

A safe laxative for use during pregnancy and lactation

DURING pregnancy Andrews Liver Salts will be found of great service. Its pleasant taste and refreshing qualities make it an acceptable draught, which can be repeated with advantage two or three times a day if necessary. Taken thus, Andrews obviates the tendency to constipation and also relieves hepatic congestion. The sedative effect of Andrews will be found helpful, and its aperient action is of great value in cases of renal insufficiency.

During lactation, Andrews can be used with confidence for the relief of constipation.

Britain's bottle-fed babies.

During that time the Central Research Laboratory of the United Dairies—today the Commonwealth's largest privately-owned dairy laboratory—has pursued and augmented the Company's "clean milk" policy. Among many notable achievements has been the laboratory's contribution to the development of full cream evaporated milk, whose value in infant feeding, even with prematures and in difficult conditions such as coeliac disease and infantile eczema, is becoming ever more widely recognised by the medical and nursing professions.

A new level of living

A functional staircase, the ciliary "escalator" is seriously deranged in chronic bronchitis and some forms of asthma by the presence of thick tenacious sputum. These stagnant secretions provide an excellent medium for infection. Now with the Lomax range of products, thick mucus can be reduced safely and simply to a consistency where ciliary function is promoted and enhanced. Coughing becomes effective, bronchospasm is relieved without side effects, risks of reinfection are much reduced. The patient can control his own symptoms at any time, and becomes much easier in body and mind.

for your asthmatics and chronic bronchitics

Lomudase, Lomupren and the Lomulizer are now available on E.C.10.

The Lomu range of products has been available to hospitals and specialists since March. But for every asthmatic and bronchitic receiving hospital treatment, there are many 'on the brink': chronically ill, recurrently incapacitated, inexorably advancing to permanent disablement. Now *fully* available for prescription on E.C.10, the Lomu range of products enters the field of general practice—the field in which a simple, self-administered and *effective* treatment can help the greatest number of patients.

• **LOMUDASE** is a special presentation of the mucolytic enzyme, chymotrypsin, which acts specifically on the muco-protein fibrils. It enables the patient to clear his chest within minutes whenever and wherever the need arises, without interruption to everyday routine. Prepared in an entirely new way—as ultra-fine particles, homogeneous by weight, in the size range of 2-6 μ —Lomudase is delivered topically to the sites of the disease process in the bronchi and bronchioles. Since treatment is greatly enhanced when mucolytic and bronchodilator therapy is given simultaneously, a highly efficient bronchodilator, isoprenaline, is incorporated.

• **LOMUPREN** is a presentation of isoprenaline in a similar form, for use in support of Lomudase therapy or where the bronchodilation alone is required. The 0.1 mg. of isoprenaline, administered by the Lomulizer, brings about maximal bronchodilation.

• **THE LOMULIZER** This ingenious dispenser ensures that the patient receives a measured dose of either Lomudase or Lomupren only at the correct point in inspiration. Accuracy of dosage is certain because the drugs are supplied in single dose cartridges. The Lomulizer is foolproof, positive in action and fits easily into the handbag or pocket. And it enables bronchitics and asthmatics to obtain all the benefits of treatment with Lomudase and Lomupren anywhere and at any time.

The Lomulizer—
Complete with carrying pouch and comprehensive instructions.

Lomudase—
each cartridge containing 0.01 Anson units of chymotrypsin and 0.1 mg. of Isoprenaline Sulphate B.P., as a homogeneous ultra-fine powder. 25 cartridges in each bottle.

Lomupren—
each cartridge containing 0.1 mg. of Isoprenaline Sulphate B.P. as a homogeneous ultra-fine powder. 25 cartridges in each bottle.

DOSAGE—
depends on individual requirements and will vary from time to time in the same patient.

When expectoration is difficult
one cartridge of LOMUDASE on waking, and one or two more according to requirements, during any 24 hour period.
When bronchospasm persists
two to four LOMUPREN cartridges, in addition to the Lomudase may be used in 24 hours.
When bronchospasm alone occurs
two to six LOMUPREN cartridges daily as required

and without drugs is to provide an attractive, readily assimilable dietary supplement of high caloric value. Wate-on does this by incorporating large amounts of a vegetable oil which is rich in readily assimilable, highly unsaturated fatty acids, and glucose which is the most easily assimilated type of carbohydrate. The physiological advantages of these two materials have been firmly established by medical research.

