

The Case of the Tidy Corpse

An odd corpse or two around the house is one thing; but when your better half finds herself knee deep in crime she is liable to take a sudden passionate interest in the vegetable garden. If you find she has prepared an onion bed 6 feet long by 2 feet wide and 6 feet deep, it's time to stand well back from high cliffs, or you may well end up with policemen drawing chalk lines round the body—your body.

You have been warned! Don't risk it. Today (for it may well be later than you think) buy a Minty bookcase... and put your murderers where they ought to be—'Inside' condemned to stay neat, tidy and dust-free for life. Your wife will admire the elegant prison, which can expand to take in the entire criminal fraternity. What's more, she'll plant onions in the onion bed.

Minty bookcases are sectional and may be started from as little as £10.1.0—on deferred terms if you prefer. Only at the Minty Centres shown below can you see and buy Minty bookcases (and furniture). These Centres are so placed that Minty furniture is within reasonably easy reach of most people. If, however, for any reason you can't call, Minty will be glad to send you a catalogue and particulars of post ordering. Write to Dept. B.9, Minty Ltd., 44-45 High Street, Oxford.

OXFORD (Head Office): 44-45 High St. BIRMINGHAM: 186 Corporation St. BOURNEMOUTH: J. J. Allen Ltd., The Quadrant. BRISTOL: 50 Park St. CARDIFF: David Morgan Ltd., The Hayes. Harker Ltd., Grainger St. NOTTINGHAM: Hopewells Ltd., Parliament St.

Down to the shops . . . taking and meeting the children from school . . . walking the dog round the park . . . up and down stairs a hundred times a day—the normal daily round can so easily make leg fatigue and varicose veins a major problem. For patients who have little time to 'put their feet up', Tru-Support stockings give comforting relief. Combining the firm support of an elastic stocking with the light-weight elegance of nylon crepe, Tru-Support provide the gentle vascular support and give the slender grace so important to fashion-conscious women.

TRU-SUPPORT

The fashion stocking with true elastic support

Tru-Support stockings, superbly strong yet fashionably fine, cost only

39/6 a pair.

Tofranil® Geigy Thymoleptic

Thymoleptic
Specific
therapeutic
measure for the
treatment of the
depressive state

Geigy

Tofranil[®]

Thymoleptic

The mode of action of Tofranil differs from that of all previous drugs used in the treatment of depression. To describe the specific action that Tofranil exerts on the depressive syndrome a new classification has been introduced—thymoleptic or "mood-regulating" drugs. Tofranil is neither a stimulant nor a tranquillizer but modifies the basic processes of the depressive illness.

Tofranil

Tofranil, the first thymoleptic, is the result of many years experimental research and clinical investigation. Tofranil is capable of replacing E.C.T., affording a basic advantage for the "intellectual" patient where possible loss of memory or confusion would be particularly undesirable.

Melancholia

Tofranil is specific for endogenous depression; reactive depression, and depression associated with other psychiatric states have also shown a high degree of therapeutic response. The main features of the depressive syndrome are characterized by: Tiredness; Heaviness of the limbs; Feeling of oppression; Retardation; Inhibition; all these features together being worse in the morning and slightly better at night.

Clinical results

In Great Britain clinical evaluation of Tofranil and widespread practical experience resulting from the treatment of over 100,000 individual diagnosed depressive patients have confirmed the 60–70% success rate reported by earlier workers. A controlled trial found Tofranil to be therapeutically effective in 74% of patients suffering from endogenous depression and in 59% of patients with reactive depression.

1Brit. med. J. 2, 1052 (1959)

Availability

The thymoleptic Tofranil is available in tablets, each containing 25 mg N-(γ-Dimethylaminopropyl)-iminodibenzyl hydrochloride
In containers of 50, 200 and 1000

new major tranquilliser . . .

"Melleril was superior to all other phenothiazines in

its ability to bring about clinical improvement
in florid and overactive schizophrenics with

the minimum of side-effects . . . "

J. ment. Sci. (1960) 106, April number.

"The most striking aspect of Melleril therapy
is the poverty of side-effects."

