in the treatment of peptic ulcer

has particular advantages

ROTER achieves a high cure rate and often gives effective control of even refractory chronic cases which have resisted other treatments.

ROTER in many cases obviates the need for hospitalization or surgical intervention.

ROTER helps patients to keep ambulant and symptom-free with a minimum of medication and with few, if any, dietary restrictions.

ROTER in general practice enables the physician to take adequate care of his gastric cases without frequent or prolonged supervision.

ROTER has no known side effects.

ROTER requires no supplementary medication such as sedatives or anti-spasmodics.

ROTER shows a saving in cost when compared with conventional methods of treatment.

Important news for users of Parenteral Iron

renewed interest in intravenous iron

Since Richmond (1957-1959) reported the induction of sarcomas in rats by iron dextran and these findings were confirmed by Haddow and Horning (1960) in mice, there has been a great deal of discussion and speculation as to how far this carcinogenic activity is applicable to man. Undoubtedly, out of this has arisen a renewed interest in intravenous iron, for when oral iron fails as a treatment for simple iron deficiency anaemias, parenteral iron becomes an almost irreplaceable therapy. Poor intestinal tolerance, malabsorption, and late pregnancy when time does not allow a trial of oral iron; all are indications for the parenteral route.

early work

Earlier workers investigated the intravenous route and Nissim (1947) established that saccharated iron oxide was effective intravenously, but it did have the disadvantages of lack of stability in the plasma, the risk of severe and painful reactions when injected outside a vein and a moderate incidence of toxic reactions. Useful as such a preparation was at that time it was not considered completely satisfactory. There was a need for a preparation which was free from general toxic reactions, stable in the plasma, did not cause severe reaction if accidentally injected outside a vein and was effectively utilised.

now

Astrafer I.V.* a preparation developed by Astra in their research laboratories is now available and does fulfil these requirements. It has been extensively tested and Anderson, Lucas and Hagedorn all report on its effectiveness and freedom from toxic reactions. This has been confirmed in this country in a report to be published.

Astrafer I.V. is a high molecular weight iron carbohydrate complex, containing 20 mgm of trivalent iron per ml. in an isotonic solution. It has a pH of 7.3 and it is stable in plasma. A completely new form of intravenous iron not to be confused with the earlier saccharated iron oxide and iron dextran preparations.

freedom from toxic reactions

Haemolysis is often regarded as a useful guide to the toxicity of iron complexes—Astrafer I.V. has negligible haemolytic activity and is extremely stable in the plasma. It clears rapidly from the circulation. Clearance is virtually complete within 24 hours following injection. This rapid rate of clearance is maintained throughout the course of treatment and repeated injections of Astrafer produce no accumulation of iron in the circulation; unlike earlier preparations where clearance is slow and serum iron values tend to increase as repeated doses are given. No cases of thrombophlebitis or pain along the course of the vein have been observed, and even when there has been accidental injection outside the vein local toxic reaction has been confined to a mild inflammation which rapidly disappeared and did not interfere with further injections. General reactions are very rare and mild in nature.

summary

Astrafer I.V.* is a new, stable and effective form of intravenous iron of low toxicity which gives almost 100% utilisation of the iron. Available in sterile ampoules of 5 ml. packed in boxes of five and twenty-five.

Safety *with efficiency* in antiseptics

Long and comprehensive experience has fully demonstrated the value of Dettol in general practice, obstetrics and surgery.

It is well-tolerated on the skin and tissues in high concentrations.

It is an efficient bactericide :—

Dettol will destroy the following organisms in 10 minutes at 20 degrees C. in the dilutions given:—

Staph. aureus:	I in 200
S. typhi:	I in 350
Strept. pyogenes:	I in 500
Bact. coli:	I in 250
Ps. pyocyanea:	I in 40
Myco. tuberculosis:	I in 200
Sh. shigae:	I in 400

Different strains can vary widely in resistance, but the figures quoted are representative.

Dettol efficiency is well maintained in the presence of organic material.

