# Obesity can be more than embarrassing

Obesity is not only embarrassing and a physical handicap—it can also be dangerous.

The association between obesity and increased incidence of conditions such as hypertension, diabetes, heart disease, cirrhosis, gout, and accidents has been statistically established. Increase in weight often occurs several years before the physical disorder becomes manifest. Prompt treatment of obesity, therefore, can play an important part in preventive medicine.

In the great majority of cases, obesity is directly attributable to excess of food intake over energy output. Dietary measures are consequently of first importance in treatment, and their success is best ensured by the use of a safe and effective anorectic. One 'Dexedrine Spansule' sustained-release capsule taken first thing in the morning will control the patient's appetite gently but firmly throughout the day—and will simultaneously dispel lethargy or apathy which may be contributing to the patient's condition, or which may arise from the rigours of dietary restriction.

# Corn Oil, Cholesterol and Coronary Heart Disease

In 1957, 26% of all male deaths between the ages of 45 and 64 in England and Wales were caused by coronary heart disease. Despite considerable research, the cause or causes of this disease have still not been proved. However, it has been suggested from preliminary clinical trials that there may be a connection between high level blood cholesterol and the incidence of coronary heart disease.

**FATS AND CHOLESTEROL** On this subject, an eminent authority on nutrition has written, '... the important point is to increase E.F.A. and to decrease non-E.F.A.

and excessive carbohydrate (which gives rise to non-E.F.A. in the body). Not all unsaturated fats or oils are good sources of E.F.A.: the best sources are the vegetable seed oils, and of these corn (or maize) oil has proved slightly superior to others in detailed trials of lowering serum cholesterol in man.'

## DIETARY ADVICE

To avoid raising the level of cholesterol in the blood, many doctors recommend their patients to reduce their daily intake of animal fats by the substitution of a vegetable oil which contains the essential fatty acids. One that is particularly recommended is Mazola Corn Oil. Mazola is made from specially selected maize, which gives an oil rich in the most important of the essential fatty acids—linoleic acid. For this reason, it helps to reduce blood cholesterol. Mazola can be used for frying, grilling, baking and for salad dressings.

*If you would like to know more about Mazola Corn Oil—its benefits and uses—please write to us for a free copy of the booklet 'The relation of dietary fats to chronic degenerative diseases'.*

# NULACIN "has revolutionized the treatment of duodenal ulcer"\*

simply

safely

Nulacin tablets, dissolved slowly in the mouth, provide intragastric milk-alkali drip therapy, obviating the necessity for a tube. Treatment is easy and convenient for the ambulant as well as the bedridden patient. Nulacin may be relied on to provide an effective treatment for peptic ulcer as well as other conditions associated with gastric hyperacidity. No undesirable side effects occur and no cases of alkalosis or acid rebound due to Nulacin have ever been reported. The safety and effectiveness of Nulacin therapy has been proven by 'in vivo' clinical work carried out in many countries.

**Favourite patient: favourite drink**

Mrs K. The indomitable she, all quips and curls. And the favourite patient's favourite drink, the one in the glass in her hand?—Lucozade, of course. It has helped during the last few days of gastro-enteritis, when appetite was poor and glycogen stores were low. It is helping now as the patient emerges into convalescence, ready for a light diet, eager to be up and about. Less than a quarter as sweet as sucrose, providing 126 Calories in one glass, and putting them into the blood-stream *quickly*—those are the reasons why the doctor too approves of . . .

# LIGNAX

TRADE MARK

## HAEMORRHOIDAL SUPPOSITORIES ( and ointment )

LIGNAX is safe because it contains lignocaine local anaesthetic which (unlike other surface anaesthetics) does not give rise to sensitisation dermatitis.

The rapid effective anaesthesia provided by LIGNAX, combined with the soothing action of the base, reduces pain, irritation and discomfort promptly, with immediate benefit to the patient which is maintained by the effective therapy of the well-tried medicaments embodied in the formula. The anaesthetic does not mask underlying causes, which should be investigated. The well-being of the patient is restored and at night restful sleep is obtained where this has hitherto been denied.

LIGNAX—the safe and sure haemorrhoidal treatment.

Available as follows:—

Suppositories in boxes of 12 and 100 and ointment in 20G. tubes.

