EMOTIONAL DISTRESS IN GENERAL PRACTICE

Although tension and anxiety can only be fully resolved by the patient coming to terms with his environment, medication can help him through the difficult period of adjustment. Over the last decade, clinical experience throughout the world has clearly shown that the requisite mood elevation can be simply and safely provided by 'DRINAMYL', and that the resultant improvement in outlook is invaluable in helping patients to return to normality. The action of the components of 'DRINAMYL'—'Dexedrine' and amylobarbitone—produces a lessening of tension combined with an increase in mental alertness and perception. There is a consequent improvement both in the patient's sense of well-being and in his assessment of his circumstances.

to relieve SINUS HEADACHE and control the symptoms of the common cold

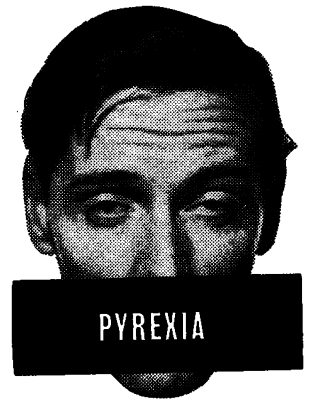

Rinurel TABLETS

A unique formulation which secures in a single tablet the greatest possible relief from the pain of sinus headache and the discomfort of the common cold. Rinurel affords prompt and lasting action without rebound congestion, gastric disturbance or constipation.

Rinurel decongests sinus and nasal mucosa to relieve pressure and promote drainage; aborts pain with two analgesics; reduces rhinorrhoea and sneezing with an antihistamine.

The prompt action of paracetamol and the more extended action of phenacetin combine to produce rapid and prolonged antipyresis. Rinurel relieves the discomfort of sinus headache and controls the symptoms of the common cold.

Formula: Paracetamol 150 mg. Phenacetin 150 mg. Phenylpropanolamine hydrochloride 25 mg. Phenyltoloxamine dihydrogen citrate 22 mg.

Dosage: Two tablets initially followed by one every 4 hours.
Prophylactically one tablet every 4 hours.

NULACIN "has revolutionized the treatment of duodenal ulcer"

"This new method of the administration of antacids (Nulacin) has revolutionized the treatment of duodenal ulcer. . . milk drip is no longer part of our therapeutic stock in trade."

PROC. ROY. SOC. MED., *December, 1958*, **51**, 1063

NULACIN tablets, when allowed to dissolve slowly in the mouth, provide intragastric milk-alkali drip therapy safely and effectively for both the bed-ridden and ambulant patient. They may be relied on to provide a treatment for peptic ulcer as well as other conditions associated with gastric hyperacidity.

The safety and effectiveness of Nulacin therapy has been proven by "in vivo" clinical work carried out in many countries. References to this work include:—

DEEP SKIN PENETRATION IN ARTHRITIS AND RHEUMATISM

NICOTINIC, SALICYLIC AND p-AMINOBENZOIC ACIDS in Ester form

IN CASES of soft-tissue rheumatism, and arthritic disorders, many doctors are tending more and more to regard Transvasin as an indispensable adjuvant to treatment.

For Transvasin is composed of the esters of nicotinic, salicylic and p-aminobenzoic acids. These esters readily pass the skin barrier in therapeutic quantities, and so enable an effective concentration of drugs to be built up where they are needed.*

Transvasin not only induces vasodilatation of the skin with a superficial erythema, but also brings about a deep hyperaemia of the underlying tissues. It is non-irritant and can be safely used on delicate skins.

It is now being widely prescribed, with successful clinical results. Since a very small quantity is sufficient for each application, the cost of treatment is extremely low.

Safety *with efficiency* in antisepsis

Long and comprehensive experience has fully demonstrated the value of Dettol in general practice, obstetrics and surgery.

It is well-tolerated on the skin and tissues in high concentrations.

It is an efficient bactericide :—

Dettol will destroy the following organisms in 10 minutes at 20 degrees C. in the dilutions given:—

Staph. aureus:	1 in 200
S. typhi:	1 in 350
Strept. pyogenes:	1 in 500
Bact. coli:	1 in 250
Ps. pyocyanea:	1 in 40
Myco. tuberculosis:	1 in 200
Sh. shigae:	1 in 400

Different strains can vary widely in resistance, but the figures quoted are representative.

Dettol efficiency is well maintained in the presence of organic material.

