of course, in conditions other than pernicious anæmia: deficiency of B₁₂ absorption is not then in question and Cytacon in lower doses is the rational preparation to prescribe.

In short, when your patients need B₁₂—in pernicious anæmia, Cytamen for *certain*—in other conditions, simply Cytacon.

'Medihaler'

The first product to apply the principle of pressurised aerosol to inhalation therapy. The 'Medihaler' is an appliance possessing almost every worthwhile feature required in inhalation therapy.

RIKER

1 OPTIMUM PARTICLE SIZE The Particle size is important. On it depends the amount of the drug that reaches the lower respiratory tract *and remains there*. The critical size for particles is from 2 to 5 microns diameter. OVER 80% (*by weight*) OF THE PARTICLES PROPELLED THROUGH THE 'MEDIHALER' ARE OF THIS DIAMETER RANGE.

2 A POWDER AEROSOL Powder aerosols are superior to liquid sprays. They usually produce more rapid effects and they do not increase the fluid volume in the respiratory tract. 'Medihaler' particles are suspended in an inert, propellant liquid. On projection the liquid vaporises instantaneously leaving the particles of *powder* fully suspended, their homogeneity unimpaired.

3 SIMPLICITY IN OPERATION The 'Medihaler' can be used at any time, anywhere, in any circumstances by any person, old or young.

4 NEUTRAL AEROSOL Many established nebuliser solutions have a strong acid reaction. These solutions on prolonged usage can cause damage to the bronchial mucosa. The 'Medihaler' powdered aerosols are quite neutral.

5 A MEASURED DOSE The special metering valve incorporated in the 'Medihaler' provides a measured dose at each operation—an important factor in the use of potent anti-asthmatic drugs—and one inhalation is usually all that is required.

