**Tofranil® Geigy Thymoleptic**  
**Specific  
therapeutic  
measure for the  
treatment of the  
depressive state**

---

## Thymoleptic

The mode of action of Tofranil differs from that of all previous drugs used in the treatment of depression. To describe the specific action that Tofranil exerts on the depressive syndrome a new classification has been introduced—**thymoleptic** or "mood-regulating" drugs. Tofranil is neither a stimulant nor a tranquillizer but modifies the basic processes of the depressive illness.

---

## Tofranil

Tofranil, the first thymoleptic, is the result of many years experimental research and clinical investigation. Tofranil is capable of replacing E.C.T., affording a basic advantage for the "intellectual" patient where possible loss of memory or confusion would be particularly undesirable.<sup>1</sup>

---

## Melancholia

Tofranil is specific for endogenous depression; reactive depression, and depression associated with other psychiatric states have also shown a high degree of therapeutic response. The main features of the depressive syndrome are characterized by: Tiredness; Heaviness of the limbs; Feeling of oppression; Retardation; Inhibition; all these features together being worse in the morning and slightly better at night.

---

## Clinical results

In Great Britain clinical evaluation of Tofranil and widespread practical experience resulting from the treatment of over 100,000 individual diagnosed depressive patients have confirmed the 60–70% success rate reported by earlier workers.

A controlled trial<sup>1</sup> found Tofranil to be therapeutically effective in 74% of patients suffering from endogenous depression and in 59% of patients with reactive depression.

# Allergic conditions

**A more potent antihistaminic—rapid,  
strong, and prolonged in its action...  
with no serious side-effects**

Of the many antihistamine compounds available today, Daneral is exceptional for its strong, rapid, and prolonged action. Even small doses are sufficient to counteract the histamine effects that occur in antigen-antibody reaction. Daneral also has a strong antispasmodic action; it also reduces capillary permeability.

It is exceptionally free of toxic side-reactions and has no pronounced action on blood-pressure or vascular resistance.

**Indications:** Extensive clinical trials have established the effectiveness of Daneral in most allergic conditions. It also has value in many conditions that have no clear allergic origin or tissue reaction.

In *hay fever* and vaso-motor rhinitis Daneral is especially effective. In *dermatology* it is used in urticaria and angioneurotic oedema; serum reactions; drug allergy; pruritus. In *general medicine* bronchial asthma and cardiac asthma are helped by Daneral.

**Packs:** 10 mg. tablets—tubes of 20 and bottles of 250.

# Eczema (INFECTIVE)

*Acute Infective Eczema before treatment*

*After 5 days' treatment (Cambison 0.5% twice a day)*

## **Steroid ointments are frequently successful in varieties of eczema that have resisted other therapy**

They have the advantage of being anti-allergic, anti-inflammatory and anti-pruritic. Even severe itching is usually relieved in a few hours, and hyperaemia, swelling, and exudation reduced during the first day of treatment.

Cambison ointment combines the steroid prednisolone with a two-fold protection against infection. Not only does it include the antibiotic neomycin, which is highly effective against staphylococci and streptococci, but also a quinolylurea compound with chemotherapeutic action particularly directed against gram-positive organisms. This combination widens the antimicrobial spectrum and enhances the antibacterial effect.

Cambison is indicated in cases of acute and chronic eczema and dermatitis, particularly where infection is present or threatened.

## **New ointment combines advantages of the corticosteroids with traditional ichthammol type therapy**

In chronic dermatoses, steroid ointments alone do not always effect radical cures.

**Tumeson** (Tumenol Prednisolone Ointment) combines the advantages of the corticosteroids with more traditional therapy.

It has two components:—

*Prednisolone* 0.25%, with its well-known anti-inflammatory and anti-allergic properties.

*Tumenol Ammonium*, a bituminous shale tar-oil similar to ichthammol, which is widely used in sub-acute and chronic skin conditions. As well as having an anti-inflammatory and anti-pruritic effect, it is a vasoconstricting agent with fungicidal and bacteriocidal properties.