A dilution of 1 in 50 will kill Staph. aureus in the presence of 25% blood in 5 minutes.

It is compatible with soap.

" Unlike the other antiseptics, Dettol appeared to have its activity increased by the presence of soap, and against Staph. pyogenes the effect was one of true synergism." (British Medical Journal, 28th July, 1956.)

It is non-poisonous.

It does not stain linen, etc.

It is stable in solution.

FOR SUPPRESSION OF

severe cough

'PHYSEPTONE' LINCTUS has a direct suppressive action on the cough reflex. It is especially valuable in such conditions as bronchiectasis, pertussis, post-influenzal tracheitis, chronic passive pulmonary congestion, pulmonary tuberculosis, and other conditions requiring a powerful cough suppressant.

'PHYSEPTONE' LINCTUS is not constipating, and seldom causes other side-reactions. Although subject to D.D.A., the Linctus in therapeutic doses carries negligible risk of addiction since only a small amount of the drug is contained in such doses.

'PHYSEPTONE' LINCTUS contains 2 mgm. of methadone hydrochloride in each fluid drachm (the recommended adult dose). For children it should be diluted with simple syrup in the proportion of one part linctus and seven parts syrup—one to two teaspoonfuls (0·25—0·5 mgm.) of this *diluted* linctus to be given according to the age of the child.

may depend on the safety of 'Distaval'

Consider the possible outcome in a case such as this—had the bottle contained a conventional barbiturate. Year by year, the barbiturates claim a mounting toll of childhood victims. Yet it is simple enough to prescribe a sedative and hypnotic which is both highly effective . . . and outstandingly safe. 'Distaval' (*thalidomide*) has been prescribed for nearly three years in this country, where the accidental poisonings rate is notoriously high; but there is no case on record in which even gross overdosage with 'Distaval' has had harmful results. Put your mind at rest. Depend on the safety of

...do you recommend an external wedge on the shoes?

But the wedges soon wear away; and very often the child is made to feel self-conscious because his shoes look different from other children's. As the diagram on the left clearly shows, any external wedge to heel disturbs the plane of forepart and heel. Surely it's more logical to have a wedge built-in between the inner and the outer sole—where it can correctly corset the foot, remain invisible, and completely unaffected by wear or repair of the shoe. That is how Start-rite INNERAZE shoes are made—on remedial lasts specially adapted to accommodate the internal wedge. That is why they are the only practical and thoroughly effective solution to this problem.

THE PATIENT SPENT A COMFORTABLE NIGHT AT A WASHINGTON GROUP HOTEL

Patients coming to the Harley Street/Wimpole Street area for treatment are well-advised to follow their doctor's lead—and patronize one of the four Washington-Group Hotels nearby. Here—at the Mandeville, the Clifton Ford, the Mostyn or the Stratford Court—they may complete their treatment by spending the night in a luxuriously restful room, or celebrate their return to health by enjoying the artistry of our superb chefs.

To spend even an hour or so in an atmosphere of such tranquil elegance is a tonic that doctors thoroughly recommend . . . and the prices are sensible enough to encourage frequent 'doses'.

REFRESHER COURSE FOR GENERAL PRACTITIONERS

Third Collection with classified contents list to volumes 1, 2 and 3

Price 25s. (by post 26s. 9d.)

Each book contains a collection of sixty Refresher Course articles from the *British Medical Journal*. Each article, written by an acknowledged expert, has been revised by its author. The articles cover a wide range. Their object is to refresh the reader's memory of what is old and well-established and to tell him about new developments.

They are invaluable to general practitioners and residents as practical reference books, to specialists as a means of keeping in touch with developments outside their own field, and to final-year students as up-to-date and reliable text-books.

The Third Collection has a cumulative classified contents list to the three volumes of "Refresher Course for General Practitioners."

The fee is two guineas, and accommodation at one of the University's Halls of Residence can be arranged at a moderate additional charge. N.H.S. practitioners are (subject to certain conditions) eligible to have the course fee paid on their behalf and to receive also certain allowances (travelling expenses, subsistence, locum fees). As the number who can be accepted is limited, enquiries and applications (stating whether or not the latter are made under the scheme for N.H.S. practitioners, and whether residential accommodation is desired, and if so for which nights) should be addressed, as soon as possible, to the Dean of the Faculty of Medicine, the University, Sheffield 10.