J. Amer. med. Ass. (1959) 170, 1283.

Mellerii BY SANDOZ

...in mental and emotional disturbance

Mirror-Calm...

Meleri the train

equilliser pure and simple

Melleril

PROPERTIES

Melleril* is a new phenothiazine tranquilliser with greater specificity of psychotherapeutic action. The most striking aspect of Melleril therapy is the almost complete absence of side-effects.

Melleril is unique in having a thiomethyl radical in position 2 and this could well be responsible for the lack of toxic reactions. The Melleril side-chain with a piperidine ring is associated not only with reduced adrenolytic and anticholinergic potency but also with suppression of both anti-emetic and extrapyramidal effects.

Although the basic pharmacological actions of Melleril are similar to those of the phenothiazines generally, certain properties have been described which support the clinical observation that Melleril has a more specific psychosedative action than other tranquillisers. Melleril selectively inhibits emotional behaviour in animals without any significant effect on either conditioned performance or motor activity. It is practically devoid of anti-emetic action; has little or no effect on the temperature-regulating mechanism; does not potentiate the action of anaesthetics to any significant extent; and does not produce "catalepsy" in rats (a correlation is thought to exist between drug-induced "catalepsy" in rats and extrapyramidal side-effects in man). The central action of Melleril is less diffuse than that of other phenothiazine tranquillisers.

Controlled clinical trials over a 3-year period have established Melleril as a major advance in tranquilliser therapy: extremely effective, safe and singularly free from the serious side-effects associated with the use of other phenothiazines—particularly extrapyramidal, allergic, hepatic and haemopoietic complications. Melleril is often well tolerated by patients experiencing untoward reactions with other tranquillisers.

INDICATIONS

Melleril is indicated for the restoration of normal behaviour in a wide range of mental and emotional disturbances characterised by anxiety, tension and agitation. It is particularly effective in the management of acute and subacute schizophrenia and manic psychoses. Good results have been reported in the treatment of chronic psychoses, acute and chronic psychoneuroses, senile confusional states and behaviour disorders in children.

Unlike other phenothiazines, Melleril has little or no anti-emetic action or potentiating effect on analgesics. Melleril is a tranquilliser pure and simple: a selective psychosedative.

ADMINISTRATION AND DOSAGE

Mental and emotional disturbance

Daily dosage range

Severe: acute schizophrenia, manic psychoses etc. 150 - 600 mg.

Moderate: psychomotor agitation in severe psychoneuroses etc. 75 - 200 mg.

Mild: anxiety, tension, apprehension etc. 30 - 100 mg.

Behaviour disorders in children: under 5 0.5 mg/lb. body weight

over 5 $\frac{1}{4} - \frac{1}{2}$ adult dosage

SIDE-EFFECTS

Melleril is extremely well tolerated and side-effects are rare and very mild in the normal dosage ranges. Drowsiness, dizziness, faintness, dryness of mouth and nasal stuffiness may occur initially with high dosage, but are usually transient.

All clinical reports underline the almost complete absence of serious toxic reactions. Even mild degrees of parkinsonism are extremely rare; moreover, patients disabled by extrapyramidal side-effects with other phenothiazines show no parkinsonism on therapeutically equivalent or larger doses of Melleril. Amenorrhoea, impairment of sexual function and lactation may occur, but respond to reduction of dosage. Oedema and leucopenia, both transient, have been reported in extremely rare instances. As with all phenothiazines, the physician should nevertheless be alert to the possibility of depression of bone marrow activity in susceptible individuals. No cases of depression of liver function, jaundice, dermatitis, photosensitivity, seizures or agranulocytosis have been reported.

Melleril is contraindicated in severely depressed or comatose states.

The tree

The pulmonary tree, from the main bronchi to the respiratory bronchioles.

The target

Specific zones of the respiratory tract.

The aim

Topical administration of known drugs.

