NaCl excretor

seven good reasons for prescribing NaClex tablets

(50 mg tablets hydroflumethiazide Glaxo)

1. Fully and rapidly effective orally. Effect begins about 2 hours after administration—lasts for up to about 12 hours.
2. Low dose of drug. NaClex is effective in 1/10th of dose of chlorothiazide. Average dose for severe case: 1 to 2 tablets twice daily for five days a week. Maintenance: 1 to 2 tablets daily, 2 or 3 times weekly.
3. Small tablet, easily swallowed. Is scored for halving.
4. Excretes Na and Cl ions in correct proportions. Unlikely to cause acidosis or alkalosis.
5. No need to restrict salt intake.
6. Does not diminish in effectiveness.
7. Makes oral diuretic therapy much less expensive.

New NaClex (Half-Strength) Tablets

Convenient for conditions responding to low doses, e.g. premenstrual oedema, obesity with fluid retention. Each scored tablet contains 25 mg hydroflumethiazide. Available in bottles of 25, 100 and 500.

forget-me-not

dosage

for the

TB patient

PUBLISHED BY SMITH & NEPHEW PHARMACEUTICALS LIMITED

In the past, PAS and INAH have mostly been prescribed three or four times a day. Less frequent, but higher, dosage is more acceptable and, consequently, more efficacious.

Patients like fewer doses. Large numbers of patients do not take their proper doses of PAS. Commonly missed or 'forgotten' is the midday dose, because it is inconvenient to carry the cachets around and people are shy of taking medicine in public. Let us be sure that the proper daily dose is given by conceding the midday dose and increasing the morning and evening doses.

New b.d. presentation. Cachets of PAS and INAH are now available in tubes containing exactly one day's supply. The tube is printed 'morning' and 'evening' to separate the two doses, and to make it easy for the patient to remember his doses. Universal adoption of this presentation would make prescription simpler, results better, and patients happier.

★ ★ ★

PYCAMISAN B.D. is the special new presentation of cachets of PAS and INAH in tubes of 8 for one day's supply. It is specially designed for twice-daily dosage eliminating the awkward midday dose, and the tube is marked 'morning' and 'evening' to help the patient remember his doses. The total daily dose is 12 grammes PAS and 300 mg. INAH—the most widely used and recommended combination in current use.

NULACIN "has revolutionized the treatment of duodenal ulcer"

"This new method of the administration of antacids (Nulacin) has revolutionized the treatment of duodenal ulcer... milk drip is no longer part of our therapeutic stock in trade."

PROC. ROY. SOC. MED., December, 1958, 51, 1063

NULACIN tablets, when allowed to dissolve slowly in the mouth, provide intragastric milk-alkali drip therapy safely and effectively for both the bed-ridden and ambulant patient. They may be relied on to provide a treatment for peptic ulcer as well as other conditions associated with gastric hyperacidity.

The safety and effectiveness of Nulacin therapy has been proven by "in vivo" clinical work carried out in many countries. References to this work include:—

running noses

The *New* concept for relief of the common cold

Relief in minutes—lasts for hours

An orally administered decongestant has much better distribution to the mucous membranes of the respiratory tract than nasal sprays, drops and inhalants, and this "affords opportunity for shrinkage in areas that could not be approached by sprays, drops or actual topical application."

'TRIOMINIC' "dries" and decongests nasal passages, combats allergic symptoms—with little likelihood of rebound congestion or pathological changes in the nasal mucosa, and without risk of local overtreatment or "nose drop addiction." Especially valuable for night-time cough caused by postnasal drip.

DEEP SKIN PENETRATION IN ARTHRITIS AND RHEUMATISM

NICOTINIC, SALICYLIC AND p-AMINOBENZOIC ACIDS in Ester form

IN CASES of soft-tissue rheumatism, and arthritic disorders, many doctors are tending more and more to regard Transvasin as an indispensable adjuvant to treatment.