A dilution of 1 in 50 will kill Staph. aureus in the presence of 25% blood in 5 minutes.

It is compatible with soap.

"Unlike the other antiseptics, Dettol appeared to have its activity increased by the presence of soap, and against Staph. pyogenes the effect was one of true synergism." (British Medical Journal, 28th July, 1956.)

It is non-poisonous.

It does not stain linen, etc.

It is stable in solution.

Surgical Dettol, Orange, Blue or colourless — For pre-operative skin preparations.

Dettol Antiseptic Cream — For obstetrics and prevention of cross-infection.

Instrument Dettol—For instrument disinfection.

BUFFERIN RELIEVES RHEUMATIC AND ARTHRITIC PAINS WITHOUT CAUSING GASTRIC UPSET

BUFFERIN contains the exclusive combination of anti-acids called Di-Aluminate. This prevents gastric distress even when taken in massive doses as for rheumatism and arthritis.

A clinical investigation carried out at the Robert Breck Brigham Hospital in Boston showed that 70% of arthritics who had a proved intolerance to straight aspirin were able to take BUFFERIN without gastric distress. *Bufferin in the Management of Rheumatic Arthritis, J.A.M.A. 158; 386, June 4, 1955.*

SPEED OF ACTION—BUFFERIN works twice as fast as plain, non-soluble aspirin. *The Lancet, Feb. 6, 1960.*

BUFFERIN has no equivalent in the B.P. or National Formulary and is prescribable on E.C. 10's.

For the patient who just can't get going again after illness

WHEN vitality is low and the appetite poor, patients can be helped on considerably by a course of I.C.I.'s new anabolic agent—'Anapolon'.

Given in tablet form, 'Anapolon' stimulates protein utilisation and the build-up of body tissues. It restores the metabolic balance and the

patient steadily regains appetite, puts on weight and shows general improvement.

'Anapolon' brings benefit to children as well as adults by accelerating recovery during the convalescent period after febrile and wasting disease, injury or surgical operation—whenever the protein reserves are depleted.

DANGER MEN AT WORK

Normal daily occupations can be hazardous enough without adding the risk of disturbing side-effects when analgesics are given for minor painful conditions.

But dizziness, euphoria, sedation or enforced absenteeism are not inevitable risks. You can prove this to your patients' and your own satisfaction. Zactirin relieves pain safely: that's because it contains Wyeth's new analgesic ethoheptazine, plus aspirin for its anti-inflammatory action. You can keep your patients at work safely when you prescribe Zactirin*.

Carnation milk

MEANS

happy babies

...AND THAT MEANS HAPPY MOTHERS (FATHERS TOO!)

Experienced mothers write to us expressing appreciation of the EXTRA qualities of Carnation Milk.

The following points are repeatedly mentioned in the very many letters we receive:

DIGESTIBILITY—Contented sleep between feeds, particularly at night.

DEVELOPMENT—Pride in Baby's healthy, happy appearance — readily recognised by medical advisers and by other mothers.

SIMPLICITY—The daily feeding routine could not be easier — no mixing.

"THE FEEDING OF INFANTS"—a book specially prepared for the medical profession — together with reprints of clinical investigations and Carnation feeding charts are available from Medical Dept., General Milk Products Ltd., Bush House, Aldwych, London, W.C.2.

DOCTORS can have every confidence in the standard performance of Carnation Milk. Published medical opinion relating to evaporated milk emphasizes:—

Smooth skin and relative freedom from rashes; Convincing evidence of good muscle tone and motor activity; Successful use in varying housing conditions.¹

It can be used, with very rare exceptions, to the exclusion of all other milk preparations if desired.²

In rheumatoid arthritic conditions, more patients can now be treated more effectively – with 'DECADRON'. Its greater anti-inflammatory action often brings relief in cases which have not responded to other steroids.

'DECADRON' gives increased therapeutic effectiveness, but a decrease in such side-effects as hyperglycaemia, hypertension and oedema. Improved appetite and gain in weight are usually welcomed.

