

A safe laxative for use during pregnancy and lactation

DURING pregnancy Andrews Liver Salts will be found of great service. Its pleasant taste and refreshing qualities make it an acceptable draught, which can be repeated with advantage two or three times a day if necessary. Taken thus, Andrews obviates the tendency to constipation and also relieves hepatic congestion. The sedative effect of Andrews will be found helpful, and its aperient action is of great value in cases of renal insufficiency.

During lactation, Andrews can be used with confidence for the relief of constipation.

The Cole Quads of Glasgow

This is a delightful picture of the Cole Quads of Glasgow, now seven months old, who are thriving on Cow & Gate Full Cream Milk Food, supplemented by Cow & Gate Cereal Food.

The wonderful progress made by these splendid babies, the ninth set of Quadruplets to be fed on Cow & Gate, supplies evidence, we suggest, if any be needed, of the successful outcome of our fifty years specialised experience in the making of infant foods. May we send you a copy of our new Medical Handbook which gives a list of our products with their formulae and dietary indications?

CENTYL—THE SELECTIVE DIURETIC

selective sodium and chloride excretion without potassium depletion

Centyl is a new and improved diuretic discovered in the Leo Laboratories in Copenhagen, Denmark.

Given orally, Centyl is 100 times more potent than chlorothiazide, weight for weight, and almost twice as effective as the parenteral mercurials. Further, although the sodium excretion rate is greatly increased, potassium excretion normally remains within physiological limits. Thus Centyl, promoting physiological diuresis, approaches the criteria for the ideal diuretic.

CENTYL promotes physiological diuresis

Centyl is bendrofluzide: It is available in 2.5 mg. or 5 mg. tablets, in bottles of 25, 100 and 500. Average basic NHS cost of Centyl treatment is as low as 8d to 2/- per week.

AND COLLABORATION

DURING TUBERCULOTHERAPY

WHY '302'?

This new addition to the Pasinah range of concurrent PAS-Isoniazid products has been designed specifically to encourage, throughout treatment, patients' fullest co-operation in order to obviate the known dangers which may result from default in taking medication.

ADVANTAGES

- Total 24-hour intake in a single convenient pack.
- Only 6 cachets per 24 hours, to provide 12 g. Sodium Aminosalicylate B.P. and 300 mg. Isoniazid B.P.
- Flexibility of single dosage maintained:
3 cachets twice daily
or 2 cachets three times daily
according to your instructions.
- Acceptability improved, because smooth cachets without sharp edges make swallowing easier; because the number to be taken on each occasion is reduced to a minimum:
never more than 3 cachets per single dose.

FORMULA

Each 'Pasinah-302' cachet contains:
Sodium Aminosalicylate B.P. 2 g.
Isoniazid B.P. 50 mg.

PRESENTATION

Tins of 180 cachets (30 days' supply) packed in daily units of 6 cachets.

Terms for institutional quantities gladly sent on request.

We are also pleased to announce that we now offer our established range of 'Pasinah' products in an improved, smaller flanged-cachet form, the doses of the contents remaining unchanged.

This alteration of form has been devised likewise especially for the greater convenience of patients, and, by extension, to induce their better co-operation.

NULACIN "has revolutionized the treatment of duodenal ulcer"

"This new method of the administration of antacids (Nulacin) has revolutionized the treatment of duodenal ulcer... milk drip is no longer part of our therapeutic stock in trade."

PROC. ROY. SOC. MED., December, 1958, 51, 1063

NULACIN tablets, when allowed to dissolve slowly in the mouth, provide intragastric milk-alkali drip therapy safely and effectively for both the bed-ridden and ambulant patient. They may be relied on to provide a treatment for peptic ulcer as well as other conditions associated with gastric hyperacidity.

The safety and effectiveness of Nulacin therapy has been proven by "in vivo" clinical work carried out in many countries. References to this work include:—

ANNOUNCING

HON* FETAL MONITOR

BY
Epsco

**first continuous precise recorder
of fetal heart rate... gives
early warning of fetal distress**

Obstetricians now have a new and improved diagnostic tool for clinical and research purposes.

