BENDROFLUAZIDE

*the more potent diuretic  
that induces physiological diuresis*

**CENTYL—THE SELECTIVE DIURETIC**

**selective sodium and chloride excretion without potassium depletion**

Centyl is a new and improved diuretic discovered in the Leo Laboratories in Copenhagen, Denmark.

Given orally, Centyl is 100 times more potent than chlorothiazide, weight for weight, and almost twice as effective as the parenteral mercurials. Further, although the sodium excretion rate is greatly increased, potassium excretion normally remains within physiological limits. Thus Centyl, promoting physiological diuresis, approaches the criteria for the ideal diuretic.

**CENTYL promotes physiological diuresis**

Centyl is bendrofluazide: It is available in 2.5 mg. or 5 mg. tablets, in bottles of 25, 100 and 500. Average basic NHS cost of Centyl treatment is as low as 8d to 2/- per week.

**Specific  
therapeutic  
measure for the  
treatment of the  
depressive state**

---

## Thymoleptic

The mode of action of Tofranil differs from that of all previous drugs used in the treatment of depression. To describe the specific action that Tofranil exerts on the depressive syndrome a new classification has been introduced—**thymoleptic** or "mood-regulating" drugs. Tofranil is neither a stimulant nor a tranquillizer but modifies the basic processes of the depressive illness.

---

## Tofranil

Tofranil, the first thymoleptic, is the result of many years experimental research and clinical investigation. Tofranil is capable of replacing E.C.T., affording a basic advantage for the "intellectual" patient where possible loss of memory or confusion would be particularly undesirable.<sup>1</sup>

---

## Melancholia

Tofranil is specific for endogenous depression; reactive depression, and depression associated with other psychiatric states have also shown a high degree of therapeutic response. The main features of the depressive syndrome are characterized by: Tiredness; Heaviness of the limbs; Feeling of oppression; Retardation; Inhibition; all these features together being worse in the morning and slightly better at night.

---

## Clinical results

In Great Britain clinical evaluation of Tofranil and widespread practical experience resulting from the treatment of over 100,000 individual diagnosed depressive patients have confirmed the 60–70% success rate reported by earlier workers.

A controlled trial<sup>1</sup> found Tofranil to be therapeutically effective in 74% of patients suffering from endogenous depression and in 59% of patients with reactive depression.

**AND HOECHST**

The great German pharmaceutical company, Farbwerke Hoechst A.G., last year celebrated its seventy-fifth anniversary. It could look back on many outstanding developments in medical science that it had introduced—ranging from the first diphtheria antitoxin, to Rastinon, the established oral treatment of diabetes.

Today, in the Pharmacopoeia of every country are listed drugs originated at Hoechst; for example, in the British Pharmacopoeia 1958 are listed Procaine, Epinephrine, Mersalyl, Tetracaine, Pethidine, Methadone, and Normethadone, each one of which was discovered in the Hoechst laboratories.

300 graduate scientists—chemists, doctors, pharmacists—are employed by Hoechst in Frankfurt on pharmaceutical research alone. They work in ultra-modern laboratories, with all the equipment they could possibly need.

The promise from Hoechst is of even greater achievement in the discovery of new weapons against disease.

The best drug to relieve arthritic pain is undoubtedly aspirin. But it causes gastric upset in as many as 42% of arthritic patients. (British Medical Journal 1954, 1:1223). Hence the need for BUFFERIN.

BUFFERIN has two antacid ingredients, aluminium glycinate and magnesium carbonate, which prevent gastric distress, even when taken in massive doses as for arthritis. A clinical investigation carried out at the Robert Breck Brigham Hospital in Boston, showed that 70% of arthritics who had a *proved* intolerance to straight aspirin were able to take BUFFERIN without gastric distress.

judged on performance

In any comparison of oral penicillins, 'V-Cil-K' is bound to take first place. Its introduction marked a milestone in penicillin therapy—it is still the favourite. 'V-Cil-K' provides the clinical response of parenteral penicillin with the convenience and safety of oral penicillin; blood levels are twice as high as those of penicillin-V acid; action is swift; side effects are few. These are the facts as confirmed by many clinical reports. *Performance* is the criterion for any drug, and on recorded performance 'V-Cil-K' is unsurpassed among oral penicillins.

## WRIGHT'S COAL TAR LIQUID SURGICAL SOAP

## bed springs eternal

He feels as though he'll never leave his bed. As if 'the flu' was not uncomfortable enough, he now has to be frustrated by mental inertia, lack of appetite and general fatigue—the aftermath of illness.

For him as for so many 'run down' patients, COLLOTONE can do much to bridge the gap between recovery from illness and normal vitality. An easily assimilated tonic, it restores appetite, improves physical and mental tone, helps busy people to get up and about with a feeling of well-being.

## COLLOTONE THE TONIC

Each fl. oz. (29 ml.) contains:  
Green ferric ammonium citrate B.P.C. 1954, 312 mg. Iron and manganese citrate B.P.C. 85 mg. Potassium glycerophosphate B.P.C. 294 mg. Sodium glycerophosphate B.P.C. 207 mg. Vitamin B<sub>1</sub> B.P. 2.67 mg. Tincture of nux vomica B.P. 0.3 ml. Caffeine citrate B.P.C. 170 mg.  
Basic N.H.S. cost 1/1d. per 4 fl. oz.