The cartridge

A container for drugs in which at least 80% by weight of the particles are within the optimum range of 2 to 6 μ —to ensure their even penetration to the sites of the disease.

A major advance

A significant pharmaceutical achievement by Benger Laboratories now makes possible the topical application of drugs throughout the respiratory tree. The first drugs to be applied in this way are isoprenaline sulphate B.P., a proven bronchodilator (LOMUPREN); and pure chymotrypsin, a safe and effective mucolytic (LOMUDASE).

The therapeutic effect

When Lomupren or Lomudase, in this unique powder form, reaches the site of the disease process it is deposited on the surface moisture covering the mucous membrane. The particles dissolve instantly on contact. The solution so formed exerts a direct, immediate and powerful therapeutic effect. Thus with Lomupren, maximal bronchodilation is obtained with the minute dose of only 0.1 mg. isoprenaline-1/200th the normal sublingual dose—and systemic concentrations at which the usual side-effects might occur are avoided.

Application

One of the obvious applications of these drugs is in chronic bronchitis where bronchospasm and retained viscid mucoid sputum are predominant features. Self administration has been made possible by an ingenious pocket disperser, the Lomulizer. When the cartridge is placed in the Lomulizer a suitable inspiratory effort ensures that the drug penetrates in a predetermined dose throughout the respiratory tract.

The Lomu range:

Products of Benger research

PRESCRIPTION INFORMATION

LOMUPREN

Each cartridge contains 0.1 mg. of isoprenaline sulphate B.P. Bottles of twenty-five cartridges—basic N.H.S. price 6/-.

LOMUDASE

Each cartridge contains 0.01 Anson units of chymotrypsin and 0.1 mg. of isoprenaline sulphate B.P. Bottles of twenty-five cart-ridges—basic N.H.S. price 17/9d.

LOMULIZER

Complete with carrying pouch-basic N.H.S. price 8/3d.

Lomu, Lomudase, Lomupren, Lomulizer are trade marks, property of the manufacturers—patents pending.

THE TOWER
AND
THE BRIDGE-

twin symbols
of a great
pharmaceutical company

Many trade symbols have this same "double life."

At Farbwerke Hoechst, A.G., Frankfurt, there is, indeed, a tower, to which is connected a bridge; they make an attractive pair of buildings, and are well-known to visitors to Hoechst.

But—in the Hoechst trade-mark—the tower and the bridge also *stand for* things valued by Hoechst. The *soaring tower* symbolizes the high-aiming endeavour and far-seeing research of the Company's personnel. The *sweeping bridge* for the far-flung connections, obligations, and trust that exists between Hoechst and the world at large—"the bridge of confidence."

300 graduate scientists—chemists, doctors, pharmacists—are employed by Hoechst in Frankfurt in the pharmaceutical field alone. They work in ultramodern laboratories with advanced equipment. And they work within a tradition of ambitious endeavour and significant discovery—inspired by such illustrious predecessors as Emil von Behring and Paul Ehrlich, originators respectively of the first diphtheria antitoxin and Salvarsan.

A soaring tower—and a sweeping bridge . . . these are fitting symbols for a pharmaceutical company that is second to none both in research and in production.

One synthetic hypoglycaemic substance was chosen from over a thousand...

-SO₂-NH-CO-NH-C₄H₉

because it combined high therapeutic effectiveness with absolute safety

MORE THAN A THOUSAND hypoglycaemic substances have been synthesized. But in Rastinon (tolbutamide), Farbwerke Hoechst A.G. offer an anti-diabetic agent which has proved, after comprehensive laboratory and clinical tests, to combine high therapeutic effectiveness with absolute safety.

The primary consideration which led to the selection of Rastinon by Hoechst was its safety. Rastinon is better tolerated than any other oral anti-diabetic agent.

This factor, together with its reliable hypoglycaemic action, determines its optimal pharmacological properties.

Here then is a new era in the therapy of diabetes—already proved for over 1,250,000 diabetics all over the world.