First displayed at the 1960 Cincinnati meeting of the American College of Obstetrics and Gynecology, the Hon Fetal Monitor is capable of continuously recording the fetal heart rate throughout labor and delivery under typical delivery room conditions. It provides separate fetal and maternal EKGs, instantaneous meter display in recording fetal heart rate, and measurements of uterine pressure. *Earliest possible warning of fetal heart rate deviations is given which provides an objective record of value in the immediate handling of the patient.*

In situations where the fetal heart beat is difficult to discern and where fetal life cannot be determined by present clinical methods (such as bleeding problems of middle pregnancy or where the patient is obese or polyhydramnious) the Hon Monitor is capable of detecting fetal life in approximately ninety per cent of such cases. It is also valuable for diagnosis of multiple pregnancy.

The fetal EKGs are recorded continuously by a new rectilinear ink writing system on inexpensive, folded paper, or electronic trace, if desired. An oscilloscope also provides visual monitoring.

*The Fetal Monitor was developed by the Assistant Professor of Obstetrics and Gynecology, Yale University School of Medicine, and electronic scientists of Epsco Medical. It consists of a self-contained wheeled unit 20" x 24" x 64" high, with recorders in a pull-out drawer. All controls and indicators are mounted on a central panel, with recorders horizontal at table height. Its operation requires no special electronic training. Orders are now being accepted and deliveries scheduled as received. Price \$9,950.

High tolerance is the most important factor in the replacement of iron in the anaemic patient. By prescribing FERROMYN (Ferrous Succinate) the physician is well insured against risks of nausea and other symptoms of intolerance to iron.

The mild atoxic action of FERROMYN permits maximum absorption and utilisation of the readily available iron, and produces a haemoglobin response which quickly becomes evident in the clinical improvement of the patient.

Whether the physician prefers to administer iron in tablet, capsule, or liquid form, all three are available in the FERROMYN range.

Providing these outstanding advantages :

Not effectively, that is, unless you provide your patient with the means of getting down into her aching muscles. That is why Algipan is so valuable. Methyl nicotinate promptly penetrates the skin barrier allowing the other active ingredients in Algipan's vanishing cream base to bring about a local vasodilatation which quickly submerges pain and discomfort in a flood of warmth. Algipan* just needs finger-tip application. It is so simple, so economical, so clean. There is no grease, no staining, nor signposting smell.

Almacarb

TRADE MARK

ALMACARB tablets are prepared from an aluminium hydroxide-magnesium carbonate co-dried gel made by an entirely new process. (Brit.Pat. 812503) Aluminium hydroxide gel has been used for some years as an antacid in suspension, but until the introduction of Almacarb no means had been discovered by which its full acid-neutralising capacity could be retained through the process of drying and tableting. In Almacarb the full antacid potential is retained and its action is rapid and sustained. ALMACARB—dosage. One tablet to be chewed as an initial dose, and thereafter one tablet to be sucked slowly at frequent intervals. ALMACARB is presented as peppermint-flavoured tablets, each containing 0.375 g. of aluminium hydroxide-magnesium carbonate co-dried gel.

ADHESIVE BANDAGING WITHOUT SKIN IRRITATION

PoroPlast considerably reduces the risk of skin irritation which often associates with the use of ordinary elastic adhesive bandages. It contains no rubber and none of the irritating natural resins or solvents usually embodied in adhesive plaster.

Consequently PoroPlast can remain in situ for long periods without causing irritation, and it has been well tolerated even on very sensitive skins.

PoroPlast is porous and has the same characteristics of elasticity, stretch and compression as ordinary elastic adhesive bandages. Its price is the same. It can be prescribed on N.H.S. In rolls 3" and 2½" wide (5-6 yards stretched). Sample roll of PoroPlast on request.

**Controlled Tests

75-100% clearances**

Impressive clinical results in the treatment of Psoriasis by ALPHOSYL continue to be recorded, and indicate most strongly that this allantoin-coal tar combination deserves a trial in all cases of:

- total scalp-to-toe psoriasis
- psoriasis of many years' duration
- psoriasis involving tender areas
- psoriasis refractory to all previous treatment

The most recent controlled study, of a group of 62 patients, shows that in 55 cases (89%) psoriatic lesions were cleared 75-100%, and nearly half

of them were "completely cleared." In ALPHOSYL, for the first time, are presented in combination two powerful and proved healing agents: allantoin and a specially refined coal tar extract. The synergistic effects of these medicaments result in rapid clearance of the condition and positive stimulation of the healing process. ALPHOSYL is notably safe to use and promotes no irritation or tolerance. It is a non-greasy, non-staining lotion vanishing on application to the skin and is thus a welcome advance cosmetically.