Wate-on is also rich in lecithin which, in addition to its basic caloric value, is also of high physiological value.

Wate-on is further supplemented by the more important vitamins and minerals.

FORMULA

<i>Each ounce of WATE-ON contains</i>		Vitamin B ₂ Riboflavin	1.0 mg.
Corn (Maize) Oil	33.0%	Vitamin B-1	0.4 mg.
Glucose	16.5%	Calcium Pantothenate.....	0.4 mg.
Lecithin	11.0%	Vitamin B-6	0.03 mg.
Iron (as ferrous gluconate).....	3.2 mg.	Vitamin D-2	100 I.U.
Nicotinamide	2.0 mg.	Vitamin B-12.....	4.2 mc.g.

Wate-on is a homogenized fat emulsion, which means that it is in a very easily assimilable physical condition. To sum up, Wate-on is based on the latest results of medical research. Clinical trials have shown that with both ordinary and post-operative patients the regular ingestion of Wate-on was followed not only by gain in weight but also the general health was improved. No side effects were reported.

Deep skin penetration in Arthritis and Rheumatism

**NICOTINIC, SALICYLIC AND
p-AMINO BENZOIC ACIDS in Ester form**

In cases of soft-tissue rheumatism, and arthritic disorders, many doctors are tending more and more to regard Transvasin as an indispensable adjuvant to treatment.

For Transvasin is composed of the esters of nicotinic, salicylic and p-aminobenzoic acids. These esters readily pass the skin barrier in therapeutic quantities, and so enable an effective concentration of drugs to be built up where they are needed.*

Transvasin not only induces vasodilation of the skin with a superficial erythema, but also brings about a deep hyperaemia of the underlying tissues. It is non-irritant and can be safely used on delicate skins.

It is now being widely prescribed, with successful clinical results. Since a very small quantity is sufficient for each application, the cost of treatment is extremely low.

One name that means a lot in penicillin therapy

CRYSTAPEN

Crystapen, a distinguished name, distinguishes a comprehensive range of Glaxo soluble penicillin preparations for systemic use.

First there is Crystapen Injection, soluble sodium penicillin G.

This, the preparation of choice for treating severe acute infections, is the fastest acting form of penicillin.

Playing the best supporting role to injection treatment are Crystapen Tablets, soluble potassium penicillin G. As clinically effective as any other form of oral penicillin, Crystapen is one of the most economical for everyday use.

Then, for those who prefer a ready-to-use palatable suspension that children like to take, there are the new Crystapen V Suspensions, calcium penicillin V.

Here below is the full Crystapen range from which to select the preparation best suited to your particular case.

ACTAL ACTUALITIES No. 4

ACTAL AGENTS

The Actal agent's greatest source of worry is the rock'n'roll star who cannot read or write. He doesn't mind the first (which helps him when drawing up agreements), but rival agents tend to dispute the validity of a cross on the contract. Which is very frustrating when you have found a teenager with long hair and a sulky expression who cannot play the guitar and cannot sing. Especially when you know that the way he *doesn't* do either will put him on top of the Hit Parade. Shivers run up and down the Actal agent's spine at the thought of his discovery's hip-wriggle seizing up. This, and the strain of eating too often in coffee bars when hunting for protégés, tends to give him dyspepsia. Luckily, whether in an espresso establishment or a concert hall, the Actal agent knows he can take a couple of Actal tablets.

In this way, he gets all the activity of a liquid antacid without being lumbered with bottle and spoon. Any moment now he may pay the highest tribute of all by stringing together the three musical chords he knows and putting them out together with a heavy off-beat as the "Actal Jive".

He would not have been as eager to do this if the doctor who prescribed his Actal had told him the chemical name was sodium polyhydroxyaluminium monocarbonate hexitol complex (360 mg.), and he would find it difficult to set to music the maker's name, which is Bayer Products Ltd., Kingston-upon-Thames (associated exporting company: Winthrop Products Ltd.).

