## may depend on the safety of 'Distaval'

Consider the possible outcome in a case such as this—had the bottle contained a conventional barbiturate. Year by year, the barbiturates claim a mounting toll of childhood victims. Yet it is simple enough to prescribe a sedative and hypnotic which is both highly effective . . . and outstandingly safe. 'Distaval' (*thalidomide*) has been prescribed for nearly three years in this country, where the accidental poisonings rate is notoriously high; but there is no case on record in which even gross overdosage with 'Distaval' has had harmful results. Put your mind at rest. Depend on the safety of

As an hypnotic at bedtime:

ADULTS: 50 mg.—200 mg.

INFANTS AND CHILDREN: 25 mg.—100 mg.

As a daytime sedative:

ADULTS: 25 mg. two or three times daily.

INFANTS AND CHILDREN: Half to one 25 mg. tablet, according to age, one to three times daily.

'Distaval' (25 mg. tablets).

'Distaval' Forte (100 mg. tablets).

Basic cost to N.H.S. of 12 tablets from dispensing pack of one hundred—1/- or 2/8d. according to strength.

**TABLETS**

A unique formulation which secures in a single tablet the greatest possible relief from the pain of sinus headache and the discomfort of the common cold. Rinurel affords prompt and lasting action without rebound congestion, gastric disturbance or constipation.

Rinurel decongests sinus and nasal mucosa to relieve pressure and promote drainage; aborts pain with two analgesics; reduces rhinorrhoea and sneezing with an antihistamine.

The prompt action of paracetamol and the more extended action of phenacetin combine to produce rapid and prolonged antipyresis. Rinurel relieves the discomfort of sinus headache and controls the symptoms of the common cold.

**Formula:** Paracetamol 150 mg. Phenacetin 150 mg.  
Phenylpropanolamine hydrochloride 25 mg.  
Phenyltoloxamine dihydrogen citrate 22 mg.

**ROTHER** achieves a high cure rate and often gives effective control of even refractory chronic cases which have resisted other treatments.

**ROTHER** in many cases obviates the need for hospitalization or surgical intervention.

**ROTHER** helps patients to keep ambulant and symptom-free with a minimum of medication and with few, if any, dietary restrictions.

**ROTHER** in general practice enables the physician to take adequate care of his gastric cases without frequent or prolonged supervision.

**ROTHER** has no known side effects.

**ROTHER** requires no supplementary medication such as sedatives or anti-spasmodics.

**ROTHER** shows a saving in cost when compared with conventional methods of treatment.

# Weight gain and a sense of well-being on **Lysinex**

*—the essential amino acid  
L-lysine plus the anabolic  
compound androstanolone*

The addition of lysine to the diets of debilitated patients has been shown to increase to a marked extent the biological value of the dietary protein and its utilization in the body.

Lysine is easily absorbed and enables the body to build protein. Debilitated patients need lysine to produce a positive change in the nitrogen balance.

The androstanolone content of LYSINEX ensures that full use is made of body protein, for it has a protein-anabolizing, tissue-building action, with no virilizing effect.

Thus, lysine and androstanolone have complementary actions, and their administration as LYSINEX results in:

- return of appetite
- marked increase in weight
- sense of well-being
- normal serum protein levels.

**LYSINEX** is indicated for old people losing weight; during convalescence; and after major surgery. In short, for all patients in negative nitrogen balance.

**Presentation and Price.** Each tablet contains 300 mg. L-lysine monohydrochloride and 10 mg. androstanolone in bottles of 25 and 100 at a basic NHS cost of 12/- and 38/- respectively.

# Laevosan

**an advance in carbohydrate supportive therapy**

Recent biochemical investigations have established the shorter metabolic pathway followed by LAEVULOSE into the energy releasing system. The liver is capable of synthesizing 35-40% of glycogen from LAEVULOSE, as compared with only 12% from glucose.

