Consider the possible outcome in a case such as this—had the bottle contained a conventional barbiturate. Year by year, the barbiturates claim a mounting toll of childhood victims. Yet it is simple enough to prescribe a sedative and hypnotic which is both highly effective... and outstandingly safe. 'Distaval' (*thalidomide*) has been prescribed for nearly three years in this country, where the accidental poisonings rate is notoriously high; but there is no case on record in which even gross overdosage with 'Distaval' has had harmful results. **WANDER**  
*"timed-release tablets"*

### The *NEW* concept for relief of the Common Cold

In the common cold and postnasal drip, one "timed-release" 'TRIOMINIC' tablet brings welcome relief of symptoms in minutes. Running noses stop, clogged noses open—and stay open for 6 to 8 hours. The patient can breathe again. 'Triominic' is not likely to cause secondary congestion, and it eliminates local overtreatment and consequent nasal pathology, such as commonly follow the use of topical decongestants in the form of sprays and nasal drops.\*

\**Illinoian med. J.*, 1957, 112, 259.

Each "timed-release" 'TRIOMINIC' Tablet contains:

 Mepyramine maleate B.P. ..... 25 mg.  
 Pheniramine maleate ..... 25 mg.

**Dosage:** One tablet every 6 to 8 hours, total number not to exceed 3 in 24 hours.

**Packs:** Supplied for dispensing in bottles of 50 and 250.

**Price:** N.H.S. Basic Price for 50 tablets—8/6d.

**Also available:** 'Triominic' Syrup, for children and those adults who prefer a liquid medication, in bottles of 2 fl. oz. and 20 fl. oz. (dispensing). N.H.S. Basic Price for 2 fl. oz. is 2/6d.

Each "timed-release" tablet keeps nasal passages clear for 6 to 8 hours—provides "around-the-clock" freedom from congestion on just 3 tablets daily.

## Anabolex

the protein anabolizing, non-virilizing steroid promotes  
—a return to appetite—an increase in weight—a sense of well-being

PATIENTS who are run down or who are recovering from illness frequently suffer from faulty protein metabolism. They are in negative nitrogen balance. Protein, in effect, is being broken down and lost faster than it is being built up.

Anabolex (androstanolone) restores the physiological balance. Many clinical trials have shown that, following the administration of Anabolex, there is an immediate return of the body's capacity to build up protein. The patient feels better, eats better and gains weight.

Here, then, is a physiological "tonic" with a wide therapeutic range. The weakness, lassitude, lack of energy and interest associated with many pathological states may be rapidly overcome by the administration of Anabolex.

Anabolex can be safely given to patients of all ages and both sexes; in therapeutic doses, its virilizing properties are almost negligible. The only known contra-indication is prostatic carcinoma.

*Anabolex is a  
registered trade mark*

**PRESENTATION:** In vials of 25 and 100 tablets, each tablet containing 25 mg. Androstanolone. Basic N.H.S. cost 20/- and 70/-. Anabolex is exempt from purchase tax. Samples and literature will be gladly sent on application.

**INDICATIONS** Middle-aged or elderly people who are debilitated or "run down." Preparation for and recovery from planned surgery. Convalescent patients. Premature infants. The child or adolescent who is under weight. Anorexia, Asthenia, Malnutrition, Wasting diseases.

Niamid is specific therapy for depressive states. For the patient who is depressed, unhappy, morose, Niamid provides a safe and effective treatment.

Smooth, prolonged and sustained in effect, Niamid induces a sense of physical and mental well-being. Patients show increased cheerfulness and hope. Feelings of inadequacy and despondency decrease.

*In rheumatoid arthritis*

- 1 Significant reduction of corticosteroid dosage in many patients.
- 2 Better control in patients hitherto unable to tolerate an adequate maintenance dose of corticosteroids.
- 3 Marked reduction in the side-effects attributable to corticosteroids.
- 4 Noticeable enhancement of well-being.

OFFERS GREATER EFFICIENCY  
AND SAFETY AT LOWER COST

APRINOX IS THE CLOSEST APPROACH  
YET TO THE IDEAL DIURETIC. It is 100 times  
more potent than chlorothiazide and a single daily  
dose produces a steady diuresis with practically no  
disturbance of serum electrolyte levels.

APRINOX CUTS THE COST OF ORAL  
DIURETIC THERAPY. Boots' extensive  
manufacturing facilities make possible the large-scale  
production of this new oral diuretic at low cost, thus  
helping to cut the size of the nation's drug bill.