For Transvasin is composed of the esters of nicotinic, salicylic and p-aminobenzoic acids. These esters readily pass the skin barrier in therapeutic quantities, and so enable an effective concentration of drugs to be built up where they are needed.*

Transvasin not only induces vasodilatation of the skin with a superficial erythema, but also brings about a deep hyperaemia of the underlying tissues. It is non-irritant and can be safely used on delicate skins.

It is now being widely prescribed, with successful clinical results. Since a very small quantity is sufficient for each application, the cost of treatment is extremely low.

A DIFFERENT TREE

A DIFFERENT TARGET

A DIFFERENT AIM

A DIFFERENT CARTRIDGE

The tree

The pulmonary tree, from the main bronchi to the respiratory bronchioles.

The target

Specific zones of the respiratory tract.

The aim

Topical administration of known drugs.

The cartridge

A container for drugs in which at least 80% by weight of the particles are within the optimum range of 2 to 6 μ —to ensure their even penetration to the sites of the disease.

A major advance

A significant pharmaceutical achievement by Bengel Laboratories now makes possible the topical application of drugs throughout the respiratory tree. The first drugs to be applied in this way are isoprenaline sulphate B.P., a proven bronchodilator (LOMUPREN); and pure chymotrypsin, a safe and effective mucolytic (LOMUDASE).

The therapeutic effect

When Lomupren or Lomudase, in this unique powder form, reaches the site of the disease process it is deposited on the surface moisture covering the mucous membrane. The particles dissolve instantly on contact. The solution so formed exerts a direct, immediate and powerful therapeutic effect. Thus with Lomupren, maximal bronchodilation is obtained with the minute dose of only 0.1 mg. isoprenaline—1/200th the normal sublingual dose—and systemic concentrations at which the usual side-effects might occur are avoided.

Application

One of the obvious applications of these drugs is in chronic bronchitis where bronchospasm and retained viscid mucoid sputum are predominant features. Self administration has been made possible by an ingenious pocket disperser, the Lomulizer. When the cartridge is placed in the Lomulizer a suitable inspiratory effort ensures that the drug penetrates in a predetermined dose throughout the respiratory tract.

**Bufferin relieves

without causing
gastric upset***

The best drug to relieve arthritic pain is undoubtedly aspirin. But it causes gastric upset in as many as 42% of arthritic patients. (British Medical Journal 1954, 1:1223). Hence the need for BUFFERIN.

BUFFERIN has two antacid ingredients, aluminium glycinate and magnesium carbonate, which prevent gastric distress, even when taken in massive doses as for arthritis. A clinical investigation carried out at the Robert Breck Brigham Hospital in Boston, showed that 70% of arthritics who had a *proved* intolerance to straight aspirin were able to take BUFFERIN without gastric distress.

*(Bufferin in the Management of Rheumatoid Arthritis, J.A.M.A. 158: 386 (June 4), 1955).

BUFFERIN has no equivalent in the B.P. or National Formulary and is prescribable on E.C. 10's.

An improved antacid preparation

'ALMACARB' tablets are prepared from an aluminium hydroxide-magnesium carbonate co-dried gel manufactured by an entirely new process (Brit. Pat. 812503). They have exceptional stability with a more rapid and prolonged acid-neutralising action than that of dried aluminium hydroxide gel, either alone or in mechanical admixture with magnesium carbonate.

'ALMACARB' tablets sucked at regular intervals will control gastric acidity effectively. They are preferable to liquid antacids both for effectiveness and convenience.

'ALMACARB' tablets are unique because there is no loss of neutralising action either on processing or tableting.

Dosage

One tablet to be chewed as an initial dose and thereafter one tablet to be sucked slowly at regular intervals.

(BRL 152)

BROXIL produces a greater concentration of antibiotic in the blood after oral administration than any other oral penicillin. It produces blood level peaks two to three times as high as those following oral potassium penicillin V, and at least equal to those following intramuscular injections of penicillin G.