Clinical experience has shown that infusions of LAEVULOSE are less irritant to the vein intima than dextrose. When infusions of concentrations as high as 20% have been given there have been no signs of thrombophlebitis. Owing to new and more economical methods of processing, this valuable carbohydrate is now available for general clinical use as a sterile pyrogen-free solution for intravenous injections as "LAEVOSAN." Also in a strength of 65% for oral administration as "LAEVORAL."

GLAXO LABORATORIES LIMITED

Here is a steroid having increased anti-inflammatory activity with a decreased possibility of side effects. Betnelan, the new potent steroid now available for clinical use,

**is devoid of salt retention activity**  
**has negligible effect on potassium balance**  
**causes no mental depression**

and shows promise of clinical superiority in other respects.

For short-term therapy a '2:1:½' dosage scheme is suggested. For example, in acute asthma, severe eczema, urticaria, shock and other conditions for which corticoids are indicated systemically, the dosage may be

2 tablets t.i.d. for 2 days followed by 1 tablet t.i.d. for 2 days and ½ tablet t.i.d. for 2 days.

For maintenance, dosage need usually be no more than ½ tablet twice daily.

**BETNELAN** is presented as scored tablets of 0.5 milligrams betamethasone in bottles of 30, 100 and 500

**Dose for dose, Betnelan is the lowest priced of all corticosteroids available to-day**

*Betnelan (betamethasone) is an entirely new parent compound developed in Britain by Glaxo Laboratories Ltd. Its merits are derived from its unique chemical structure—the beta position of the 16 methyl group in the formula 16β-methyl-9α-fluoroprednisolone (betamethasone) representing more than 20 new stages of manufacturing complexity.*

## 'ICIPEN' in Chronic Bronchitis and other winter ailments

"The nearest approach to the activity of penicillin G against important pathogenic organisms such as haemolytic streptococci and pneumococci is that of penicillin V."

*Brit. med. J.*, 1960, ii, 1695.

This recent study confirms that penicillin V retains a prominent place in the oral treatment of penicillin-sensitive infections.

'Icpen' tablets provide effective therapy for all these infections. The tablets each contain 300 mg. potassium penicillin V and, taken three times a day, they provide therapeutic blood levels adequate for treatment.

'Icpen' tablets are ideal for long-term prophylaxis as in chronic bronchitis. The cost of one day's prophylaxis, namely 1 tablet twice daily, is 1/9d. This represents a substantial saving in cost compared with other antibiotics.

*'ICIPEN' is easily remembered, easily written and only one strength of tablet is supplied.*

In rheumatoid arthritic conditions, more patients can now be treated more effectively – with 'DECADRON'. Its greater anti-inflammatory action often brings relief in cases which have not responded to other steroids.

'DECADRON' gives increased therapeutic effectiveness, but a decrease in such side-effects as hyperglycaemia, hypertension and oedema. Improved appetite and gain in weight are usually welcomed.

In rheumatoid arthritis, low maintenance dosage with 'DECADRON' may make the difference between useful employment and invalidism.

United Kingdom N.H.S. basic costs are 6s. 3d. for 10 × 0.5 mg. tablets and 9s. 5d. for 10 × 0.75 mg. tablets (ex dispensing packs).

# How painful is influenza?

Just how much of the general misery and discomfort of your influenzal patients is due to aches and pains or to weakness or to any of the other symptoms of this debilitating disease would be difficult to say. But there's no doubt that relief of the constitutional symptoms with a simple antipyretic and an analgesic can do much to ease your patients' recovery and hasten convalescence.

When you prescribe Zactirin you not only provide effective symptomatic treatment, you also ensure that you do not add to your patients' distress with troublesome side-effects such as constipation and dizziness. Zactirin contains Wyeth's new analgesic discovery—ethoheptazine—plus soluble aspirin.