More melodious is the ingredient cost of a week's treatment (2 tablets t.d.s.) which is only 1/10½d.

The PNEUMOTRON
an "electronically
controlled" resuscitator

The Pneumotron is an electronically controlled breathing apparatus originally designed for promoting and sustaining breathing in new-born infants, and which has now been developed for treating adult patients. It can be operated as a 'patient triggered' or fully automatic resuscitator. The slightest inspiratory effort of the patient will 'trigger' the apparatus to follow the breathing rate and respiratory pattern of the patient.

The Pneumotron will change over automatically to cycle at a preset rate and pressure should breathing cease altogether. Alternatively, the control can be set at fully automatic to give a continuous breathing cycle.

Your patient will prefer
DECADRON
Trademark
 because unlike other steroids
 it promotes a *natural*
 sense of well-being

An unexpected but very acceptable finding has emerged during widespread experience with 'Decadron' in a great variety of disorders—patients report that they *feel* better. This healthy sense of *improvement* is particularly noticed by patients who have previously been treated with other steroids, and, as a result, their co-operation during a prolonged and difficult illness is much easier to obtain. Reduction in the incidence and severity of many of the side-effects associated with the older steroids (e.g., oedema and hypertension) has made possible the treatment of patients with cardiovascular disease, and the relative freedom from diabetogenic effect allows 'Decadron' to be given to diabetics when indicated. Thus, the discovery of 'Decadron' has increased still further the number of patients who may now be given the immense benefits of corticosteroid therapy.

'Decadron' (Dexamethasone) is now available in TWO strengths:
 'Decadron'-75 (0.75 mg), green, half-scored tablets. 'Decadron' (0.5 mg.), yellow, half-scored tablets.
 The United Kingdom N.H.S. basic cost is 24s. 0d. per 30 x 0.5 mg. tablets.

In light diets . . .

In light diets, as well as under more normal regimes, Lucozade fulfils a most valuable role, not only in abating thirst and protecting the mucosa of the mouth, but also in arousing the appetite and contributing to the retention of more solid food. Lucozade is especially useful in the diet of patients in whom nausea of pregnancy, dehydration, or other special conditions make it necessary to supply an easily tolerated, nutritious fluid intake.

Lucozade is lightly carbonated with an attractive golden colour and a pleasant citrus flavour. It contains 23.5% w/v Liquid Glucose and its energy value is 21 Calories per fluid ounce. It is supplied in 6 oz. and 26 oz. bottles.

A New Roche Introduction

2,4 - dimethoxy - 6 - sulphanilamido - 1,3 - diazine

the safe long acting sulphonamide

Properties:

The most outstanding property of 'Madribon' is that therapeutic blood levels are maintained for at least 24 hours after each dose.

'Madribon' differs from most sulphonamides in that it is mainly excreted in the urine in the form of a glucuronide. This derivative, unlike the acetyl derivatives of most sulphonamides, is much more soluble than the parent compound and also retains some antibacterial activity.

Trials in over 9,000 patients show that it combines the advantages of small and infrequent dosage with high effectiveness and safety.

Dosage:

Adults: Initial dose 1-2g. (2-4 Tablets)
Maintenance dose 0.5-1g. (1-2 tablets)

Children: Initial dose 0.25g. ($\frac{1}{4}$ tablet) for every 20lb. body weight
Maintenance dose. 0.125g. ($\frac{1}{8}$ tablet) for every
20 lb. body weight

Packings

'Madribon' tablets 0.5g. are available in packings of 10, 50 and 250.
Basic N.H.S. cost for 10 tablets is 5/4d.
(4-9 days treatment depending upon the severity of the infection)

HYDRENOX
HYDROFLUMETHIAZIDE
ORAL DIURETIC

offers the following important advantages:-

Hydrenox is at least ten times as potent as chlorothiazide.

The cost of treatment with Hydrenox is lower than with any other potent oral diuretic.

In many cases a single daily dose produces an adequate response.

PACK AND PRICE

Each tablet contains 50 mg. of hydroflumethiazide. Available in containers of 100 and 500 tablets. Basic N.H.S. price 24/- and 116/- respectively. Normal dosage 1-4 tablets daily.