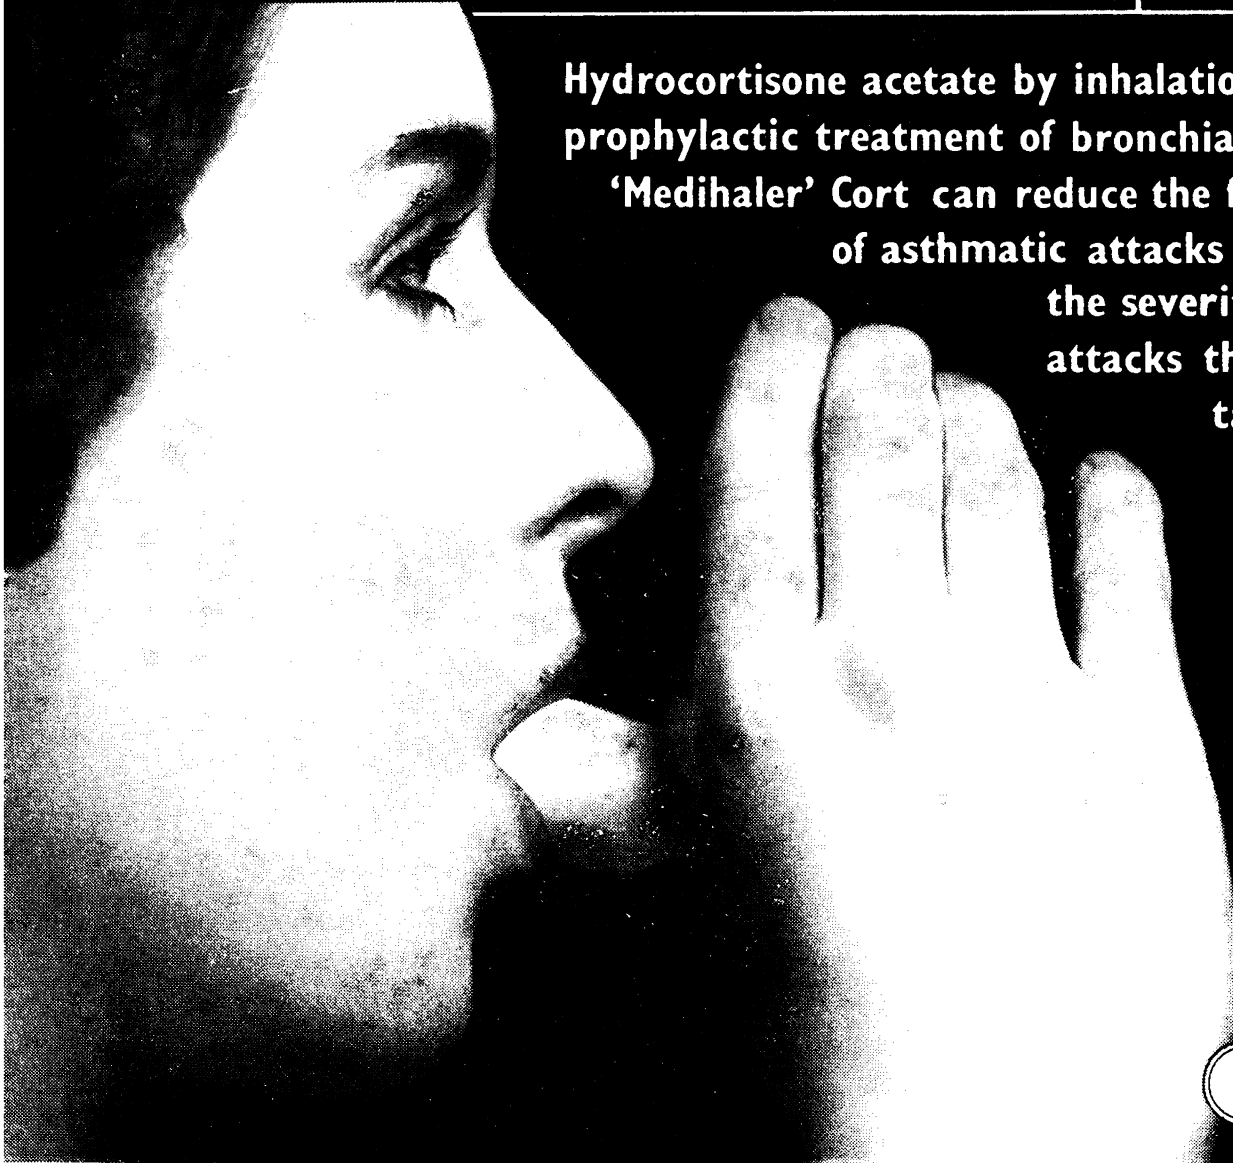

6 CONTENTS UNCONTAMINATED AND STABLE The stainless steel container of the 'Medihaler' is sealed except when the spray is released.

7 ROBUSTNESS The 'Medihaler' cannot be broken with normal usage.

THE 'MEDIHALER' CAN BE CARRIED IN THE WAISTCOAT POCKET AND USED WITH PRESS-BUTTON SIMPLICITY.

'Medihaler', 'MedihalerIso' and 'MedihalerEpi' are registered trade marks of —

'Medihaler' CORT

Hydrocortisone acetate by inhalation for the prophylactic treatment of bronchial asthma. 'Medihaler' Cort can reduce the frequency of asthmatic attacks and curb the severity of any attacks that might take place

RIKER

'Medihaler' Cort The response is most marked in the absence of hypersecretion, i.e. in cases of "dry" asthma. By inhalation of the insoluble salt, hydrocortisone acetate, response to steroid therapy in bronchial asthma is achieved on a relatively small dosage schedule. Though steroids have proved of value in the treatment of asthma when given orally, the relatively high doses necessary by this route give rise in long term administration, to symptoms of hypercorticism.

DOSAGE The recommended daily dose of hydrocortisone acetate by inhalation is 10 to 15 mg. This involves taking 6 to 10 inhalations of 'Medihaler' Cort per day at equally divided intervals.

CONTRA-INDICATED In Tuberculosis, peptic ulcer, or a history of mental illness.

NOTE For giving *immediate relief* in a crisis, 'Medihaler Iso' and 'Medihaler Epi' are the preparations of choice.

'Medihaler Iso' contains Isoprenaline Sulphate, B.P. well-known for its bronchodilating effect. Given by inhalation this effect is profound and rapid. It is said that isoprenaline is 100 times more effective by inhalation than when administered orally or sublingually. The side effects associated with isoprenaline therapy are minimal, when it is administered by inhalation. 'Medihaler Iso' propels a dose of 0.075 mg. of the drug at each single operation.

'Medihaler Epi' contains Adrenaline Bitartrate B.P. and is indicated for routine use in acute asthma. Each propelled dose delivers the equivalent of 0.15 mg. of adrenaline base.

NOTE Each vial contains approximately 200 doses which provides, on the basis of three doses a day, approximately two months treatment.

PRICES AND PACKS

'Medihaler Iso' and 'Medihaler Epi' complete 12/8. Refill 10/4.

'Medihaler' Cort complete 36/8. Refill 34/4.

CLINICAL RESPONSE

These are the advantages of

Calcium B-PAS WANDER

and

B-Pasinah WANDER

(calcium B-PAS Wander plus isoniazid)

in the

Chemotherapy of Tuberculosis

B-PAS (Wander), 4-benzoylamino-2-hydroxybenzoic acid, first introduced by our Research Laboratories in 1948, is the drug of choice in regimens comprising PAS in concurrent therapy.

In the form of its calcium salt, it provides extended bacteriostatic levels, induces only minimal side-effects as compared with sodium PAS, and because of its high acceptability guarantees as far as possible that patients, particularly on domiciliary treatment, do take their medication.

Available in 3.5 g. envelopes and in 1 g. cachets; and as bulk powder.

' **B-PASINAH** ' is available in two convenient forms:

Powders each containing
3.5 g. calcium B-PAS (Wander)
and 87.5 mg. isoniazid.

Cachets each containing
1 g. calcium B-PAS (Wander)
and 25 mg. isoniazid.

...yet breathes!