**CREAM** have pronounced

advantages over either medicament alone

The established germicidal, stimulating and anti-pruritic properties of tar, in the treatment of sub-acute and refractory skin affections, can now be considerably enhanced by its incorporation with hydrocortisone. \* Clinical trials have shown that the two medicaments together exert a powerful synergistic action that is far more rapid, more pronounced and complete than the action of either alone. These two valuable therapeutic agents are presented in a non-greasy, stainless, hydrophilic cream known as TARCORTIN.

### TARCORTIN CREAM

is supplied in 7 gm. and 15 gm. tubes, containing 0.5% Hydrocortisone in a special coal-tar extract.

## The Case of the Tidy Corpse

An odd corpse or two around the house is one thing; but when your better half finds herself knee deep in crime she is liable to take a sudden passionate interest in the vegetable garden. If you find she has prepared an onion bed 6 feet long by 2 feet wide and 6 feet deep, it's time to stand well back from high cliffs, or you may well end up with policemen drawing chalk lines round the body—*your* body.

*You have been warned!* Don't risk it. *Today* (for it may well be later than you think) buy a Minty bookcase . . . and put your murderers where they ought to be—'Inside' condemned to stay neat, tidy and dust-free for life. Your wife will admire the elegant prison, which can expand to take in the entire criminal fraternity. What's more, she'll plant onions in the onion bed.

Minty bookcases are *sectional* and may be started from as little as £10.1.0—on deferred terms if you prefer. Only at the Minty Centres shown below can you see and buy Minty bookcases (and furniture). These Centres are so placed that Minty furniture is within reasonably easy reach of most people. If, however, for any reason you can't call, Minty will be glad to send you a catalogue and particulars of post ordering. Write to Dept. B.9, Minty Ltd., 44-45 High Street, Oxford.

## REFRESHER COURSE FOR GENERAL PRACTITIONERS

Third Collection with classified contents list to volumes 1, 2 and 3  
Price 25s. (by post 26s. 9d.)

Each book contains a collection of sixty Refresher Course articles from the *British Medical Journal*. Each article, written by an acknowledged expert, has been revised by its author. The articles cover a wide range. Their object is to refresh the reader's memory of what is old and well-established and to tell him about new developments. They are invaluable to general practitioners and residents as practical reference books, to specialists as a means of keeping in touch with developments outside their own field, and to final-year students as up-to-date and reliable text-books.

The Third Collection has a cumulative classified contents list to the three volumes of "Refresher Course for General Practitioners."

## APPOINTMENTS

Applicants should state name, address, age, nationality, qualifications, and enclose (unless otherwise specified) one copy each of 3 recent testimonials with short statement of experience and appointments held.

Applications should be sent at once if no closing date is given.

House Officers should submit a separate application for each post for which they apply.

Canvassing of members of the Board or Advisory Appointments Committee will lead to disqualification (Statutory Instrument 1950, No. 1259, N.H.S.).

★SERVICE MEMBERS may have difficulty in supplying recent testimonials, but this should not deter them from applying.

A fully registered medical practitioner who is liable for National Service must obtain deferment of recruitment in writing from the Central Medical Recruitment Committee or (in Scotland) the Scottish Central Medical Recruitment Committee before accepting any civilian appointment.

The position of provisionally registered medical practitioners who are liable for National Service has been made clear in a notice sent to them by the Ministry of Labour and National Service.

# Laxatives for Children

AS A LAXATIVE for children Andrews has characteristics which have commended it to many physicians. A brief restatement of them may be helpful.

The laxative action of Andrews is mild, and is due to the presence of magnesium sulphate and other salts in balanced proportion. Their effect is to increase the fluid in the bowel by osmosis. There is no irritation of the intestine. Evacuation is easy, and without griping.

Andrews has a pleasant taste, and children accept it readily. Dosage is easily adjusted according to age.

It is mildly antacid, stimulates bile flow, and aids digestive processes. It is also useful as a gastric sedative in bilious attacks.

Andrews gives rise to no costive reaction when discontinued.

PHILLIPS, SCOTT & TURNER LIMITED, 179 ACTON VALE, ACTON, LONDON, W.3

an improved

antacid preparation

'ALMACARB' tablets are prepared from an aluminium hydroxide-magnesium carbonate co-dried gel manufactured by an entirely new process (Brit. Pat. 812503). The result is a product of exceptional stability with a more rapid and prolonged acid-neutralising action than that of dried aluminium hydroxide gel either alone or in mechanical admixture with magnesium carbonate. 'ALMACARB' tablets sucked at regular intervals will ensure effective control of gastric acidity. Used in this way they are preferable to liquid antacids both for effectiveness and convenience. 'ALMACARB' tablets are unique because there is no loss of neutralising action either on processing or tableting.

#### DOSAGE

One tablet to be chewed as an initial dose and thereafter one tablet to be sucked slowly at regular intervals.

#### PACK

Individually foil wrapped tablets.