In rheumatoid arthritis, low maintenance dosage with 'DECADRON' may make the difference between useful employment and invalidism.

United Kingdom N.H.S. basic costs are 6s. 3d. for 10 × 0.5 mg. tablets and 9s. 5d. for 10 × 0.75 mg. tablets (ex dispensing packs).

A sunscreen for both short and long U/V

Uvistat Cream in Photodermatoses

The longer wavelengths (above 320 m μ) of the ultraviolet spectrum are important in the initiation of light reactions in photosensitive patients.

Paraaminobenzoate sunscreen creams absorb only in the narrow normal sunburn region of the spectrum (290-310 m μ).

UVISTAT CREAM absorbs over a wide range (250-350 m μ) when applied to the skin in a cosmetically acceptable vanishing cream.

UVISTAT CREAM affords protection in acute solar eczema, chronic polymorphic light eruptions and prurigo aestivale. It is also indicated in lupus erythematosus, herpes labialis, rosacea and other dermatoses aggravated by light. It causes neither irritation nor sensitisation.

UVISTAT CREAM containing 10% 2-hydroxy-4-methoxy-4'-methylbenzophenone in a vanishing cream base, is available in 50 gm. tubes.

ADRENOXYL reduces the mean bleeding time...

simply...

Adrenoxyl* is a capillary haemostatic which reduces the mean capillary bleeding time by increasing the contractility and resistance and decreasing the permeability of the capillary wall.

*adrenochrome monosemicarbazone dihydrate

safely...

Adrenoxyl is safe, gives rise to no side-effects, and there are no contra-indications to its use. It does not affect pulse rate, blood pressure or blood coagulation.

effectively

Reports have been received that Adrenoxyl reduces the amount of blood lost during operation, and suggesting that it has a definite place in routine surgical procedures. It is available in ampoules for intramuscular or subcutaneous injection and in tablets for oral administration.

**DEPARTMENT OF HEALTH SERVICES
Tasmania**

**PERMANENT LOCUM—DISTRICT MEDICAL
SERVICE**

Applications are invited from medical practitioners, holding primary qualifications registrable in Tasmania, for the post of permanent Locum in the District Medical Service.

Duties: In addition to the employment of casual locum practitioners, a full-time employed locum is necessary to enable each of the 16 general practitioners employed in the District Medical Service to obtain their annual recreational leave of 28 days on a roster system. Full details of the District Medical Service are available from the Director-General of Health Services or the Agent-General for Tasmania in London.

Salary: The salary is at the rate of £2,491 (Australian) per annum, and in addition to this fees from Workers' Compensation Act cases, Repatriation Department cases, and in the case of dispensing practices, from the Commonwealth Pharmaceutical Benefit Scheme, are available "in hours," i.e., from 9 a.m. to 6 p.m. on week-days, and 9 a.m. to 12 noon on Saturdays. "Out of hours" private fees may be charged on a prescribed scale as may fees under the Commonwealth Pensioner Medical Service Scheme.

Accommodation: District Medical Officers usually make their fully furnished residence available to the locum, and during this time the locum pays the nominal rent which is usually charged to the District Medical Officer. When the doctor's residence is not available, suitable local accommodation is arranged.

Allowances: A car is provided, along with fuel and maintenance.

An allowance of 25s. (Australian) a day is paid continuously to compensate the locum for moving from place to place, and as a contribution towards any expenses he may have should he be required to reside in accommodation other than the District Medical Officer's residence.

General Information: The permanent locum is given priority over applicants from outside the Service, should he wish to apply for vacancies arising within the Service.

Applicants must have at least two years' post-graduate experience in the practice of medicine.

Travelling Reimbursements: Arrangements will be made for an appointee from the United Kingdom to travel to Australia under the Commonwealth Migration Scheme.