# DEEP SKIN PENETRATION IN ARTHRITIS AND RHEUMATISM

**NICOTINIC, SALICYLIC AND  
p-AMINOBENZOIC ACIDS in Ester form**

IN CASES of soft-tissue rheumatism, and arthritic disorders, many doctors are tending more and more to regard Transvasin as an indispensable adjuvant to treatment.

For Transvasin is composed of the esters of nicotinic, salicylic and p-aminobenzoic acids. These esters readily pass the skin barrier in therapeutic quantities, and so enable an effective concentration of drugs to be built up where they are needed.\*

Transvasin not only induces vasodilatation of the skin with a superficial erythema, but also brings about deep hyperaemia of the underlying tissues. It is non-irritant and can be safely used on delicate skins.

It is now being widely prescribed, with successful clinical results. Since a very small quantity is sufficient for each application, the cost of treatment is extremely low.

# Corn Oil, Cholesterol and Coronary Heart Disease

In 1957, 26% of all male deaths between the ages of 45 and 64 in England and Wales were caused by coronary heart disease. Despite considerable research, the cause or causes of this disease have still not been proved. However, it has been suggested from preliminary clinical trials that there may be a connection between high level blood cholesterol and the incidence of coronary heart disease.

**FATS AND CHOLESTEROL** On this subject, an eminent authority on nutrition has written, '... the

important point is to increase E.F.A. and to decrease non-E.F.A. and excessive carbohydrate (which gives rise to non-E.F.A. in the body). Not all unsaturated fats or oils are good sources of E.F.A.: the best sources are the vegetable seed oils, and of these corn (or maize) oil has proved slightly superior to others in detailed trials of lowering serum cholesterol in man.'

## DIETARY ADVICE

To avoid raising the level of cholesterol in the blood, many doctors recommend their patients to reduce their daily intake of animal fats by the substitution of a vegetable oil which contains the essential fatty acids. One that is particularly recommended is Mazola Corn Oil. Mazola is made from specially selected maize, which gives an oil rich in the most important of the essential fatty acids—linoleic acid. For this reason, it helps to reduce blood cholesterol. Mazola can be used for frying, grilling, baking and for salad dressing.

*If you would like to know more about Mazola Corn Oil—its benefits and uses—please write to us for a free copy of the booklet 'The relation of dietary fats to chronic degenerative diseases'.*

President: The Earl Spencer  
Medical Superintendent: Thomas Tennent, M.D.,  
F.R.C.P., D.P.H., D.P.M.

This registered hospital is situated in 130 acres of park and pleasure grounds. Patients, both male and female, who are suffering from incipient mental disorders, or who wish to prevent recurrent attacks of mental trouble, are received for treatment. Careful clinical, biochemical, bacteriological and pathological examinations. Private rooms with special nurses, male and female, in the hospital or in one of the numerous villas in the grounds of the various branches can be provided.

### WANTAGE HOUSE

This is a Reception Hospital in detached grounds with a separate entrance to which patients can be admitted. It is equipped with all the apparatus for the complete investigation and treatment of mental and nervous disorders by the most modern methods; insulin treatment is available for suitable cases. It also contains laboratories for biochemical, bacteriological and pathological research. Psychotherapeutic treatment is employed when indicated.

### MOULTON PARK

Two miles from the Main Hospital there are several villas situated in a park and farm of 600 acres. Milk, meat, fruit and vegetables are supplied to the hospital from the farm, gardens and orchards of Moulton Park. Occupational therapy is a feature of this branch, and patients are given every facility for occupying themselves in farming, gardening and fruit growing.

### BRYN-Y-NEUADD HALL

The seaside home of St. Andrew's Hospital is beautifully situated in a park of 330 acres at Llanfairfechan, amidst the finest scenery in North Wales. On the north-west side of the estate a mile of sea-coast forms the boundary. Patients may visit this branch for a short seaside change or for longer periods. The hospital has its own private bathing house on the seashore. There is trout fishing in the park.

For terms and further particulars apply to the Medical Superintendent (Telephone No. 34354 Northampton), who can be seen in London by appointment.