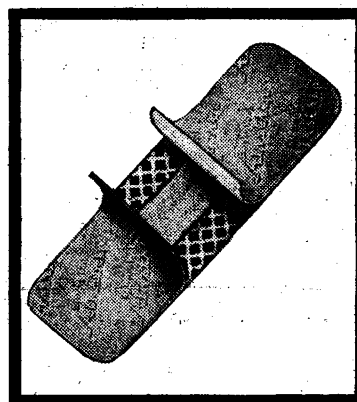

Elastoplast Airstrip

FIRST AID DRESSING

Any place such as a hospital or factory where a large number of people are leading active lives has a fairly high incidence of minor wounds over a period of time.* The most convenient dressing to cope with such injuries is Elastoplast 'Airstrip'. Elastoplast 'Airstrip' is made from a specially developed plastic material, through which sweat and skin exudates evaporate at the same rate as they develop on the skin. The material is a micro-porous extensible filter, and is not perforated. It provides a barrier to

water, grease and infective organisms. Even after long applications, Elastoplast 'Airstrip' does not cause maceration. The surface of the wound and the surrounding skin remain dry beneath an 'Airstrip' dressing, which can be left on until the wound heals.

* "... nearly 500,000 skin injuries occur each day which require at least a first-aid dressing." *Brit. med. J.* 1956, 2, 962. Published work: *Trans. Ass. industr. med. Off.* IV, 69; *Brit. med. J.*, 1956, 2, 962; *J. Pharm. Pharmacol.*, 1957, 9, 785-801; *ibid.* 1957, 9, 802-809.

SENOKOT IN OBSTETRICS

"For three years . . . I have found it unnecessary to prescribe any other laxative than standardized senna ('senokot') . . . The pregnant woman has a choice . . . of chocolate granules or tablets. And she can go on taking it nightly without ill effect".

Extract of letter: British Medical Journal, 1957, 2, 1438

SENOKOT FOR THE NURSING MOTHER

"A laxative must be entirely safe for both mother and baby and should not adversely affect nutrition or lactation performance or be excreted in breast milk. Standardized senna (Senokot) meets these requirements".

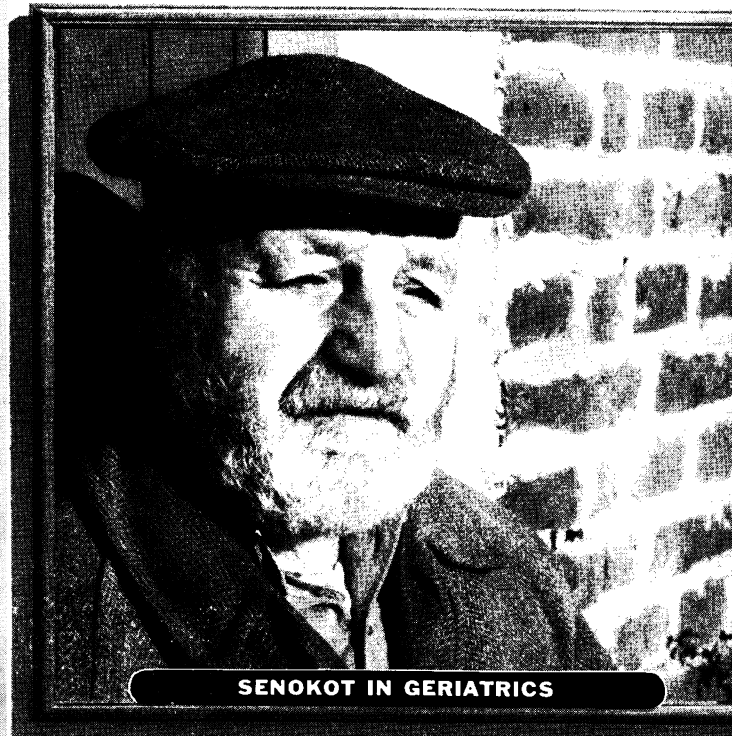

Pharm. J., 1958, 181, 337

SENOKOT IN PAEDIATRICS

"For some years we have used a standardized preparation of senna (Senokot) in the treatment of children with stubborn constipation. The usual dose is one teaspoonful nightly and this is gradually reduced and eventually discontinued".

"Surgery in Infancy and Childhood" (1958), Livingstone, Edinburgh, p. 196

SENOKOT IN GERIATRICS

"The new standardized preparations of senna (Senokot) . . . do not cause pain or even abdominal discomfort, and there is never any incontinence. The need for enemata is reduced—a great advantage when dealing with aged patients".

"Hernia in the Aged" Medical World, 1955, 83, 318

BURROUGHS WELLCOME & CO., LONDON

(THE WELLCOME FOUNDATION LTD.)

for mild sedation
with nutritional support

The debilitated patient, whether recovering from severe illness or operation or suffering from a chronic disease, is greatly benefited by the addition of nutritionally generous supplements of vitamins of the B complex and ascorbic acid. Such patients often need also mild sedation.

A combination of the necessary vitamins with a relatively low dose of phenobarbitone is now available as Tropenol.

FORMULA

Each tablet contains

Aneurine hydrochloride B.P.	5 mg.
Riboflavine B.P.	5 mg.
Pyridoxine B.P.C.	2 mg.
Nicotinamide B.P.	15 mg.
Ascorbic acid B.P.	50 mg.
Phenobarbitone B.P.	16 mg. ($\frac{1}{2}$ gr.)