Where a rapid, pronounced and sustained anti-pruritic and anti-eczematous action is called for, Tumeson is especially useful.

# Athlete's Foot

*Ringworm of the feet*

*After 7 days' treatment with Jadit*

## **An effective new treatment that is odourless and colourless**

Fungus infections of the skin—and particularly 'athlete's foot'—still remain a prevalent cause of distress and morbidity. The need for a reliable and cosmetically acceptable local treatment is greater than ever before.

The advantage of Jadit (chlorhydroxybenzoic acid butylamide) is that it provides a potent fungicidal action that is practically unimpaired in the presence of tissue protein. It is elegant, simple and safe.

## **For inflammatory and allergic mycotic reactions, hydrocortisone is added**

Jadit 'H' contains 0.5% of hydrocortisone, which has a reliable anti-inflammatory, anti-allergic and anti-pruritic action. In combination with Jadit's antimycotic action, hydrocortisone suppresses inflammatory reactions.

# DIABETES

*and the patient who fears injections*

## RASTINON

PROVIDES COMPLETE ORAL CONTROL  
*that is safe and convenient*

THE DIABETIC PATIENT who suffers from an excessive fear of injections may undergo considerable psychic trauma.

A large number of these patients\* can now be controlled orally with RASTINON (tolbutamide). In many cases, one tablet by mouth once or twice a day is all that is necessary for maintenance.

Not only does RASTINON make possible continued dosage administration that is free from psychological reactions; in addition, blood sugar levels approach the normal without risk of hypoglycaemia. RASTINON is a true euglycaemic agent.

In patients in whom maintenance dosage has been established, RASTINON lowers the blood sugar to normal levels, but almost never beyond that point, regardless of dosage.

Rapid excretion precludes cumulative effects. No cases of dyschaemopoiesis, jaundice, or other serious side effects have been reported.

There is no added cost of treatment for the patient previously on insulin.