SUBJECTIVE ADVANTAGES:

Rastinon, the standard *oral* anti-diabetic agent, eliminates all problems of self-administration associated with injections. In many cases one tablet by mouth once or twice a day is all that is necessary for maintenance. In diabetic patients with tremor, physical disability, or psychic problems, the advantages of Rastinon's oral control may be especially relevant.

OBJECTIVE ADVANTAGES:

There is virtually no danger of hypoglycaemic reactions as a result of Rastinon therapy, regardless of dosage. Rastinon is a true euglycaemic agent. In patients in whom maintenance dosage has been established, it lowers the blood sugar to normal levels, but almost never beyond that point.

The Rastinon combination of high therapeutic effectiveness, absolute safety and low cost cannot be matched by any other oral anti-diabetic agent.

Do you make full use of 'Largactil'?

Although the use of 'Largactil' brand chlorpromazine hydrochloride is firmly established in many specialized fields of medicine, this drug also finds many valuable applications in general practice.

In general medicine 'Largactil' is of particular value in:-

The treatment of moderate to severe mental and emotional disturbances and many somatic conditions complicated by emotional stress.

The prevention and treatment of severe nausea, vomiting and hiccough.

The relief of otherwise intractable pain. 'Largactil' enhances the actions of analgesics and hypnotics and thereby allows smaller amounts of these agents to be used.

PRESENTATIONS

TABLETS sugar-coated, white, of 10, 25, 50 and 100 mg.

SYRUP containing 25 mg. chlorpromazine hydrochloride in each 3.6 ml. (approx. one teaspoonful).

1 PER CENT SOLUTION in ampoules of 5 ml.

2.5 PER CENT SOLUTION in ampoules of 1 ml. and 2 ml.

SUPPOSITORIES containing 100 mg. base.

Detailed information is available on request.

An M&B brand Medical Product.

Naclex

NaCI excretor

seven good reasons for prescribing NaClex tablets

(50 mg tablets hydroflumethiazide Glaxo)

- 2 1. Fully and rapidly effective orally.
 Effect begins about 2 hours after administration—lasts for up to about 12 hours.
- 2. Low dose of drug. NaClex is effective in 1/10th of dose of chlorothiazide. Average dose for severe case: 1 to 2 tablets twice daily for five days a week. Maintenance: one tablet twice weekly is often sufficient.
- 3. Small tablet, easily swallowed and well tolerated.
- 4. Excretes Na and Cl ions in correct proportions. Unlikely to cause acidosis or alkalosis.
- 5. Seldom requires restriction of salt intake.
- 6. Does not diminish in effectiveness.
- 7. Makes oral diuretic therapy much less expensive.

New NaClex (Half-Strength) Tablets

Convenient for conditions responding to low doses, e.g. premenstrual oedema, obesity with fluid retention. Each scored tablet contains 25 mg hydroflumethiazide. Available in bottles of 25, and 100

INDICATIONS

Congestive heart failure · Left-sided heart failure (cardiac asthma)
Hypertension · Toxaemia of pregnancy · Nephrotic syndrome
Cirrhosis of the liver with fluid retention · Steroid oedema

announcing

NARPHEN

Trade Mark brand PHENAZOCINE (NIH 7519)

new synthetic analgesic

more powerful than morphine

NARPHEN is chemically 2'-hydroxy-5,9-dimethyl-2-phenethyl-6,7-benzomorphan; its 'Approved Name' is phenazocine.

NARPHEN is a quick-acting and potent analgesic that is more powerful than morphine and pethidine. Early reports show that Narphen is from 3 to 10 times more effective an analgesic than morphine.

NARPHEN produces less respiratory depression, less hypotension, and less nausea and vomiting than morphine.

NARPHEN appears to produce addiction more slowly than morphine and the effects of withdrawal are less intense.

NARPHEN is available in boxes of 10 and 100 ampoules each containing 2 mg. per 1 ml. ampoule.