BROXIL has an antibiotic spectrum similar to other forms of penicillin.

BROXIL is the first of the new antibiotics prepared from the penicillin "nucleus" — 6-aminopenicillanic acid — isolated in the Beecham Research Laboratories.

BROXIL (BRL 152) is the potassium salt of 6-(α -phenoxypropionamido)penicillanic acid

It's the pain she can't reach

Not effectively, that is, unless you provide your patient with the means of getting down into her aching muscles. That is why Algipan is so valuable. Methyl nicotinate promptly penetrates the skin barrier allowing the other active ingredients in Algipan's vanishing cream base to bring about a local vasodilatation which quickly submerges pain and discomfort in a flood of warmth. Algipan* just needs finger-tip application. It is so simple, so economical, so clean. There is no grease, no staining, nor signposting smell.

To restore full vigour

Whatever the illness, whether infection, metabolic disorder or a condition requiring surgical intervention, the patient needs full nutritional support for the restoration of health. And this implies more than a good mixed diet. Not only must the appetite be stimulated but the tissues must respond to the extra demands for full physiological activity, and this means supplying them with more than the usual intake of vitamins, especially of the B complex and ascorbic acid.

For these purposes the three preparations BEFORTISS, BECOVITE and OROVITE are designed, the latter being pleasantly flavoured and acceptable to patients of all ages.

For maintenance therapy—

Befortiss: Tablets (100), 1 ml., Ampoules (boxes of 5), Elixir (6 fl. ozs.).

BEFORTISS

For intensive therapy—

Becovite: Tablets (100), Twin 1 ml., Ampoules (boxes of 3 pairs), Elixir (6 fl. ozs.).

BECOVITE

For concentrated oral therapy—

Tablets (100) and Elixir (6 fl. ozs.). (Vitamin C can be added as Ascorvel.)

For his appetite's sake . . .

Loss of appetite is often a presenting symptom of vitamin B deficiency, and when due to this condition it calls for Elixir 'VIRVINA'. This pleasantly-flavoured preparation stimulates the appetite, increases intestinal motility and accelerates the flow of gastric juice. Elixir 'VIRVINA' contains vitamins B₁, B₂, B₆, and nicotinamide, as well as glycerophosphates of calcium, potassium, sodium and manganese. It is an ideal vitamin and mineral supplement, and it is very economical to prescribe. Elixir 'VIRVINA' is suitable for patients of all ages. The dosage for adults is two teaspoonfuls, for children one teaspoonful, three times daily before meals.

HASTINGS AND ST. LEONARDS

are what the doctor might order

Hastings is one of the nearest places to London that combines a mild climate with complete absence of smog, plus excellent hotels—and the peace and quiet a convalescent needs.

A patient can hardly fail to benefit by (literally) a 'breather' at Hastings. There is, on average, 400 hours more sunshine a year than in

London. There are cleverly designed suntrap shelters on the Promenades. And there is a delightfully relaxed feeling about the whole town. As a spot for taking it easy, Hastings is hard to better.

A postcard to the P.R. 37 Bureau, Hastings, Sussex, will bring you more information.

for **SAFER** Salicylate Therapy

Ekammon-soluble makes possible the administration of aspirin in full analgesic, antipyretic and antirheumatic doses.

Composition

Each tablet is tangerine-flavoured and contains: Soluble Aspirin equivalent to acetylsalicylic acid 330 mgm (5 grains), Acetomenaphthone (Vitamin K) 0.49 mgm, Ascorbic Acid (Vitamin C) 20 mgm.

Advantages

Gastric irritation due to the use of insoluble aspirin is considerably reduced or abolished when replaced by soluble aspirin

in Ekammon-soluble, avoiding erosive gastritis and its potentially lethal complications. The inclusion of Vitamin K counteracts the prothrombin-reducing action of aspirin, averting haemorrhagic tendencies; and Vitamin C prevents the depressant effects usually associated with the administration of salicylate medication.