Tropenol

INDICATIONS

- (1) Anxiety states with restlessness, especially associated with hypertension, alcoholic withdrawal or peptic ulcer.
- (2) Progressive illness in which insomnia is associated with a need for the greatest nutritional support—e.g. congestive heart disease, cachectic states.
- (3) During convalescence, to speed recovery by promoting good appetite and a quiet frame of mind associated with nutritional adequacy.
- (4) Insomnia not induced by pain.

In designing the formula, it was necessary to bear in mind the known antagonism between barbiturates and the vitamins of the B complex, together with the theoretical possibility that the effects might cancel each other out. But preliminary trials have shown that on account of the varying speeds of action and other factors not fully understood, the combination is clinically effective.

DOSAGE

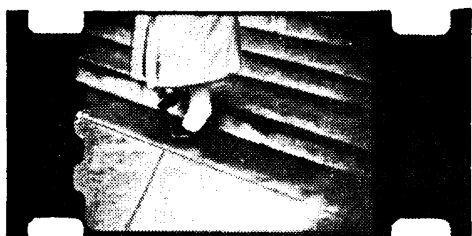

One to four tablets daily.
Tablets in packs of 100 and 500.

Standard Reference Cards.

Factual information on all our products is available. Produced in accordance with A.B.P.I. Specifications, cards can be obtained from our representatives or from Vitamins Ltd.

Whatever the aetiology—

OEDEMA of any degree

responds to 'SALURIC'

'Saluric' is now well established as the diuretic of choice for oedema accompanying cardiac, renal or hepatic diseases. Furthermore, the effectiveness and safety of 'Saluric' have widened the *scope* of diuretic therapy. For example, 'Saluric' may prove to be highly effective whenever oedema is associated with any of the following conditions:

Peripheral phlebitis, migraine headache, allergy, arthritis, the menopausal syndrome, and ascites due to malignant tumour. The syndrome of angina pectoris, if associated with congestive failure or hypertension, may also respond favourably as the oedema is controlled or blood pressure reduced.

The illustration is taken from the film **DIURETIC THERAPY WITH 'SALURIC'**, which is offered for showing to medical audiences. Secretaries of Medical Societies are invited to ask for details about the film and its availability.
Film produced by Film Surveys, Ltd., London.

Analgesic — Antipyretic
Sedative

"CODIS" is a combination of aspirin, phenacetin, and codeine phosphate—a combination well known and accepted medically as giving pain relief in a wide range of conditions.

The unique feature of the tablets of the formula is that the aspirin is soluble for quick and easy absorption and is kept in a protective coating for stability.

CODIS AND SOLUBILITY

THE GREAT ADVANTAGE of Codis is that it provides a codeine compound tablet in which the aspirin content is soluble in water. (The codeine constituent is also soluble, and the phenacetin is in very fine suspension.)

This is achieved by careful compounding and preparation, resulting in tablets which are quickly absorbed and well tolerated—even in cases of proven intolerance to ordinary (insoluble) aspirin.

To ensure stability and easy identification, the tablets are wrapped in moisture-proof distinctive gold foils of 10 tablets each (dispensing size), or boxes containing five foils of 4 tablets each (public size).

CODIS_{REGD.} AVAILABLE FOR DISPENSING
Not advertised to the public

Composition.

Each Codis tablet contains: Acid. Acetylsalicyl. B.P. 4 gr., Phenacet. B.P. 4 gr., Codein. Phosph. B.P. 0.125 gr., Calc. Carb. B.P. 1.2 gr., Acid. Cit. B.P. (exsic.) 0.4 gr.

VELROC

TRADE MARK

Plaster of Paris Bandages

ARE STRONGER

Extensive tests under varying conditions have proved beyond doubt that Velroc Bandages produce the strongest casts.

MORE ECONOMICAL

Greater cast strength from each yard of Velroc Bandage means fewer bandages required — so cast making is quicker.

CLEANER, NON-IRRITANT

Velroc Bandages are much cleaner and more pleasant to use because the creamy plaster adheres so well to the cloth that only a negligible amount is wasted. Velroc Bandages contain no irritating resins.

AND THEY COST NO MORE!

With all these extra advantages, Velroc Bandages are no dearer than ordinary bandages.

**"90%
satisfactory
response
obtained in
ambulant
patients"**

"The immediate clinical results were assessed after the first month's treatment (with Roter Tablets) . . . 81% of cases became symptom-free—70% of them during the first week and 30% during the second week; a further 9% were relieved of the majority of their symptoms. Thus there was a satisfactory response in 90% of cases . . . In 75% of cases the patients found they were able to take foods which they had avoided for years."

Extract from the BRITISH MEDICAL JOURNAL (1955) 2, 827

IMPROVED THERAPY FOR PEPTIC ULCER

"In a series of 155 cases of peptic ulcer treated with . . . (Roter) tablets for three to six weeks, there was immediate relief of pain in 92% of cases and roentgenological healing of the ulcer in 81% . . . The special features of this medication are immediate and prolonged relief of pain, correction of gastric hyperacidity, absence of side reactions, effectiveness for ambulatory patients, and early healing of the ulcer in most cases."