GENERAL ANAESTHESIA

Edited by Frankis T. Evans, M.B., B.S., F.F.A.R.C.S., D.A., and Cecil Gray, M.D., F.F.A.R.C.S. In two volumes: Vol. I, Pp. xiv+531+Index; Vol. II, Pp. xii+431+Index. 199 illustrations. £7 7s. net per set; by post, 2s. 9d. extra.

The whole wide field of anaesthesia is covered in these two volumes. The first takes in basic principles, covering those specialized aspects of anatomy, physiology and neurophysiology which are important to anaesthetists in their everyday work, pre-anaesthetic considerations, apparatus, blood transfusions, the different methods of administration and many other subjects. Techniques, special fields and hazards are detailed in the second, where the appropriate anaesthetic approach to every type of operation is minutely examined by accepted authorities writing on their own subjects.

MODERN TRENDS IN ACCIDENT SURGERY AND MEDICINE

Edited by Ruscoe Clarke, M.B.E., M.B.(Lond.), F.R.C.S.(Eng.), F. G. Badger, B.Sc., F.R.C.S.(Ed.), and Simon Sevitt, M.D., M.Sc., M.A., F.R.C.P.I., D.P.H. Pp. xi+330+Index. 82 illustrations. 75s. net; by post, 2s. extra.

"It is pleasing that the title of this book is comprehensive, including both surgical and medical accidents; this is as it should be, as a modern understanding of accident cases involves the patient as a whole. Every aspect of the accident case is covered in a very practical way.... The illustrations are excellent and have been well chosen. The operative treatment of fractures is portrayed in a very interesting and practical fashion. This is one of the really important books of the year. It will be the guide to all surgeons who have to deal with trauma and it will prove of real value to the surgical undergraduate who is working for a higher degree."—British Journal of Surgery.

PRINCIPLES OF BONE X-RAY DIAGNOSIS

By George Simon, M.D., M.R.C.P., F.F.R. Pp. xx+170+Index. 244 illustrations, 57s. 6d. net; by post, 1s. 9d. extra.

Dr. Simon uses his familiar method of classifying the abnormalities shown on the X-ray, and then linking a provisional or even final diagnosis with the clinical findings. Essentially for the radiologist, this book will also be welcomed by orthopaedic surgeons and by all doctors who may be required to interpret the appearances on bone X-rays.

A GREAT ASSORTMENT OF MEDICAL PUBLICATIONS.

First shoes have big responsibilities. They have to look after little feet when it's easiest of all to damage them for life with ill-fitting, ill-made footwear. Clarks Play-ups have no unnecessary gimmicks but have everything a toddler needs in shoes; firm but gentle FIT at instep and heel, room at the front for toes to grow, soft leathers which are kind to baby skin, broad but light and flexible soles to make balancing less of a problem, absorbent leather inner soles for health and comfort. Play-ups are shoes you can *trust* at a time when trustworthy shoes are all-important.

Melsedin is the ideal hypnotic for treating insomnia and is free from the potential hazards of barbiturate therapy.

Melsedin is supplied in tablets of 150 mg.

BOOTS PURE DRUG CO. LTD. STATION STREET

NOTTINGHAM

an improved

antacid preparation

'ALMACARB' tablets are prepared from an aluminium hydroxide-magnesium carbonate co-dried gel manufactured by an entirely new process (Brit. Pat. 812503). The result is a product of exceptional stability with a more rapid and prolonged acid-neutralising action than that of dried aluminium hydroxide gel either alone or in mechanical admixture with magnesium carbonate. 'ALMACARB' tablets sucked at regular intervals will ensure effective control of gastric acidity. Used in this way they are preferable to liquid antacids both for effectiveness and convenience. 'ALMACARB' tablets are unique because there is no loss of neutralising action either on processing or tabletting.

DOSAGE

One tablet to be chewed as an initial dose and thereafter one tablet to be sucked slowly at regular intervals.

PACI

Individually foil wrapped tablets.

BASIC N.H.S. PRICES

Cartons of 40...3/- Subject Cartons of 200...12/- to P.T.