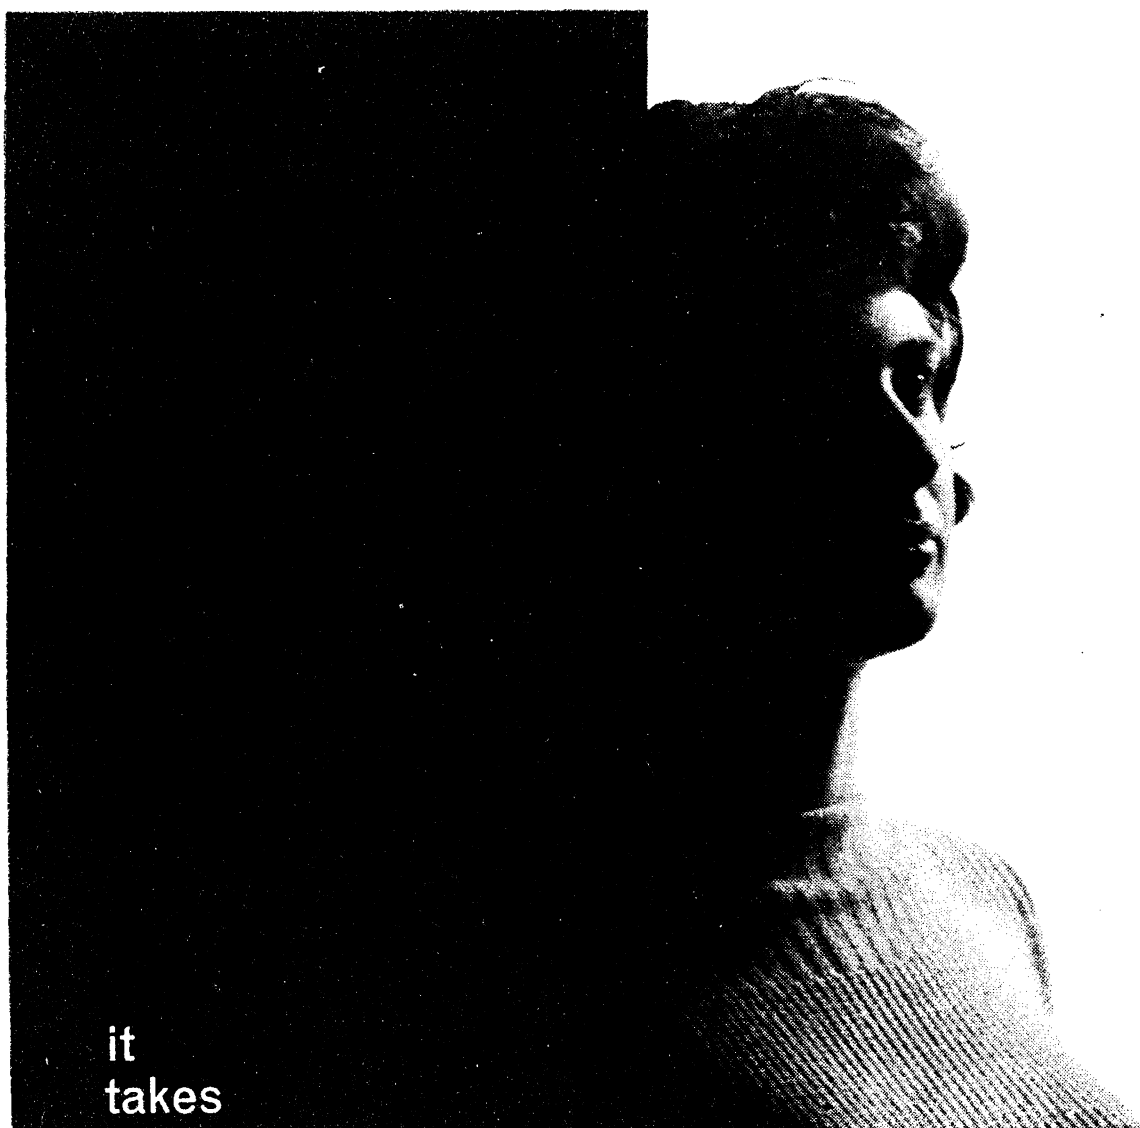

\* Over 1,250,000  
diabetics all over  
the world owe their well-  
being to RASTINON. The  
rate of response increases

# Reduction of blood cholesterol level

*High blood cholesterol levels can be substantially reduced by a diet high in liquid vegetable oils which contain a high proportion of polyunsaturated fatty acids, such as linoleic acid.*

Some authorities believe that lowering the serum cholesterol level diminishes the chances of coronary artery disease.

This is the reason why many doctors recommend the use of liquid vegetable oil to their patients—elevated serum cholesterol levels are lowered, and normal levels tend to stay normal.

TWIRL is 100% vegetable oil—a blend of winterised cottonseed and corn oils—scrupulously refined. It is high in polyunsaturated fatty acids (linoleic acid 45%).

TWIRL is excellent for *all* cooking. Foods fried in TWIRL are non-greasy, readily digestible and

retain all their natural flavour. TWIRL is resistant to autoxidation and keeps its bland flavour. It is economical, too.

Our scientists have prepared a booklet "Lipids in Relation to Arterial Disease—A Summary of Biochemical Evidence", which summarizes the facts relating to the composition of blood lipids and of pathological deposits associated with atherosclerosis.

The booklet may be obtained by writing to J. Bibby & Sons Limited, Research Department, King Edward Street, Liverpool 3.

## An improved antacid preparation

'ALMACARB' tablets are prepared from an aluminium hydroxide-magnesium carbonate co-dried gel manufactured by an entirely new process (Brit. Pat. 812503). They have exceptional stability with a more rapid and prolonged acid-neutralising action than that of dried aluminium hydroxide gel, either alone or in mechanical admixture with magnesium carbonate.

'ALMACARB' tablets sucked at regular intervals will control gastric acidity effectively. They are preferable to liquid antacids both for effectiveness and convenience.

'ALMACARB' tablets are unique because there is no loss of neutralising action either on processing or tableting.