Extract from the AMERICAN JOURNAL OF GASTROENTEROLOGY (1957) 28, 439

ACTAL ACTUALITIES NO. 3

ACTAL ADVOCATES

In-law trouble to Humphrey Tarradiddle means not enough crime to go round and the difficulty of paying his bills. He doesn't always eat well and even when he is working, the judge adjourns for lunch at a different time each day. The result—dyspepsia and the worry that Humphrey will develop an ulcer before his fees justify one. His vehemence in denouncing this injustice is only equalled by his eloquence in advocating Actal.

A few tablets slipped under his wig means freedom from distress throughout the most prolonged cross-examination.

In this case he knows that he is getting all the activity of a liquid antacid without having to produce a bottle and spoon in court. He has no objection to the taste—in fact, he likes it—and the tablets dissolve quickly on his tongue without a pause in his peroration. The conclusive evidence is that his doctor prescribes Actal—and Humphrey knows the value of an expert witness.

What his doctor doesn't tell Humphrey is that Actal tablets contain 360 mg. of sodium polyhydroxy-aluminium monocarbonate hexitol complex, and are made by Bayer Products Ltd. of Kingston-upon-Thames, whose associated exporting company is Winthrop Products Ltd. Nor that the ingredient cost of one week's treatment (2 tablets t.d.s.) is only 1/10³d.

NEW FIRM-FITTING, FULLY-FOOTED

NYLON LIGHTWEIGHT
ELASTIC STOCKINGS

Nylastik

(SCHOLL)

The ideal stockings for early varices and mild oedema, for pre-natal wear, and for women whose occupation entails much standing. They provide a degree of support hitherto unobtainable in any lightweight elastic hosiery. Their introduction leads to a new conception of the lightness and beauty which can now be combined with efficient compression and durability.

Full-footed. Worn without overhose

E.C.10's SHOULD STATE :— "NYLASTIK, Scholl"

FOR ALL AVERAGE CASES to provide the greater degree of support which is generally required, prescribe

Soft-Grip

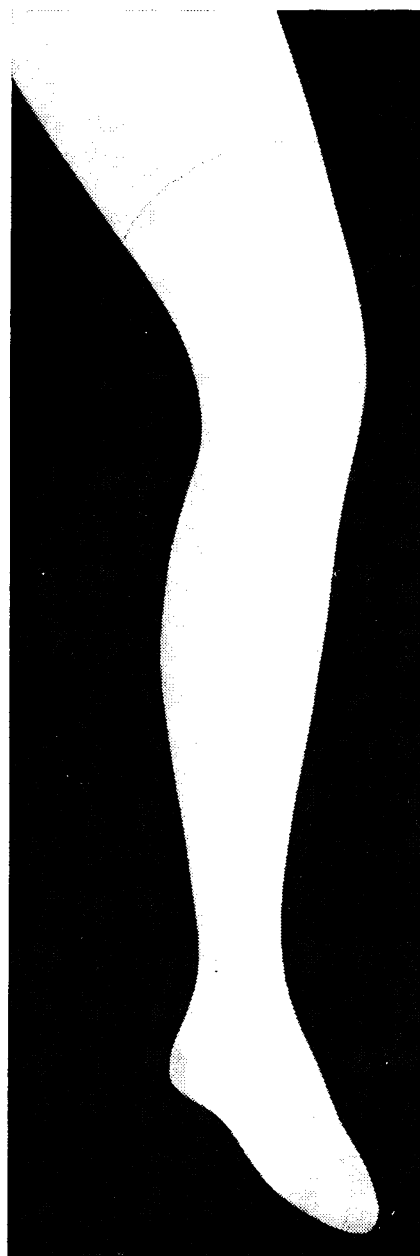

ELASTIC YARN (SCHOLL)

Worn under the normal hose. Impart uniform pressure over every contour of the limb without constriction. Completely seamless. They fit without ridges or creases. Their firm compression and comfort distinguishes them from all other Elastic Yarn hosiery.

Worn under the normal hose

E.C.10's SHOULD STATE:- "ELASTIC YARN Scholl"

The name **Scholl** ensures accurate support, fit, comfort and long wear

For SUB-ACUTE and Chronic dermatoses

TAR + HYDROCORTISONE

combined in

TARCORTIN

CREAM

have pronounced advantages over either medicament alone

The established germicidal, stimulating and anti-pruritic properties of tar, in the treatment of sub-acute and refractory skin affections, can now be considerably enhanced by its incorporation with hydrocortisone.

*Clinical trials have shown that the two medicaments together exert a powerful synergistic action that is far more rapid, more pronounced and complete than the action of either alone.

These two valuable therapeutic agents are presented in a non-greasy, stainless, hydrophilic cream, known as TARCORTIN.

TARCORTIN CREAM is supplied in 7 gm. and 15 gm. tubes, containing 0.5% Hyd. cortisone in a special coal-tar extract.

* Literature available on request.

How
these
stockings
help
the busy
Medical
man...