Packs

Containers of 50, 100, 350 and 750 tablets.

Second Collection and
Third Collection with classified contents list to volumes 1, 2 and 3
Price 25s each (by post 26s. 9d.)

Each book contains a collection of sixty Refresher Course articles from the *British Medical Journal*. Each article, written by an acknowledged expert, has been revised by its author. The articles cover a wide range. Their object is to refresh the reader's memory of what is old and well-established and to tell him about new developments. They are invaluable to general practitioners and residents as practical reference books, to specialists as a means of keeping in touch with developments outside their own field, and to final-year students as up-to-date and reliable text-books.

The Third Collection has a cumulative classified contents list to the three volumes of "Refresher Course for General Practitioners."

The Case of the Tidy Corpse

An odd corpse or two around the house is one thing; but when your better half finds herself knee deep in crime she is liable to take a sudden passionate interest in the vegetable garden. If you find she has prepared an onion bed 6 feet long by 2 feet wide and 6 feet deep, it's time to stand well back from high cliffs, or you may well end up with policemen drawing chalk lines round the body—*your* body.

You have been warned! Don't risk it. *Today* (for it may well be later than you think) buy a Minty bookcase . . . and put your murderers where they ought to be—'Inside' condemned to stay neat, tidy and dust-free for life. Your wife will admire the elegant prison, which can expand to take in the entire criminal fraternity. What's more, she'll plant onions in the onion bed.

Minty bookcases are *sectional* and may be started from as little as £10.1.0—on deferred terms if you prefer. Only at the Minty Centres shown below can you see and buy Minty bookcases (and furniture). These Centres are so placed that Minty furniture is within reasonably easy reach of most people. If, however, for any reason you can't call, Minty will be glad to send you a catalogue and particulars of post ordering. Write to Dept. B.8, Minty Ltd., 44-45 High Street, Oxford.

the world's discovered Malta

the newest, sunniest, Mediterranean playground

There's an accent on relaxation in Malta—where a holiday inspires the feeling that one has at last got away from it all. Perhaps that is why it is becoming increasingly fashionable among people in search of a changing rhythm from the hurly-burly of life. Possibly the scenery accounts for it—the sands are whiter, the skies bluer, the sea warmer. Or it could be the year-round sunshine. Of course there's the kind of sport that helps one to limber up in a way all of us would like to—effortlessly. Or can we ascribe Malta's popularity to 'atmosphere'—an atmosphere fostered by the cultural legacies of civilizations going back 5000 years. In the silver shadows of its cathedrals and grand palaces history does seem to come alive.

*When you recommend a rest, recommend Malta—
In fact, take a trip there yourself sometime.*

APPOINTMENTS

Applicants should state name, address, age, nationality, qualifications, and enclose (unless otherwise specified) one copy each of 3 recent testimonials with short statement of experience and appointments held.

Applications should be sent at once if no closing date is given.

House Officers should submit a separate application for each post for which they apply.

Canvassing of members of the Board or Advisory Appointments Committee will lead to disqualification (Statutory Instrument 1950, No. 1259, N.H.S.).

★SERVICE MEMBERS may have difficulty in supplying recent testimonials, but this should not deter them from applying.

A fully registered medical practitioner who is liable for National Service must obtain deferment of recruitment in writing from the Central Medical Recruitment Committee or (in Scotland) the Scottish Central Medical Recruitment Committee before accepting any civilian appointment.

The position of provisionally registered medical practitioners who are liable for National Service has been made clear in a notice sent to them by the Ministry of Labour and National Service.

UNIVERSITY OF ST. ANDREWS**POSTGRADUATE MEDICAL EDUCATION****COMBINED CLINICAL AND MEDICAL SCIENCES COURSE**

Graduates in Medicine and Surgery are invited to make application for a combined Clinical and Medical Sciences Course to be held in Queen's College, Dundee, from October, 1960, to March, 1961.