The basic N.H.S. costs are:

'APRINOX 5 mg'—4/8d for 25 (ex 500 pack)

'APRINOX 2.5 mg'—2/7d for 25 (ex 500 pack)

## 'ANTEPAR' acts alone

When using 'Antepar' to treat threadworm infection, there is no danger of undesirable purging in infants and small children - for 'Antepar' contains no laxative. A course of small daily doses of 'Antepar' Elixir clears threadworm: this system ensures that the possibility of reinfection is minimised. It is pleasant and easy to take.

'Antepar' Elixir contains piperazine citrate equivalent to 500 mgm. piperazine B.P., in each fluid drachm. Also available - 'Antepar' Tablets, containing piperazine phosphate equivalent to 500 mgm. piperazine in each tablet.

# transid

*brand*

*A unique antacid . . . . .*

**polyaminostyrene**

*insoluble, non-alkaline ion-exchange resin*

Of the antacids at present available for the treatment of peptic ulcer, 'Transid' most nearly approaches the ideal, defined (in "The Pharmacological Basis of Therapeutics," 1955. (a) p. 1040; (b) p. 1032) as

"that which does not cause systemic alkalosis, does not cause 'rebound' stimulation of the secretion of acid, interferes least with digestive processes, does not cause diarrhoea or constipation, is not irritative to the stomach, does not release carbon dioxide upon reacting with hydrochloric acid and, lastly, is efficient in neutralising gastric juices."

'Transid' is active only against *excess* acid; it also reduces pepsin activity. Otherwise, 'Transid' is completely inert; it does not interfere with digestion or absorption and cannot cause alkalosis, constipation or diarrhoea. Clinical experience suggests that 'Transid' may succeed in cases of peptic ulcer in which medical treatment with orthodox antacids has failed.

**INDICATIONS:**

Peptic ulcer; gastric hyperacidity from whatever cause; dyspepsia of pregnancy.

# transid

No ill-effect can come from too much polyaminostyrene and the correct dose is that required to control the symptoms (initially, usually two to four tablets every two or three hours).

## DIABETIC NEUROPATHY

Neuropathy complicates diabetes to a variable extent, estimated at about 14% of cases. The commonest symptom is pain in the limbs. Reflexes may be absent.

Recently, treatment by the whole B complex in the form of Parentrovite has been employed with encouraging results. 10 ml. given twice weekly for four to six weeks produced impressive effects both in respect of relief of pain and rate of recovery.

It is now acknowledged that there is seldom if ever a need for large doses of a single vitamin of the B complex, since these factors interact in enzyme symptoms. Inadequacy of vitamin reserves, i.e. "Vitamin insufficiency" may occur apart from nutritional deficiency, and may manifest as symptoms and signs of peripheral neuropathy.

### PARENTROVITE

is a high potency injectable preparation of the Vitamin B complex with Vitamin C. Packs : in boxes of 3 and 12 pairs. Hospital packs also available.

### OROVITE

Treatment may be continued with OROVITE—high dosage Vitamin B complex for oral use—for rapid restoration of intracellular metabolism.

Available in tablets and elixir form.

SEARLE

the first specific  
aldosterone-blocking agent

# Aldactone

Brand of Spironolactone. (SC 9420)

The new therapeutic principle embodied in this drug effectively extends control of *oedema and ascites* in congestive heart failure, hepatic cirrhosis, the nephrotic syndrome and idiopathic oedema.

Aldactone provides satisfactory relief of resistant or advanced oedema even when all other agents, alone or in combination, are ineffective or are only partially effective.

By blocking the effect of aldosterone which is the major cause of resistance to diuretics, and because of its different site and mode of action Aldactone has a true and highly synergistic activity when used with a mercurial or thiazide diuretic.

### *What physicians may expect of Aldactone*

It is fully expected that Aldactone will change present medical concepts of therapeutic limitations in the management of oedema. Many patients living in a greater or lesser state of oedematous invalidism can now be oedema-free. To others, gravely ill, Aldactone will be life-saving.

When Aldactone is used in a comprehensive therapeutic regimen, which includes a mercurial or a thiazide diuretic, a satisfactory diuresis and relief of oedema may be expected in approximately 85 per cent of oedematous patients who would not otherwise respond.

only one sulphonamide is  
designed specifically for the  
treatment of *E. coli* infections  
of the urinary tract.

#### SELECTIVE

The action of Urolucosil is mainly on the urinary tract. It is very soluble and is rapidly excreted, largely unchanged, in the urine.