EVERY professional man knows the woman patient who resists advice to take preventive action over leg afflictions. . . and later, helps to over-crowd his surgery, when her condition becomes painfully serious.

Lastonet Elastic Net Stockings are of great assistance in preventing such occurrences. Their excellent appearance (they are virtually invisible under ordinary nylons)—their exceptional airy-cool comfort, their perfect, made-to-measure individual fit—all recommend them to women who object to wearing ordinary surgical stockings.

New, Light-Resistant Rubber

The recent incorporation of a new, light-resistant rubber in Lastonet lessens perishing, gives longer life and increased retention of fit. A longer lasting stocking reduces frequency of request for prescriptions—and so Lastonet helps reduce your surgery 'queue'. . . besides economising in N.H.S. prescription costs. Lastonet are available in thigh or knee length.

RASTINON

*Complete oral control
without side-effects
for thousands of diabetics*

EFFECTIVE

Over 1,000 published articles substantiate the clinical value of Rastinon (tolbutamide). Thousands of patients have been effectively controlled for more than three years.

SAFE

No cases of dyshaemopoiesis, jaundice or other serious side-effects have been reported. Analysis of over 10,000 case histories shows Rastinon to be completely safe for suitable diabetics.

Rapid excretion precludes cumulative effects. The significant difference between Rastinon and all other available anti-diabetic agents is that there is virtually no danger of hypoglycaemic reactions as a result of Rastinon therapy.

SIMPLE

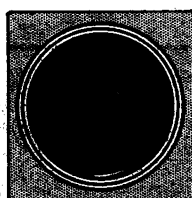

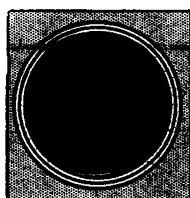

One tablet by mouth once or twice a day is all that is necessary for maintenance. There is no added cost of treatment for the patient previously on insulin.

DUST-BORNE CROSS-INFECTION

The problem

A disquieting situation arising in hospitals throughout the country is the closure of wards due to dust-borne cross-infection. The floors act as a depository for dust and dirt (whether by settlement or displacement) and bacteria-laden particles can be seriously disturbed by brooms, mops or non-approved polishing and vacuum cleaning machines.

The solution Medical research has established that suitable, controlled conditions can help to eliminate or reduce to acceptable proportions the risk of cross-infection from pathogenic bacteria. Now, for the first time, a floor cleaning machine has been developed which makes a positive contribution towards overcoming the risk of cross-infection. This machine, the Columbus Dixon Model III Suction Polisher and Cleaner, has undergone laboratory tests at a London Hospital, and the results of these tests are now available in our new publication. The detailed case-history of the outbreak of cross-infection, which prompted the development and testing of this machine, has already been published.* **THE LANCET* (1958), ii 713.

Micro-photographs, reproduced top left, illustrate the reduction in the bacterial count where the new COLUMBUS Machine, with two stage-dust control and disposable dust-bag, was employed.

The COLUMBUS SUCTION POLISHER AND CLEANER, which has been used successfully in hospitals for 25 years, controls and traps 98% of all floor dust and dirt. This new patented two-stage dust-bag canalises dust flow into a separate protected chamber, preventing fall-out or drop-back of dust, the disposable bag trapping bacteria to an effective degree. High speed brushes work in an unrestricted vacuum field giving 360° all-round suction. A designed unit for high power suction polishing and cleaning, the new COLUMBUS is the most advanced Suction Polisher and Cleaner in the World.

EMERGENCIES IN GENERAL PRACTICE

from the
British Medical Journal

470 Pages, cloth bound,
with full index

PRICE 25s. net

by post: inland and overseas 26s. 9d.

This book deals with medical emergencies in a wide sense: acute clinical emergencies requiring prompt and skilful treatment; conditions such as faints and fits and giddy turns, the careful elucidation of which may mean the difference to a patient between a life of activity and one of restriction; acute psychiatric states; accidents of treatment, such as dangerous reactions to drugs or collapse during anaesthesia; and emergency calls when the doctor is isolated, as on a ship.

It comprises 57 specially commissioned articles which appeared originally in the *British Medical Journal*.

The author of each is an acknowledged authority. This collection, now revised by the authors, will be of value not only to general practitioners but also to senior students, house-physicians, house-surgeons, and to those supervising their work in hospitals.

How well do you know the Concerto in E^b?

... or any other famous work? Do you know every grace note—every subtle change in harmony? If you do, you are either an expert score reader, a regular concert-goer or the owner of an Avantic DL7-35 Power Amplifier.

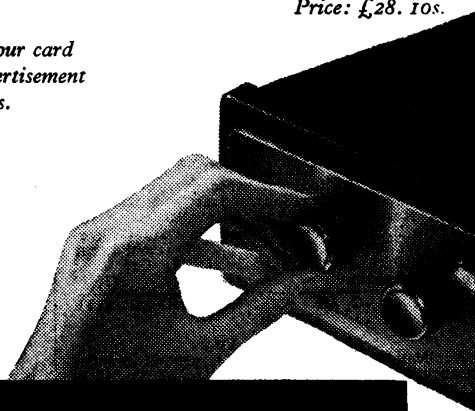

This amplifier has been acclaimed by the critics (see *The Gramophone*, October 1956 and *Gramophone Record Review*, April 1957) as being faultless in design, construction and performance. It has a peak power output of 54 watts and a distortion content of less than 0.05% at 20 watts sine wave output. The power response at this level is linear from 30 c/s. to 20 kc/s. With a damping factor of 50 and a rise time of only 5 microseconds, an excellent transient response is assured.