Please note also-

How easy it is for your patients to insert.

How flat Tampax expands to fit the vaginal canal.

How gentle its contact with the vaginal epithelium.

How dainty it is for the patient to remove.

How well it is adapted to individual needs.

The high absorptive efficiency of Tampax is the best assurance your patients can have of dependable internal protection. For the strong capillary 'wick' action of the fine surgical cotton—from which the Tampax tampon is made—enables it to absorb the flux with active freedom, and transmit it evenly throughout its full length.

This advantage may be readily demonstrated by immersing one end of a dry, opened tampon in a glass of water, with the other end hanging outside over the edge. The tampon, like a wick, unfailingly conveys water up over the rim to saturate the free end.

When the Tampax is inserted intravaginally, this positive wick action prevents any blockage of the flow—since, with equal sureness, it draws the menstrual fluid away from the cervix uteri.

The ease and convenience of using Tampax lend additional appeal to its efficacy. The compressed tampon may be inserted high in the vaginal vault by the simple operation of the individual applicator. Here it gently undergoes flat expansion, held intact by special cross-fibre stitching. A moisture-proof cord facilitates gentle removal.

HAVE YOU TRIED THIS 'WATER-TEST' FOR ABSORPTIVE EFFICIENCY? Professional samples and literature will gladly be supplied by Medical Department, Tampax Limited, Havant, Hants.

Tampax provides better physical management of menstrual hygiene

the

safety factor

in corticosteroid therapy

In corticosteroid therapy, it is now accepted that while one can have too much potency, one cannot have too much safety. Physicians today therefore prefer to assess the value of a corticoid on the actual clinical results rather than on high potency alone. It is this factor that explains the wide-spread preference for LEDERCORT triamcinolone. It is backed by the most telling assurance of all—prolonged successful use coupled with an excellent record of safety in a wide range of clinical conditions.

High tolerance is the most important factor in the replacement of iron in the anaemic patient. By prescribing FERROMYN (Ferrous Succinate) the physician is well insured against risks of nausea and other symptoms of intolerance to iron.

The mild atoxic action of FERROMYN permits maximum absorption and utilisation of the readily available iron, and produces a haemoglobin response which quickly becomes evident in the clinical improvement of the patient.

Whether the physician prefers to administer iron in tablet, capsule, or liquid form, all three are available in the FERROMYN range.

Providing these outstanding advantages:

(i) disintegration is rapid (ii) intolerance is low (iii) haemoglobin response is 1%-2% per day.

FERROMYN: Each Tablet / Capsule / teaspoonful contains: Ferrous Succinate 150mg.

FERROMYN 'B': Each Tablet/Capsule/teaspoonful contains: Ferrous Succinate 150mg. Riboflavin 1mg. Aneurine Hydrochloride 1 mg. Nicotinamide 10 mg.

DOSAGE: One Tablet/Capsule/teaspoonful between meals or as prescribed.

Ferroids

Can be prescribed with Confidence

TO ACHIEVE AND
MAINTAIN SATISFACTORY
HAEMOGLOBIN LEVELS

IN ANTE OF POST PARTUM PATIENTS

Acceptable to both doctors and patients.

This partly chelated complex of iron and amino acids is well absorbed, without troublesome side-effects.

Utilisation of iron is unusually high.

One 'Ferroids' tablet three times daily will be adequate for most patients.

When required, eight tablets daily—or more—will be well-tolerated even if taken between meals.

'FERROIDS' establish

satisfactory haemoglobin levels and replenish iron reserves more effectively and safely than conventional iron salts.

'FERROIDS' tablets contain:

Iron aminoates...... 350 mg.* \bullet Vitamin B_1 1 mg.

*equivalent to 35 mg. elemental iron.

'Ferroids' tablets are available in containers of 100......6/8 and 1,000.....54/8 (Basic N.H.S. prices)

'FERROIDS' is a registered trade mark of:

Why parents need special aspirin for their children...