An appointee travelling from South Africa will have to make his own travelling arrangements and pay his own fares and freight charges. The Department will reimburse the appointee towards the total cost of his own and his family's fares and the freighting of their personal and household effects up to a total of £500 (Australian), or the actual cost of the fares and freight charges, whichever is the lesser amount. This £500 (Australian) (or lesser amount) will be refunded to the appointee in amounts of £100 (Australian) at the end of each year's service to the Department for five consecutive years, or less, according to the total amount of reimbursement.

In the case of an appointment made from a mainland State within Australia, the appointee will be refunded his own fares from the capital city in that mainland State to his personal place of employment in Tasmania forthwith. A reasonable amount of the total cost of the fares of the medical officer's family and the freight charges for personal and household effects will be refunded at the rate of one-third of the amount at the end of each completed year of service with the Department.

Applications, together with a curriculum vitae and copies of recent testimonials, should be forwarded as follows: From United Kingdom, to Agent-General for Tasmania, 457 Strand, London W.C.2. England; from South Africa and Australia, Director-General of Health Services, Box 191B, G.P.O., Hobart. (8572)

ST. ANDREW'S HOSPITAL FOR NERVOUS AND MENTAL DISORDERS, NORTHAMPTON

President: The Earl Spencer

Medical Superintendent: Thomas Tennent, M.D., F.R.C.P., D.P.H., D.P.M.

This registered hospital is situated in 130 acres of park and pleasure grounds. Patients, both male and female, who are suffering from incipient mental disorders, or who wish to prevent recurrent attacks of mental trouble, are received for treatment. Careful clinical, biochemical, bacteriological and pathological examinations. Private rooms with special nurses, male or female, in the hospital or in one of the numerous villas in the grounds of the various branches can be provided.

WANTAGE HOUSE

This is a Reception Hospital in detached grounds with a separate entrance to which patients can be admitted. It is equipped with all the apparatus for the complete investigation and treatment of mental and nervous disorders by the most modern methods; insulin treatment is available for suitable cases. It also contains laboratories for biochemical, bacteriological and pathological research. Psychotherapeutic treatment is employed when indicated.

MOULTON PARK

Two miles from the Main Hospital there are several villas situated in a park and farm of 600 acres. Milk, meat, fruit and vegetables are supplied to the hospital from the farm, gardens and orchards of Moulton Park. Occupational therapy is a feature of this branch, and patients are given every facility for occupying themselves in farming, gardening and fruit growing.

BRYN-Y-NEUADD HALL

The seaside home of St. Andrew's Hospital is beautifully situated in a park of 330 acres at Llanfairfechan, amidst the finest scenery in North Wales. On the north-west side of the estate a mile of sea-coast forms the boundary. Patients may visit this branch for a short seaside change or for longer periods. The hospital has its own private bathing house on the seashore. There is trout fishing in the park.

For terms and further particulars apply to the Medical Superintendent (Telephone No. 34354 Northampton), who can be seen in London by appointment.

BROXIL ACHIEVES MORE RAPID CLINICAL RESULTS IN ALL GRAM-POSITIVE INFECTIONS

Quickly absorbed from the gastro-intestinal tract, Broxil produces within a period of half to one hour peak serum concentrations higher than can be obtained with any other penicillin. Clinical response with Broxil has been noted to be more rapid than with penicillin V and in most cases recourse to injections is unnecessary.

Broxil, the high peak penicillin, is the potassium salt of 6-(alpha-phenoxypropionamido)-penicillanic acid. It is available in tablet or syrup form.

Broxil Tablets Basic NHS price: packs of 100 tablets: 125 mg. 54/9, 250 mg. 108/-.

Broxil Syrup Basic NHS price: bottles of 60 ml. when dispensed (each 5 ml. containing 125 mg.) 12/4.

VISIBLE SAFE ACCESSIBLE

Packed in glass, London Hospital catgut is visibly secure, easily recognised and accessible.

Sutures remain completely safe and sterile, because glass tubes cannot be slit or punctured accidentally. Glass cannot become permeable or otherwise deteriorate. Glass is not affected by chemical sterilising agents.

London Hospital 'spot' glass tubes do not splinter. Under slight pressure they break cleanly at the centre groove without filing.