Price: £33

The Avantic SP21 Stereophonic Pre-amplifier Control Unit is now available for use with either one or two DL7-35 Amplifiers for monophonic or stereophonic reproduction. It has 6 separate inputs for each channel and 9 controls.

Price: £28. 10s.

APPOINTMENTS

Applicants should state name, address, age, nationality, qualifications, and enclose (unless otherwise specified) one copy each of 3 recent testimonials with short statement of experience and appointments held.

Applications should be sent at once if no closing date is given.

House Officers should submit a separate application for each post for which they apply.

Canvassing in any form will disqualify.

★SERVICE MEMBERS may have difficulty in supplying recent testimonials, but this should not deter them from applying.

A fully registered medical practitioner who is liable for National Service must obtain deferment of recruitment in writing from the Central Medical Recruitment Committee or (in Scotland) the Scottish Central Medical Recruitment Committee before accepting any civilian appointment.

The position of provisionally registered medical practitioners who are liable for National Service has been made clear in a notice sent to them by the Ministry of Labour and National Service.

SALARY SCALES OF JUNIOR GRADES OF HOSPITAL MEDICAL STAFF

Registrar Grades, Whole-time

(a) **REGISTRAR**: Posts obtained normally not less than two years after registration as a medical practitioner and held normally for two years: £972 8s. per annum in the first year; £1,103 19s. per annum in the second and any subsequent years. If the post is resident a deduction of £170 per annum is made.

(b) **SENIOR REGISTRAR**: Posts obtained normally not less than four years after registration as a medical practitioner and held normally for four years: £1,258 8s. per annum in the first year; £1,372 16s. per annum in the second year; £1,487 4s. per annum in the third year; £1,601 12s. per annum in any subsequent years. If the post is resident a deduction of £200 per annum is made.

Other Grades, Whole-time

(a) HOUSE OFFICERS:

(i) **Provisionally registered medical practitioners**: £486 4s. per annum for the first post held; £543 8s. per annum for the second and all subsequent posts held; provided that the employing authority (subject in the case of a Hospital Management Committee to the consent of the Regional Hospital Board) shall have discretion to determine that the remuneration of any officer holding his first post in the National Health Service as a House Officer shall be £543 8s. per annum if they are satisfied that the officer has held at least one hospital post outside, of not less than six months' duration, involving clinical responsibilities equivalent to those of house posts in the National Health Service and supervised by appropriate specialist staff.

(ii) **Fully registered medical practitioners**: £600 12s. per annum for any post held; provided that in exceptional circumstances, subject to the consent of the Minister, this rate may be exceeded by up to £50 per annum where a post cannot be filled otherwise.

In each case under sub-sections (i) and (ii) above, a deduction of £125 per annum in respect of board and lodging and other services provided shall be made and each post shall be tenable for six months.

(b) **SENIOR HOUSE OFFICER**: Posts obtained by fully registered medical practitioners, and held normally for one year only: £852 6s. per annum. If the post is resident a deduction of £150 per annum is made.

(c) **JUNIOR HOSPITAL MEDICAL OFFICER**: Officers who have held house appointments but who are neither Senior House Officers nor in one of the registrar grades, who have less responsibility than other hospital officers of non-consultant status, and who have been appointed for a limited or an indefinite period, not less than one year after full registration as a medical practitioner: £886 12s. by £57 4s. to £1,229 16s. per annum. If the post is resident a deduction of £170 per annum is made.

Applications, which should be received not later than June 27, 1959, should be sent to H.M. Chief Inspector of Factories, 19, St. James's Square, London, S.W.1. (3449)

SERVICES

Royal Air Force vacancies for Medical Officers

The R.A.F. offers an attractive career to medical practitioners with unique opportunities for specialization as well as for general practice. Permanent officers may take post-graduate course, and if recognized as R.A.F. specialists will receive specialist pay (£219 per annum) and be promoted by time to Group Captain. Non-specialist medical officers can expect time promotion to Wing Commander, and higher by selection. Generous antedate of seniority is given for civil experience.

The normal upper age limit for candidates is 33, but older applicants with special qualifications may be considered. Appointment in the first instance is normally to a short service commission for 3-6 years, which carries a tax-free gratuity. During this period officers may apply for permanent commissions.

For details write to Air Ministry (M.A.1), Dept. HN544, 1-6, Tavistock Square, London, W.C.1.

A large rapidly expanding mine in the Copper Belt of NORTHERN RHODESIA invites applications in connection with a vacancy for a MEDICAL OFFICER

The successful candidate would normally be required to do general medical and surgical work at the African Hospital and should be suitably qualified to relieve the surgeon, who works chiefly on the European side, when the latter is on leave.