Many parents find it difficult to measure sub-doses of adult aspirins when they have to administer them to children. Angiers Junior Aspirin overcomes this difficulty because it is correctly measured to the safe child's dose of $1\frac{1}{4}$ grains of aspirin per tablet.

Not only is Angiers Junior Aspirin easy for parents to administer safely but children find it pleasant to take because it is orange-flavoured. Angiers Junior Aspirin also contains $1\frac{1}{2}$ grains of Di-calcium Phosphate per tablet, to check any possible acid irritation of sensitive stomachs.

ANGIERS JUNIOR ASPIRIN

Isoniasid and _____

In the course of isoniazid treatment of tuberculosis adverse effects on the nervous system have been reported occasionally. Peripheral neuropathy or psychosis may arise, and it has been suggested that these side effects may be due to an antagonism between isoniazid and vitamin B factors. A good response to massive doses of the vitamin B complex has, in fact, been obtained in psychosis arising during isoniazid therapy.

Marmite yeast extract is a useful dietary supplement, providing all known factors of the vitamin B complex. Its pleasant taste ensures ready acceptance by the patient, while the nursing staff appreciate the ease with which Marmite drinks and sandwiches can be prepared.

REFRESHER COURSE FOR GENERAL PRACTITIONERS

Third Collection with classified contents list to volumes 1, 2 and 3 Price 25s. (by post 26s. 9d.)

Each book contains a collection of sixty Refresher Course articles from the British Medical Journal. Each article, written by an acknowledged expert, has been revised by its author. The articles cover a wide range. Their object is to refresh the reader's memory of what is old and well-established and to tell him about new developments. They are invaluable to general practitioners and residents as practical reference books, to specialists as a means of keeping in touch with developments outside their own field, and to final-year students as up-to-date and reliable text-books.

The Third Collection has a cumulative classified contents list to the three volumes of "Refresher Course for General Practitioners."

APPOINTMENTS

Applicants should state name, address, age, nationality, qualifications, and enclose (unless otherwise specified) one copy each of 3 recent*testimonials with short statement of experience and appointments held.

Applications should be sent at once if no closing date is given.

House Officers should submit a separate application for each post for which they apply.

Canvassing of members of the Board or Advisory Appointments Committee will lead to disqualification (Statutory Instrument 1950, No. 1259, N.H.S.).

★SERVICE MEMBERS may have difficulty in supplying recent testimonials, but this should not deter them from applying.

A fully registered medical practitioner who is liable for National Service must obtain deferment of recruitment in writing from the Central Medical Recruitment Committee or (in Scotland) the Scotlish Central Medical Recruitment Committee before accepting any civilian appointment.

The position of provisionally registered medical practitioners who are liable for National Service has been made clear in a notice sent to them by the Ministry of Labour and National Service.

SALARY SCALES OF JUNIOR GRADES OF HOSPITAL MEDICAL STAFF

Registrar Grades, Whole-time

(a) REGISTRAR: Posts obtained normally not less than two years after registration as a medical practitioner and held normally for two years: £972 8s, per annum in the first year; £1,103 19s, per annum in the second and any subsequent years. If the post is resident a deduction of £170 per annum is made.

(b) SENIOR REGISTRAR: Posts obtained normally not less than four years after registration as a medical practitioner and held normally for four years; £1,258 8s. per annum in the first year; £1,372 1cs. per annum in the second year; £1,487 4s. per annum in the third year; £1,601 12s. per annum in any subsequent years. If the post is resident a deduction of £200 per annum is made.

Other Grades, Whole-time

(i) Provisionally registered medical practitioners: £486 4s. per annum for the first post held; £543 8s. per annum for the second and all subsequent posts held;

provided that the employing authority (subject in the case of a Hospital Management Committee to the consent of the Regional Hospital Board) shall have discretion to determine that the remuneration of any officer holding his first post in the National Health Service as a House Officer shall be £543 8s. per annum if they are satisfied that the officer has held at least one hospital post outside, of not less than six months' duration, involving clinical responsibilities equivaent to those of house posts in the National Health Service and supervised by appropriate specialist staff.