#### LOW DOSAGE

Urolucosil is effective in about one-fifth of the dosage used for most sulphonamides.

#### NO CRYSTALLURIA

With Urolucosil, obstruction due to crystalluria does not occur. Extra fluids are not required.

#### LOW COST

Twenty-five tablets taken over 5-7 days usually suffice to control an acute infection.

#### NON-TOXIC AND FREE FROM SIDE EFFECTS

*DOSAGE:* Adults—one or two tablets five or six times a day.

Children—half to one tablet five or six times a day.

*In most cases, five tablets daily for five days will render the urine sterile.*

## PYE'S SURGICAL HANDICRAFT

Edited by HAMILTON BAILEY

**Vol. I**—About 400 pp. Fully illustrated. About 32s. 6d.  
Ready early in 1961.

**Vol. II**—In preparation.

For the newly appointed house-surgeon, the rural district practitioner, and the ship's surgeon, this book has been for many years a tried and trusted friend. By issuing the whole in two small, handy volumes—Vol. I—General; Vol. II—Special—the appeal of the book has widened. The medical student will purchase Vol. I to find information of a practical character, on which, in these days of crowded curriculums, he receives little or no specific instruction. On qualifying he will not fail to obtain Vol. II, for therein will be found guidance in the expanding scope of his activities.

# ADRENOXYL reduces the mean bleeding time...

simply...

effectively

safely...

Adrenoxyl\* is a capillary haemostatic which reduces the mean capillary bleeding time by increasing the contractility and resistance and decreasing the permeability of the capillary wall.

\*adrenochrome monosemicarbazone dihydrate

Adrenoxyl is safe, gives rise to no side-effects, and there are no contra-indications to its use. It does not affect pulse rate, blood pressure or blood coagulation.

Reports have been received that Adrenoxyl reduces the amount of blood lost during operation, and suggesting that it has a definite place in routine surgical procedures. It is available in ampoules for intramuscular or subcutaneous injection and in tablets for oral administration.

## ANTI-RHEUMATIC PASTE

RHEUSALATE has been formulated for the relief of pain associated with muscular rheumatism (fibrositis), sprains and strains. Early experiments with RHEUSALATE indicated that a significant proportion of patients respond favourably and that relief from pain or stiffness, or both, is achieved. RHEUSALATE contains diethylamine salicylate, salicylamide and ethyl nicotinate. By an improved procedure developed in our Laboratories, the normal aqueous solubility of salicylamide has been increased fifteen-fold and this further facilitates penetration of the skin barrier. RHEUSALATE, which is water soluble, can be massaged into the affected part, or dissolved in a very little water and applied by means of lint.

RHEUSALATE- the new product for rheumatism.  
Available in 40G. tubes.

## ANTIBIOTIC THROAT PASTILLES

For the first time a pastille is available for infections of the mouth and throat containing a powerful locally acting antibiotic and a bactericidal wetting agent.

- \* **NYCET** Pastilles dissolve slowly in the mouth and thus allow essential contact between the constituents and the inflamed mucosa.
- \* **NYCETS** are non-toxic—no anaesthetic materials are contained.
- \* **NYCET** Pastilles can be used to reduce the tendency to secondary infections of the common cold by decreasing the virulence of pharyngeal organisms.
- \* **NYCETS** are pleasantly flavoured and may be prescribed with complete safety for children and adults.

**FORMULA**  
Each NYCET Pastille contains—Tyrothricin 1.0 mg.  
Cetyl Pyridinium Chloride 2.5 mg.

Basic N.H.S. price 1/8d.

Each pack contains 12 pastilles individually wrapped in foil strip.

Wright's Coal Tar Soap has been in continuous use by the Medical Profession for nearly a century. Its world-wide use is largely due to professional approval of its quality, and to the fact that it contains the original 'Liquor Carbonis Detergens'. Even in 1882 this ingredient was described by the B.M.J. as "by no means a new preparation".

To maintain this front-rank position has not been easy. It has called for unremitting effort, continuous improvements in technique, ever higher analytical standards, and a record of service in which we take modest pride.

The improved London Hospital eyeless needle combines the traditional safety of stainless steel with a new standard in the several qualities required by surgeons.

These eyeless needles are the result of new methods of manufacture and are available in the London Hospital standard range.

*Improved temper*

*Sharper points*

*Maximum strength of join*

*No hilt distortion*

*Smallest ratio of needle diameter to size of catgut—minimizing tissue trauma.*