The Mine European and African Hospitals are very modern, well equipped, and total nearly 500 beds. They have excellent laboratory, x-ray, operating and physiotherapy facilities, and are staffed by eight medical officers. The total mine population catered for comprises approximately 35,000 Africans, 5,000 Europeans (including families).

Salary, based on qualifications and experience, would not be less than £1,800 per annum, plus variable cost of living allowance, currently approximately £72 per annum. In addition there is a bonus scheme whereby employees share in the prosperity of the Copper Mining Industry. The provisional bonus is at present 31½% of basic salary. There are also generous Life Assurance, Pension and Share Purchase Plan schemes.

Paid leave at rate of 51 days per annum, may be accumulated up to 153 days. In addition, up to 7 days' local leave may be granted each year after completing one year's service.

A house, with basic furniture, available at nominal rental. Car provided for professional use.

Free passages from place of recruitment to Mufulira provided for successful applicant, wife and family.

Schools, sport and recreational facilities are excellent, and general health conditions are very good.

Applications, giving full personal particulars, details of qualifications, experience (which will be treated as confidential), and indication of earliest date duties can be assumed, should be sent to Box 1052, British Medical Journal, B.M.A. House, Tavistock Square, W.C.1.

ASSAM. SURGEON REQUIRED BY LARGE Tea Company in Assam for extensive medical practice, including Central Hospital with 100 beds. Applicants should hold F.R.C.S. and be willing to undertake some general medical duties. Minimum starting salary Rs.2,000 (£150) per mensem, plus dearness allowance, free bungalow, servants and transport. Pension scheme. Leave on full pay and allowances at regular intervals. Write, stating age, qualification, and experience, and giving the names of two referees, to Box 1002, B.M.J.

PATHOLOGISTS

The National Iranian Oil Company Limited have two posts for Pathologists in

SOUTHERN PERSIA

to supervise and direct the pathological laboratory service in their hospitals in the Oilfields and Refinery. Applicants should be between 35 and 50, and have had at least three years' experience in general pathology. A higher qualification in pathology and, or, general medicine would be an advantage. Salary will depend on qualifications and experience, but will be not less than £3,200 per annum net. Married accommodation and free family first-class air passages are provided, and the normal tour of duty is two years. Apply to Manager, Personnel Department,

IRANIAN OIL SERVICES LIMITED
3, Finsbury Square, London, E.C.2.

**EDINBURGH POSTGRADUATE BOARD FOR
MEDICINE****SURGERY**

Three-month courses of postgraduate surgery suitable for surgeons requiring a refresher course in the current outlook on surgery or for graduates preparing to specialize in surgery start on September 28, 1959, and March 14, 1960. The programme has been arranged so as to provide co-ordinated clinical and systematic instruction in general surgical wards and specialized surgical units in Edinburgh. Fee £37 12s. 6d.

MEDICAL SCIENCES

A three-month course in Applied Anatomy, Physiology, Pathology, Bacteriology and Biochemistry will begin on June 20, 1960. This course includes an adequate amount of practical instruction and is suitable for postgraduates wishing to take the Primary Fellowship examination. Fee £37 12s. 6d., including matriculation fee of £2 12s. 6d. Courses in the Basic Sciences (Anatomy, Physiology, Pathology, including Bacteriology) are arranged by the Royal College of Surgeons under the aegis of the Edinburgh Postgraduate Board for Medicine. These courses, comprising lectures, demonstrations and practical instruction, will begin on February 1 and September 26, 1960, and continue for 12 weeks. Fee £35. Courses in Medical Sciences are designed as a final preparation for the Primary Fellowship examination, and it is essential that those attending should already have a considerable knowledge of the subjects.

INTERNAL MEDICINE

Courses lasting 12 weeks, suitable for graduates desiring a refresher course or to specialize in Medicine, begin on September 28, 1959, and March 21, 1960. These courses consist of 320 hours' instruction, comprising lectures, clinical demonstrations and ward visits. Fee £37 12s. 6d. Additional instruction in Clinical Paediatrics, Tropical Medicine and Clinical Chemistry is arranged in conjunction with the course in Medicine. There is a small additional fee and the numbers are limited.

HILL PATTISON-STROTHERS BURSARIES

The Royal College of Physicians of Edinburgh award two Hill Pattison-Strothers Bursaries each year to graduates attending the Internal Medicine Course. Each bursary amounts to £100. Applications must be submitted to the Secretary, Royal College of Physicians of Edinburgh, 9, Queen Street, Edinburgh, 2, before July 1, 1959, for those attending the September, 1959, course.

**REFRESHER COURSE FOR GENERAL
PRACTITIONERS**

The twenty-seventh fortnight Refresher Course for general practitioners will start on May 2, 1960. Fee for graduates not claiming expenses from Government sources, 10 guineas. Applications for enrolment should be addressed to the Director of Postgraduate Studies, Surgeons' Hall, Edinburgh, 8. Applicants for courses, except general practitioners, should supply particulars of qualifications and postgraduate experience. (3098)