All those taking the Combined Clinical and Medical Sciences Course will have:

(1) A clinical attachment in the special subject of their choice. In 1960-61 the following subjects will be offered:

GENERAL SURGERY
GENERAL MEDICINE
CARDIOLOGY
CARDIO-VASCULAR SURGERY
ENDOCRINOLOGY
DERMATOLOGY

HAEMATOLOGY
INFECTIOUS DISEASES
RESPIRATORY DISEASES
OBSTETRICS
GYNAECOLOGY
PAEDIATRICS

PSYCHIATRY
OPHTHALMOLOGY
OTO-RHINO-LARYNGOLOGY
ORTHOPAEDICS

(2) A supervisor who would guide their reading and laboratory work in relation to their specialty, and
(3) All would attend the medical sciences course.

The number accepted for this educational programme will be small and only one or at the most two candidates will get an attachment in each special subject.

The Eastern Regional Hospital Board will give the successful candidate an honorary clinical assistantship within the Unit where is studying the special subject of his choice.

The Supervisor will not only guide the reading and laboratory work of the student but will in appropriate cases allow him to take part in current research programmes.

The objective of the medical sciences course which all the postgraduates, whether medical, surgical, or other specialists, will follow is to bring the postgraduate student up to date on current trends in the medical sciences which are of importance to future medical developments.

In addition to this course, the Medical School offers weekly open postgraduate lectures by distinguished visitors and a course of lectures on scientific methods which postgraduate students in the school will be free to attend.

The fee for the course will be £36. Applications should be submitted before September 1, 1960, to the Dean of the Faculty of Medicine, University of St. Andrews, Queen's College, Dundee, from whom further information may be obtained.

ST. ANDREW'S HOSPITAL, NORTHAMPTON
For Nervous and Mental Disorders

President: The Earl Spencer. Medical Supt., Thomas Tennent, M.D., F.R.C.P., D.P.H., D.P.M. This registered hospital is situated in 130 acres of park and pleasure grounds. Voluntary patients who are suffering from incipient mental disorders or who wish to prevent recurrent attacks of mental trouble, temporary patients and certified patients of both sexes are received for treatment. Careful clinical, biochemical, bacteriological, and pathological examinations. Private rooms with special nurses, male or female, in hospital or in one of the numerous villas in grounds of the various branches can be provided.

MOULTON PARK.—Two miles from the main hospital there are several branch establishments and villas situated in a park and farm of 650 acres. Milk, meat, fruit and vegetables are supplied to the hospital from the farm, gardens and orchards of Moulton Park. Occupational therapy is a feature of this branch and patients are given every facility for occupying themselves in farming, gardening and fruit-growing.

WANTAGE HOUSE.—This is a reception hospital in detached grounds, with a separate entrance to which patients can be admitted. It is equipped with all the apparatus for the complete investigation and treatment of Mental and Nervous Disorders by the most modern methods; insulin treatment is available for suitable cases. There is an Operating Theatre, a Dental Surgery, an X-ray Room, an Ultra-Violet Apparatus, and a Department of Diathermy and high-frequency treatment. It also contains laboratories for biochemical, bacteriological and pathological research. Psychotherapeutic treatment is employed when indicated.

BRYN-Y-NEUADD HALL.—The seaside house of St. Andrew's Hospital is beautifully situated in a park of 330 acres at Llanfairfechan amidst the finest scenery in North Wales. On the North-West side of the estate a mile of sea-coast forms the boundary. Patients may visit this branch for a short seaside change or for longer periods. The hospital has its own private bathing house on the seashore. There is trout-fishing in the park. At all the branches of the hospital there are cricket grounds, football and hockey grounds, lawn tennis courts (grass and hard courts), croquet grounds, golf courses and bowling greens. Ladies and gentlemen have their own gardens, and facilities are provided for handicrafts such as carpentry, etc. For terms and further particulars apply to the Medical Superintendent (Telephone No.: Northampton 34354 (3 lines)), who can be seen in London by appointment.