### Dosage

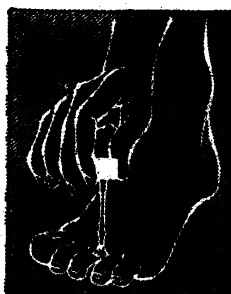

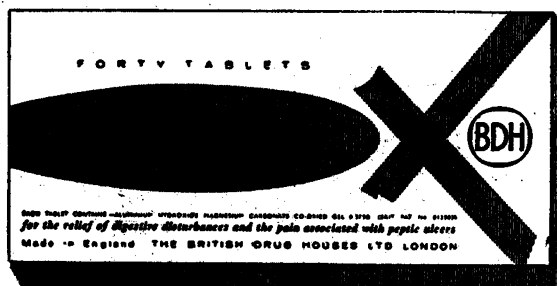

One tablet to be chewed as an initial dose and thereafter one tablet to be sucked slowly at regular intervals.

***new simplicity  
in diuretic therapy***

Intensive diuretic therapy often causes potassium depletion. This can usually be prevented by the administration of a potassium supplement. 'HydroSALURIC'-K is a diuretic product which contains hydrochlorothiazide and potassium chloride, the latter component contained in a new and reliable enteric coating

*Average Dosage:*

1 to 2 tablets, once or twice daily, as required

*Each tablet of 'HydroSALURIC'-K contains:*

Hydrochlorothiazide 25 mg., Potassium Chloride 572 mg.

*The U.K. basic N.H.S. cost of 12 tablets is approximately 3s. 11d.*

## Hunter, Frye and Swartzwelder—MANUAL OF TROPICAL MEDICINE

Newest methods in treatment and control. New (3rd) Edition.

By GEORGE W. HUNTER, *Lecturer in Microbiology, University of Florida*; WILLIAM W. FRYE, *Professor of Tropical Medicine, Louisiana State University*; and J. CLYDE SWARTZWELDER, *Professor of Parasitology, Louisiana State University*.  
892 pages, 323 illustrations. £5 5s.

## Gardner, Gray and O'Rahilly—ANATOMY: A regional Study of Human Structure

New! A significant contribution to medical education—an unusual anatomy text boldly designed to meet the changing needs of today's students. The approach is regional. Systemic considerations are included where pertinent in the regional discussions. Paris nomenclature of 1955 is used throughout, with older synonyms noted at least once. Basic anatomy is portrayed not as a static subject, but as an area in which knowledge is always advancing.

By ERNEST GARDNER, *Professor of Anatomy, Wayne University*; DONALD J. GRAY, *Professor of Anatomy, Stanford University*; and RONAN O'RAHILLY, *Associate Professor of Anatomy, Wayne University*.  
999 pages, 568 line drawings and 64 radiographic plates. £5 5s.

## Poppen—ATLAS OF NEUROSURGICAL TECHNIQUES

Exquisite, step-by-step pictorial details of procedures in elective and emergency neurosurgery—drawn from the author's long experience at the Lahey Clinic.

By JAMES POPPEN, *Neurosurgeon, The Lahey Clinic*. 522 pages, with 248 full-page plates. £9 16s.

## Leavell and Thorup—FUNDAMENTALS OF CLINICAL HEMATOLOGY

A useful working volume in understanding the more common blood disorders.

By BYRD S. LEAVELL, *Professor of Internal Medicine, University of Virginia*; and OSCAR A. THORUP, *Associate Professor of Internal Medicine, University of Virginia*.  
503 pages, illustrated. £3 10s.

## REFRESHER COURSE FOR GENERAL PRACTITIONERS

Third Collection with classified contents list to volumes 1, 2 and 3  
Price 25s. (by post 26s. 9d.)

Each book contains a collection of sixty Refresher Course articles from the *British Medical Journal*. Each article, written by an acknowledged expert, has been revised by its author. The articles cover a wide range. Their object is to refresh the reader's memory of what is old and well-established and to tell him about new developments. They are invaluable to general practitioners and residents as practical reference books, to specialists as a means of keeping in touch with developments outside their own field, and to final-year students as up-to-date and reliable text-books.