(ii) Fully registered medical practitioners: £600 12s, per annum for any post held; provided that in exceptional circumstances, subject to the consent of the Minister, this rate may be exceeded by up to £50 per annum where a post cannot be filled otherwise.

In each case under sub-sections (i) and (ii) above, a deduction of £125 per annum in respect of board and lodging and other services provided shall be made and each post shall be tenable for six months.

(b) SENIOR HOUSE OFFICER: Posts obtained by fully registered medical practitioners, and held normally for one year only: £852 6s, per annum. If the post is resident a deduction of £150 per annum is made.

(c) JUNIOR HOSPITAL MEDICAL OFFICER: Officers who have held house appointments but who are neither Senior House Officers nor in one of the registrar grades, who have less responsibility than other hospital officers of non-consultant status, and who have been appointed for a limited or an indefinite period, not less than one year after full registration as a medical practitioner: £886 12s. by £57 4s. to £1,229 16s. per annum. If the post is resident a deduction of £170 per annum is made.

ALL NATIONAL HEALTH SERVICE HOSPITAL APPOINTMENTS ARE IN ACCORDANCE WITH THE TERMS AND CONDITIONS OF SERVICE OF HOSPITAL MEDICAL STAFF (20/11/59)

THE ERNEST AND MINNIE DAWSON CANCER TRUST

A COMPETITION FOR GENERAL MEDICAL PRACTITIONERS

The purpose of the Ernest and Minnie Dawson Cancer Trust, which came into being in 1955, is to arrange competitions between selected general medical practitioners who, from time to time, make what is considered to be the most valuable contribution to the early diagnosis, prevention and treatment of cancer and to knowledge of its causes. The third competition, which will close on May 1, 1961, will take the form of a thesis on cancer. The subject matter is at the discretion of the entrant, and may relate to cancer in various sites or cancer of one organ; it must also lay emphasis on one or more of the following: (a) early diagnosis; (b) causes; (c) prevention, and (d) treatment. All entries must contain original thought and observation, and be the result of personal endeavour.

The competition is open to doctors mainly engaged in general practice who practise and/or reside in Lancashire or Yorkshire or any of the following parts of Great Britain:

Cheshire Cumberland Derbyshire Durham Isle of Man Lincolnshire Northumberland Nottinghamshire Westmorland

Prizes to a total of £2,000 may be awarded by

Entry forms and detailed conditions of entry may be obtained from the Clerk to the Trust, The Ernest and Minnie Dawson Cancer Trust, Williams Deacon's Bank Chambers, 2, Lytham Road, Fulwood, Preston.

E. PEARSON. Clerk to the Trust.

Readers frequently desire to refer to advertisements concerning appliances, preparations, etc., which have appeared in earlier issues of the *Journal*.

The Advertisement Director can supply particulars at any time.

In dealing with written inquiries, especially from overseas, correspondents are wherever possible, put in direct contact with the advertisers in whose products they interested.

Write: Advertisement Director, British Medical Journal. B.M.A. House, Tavistock Square. London, W.C.1,

Have you received your copy of

MODERN CONTRACEPTIVE TECHNIQUE?

This practical manual on contraception has already proved invaluable to many doctors in advising their patients. It presents a concise and compact survey of methods commonly used, together with notes on methods which have medical approval, and also on others which are medically contra-indicated. If you have not yet received a copy, you are invited to write for one now.

The case against 'natural' methods

Medical opinion generally agrees that the practice of so-called "natural" methods of contraception (coitus interruptus, coitus reservatus, etc.) can have an adverse effect on physical and mental health. One of the principal reasons why these unreliable methods are used is the slight loss of sensitivity experienced with protectives (condoms).

This problem has now been almost entirely overcome by the introduction of Durex Gossamer, a new kind of lubricated protective. Durex Gossamer, is treated with Sensitol, "a non-wet, non-messy lubricant which substantially increases the level of sensitivity. Samples of Durex Gossamer protectives on request.