# THREADWORMS

## AND ROUNDWORMS

**SINGLE-DOSE TREATMENT**

1. A single dose of Pripsen is effective for both threadworms and roundworms.
2. The palatable granules are readily accepted by children.
3. For threadworms, Pripsen in a single dose replaces the usual seven-day treatment.
4. The dose can be given under supervision, thus avoiding any risk of treatment not being carried out.
5. No extra laxative is required.
6. Pripsen is not a dye, and therefore is non-staining.

*"With its high cure-rate, lack of toxicity, ease of administration, and simplicity of dosage, we regard pripsen as, at present, the remedy of choice for enterobiasis."*—*Lancet*, 1960, I, 256.

# PREDSOL ENEMA

THE FIRST PRESENTATION OF A CORTICOID IN A DISPOSABLE PLASTIC BAG

A water-soluble corticoid given as a rectal infusion has produced complete symptomatic relief and considerable improvement, as judged by sigmoidoscopic and histological findings,<sup>1</sup> in a high proportion of patients with ulcerative colitis. This technique has now been further simplified<sup>2</sup> by presenting a small quantity of Predsol (water-soluble prednisolone) in solution as an enema to avoid the inconvenience of prolonged administration by rectal drip.

The course of treatment is one Predsol Enema contained in a disposable plastic bag, self administered nightly for about a month ... a course to which the majority of patients will respond.

1. *British Medical J.* 1958, 2, 1072.

2. *Lancet* 1960, 1, 517.

*Predsol Enema is available in boxes holding a week's supply of seven plastic bags each containing 100 ml. Instructions to the patient are enclosed.*

**MONASH UNIVERSITY**  
Clayton, Victoria, Australia**CHAIR OF MEDICAL BIOCHEMISTRY**

The Interim Council of Monash University invites applications to the Foundation Chair of Medical Biochemistry. The University opened on March 13, 1961, with Faculties of Medicine, Arts, Economics and Politics, Science and Engineering, at Clayton, 14 miles from the centre of Melbourne. Students who began the first year of their medical course in March, 1961, will start Medical Biochemistry in March, 1962. Planning for the first portion of the Medical School to be built by the end of 1962 is proceeding, and multi-discipline laboratories for Medical Biochemistry, Physiology, Pharmacology, and Histology will be incorporated. Biochemistry, other than Medical, will be taught in the Chemistry School. The successful applicant will have the opportunity to take part in the planning of his department, and if from overseas, air fares will be paid for this purpose so that, immediately on appointment, a short visit for consultation with the Dean of the Faculty and the Architects can take place. For the building of the first phase (1961-3) of the Medical School (Anatomy, Medical Biochemistry, and Physiology) the Australian Universities Commission has allotted £500,000. The first three years of the course will be at the University, and the three clinical years at Alfred Hospital (with its associated Baker Medical Research Institute) and Prince Henry's Hospital. The Chairs of Pathology and Microbiology will be at Alfred Hospital, and the Clinical Chairs at the two hospitals. A site next to the Medical School has been reserved at the University for a General Teaching Hospital which, it is expected, will be built in the next ten years. The successful applicant will be a full-time officer of the University and will be expected (i) to teach, conduct examinations, and exercise supervision over the work of his department in accordance with the University Statutes and Regulations and the direction of the Interim Council, to whom he will be responsible through the Vice-Chancellor, (ii) to carry out and organize research amongst staff and postgraduate students, and (iii) to advise the Interim Council on the establishment and development of his own department. The salary of the Professor will be subject to negotiation, but will be not less than £A.4,000 per annum. Superannuation provision is similar to F.S.S.U.: there will be travelling and removal expenses to Melbourne for the appointee and his family. Further information, and details of the terms and conditions of appointment for the Chair, may be obtained from the undersigned, with whom applications close on June 10, 1961, or from the Secretary, Association of Universities of the British Commonwealth, 36 Gordon Square, London W.C.1.—F. H. Johnson, Registrar, Monash University, Clayton, Victoria, Australia. (7464)

**THIS MONTH**, as the catkins come to maturity, the first hay fever patients appear. There aren't many of them, but they provide an opportunity to test Daneral before the season proper starts.

this  
year

Daneral is a potent and long-acting antihistamine. It gives prompt and long-lasting relief from hay-fever symptoms. Daneral is an original compound discovered and developed by Farbwerke Hoechst. Its usefulness has been proved by its efficacy in thousands of patients. Daneral is a powerful antihistamine and in normal dosage produces no serious side-effects.