The Third Collection has a cumulative classified contents list to the three volumes of "Refresher Course for General Practitioners."

## APPOINTMENTS

Applicants should state name, address, age, nationality, qualifications, and enclose (unless otherwise specified) one copy each of 3 recent \* testimonials with short statement of experience and appointments held.

Applications should be sent at once if no closing date is given.

House Officers should submit a separate application for each post for which they apply.

Canvassing of members of the Board or Advisory Appointments Committee will lead to disqualification (Statutory Instrument 1950, No. 1259, N.H.S.).

\*SERVICE MEMBERS may have difficulty in supplying recent testimonials, but this should not deter them from applying.

A fully registered medical practitioner who is liable for National Service must obtain deferment of recruitment in writing from the Central Medical Recruitment Committee or (in Scotland) the Scottish Central Medical Recruitment Committee before accepting any civilian appointment.

The position of provisionally registered medical practitioners who are liable for National Service has been made clear in a notice sent to them by the Ministry of Labour and National Service.

### SALARY SCALES OF JUNIOR GRADES OF HOSPITAL MEDICAL STAFF

#### Registrar Grades, Whole-time

(a) **REGISTRAR**: Posts obtained normally not less than two years after registration as a medical practitioner and held normally for two years: £972 8s. per annum in the first year; £1,103 19s. per annum in the second and any subsequent years. If the post is resident a deduction of £170 per annum is made.

(b) **SENIOR REGISTRAR**: Posts obtained normally not less than four years after registration as a medical practitioner and held normally for four years: £1,258 8s. per annum in the first year; £1,372 16s. per annum in the second year; £1,487 4s. per annum in the third year; £1,601 12s. per annum in any subsequent years. If the post is resident a deduction of £200 per annum is made.

#### Other Grades, Whole-time

##### (a) HOUSE OFFICERS:

(i) **Provisionally registered medical practitioners**: £486 4s. per annum for the first post held; £543 8s. per annum for the second and all subsequent posts held; provided that the employing authority (subject in the case of a Hospital Management Committee to the consent of the Regional Hospital Board) shall have discretion to determine that the remuneration of any officer holding his first post in the National Health Service as a House Officer shall be £543 8s. per annum if they are satisfied that the officer has held at least one hospital post outside, of not less than six months' duration, involving clinical responsibilities equivalent to those of house posts in the National Health Service and supervised by appropriate specialist staff.

(ii) **Fully registered medical practitioners**: £600 12s. per annum for any post held; provided that in exceptional circumstances, subject to the consent of the Minister, this rate may be exceeded by up to £50 per annum where a post cannot be filled otherwise.

In each case under sub-sections (i) and (ii) above, a deduction of £125 per annum in respect of board and lodging and other services provided shall be made and each post shall be tenable for six months.

(b) **SENIOR HOUSE OFFICER**: Posts obtained by fully registered medical practitioners, and held normally for one year only: £852 6s. per annum. If the post is resident a deduction of £150 per annum is made.

(c) **JUNIOR HOSPITAL MEDICAL OFFICER**: Officers who have held house appointments but who are neither Senior House Officers nor in one of the registrar grades, who have less responsibility than other hospital officers of non-consultant status, and who have been appointed for a limited or an indefinite period, not less than one year after full registration as a medical practitioner: £886 12s. by £57 4s. to £1,229 16s. per annum. If the post is resident a deduction of £170 per annum is made.

daily round

Down to the shops . . . taking and meeting the children from school . . . walking the dog round the park . . . up and down stairs a hundred times a day—the normal daily round can so easily make leg fatigue and varicose veins a major problem. For patients who have little time to 'put their feet up', Tru-Support stockings give comforting relief. Combining the firm support of an elastic stocking with the light-weight elegance of nylon crepe, Tru-Support provide the gentle vascular support and give the slender grace so important to fashion-conscious women.