RAUWILOID

simplifies anti-hypertensive
therapy.

Alone for mild hypertension.

In combination for severe forms.

'Rauwiloid' was introduced in November 1953—the first Rauwolfia product to be made available in Great Britain. Many reports have since been published reviewing its anti-hypertensive properties and comparing them with those of the barbiturates and single rauwolfia alkaloids, e.g. reserpine.

Where direct comparisons are possible 'Rauwiloid' inevitably emerges as the preferred drug because of its effectiveness, lower incidence of severe side effects such as mental depression and simplicity of dosage which is

Safe, consistent and remarkably effective against the majority of bacterial infections met with in practice, Evramycin* offers you a rapidly active oral antibiotic with two outstanding features.

Firstly, nearly all pathogenic strains of staphylococci — even those resistant to other antibiotics — as well as streptococci and pneumococci are readily susceptible.

Secondly, treatment is relatively free from side-effects — allergy is rare; anaphylaxis, agranulocytosis, staphylococcal enteritis and troublesome minor symptoms are unknown.

'daracolor'
TABLETS

the **NEW** all-purpose antimalarial

Treatment 'DARACLOR' ensures swift and efficient control of the acute attack. In semi-immunes, a single dose is sufficient.

Suppression 'DARACLOR' is without question the most powerful suppressant of malaria now available. With 'DARACLOR', the development of parasite-resistance is extremely unlikely.

Eradication By virtue of its combined schizonticidal, suppressant, and sporontocidal properties, 'DARACLOR' is unsurpassed as an adjuvant to vector control. Mass 'single-dose' distribution is suggested as a follow-up to spraying campaigns.

In eradication programmes, for protection of troops and labour forces, and for treatment and protection of the individual...

ST. ANDREW'S HOSPITAL, NORTHAMPTON
For Nervous and Mental Disorders

President: The Earl Spencer. Medical Supt., Thomas Tennent, M.D., F.R.C.P., D.P.H., D.P.M. This Registered Hospital is situated in 130 acres of park and pleasure grounds. Voluntary patients who are suffering from incipient mental disorders or who wish to prevent recurrent attacks of mental trouble, temporary patients and certified patients of both sexes are received for treatment. Careful clinical, biochemical, bacteriological and pathological examinations. Private rooms with special nurses, male or female, in hospital or in one of the numerous villas in grounds of the various branches can be provided. **MOULTON PARK.**—Two miles from the main hospital there are several branch establishments and villas situated in a park and farm of 650 acres. Milk, meat, fruit and vegetables are supplied to the hospital from the farm, gardens, and orchards of Moulton Park. Occupational therapy is a feature of this branch and patients are given every facility for occupying themselves in farming, gardening and fruit-growing.

WANTAGE HOUSE.—This is a reception hospital in detached grounds with a separate entrance to which patients can be admitted. It is equipped with all the apparatus for the complete investigation and treatment of Mental and Nervous Disorders by the most modern methods: insulin treatment is available for suitable cases. There is an Operating Theatre, a Dental Surgery, an X-ray Room, an Ultra-Violet Apparatus, and a department of Diathermy and high frequency treatment. It also contains laboratories for biochemical, bacteriological and pathological research. Psychotherapeutic treatment is employed when indicated.

BRYN-Y-NEUADD HALL.—The seaside house of St. Andrew's Hospital is beautifully situated in a park of 330 acres at Llanfairfechan amidst the finest scenery in North Wales. On the North-West side of the estate a mile of sea-coast forms the boundary. Patients may visit this branch for a short seaside change or for longer periods. The hospital has its own private bathing house on the seashore. There is trout-fishing in the park.

At all the branches of the hospital there are cricket grounds, football and hockey grounds, lawn tennis courts (grass and hard courts), croquet grounds, golf courses and bowling greens. Ladies and gentlemen have their own gardens, and facilities are provided for handicrafts such as carpentry, etc.

For terms and further particulars apply to the Medical Superintendent (Telephone No.: Northampton 4354 (3 lines)), who can be seen in London by appointment.
